AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA//FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	MSPB*/OPM*		CSA	MSPB*/OPM*
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

***NOTE: As of January 1, 1979, the Merit Systems Protection Board (MSPB) and the Office of Personnel Management (OPM) will publish on the Tuesday/Friday schedule. (MSPB and OPM are successor agencies to the Civil Service Commission.)**

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended, 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—General Regulations Governing Price Support for the 1978 and Subsequent Crops

Correction

In FR Doc. 79-973 appearing at page 2353 in the issue for Thursday, January 11, 1979, on page 2354, first column, the EFFECTIVE DATE should read "January 11, 1979".

[3410-05-M]

[CCC Grain Price Support Regulations, 1978 and Subsequent Crops, Wheat Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 and Subsequent Crops Wheat Loan and Purchase Program

AGENCY: Commodity Credit Corporation.

ACTION: Final Rule.

SUMMARY: This rule sets forth the general provisions under which producers may obtain price support on their 1978 and subsequent crops of wheat. This rule changes the definition of eligible wheat. This rule also changes warehouse charges and deletes reference to terminal markets. This rule is needed in order to advise producers of program provisions.

EFFECTIVE DATE: January 17, 1979.

ADDRESS: Price Support and Loan Division, ASCS U.S. Department of Agriculture, 3734 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Cecil Lower, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 63895, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for 1978 crop wheat. Such determinations were to include operational provisions needed to carry out the program.

No comments were received concerning the operational provisions.

FINAL RULE

Therefore, the General Regulations Governing Price Support for 1978 and Subsequent Crops in this Part 1421 are supplemented as stated herein for the 1978 and subsequent crops of wheat. The material previously appearing in this subpart remains in full force and effect as to the crops to which it was applicable. Accordingly, the regulations in 7 CFR § 1421.460 through 1421.469 and the title of the subpart are revised to read as follows:

Subpart—1978 and Subsequent Crops Wheat Loan and Purchase Programs

Sec.
1421.460 Purpose.
1421.461 Eligible wheat.
1421.462 Determination of quality.
1421.463 Determination of quantity.
1421.464 Warehouse receipts.
1421.465 Fees and charges.
1421.466 Warehouse charges.
1421.467 Maturity of loans.
1421.468 Settlement.
1421.469 Support rates.

AUTHORITY: The provisions of this subpart issued under secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 107A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1445b, 1421).

Subpart—1978 and Subsequent Crops Wheat Loan and Purchase Programs

§ 1421.460 Purpose.

This supplement contains program provisions which together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1978 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1978 and Subsequent Crops of wheat.

§ 1421.461 Eligible wheat.

(a) *General.* To be eligible for a loan or purchase, the wheat (1) may be of any class except unclassed wheat, (2) must be merchantable for food or feed or for other uses, as determined by CCC, (3) must not contain mercurial compounds, toxin producing molds, or other substances poisonous to man or animals, (4) must not contain two or more rodent pellets or comparable amounts of other excreta per 1,000 grains of wheat or one percent or more by weight of kernels visibly damaged by weevils or other insects, (5) The wheat must have also been produced by a producer who has complied with the set-aside and normal crop acreage requirements, if any, as prescribed in Parts 718, 722, 728, 730, 775, and 791 of this title and any amendments thereto.

(b) *Warehouse stored loan grade requirements.* To be eligible for a warehouse storage loan, the wheat must also meet the following requirements:

(1) The wheat must grade No. 5 or better except that it may grade sample on the factors of (i) test weight provided test weight is not less than 40 pounds per bushel, (ii) damaged kernels (total) with not more than 3 percent heat damage, (iii) foreign material, (iv) total defects with not more than 3 percent heat damage, or (v) any combination of subdivisions (i) through (iv) of this subparagraph.

(2) If of the class Mixed wheat, the wheat must consist of mixtures of grades of eligible wheat as specified in subparagraph (1) of this paragraph, provided such mixtures are the natural products of the field.

(3) The wheat may have the special grade designations "Garlicky" or "Smutty," or both.

(4) The wheat must not grade Ergoty or Treated.

(5) The wheat must not grade "Weevily" or have moisture over 13.5 percent unless the warehouse receipt representing the wheat is accompanied by

V 4 4 / 1 2 J A 1 7 7 9 UMI

a supplemental certificate which provides that the warehouseman shall deliver wheat which is not "Weevily," does not contain in excess of 13.5 percent moisture, and is otherwise of an eligible grade and quality. The grade, quality and quantity shown on the supplemental certificate shall be provided in § 1421.464(c).

§ 1421.462 Determination of quality.

(a) *Regular grading factors.* The class, grade, grading factors, and all other quality factors shall be based on the Official Grain Standards of the United States for Wheat, whether or not such determinations are made on the basis of an official inspection. The cost of official grade determinations, when made, shall not be for the account of CCC.

(b) *Protein content determinations.* Producers may obtain official protein content determinations or protein content determinations arrived at by mutual agreement between the producer and the warehouseman on wheat of the classes Hard Red Winter and Hard Red Spring, to be placed under warehouse-storage loans or stored in approved warehouses for later purchase by CCC and on wheat delivered from farm storage in satisfaction of a loan or for purchase by CCC. Producers may also obtain official protein determinations on wheat of such classes placed under farm-storage loans in accordance with paragraph (c) of this section. The cost of official protein content determinations shall not be for the account of CCC.

(c) *Protein determinations on farm-storage loan wheat.* If a producer at time of request for a farm-storage loan also requests that the premium for protein content be applied to the basic support rate for the classes of wheat specified in paragraph (b) of this section, the county office will draw a representative sample of, and arrange for protein tests on, the wheat to be placed under loan. The premium applicable to the values determined by such test shall be applied to the basic support rate at the time the loan is made, but settlement shall be based on the protein content determined upon delivery of the wheat to CCC. The producer who requests the protein premium on his farm storage wheat to be placed under loan shall be charged a fee of $3.50 for each bin of wheat tested for protein content.

§ 1421.463 Determination of quantity.

When the quantity is determined by weight, a bushel shall be 60 pounds of wheat free of dockage.

(a) *In warehouse.* The quantity of wheat on which a warehouse storage loan shall be made and the quantity delivered to or acquired by CCC in an approved warehouse shall be the net weight specified on the warehouse receipt or on the supplemental certificate, if applicable. If the wheat has been dried or blended to reduce the moisture content, the quantity specified on the warehouse receipt or the supplemental certificate, if applicable, shall represent the quantity after drying or blending, and such quantity shall reflect a minimum shrink in the receiving weight of 1.2 times the percentage difference between the moisture content of the wheat, when received, and 13.5 percent.

(b) *On farm.* The quantity of wheat eligible to be placed under a farm storage loan shall be determined in accordance with § 1421.17. The quantity acquired by CCC from farm storage under a loan or purchase shall be determined by weight.

§ 1421.464 Warehouse receipts.

Warehouse receipts tendered to CCC in connection with a loan or purchase must meet the requirements of this section.

(a) *Separate receipt.* A separate warehouse receipt must be submitted for each grade and subclass of wheat.

(b) *Entries.* Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt, must show: (1) Gross weight and net bushels, (2) subclass, (3) grade (including special grades), (4) test weight, (5) moisture content if above 13.5 percent, (6) dockage, (7) any other grading factor(s) when such factor(s) and not test weight determine the grade, (8) protein content when applicable, (9) whether the wheat arrived by rail, truck or barge, (10) the date the wheat was received or deposited in the warehouse, (11)) the storage start date.

(c) *Where warehouse receipt shows "Weevily", excess moisture, or both.* If a warehouse receipt tendered as security for a loan indicates the wheat grades "Weevily" or contains over 13.5 percent moisture, or both, the warehouse receipt must be accompanied by a supplemental certificate as provided in § 1421.461(b)(5) in order for the wheat to be eligible for price support. The grade, grading factors, and quantity to be delivered must be shown on the supplemental certificate as follows: (1) When the warehouse receipts show "Weevily" and the wheat has been conditioned to correct the "Weevily" condition, the supplemental certificate must show the same grade without the "Weevily" designation and the same grading factors and quantity as shown on the warehouse receipt, (2) when the warehouse receipt shows a moisture content of over 13.5 percent and the wheat has been dried or blended, the supplemental certificate must show the grade, grading factors, and quantity after drying or blending the wheat to a moisture content of not over 13.5 percent which shall reflect a drying or blending shrink as specified in § 1421.463(a).

The supplemental certificate must state that no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt. In the case of conditions specified in subparagraphs (1) and (2) of this paragraph, the grade, grading factors, and the quantity shown on the supplemental certificate shall supersede the entries for such items on the warehouse receipt.

(d) *Liens.* Warehouse receipts and the wheat represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (hereinafter called "UGSA") may be subject to liens for warehouse charges only to the extent indicated in § 1421.466. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the wheat when CCC is holder of the warehouse receipt.

(e) *Freight certificate requirements.* Warehouse receipts representing wheat which has been shipped by rail, or by barge utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission, from a country shipping point to a normal trade channel market or to a storage point and stored intransit to a normal trade channel market, must be accompanied by supplemental certificates. These certificates must be representative as to origin and date of movement of the wheat and must reflect the rate of freight paid into the storage point and the amount of penalty, if any, for out-of-line haul. The form of the certificates will be prescribed by the ASCS commodity office and shall be signed by the warehouseman.

§ 1421.465 Fees and charges.

The producer shall pay a loan service fee and delivery charge as specified in § 1421.11.

§ 1421.466 Warehouse charges.

The Kansas City Commodity Office (KCCO) approved list of handling and storage rates will provide the rates to be deducted from the amount of the loan or purchase price in the case of wheat stored in an approved warehouse operated under the UGSA. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipts that (a) storage charges through the loan maturity date have been prepaid or (b) that the producer has arranged with the warehouseman for the payment of storage charges through loan maturity and the warehouseman enters an endorsement in substantially the following form on the warehouse receipt: "Warehouse storage charges through (the applicable maturity date) accrued or to accrue prior to the acquisition of the wheat by CCC on wheat represented by this warehouse receipt have been paid or otherwise provided for and a lien for such charges will not be asserted by the warehouseman against CCC or against any subsequent holder of the warehouse receipt," no storage deductions shall be made. The beginning date to be used for computing the storage deduction on wheat stored in warehouses operating under the UGSA shall be the latest of the following: (1) The date the wheat was received or deposited in the warehouse, (2) the date storage charges start, or (3) the day following the date through which storage charges have been paid.

§ 1421.467 Maturity of loans.

Loans mature on demand but no later than the date specified in the annual crop year supplement to the regulations in this subpart.

§ 1421.468 Settlement.

Notwithstanding the provisions of § 1421.22, if the wheat delivered is of a quality which does not meet the sanitation requirements of § 1421.461 (a)(4), the wheat shall be sold for uses other than for human consumption and the settlement value shall be the same as the sale price, except that if CCC is unable to sell the wheat for such other uses, the settlement value shall be the market value determined by CCC, as of the date of delivery.

§ 1421.469 Support rates.

Basic county support rates for wheat and the schedule of premiums and discounts will be set forth in the annual crop year supplement to the regulations contained in this subpart. Farm-stored wheat loans will be made at the applicable basic county support rate adjusted, where applicable, for the Weed Control discount and as provided in § 1421.462(c). The support rate for warehouse-storage loans and for wheat acquired under a loan or by purchase shall be the applicable basic support rate adjusted in accordance with the provisions of this section, and the premiums and discounts in the annual crop year supplement on the basis of quality factors on warehouse receipts or supplemental certificates in the case of wheat stored in or delivered to an approved warehouse or on such other form as CCC may prescribe in the case of wheat delivered to other than an approved warehouse. Settlement of loans and purchases shall be made in accordance with the provisions of § 1421.22. If two or more approved warehouses are located in the same or adjoining towns, villages, or cities which have the same freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same basic county support rate shall apply even through such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(a) *Basic support rates for farm-stored wheat.* The applicable basic support rate for farm-stored loans shall be the basic county support rate established for the county in which the wheat is stored.

(b) *Basic support rates for warehouse-stored wheat received by rail or utilizing combination barge-rail rates.* (1) *When shipped by rail.* The applicable basic support rate for warehouse-stored loans on wheat which was received by rail and stored in an approved warehouse which is in line of normal commercial channels of trade shall be determined by adding to the basic support rate established for the county from which the wheat was shippped, the amount of freight charges per bushel actually paid in and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse. The freight rate paid into the storage point shall not exceed the lowest rate which will permit the storage intransit privilege and protect the lowest single car rate applying from origin through point of storage to a normal trade channel market that would be used in commercial channels of trade. If the wheat is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a normal trade channel market that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(2) *When shipped utilizing combination barge-rail rates.* The applicable basic support rate for warehouse storage loans on wheat which was shipped utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission and stored in an approved warehouse shall be determined by adding to the basic support rate established for the county from which the wheat was shipped, the amount of freight charges per bushel actually paid in and an amount equal to the truck receiving and rail loading-out charges computed in accordance with the applicable rates of the UGSA in effect at the time the loan is made. The freight rate paid into the storage point shall be a rate which will permit the storage intransit privilege and protect the lowest single car or barge freight rate applying from origin through point of storage to a normal trade channel that would be used in commmercial channels of trade. If the wheat is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a normal trade channel that would be used in commercial channels of trade, such penalty of cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(c) *Basic support rates for warehouse-stored wheat received by truck or nontariff barge.* (1) The basic support rate for wheat delivered by truck by the producer to a warehouse at normal delivery point shall be the rate for the county where the wheat is stored. (2) The basic support rate for wheat delivered by truck by the producer to an in-line warehouse beyond normal delivery point shall be the support rate for the county from which shipped plus the smaller of the actual freight charge or the following truck freight rate from the farm to the storing warehouse minus the distance from the farm to the producer's normal delivery point.

Map mileage	Allowance
0-19	$.0
20-50	$.06 per bushel
51-100 add	$.0010 per bushel per mile
101- and over add	$.0004 per bushel per mile

(3) The basic support rate for wheat delivered to a warehouse and shipped by truck to in-line warehouse shall be the support rate for the county in which the shipping warehouse is located plus truck freight from schedule shown in subparagraph (c) (2) plus truck receiving and truck load out charges for the shipping warehouse.

(4) The basic support rate for wheat shipped by barge or truck-barge to an in-line warehouse at negotiated rate shall be the support rate for the county from where shipped plus truck freight from schedule shown in subparagraph (c)(2) plus origin truck receiving and load out charge.

(d) *Storing responsibilities.* The storing warehouseman in the case of wheat received by rail or utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission shall be responsible for determining the normal trade channel routes via the storing warehouse that will protect the lowest freight rate to the designated normal trade channel market that would be used in commercial channels of trade, and for protecting such routes. The storing warehouseman shall also execute supplemental certificates showing (1) the rate of freight

V 4 4 / 1 2

paid into the storage point, (2) amount of penalty if any, for backhaul or out of line movement, (3) the applicable normal trade channel market that would be used in commercial channels of trade and (4) any other information which may be prescribed by CCC. The warehouseman is responsible to CCC for the accuracy or omissions of information on the supplemental certificate. Warehouseman liability, if any, for their failure to comply with the provisions of this paragraph (d) will be determined in accordance with the provisions of the UGSA after acquisition of the warehouse receipt by CCC.

NOTE: An approved Impact Analysis Statement is available from Orville Overboe (ASCS), (202) 447-7987.

NOTE: Based on an assessment of the environmental impacts of the proposed action, it has been determined that an Environmental Impact Statement need not be prepared since the proposals will have no significant effect on the quality of the human environment.

Signed at Washington D.C., on January 9, 1979.

STEWART N. SMITH,
Acting Executive Vice President,
Commodity Credit Corporation.

[CCC Grain Price Support Regulations, 1978 and Subsequent Crops, Barley Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 and Subsequent Crops Barley Loan and Purchase Program

AGENCY: Commodity Credit Corporation.

ACTION: Final Rule.

SUMMARY: This rule sets forth the general provisions under which producers may obtain price support on their 1978 and subsequent crops of barley. This rule changes the definition of eligible barley. This rule also changes warehouse charges and deletes reference to terminal markets. This rule is needed in order to advise producers of program provisions.

EFFECTIVE DATE: February 17, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3734 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Cecil Lower, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 63895, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for 1978 crop barley. Such determinations were to include operational provisions needed to carry out the program.

No comments were received concerning the operational provisions.

FINAL RULE

Therefore, the General Regulations Governing Price Support for 1978 and Subsequent Crops in this Part 1421 are supplemented as stated herein for the 1978 and subsequent crops of barley. The material previously appearing in this subpart remains in full force and effect as to the crops to which it was applicable. Accordingly, the regulations in 7 CFR § 1421.50 through 1421.58 and the title of the subpart are amended to read as follows:

Subpart—1978 and Subsequent Crops Barley Loan and Purchase Programs

Sec.
1421.50 Purpose.
1421.51 Eligible barley.
1421.52 Determination of quality.
1421.53 Determination of quantity.
1421.54 Warehouse receipts.
1421.55 Fees and charges.
1421.56 Warehouse charges.
1421.57 Maturity of loans.
1421.58 Support rates.

AUTHORITY: The provisions of this subpart issued under secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); 105 A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1444c, 1421).

§ 1421.50 Purpose.

This supplement contains program provisions which together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1978 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1978 and Subsequent Crops of barley.

§ 1421.51 Eligible barley.

(a) *General.* (1) To be eligible for a loan or purchase, the barley must be merchantable for food or feed or for other uses, as determined by CCC, and must not contain mercurial compounds, toxin producing molds, or other substances poisonous to man or animals. (2) The barley must have also been produced by a producer who has complied with the set-aside and normal crop acreage requirements, if any, as prescribed in parts 718, 722, 728, 730, 775, and 791 of this title and any amendments thereto.

(b) *Warehouse stored loan grade requirements.* To be eligible for a warehouse storage loan, the barley must also meet the following requirements:

(1) The barley must grade No. 5 or better, except that (i) the barley may grade "Sample" on the factor of total damage (except heat damage), (ii) Western Barley shall have a test weight of not less than 36 pounds per bushel, and (iii) the barley may have the following special grade designations: "Garlicky" and in the State of Alaska only, "Tough".

(2) The barley must not grade Blighted, Bleached, Ergoty, Smutty, or if Western Barley, Stained.

(3) The barley must not grade "Weevily" or have moisture over 14.5 (13.5 if Western Barley) percent unless the warehouse receipt representing the barley is accompanied by a supplemental certificate which provides that the warehouseman shall deliver barley which is not "Weevily," does not contain in excess of 14.5 (13.5 if Western Barley) percent moisture, and is otherwise of an eligible grade and quality. The grade, quality and quantity shown on the supplemental certificate shall be as provided in § 1421.54(c). This subparagraph shall apply to barley produced in the State of Alaska.

§ 1421.52 Determination of quality.

The class, grade, grading factors, and all other quality factors shall be based on the Official Grain Standards of the United States for Barley, whether or not such determinations are made on the basis of an official inspection. The cost of official grade determinations when made shall not be for the account of CCC.

§ 1421.53 Determination of quantity.

When the quantity is determined by weight, a bushel shall be 48 pounds of barley free of dockage.

(a) *In warehouse.* The quantity of barley on which a warehouse storage loan shall be made and the quantity delivered to or acquired by CCC in an approved warehouse shall be the net weight specified on the warehouse receipt or on the supplemental certificate, if applicable. If the barley has been dried or blended to reduce the moisture content, the quantity specified on the warehouse receipt or the supplemental certificate, if applicable, shall represent the quantity after drying or blending, and such quantity shall reflect a minimum shrink in the receiving weight excluding dockage of 1.2 times the percentage difference between the moisture content of the barley, when received, and 14.5 (13.5 if Western Barley) percent.

(b) *On farm.* The quantity of barley eligible to be placed under a farm storage loan shall be determined in accordance with § 1421.17. The quantity acquired by CCC from farm storage under a loan or purchase shall be determined by weight.

§ 1421.54 Warehouse receipts.

Warehouse receipts tendered to CCC in connection with a loan or purchase must meet the requirements of this section.

(a) *Separate receipt.* A separate warehouse receipt must be submitted for each grade and class of barley.

(b) *Entries.* Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt must show: (1) Gross weight and net bushels, (2) class, (3) grade (including special grades), (4) test weight, (5) moisture content if above 14.5 (13.5 if Western Barley) percent, (6) dockage, (7) any other grading factor(s) when such factor(s) and not test weight determine the grade, (8) whether the barley arrived by rail, truck or barge, (9) the date the barley was received or deposited in the warehouse, (10) the storage start date.

(c) *Where warehouse receipt shows "Weevily", excess moisture, or both.* If a warehouse receipt tendered as security for a loan indicates the barley grades "Weevily" or contains over 14.5 (13.5 if Western Barley) percent moisture, or both, the warehouse receipt must be accompanied by a supplemental certificate as provided in § 1421.51(b) (3) in order for the barley to be eligible for price support. The grade, grading factors, and quantity to be delivered must be shown on the supplemental certificate as follows: (1) When the warehouse receipts shows "Weevily" and the barley has been conditioned to correct the "Weevily" condition, the supplemental certificate must show the same grade without the "Weevily" designation and the same grading factors and quantity as shown on the warehouse receipt, (2) when the warehouse receipt shows a moisture content of over 14.5 (13.5 if Western Barley) percent and the barley has been dried or blended, the supplemental certificate must show the grade, grading factors, and quantity after drying or blending the barley to a moisture content of not over 14.5 (13.5 if Western Barley) percent which shall reflect a drying or blending shrink as specified in § 1421.53 (a).

The supplemental certificate must state that no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt. In the case of conditions specified in subparagraphs (1) and (2) of this paragraph, the grade, grading factors, and the quantity shown on the supplemental certificate shall supersede the entries for such items on the warehouse receipt.

(d). *Liens.* Warehouse receipts and the barley represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (hereinafter called "UGSA") may be subject to liens for warehouse charges only to the extent indicated in § 1421.56. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the barley when CCC is holder of the warehouse receipt.

(e) *Freight certificate requirements.* Warehouse receipts representing barley which has been shipped by rail, or by barge utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission, from a country shipping point to a normal trade channel market or to a storage point and stored intransit to a normal trade channel market, must be accompanied by supplemental certificates. These certificates must be representative as to origin and date of movement of the barley and must reflect the rate of freight paid into the storage point and the amount of penalty, if any, for out-of-line haul. The form of the certificates will be prescribed by the ASCS commodity office and shall be signed by the warehouseman.

§ 1421.55 Fees and charges.

The producer shall pay a loan service fee and delivery charge as specified in § 1421.11.

§ 1421.56 Warehouse charges.

The Kansas City Commodity Office (KCCO) approved list of handling and storage rates will provide the rates to be deducted from the amount of the loan or purchase price in the case of barley stored in an approved warehouse operated under the UGSA. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipts that (a) storage charges through the loan maturity date have been prepaid or, (b) that the producer has arranged with the warehouse operator for the payment of storage charges through loan maturity and the warehouseman enters an endorsement in substantially the following form on the warehouse receipt; "Warehouse storage charges through (the applicable maturity date) accrued or to accrue prior to the acquisition of the barley by CCC on barley represented by this warehouse receipt have been paid or otherwise provided for and a lien for such charges will not be asserted by the warehouseman against CCC or against any subsequent holder of the warehouse receipt," no storage deductions shall be made. The beginning date to be used for computing the storage deduction on barley stored in warehouses operating under the UGSA shall be the latest of the following: (1) The date the barley was received or deposited in the warehouse, (2) the date storage charges start, or (3) the day following the date through which storage charges have been paid.

§ 1421.57 Maturity of loans.

Loans mature on demand but no later than the date specified in the annual crop year supplement to the regulations in this subpart.

§ 1421.58 Support rates.

Basic county support rates for barley and the schedule of discounts will be set forth in the annual crop year supplement to the regulations contained in this subpart. Farm-stored barley loans will be made at the applicable basic county support rate, adjusted only for the Weed Control discount where applicable. The support rate for warehouse-storage loans and for barley acquired under a loan or by purchase shall be the applicable basic support rate adjusted in accordance with the provisions of this section, and the discounts in the annual crop year supplement on the basis of quality factors on warehouse receipts or supplemental certificates in the case of barley stored in or delivered to an approved warehouse or on such other form as CCC may prescribe in the case of barley delivered to other than an approved warehouse. Settlement of loans and purchases shall be made in accordance with the provisions of § 1421.22. If two or more approved warehouses are located in the same or adjoining towns, villages, or cities which have the same freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same basic county support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(a) *Basic support rates for farm-stored barley.* The applicable basic support rate for farm-stored loans shall be the basic county support rate established for the county in which the barley is stored.

(b) *Basic support rates for warehouse-stored barley received by rail or utilizing combination barge-rail rates.* (1) *When shipped by rail.* The applicable basic support rate for warehouse-storage loans on barley which was received by rail and stored in an approved warehouse which is in line of normal commercial channels of trade shall be determined by adding to the basic support rate established for the county from which the barley was shipped, the amount of freight charges per bushel actually paid in

A 17 79 UMI

and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse. The freight rate paid into the storage point shall not exceed the lowest rate which will permit the storage intransit privilege and protect the lowest single car rate applying from origin through point of storage to a normal trade channel market that would be used in commercial channels of trade. If the barley is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a normal trade channel market that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(2) *When shipped utilizing combination barge-rail rates.* The applicable basic support rate for warehouse storage loans on barley which was shipped utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission and stored in an approved warehouse shall be determined by adding to the basic support rate established for the county from which the barley was shipped the amount of freight charges per bushel actually paid in and an amount equal to the truck receiving and rail loading-out charges computed in accordance with the applicable rates of the UGSA in effect at the time the loan is made. The freight rate paid into the storage point shall be a rate which will permit the storage intransit privilege and protect the lowest single car, or barge freight rate applying from origin through point of storage to a normal trade channel that would be used in commercial channels of trade. If the barley is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a normal trade channel that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(c) *Basic support rates for warehouse-stored barley received by truck or nontariff barge.* (1) The basic support rate for barley delivered by truck by the producer to a warehouse at normal delivery point, shall be the rate for the county where the barley is stored. (2) The basic support rate for barley delivered by truck by the producer to an in-line warehouse beyond normal delivery point shall be the support rate for the county from which shipped plus the smaller of the actual freight charge or the following truck freight rate from the farm to the storing warehouse minus the distance from the farm to the producer's normal delivery point.

Map mileage	Allowance
0-19	$.0
20-50	$.06 per bushel
51-100 add	$.0010 per bushel per mile
101 and over add	$.0004 per bushel per mile

(3) The basic support rate for barley delivered to a warehouse and shipped by truck to in-line warehouse shall be the support rate for the county in which the shipping warehouse is located plus truck freight from schedule shown in subparagraph (c)(2) plus truck receiving and truck load out charges for the shipping warehouse.

(4) The basic support rate for barley shipped by barge or truck-barge to an in-line warehouse at negotiated rate shall be the support rate for the county from where shipped plus truck freight from schedule shown in subparagraph (c)(2) plus origin truck receiving and load out charge.

(d) *Storing responsibilities.* The storing warehouseman in the case of barley received by rail or utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission shall be responsible for determining the normal trade channel routes via the storing warehouse that will protect the lowest freight rate to the designated normal trade channel market that would be used in commercial channels of trade, and for protecting such routes. The storing warehouseman shall also execute supplemental certificates showing (1) the rate of freight paid into the storage point, (2) amount of penalty if any, for backhaul or out of line movement, (3) the applicable normal trade channel market that would be used in commercial channels of trade and (4) any other information which may be prescribed by CCC. The warehouseman is responsible to CCC for the accuracy or omissions of information on the supplemental certificate. Warehouseman liability, if any, for their failure to comply with the provisions of this paragraph (d) will be determined in accordance with the provisions of the UGSA after acquisiton of the warehouse receipt by CCC.

NOTE—An approved Impact Analysis Statement is available from Orville Overboe (ASCS), (202) 447-7987.

NOTE—Based on an assessment of the environmental impacts of the proposed action, it has been determined that an Environmental Impact Statement need not be prepared since the proposals will have no significant effect on the quality of the human environment.

Signed at Washington, D.C., on January 9, 1979.

[CCC Grain Price Support Regulations, 1978 and Subsequent Crops, Rye Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 and Subsequent Crops Rye Loan and Purchase Program

AGENCY: Commodity Credit Corporation.

ACTION: Final Rule.

SUMMARY: This rule sets forth the general provisions under which producers may obtain price support on their 1978 and subsequent crops of rye. This rule changes the definition of eligible rye and deletes the section on availability which is sufficiently covered in the annual crop supplement. This rule also changes warehouse charges and deletes reference to terminal markets. This rule is needed in order to advise producers of program provisions.

EFFECTIVE DATE: February 17, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3734 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Cecil Lower, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 63895, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for 1978 crop rye. Such determinations were to include operational provisions needed to carry out the program.

No comments were received concerning the operational provisions.

FINAL RULE

Therefore, the General Regulations Governing Price support for 1978 and Subsequent Crops in this Part 1421 are supplemented as stated herein for the 1978 and subsequent crops of rye. The material previously appearing in this subpart remains in full force and effect as to the crops to which it was applicable. Accordingly, the regulations in 7 CFR § 1421.335 through

1421.343 and the title of the subpart are revised to read as follows:

Subpart—1978 and Subsequent Crops Rye Loan and Purchase Programs

Sec.
1421.335 Purpose.
1421.336 Eligible rye.
1421.337 Determination of quality.
1421.338 Determination of quantity.
1421.339 Warehouse receipts.
1421.340 Fees and charges.
1421.341 Warehouse charges.
1421.342 Maturity of loans.
1421.343 Support rates.

AUTHORITY: The provisions of this subpart issued under secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 105 A, 401, 63 Stat. 1051, as amended (15 U.S.C. 7 U.S.C. 1444c, 1421).

§ 1421.335 Purpose.

This supplement contains program provisions which together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1978 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1978 and Subsequent Crops of rye.

§ 1421.336 Eligible rye.

(a) *General.* (1) To be eligible for a loan or purchase, the rye must be merchantable for food or feed or for other uses, as determined by CCC, and must not contain mercurial compounds, toxin producing molds, or other substances poisonous to man or animals. (2) The rye must have also been produced by a producer who has complied with the set-aside and normal crop acreage requirements, if any, as prescribed in parts 718, 722, 728, 730, 775, and 791 of this title and any amendments thereto.

(b) *Warehouse stored loan grade requirements.* To be eligible for a warehouse storage loan, the rye must also meet the following requirements:

(1) The rye must grade U.S. No. 2 or better, except that it may grade U.S. No. 3 or 4 on the factor of test weight or "thin" grade, or both, but otherwise must grade U.S. No. 2 or better.

(2) Rye must not grade "Light Smutty," "Light Garlicky," "Garlicky," or contain in excess of 1 percent Ergot.

(3) Rye must not grade "Weevily" or contain over 14 percent moisture unless the warehouse receipt representing the rye is accompanied by a supplemental certificate which provides that the warehouseman shall deliver rye which is not "Weevily," or does not contain over 14 percent moisture, or both and is otherwise of an eligible grade and quality. The grade, quality, and quantity shown on the supplemental certificate must be as provided in § 1421.339(c).

§ 1421.337 Determination of quality.

(a) *Grading factors.* The grade, grading factors, and all other quality factors shall be based on the Official Grain Standards of the United States for Rye, whether or not such determinations are made on the basis of an official inspection. (b) Ergot. The quantity of ergot shall be stated in terms of tenths of 1 percent and, where applicable, the word "Ergoty" shall be added to, and made a part of, the grade designation. (c) The cost of official grade determinations, when made shall not be for the account of CCC.

§ 1421.338 Determination of quantity.

When the quantity is determined by weight, a bushel shall be 56 pounds of rye free of dockage.

(a) *In warehouse.* The quantity of rye on which a warehouse storage loan shall be made and the quantity delivered to or acquired by CCC in an approved warehouse shall be the net weight specified on the warehouse receipt or on the supplemental certificate, if applicable. If the rye has been dried or blended to reduce the moisture content, the quantity specified on the warehouse receipt or the supplemental certificate, if applicable, shall represent the quantity after drying or blending, and such quantity shall reflect a minimum shrink in the receiving weight of 1.2 times the percentage difference between the moisture content of the rye, when received, and 14 percent.

(b) *On farm.* The quantity of rye eligible to be placed under a farm storage loan shall be determined in accordance with § 1421.17. The quantity acquired by CCC from farm storage under a loan or purchase shall be determined by weight.

§ 1421.339 Warehouse receipts.

Warehouse receipts tendered to CCC in connection with a loan or purchase must meet the requirements of this section.

(a) *Separate receipt.* A separate warehouse receipt must be submitted for each grade and class of rye.

(b) *Entries.* Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt, must show: (1) Gross weight and net bushels, (2) percentage of ergot for rye containing in excess of three tenths of 1 percent of ergot, (3) grade (including special grades), (4) test weight, (5) moisture content if above 14 percent; (6) dockage, (7) any other grading factor(s) when such factor(s) and not test weight determine the grade, (8) whether the rye arrived by rail, truck or barge, (9) the date the rye was received or deposited in the warehouse, and (10) the storage start date.

(c) *Where warehouse receipt shows "Weevily", excess moisture, or both.* If a warehouse receipt tendered as security for a loan indicates the rye grades "Weevily" or contains over 14 percent moisture, or both, the warehouse receipt must be accompanied by a supplemental certificate as provided in § 1421.336(b) (3) in order for the rye to be eligible for price support. The grade, grading factors, and quantity to be delivered must be shown on the supplemental certificate as follows: (1) When the warehouse receipts show "Weevily" and the barley has been conditioned to correct the "Weevily" condition, the supplemental certificate must show the same grade without the "Weevily" designation and the same grading factors and quantity as shown on the warehouse receipt, (2) when the warehouse receipt shows a moisture content of over 14 percent and the rye has been dried or blended, the supplemental certificate must show the grade, grading factors, and quantity after drying or blending the rye to a moisture content of not over 14 percent which shall reflect a drying or blending shrink as specified in § 1421.338(a).

The supplemental certificate must state that no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt. In the case of conditions specified in subparagraphs (1) and (2) of this paragraph, the grade, grading factors, and the quantity shown on the supplemental certificate shall supersede the entries for such items on the warehouse receipt.

(d) *Liens.* Warehouse receipts and the rye represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (hereinafter called "UGSA") may be subject to liens for warehouse charges, only to the extent indicated in § 1421.341. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the rye when CCC is holder of the warehouse receipt.

(e) *Freight certificate requirements.* Warehouse receipts representing rye which has been shipped by rail, or by barge utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission, from a country shipping point to a normal trade channel market or to a storage point and stored intransit to a normal trade channel market, must be accompanied by supplemental certificates. These certificates must be representative as to origin and date of movement of the rye and must reflect the rate of

freight paid into the storage point and the amount of penalty, if any, for out-of-line haul. The form of the certificates will be prescribed by the ASCS commodity office and shall be signed by the warehouseman.

§ 1421.340 Fees and charges.

The producer shall pay a loan service fee and delivery charge as specified in § 1421.11.

§ 1421.341 Warehouse charges.

The Kansas City Commodity Office (KCCO) approved list of handling and storage rates will provide the rates to be deducted from the amount of the loan or purchase price in the case of rye stored in an approved warehouse operated under the UGSA. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipts that (a) storage charges through the loan maturity date have been prepaid or, (b) that the producer has arranged with the warehouseman for the payment of storage charges through loan maturity and the warehouse operator enters an endorsement in substantially the following form on the warehouse receipts; "Warehouse storage charges through the applicable maturity date accrued or to accrue prior to the acquisition of the rye by CCC on rye represented by this warehouse receipt have been paid or otherwise provided for and a lien for such charges will not be asserted by the warehouseman against CCC or against any subsequent holder of the warehouse receipt, "no storage deductions shall be made. The beginning date to be used for computing the storage deduction on rye stored in warehouses operating under the UGSA shall be the latest of the following: (1) The date the rye was received or deposited in the warehouse, (2) the date storage charges start or (3) the day following the date through which storage charges have been paid.

§ 1421.342 Maturity of loans.

Loans mature on demand but no later than the date specified in the annual crop year supplement to the regulations in this subpart.

§1421.343 Support rates.

Basic county support rates for rye and the schedule of premiums and discounts will be set forth in the annual crop year supplement to the regulations contained in this subpart. Farm-stored rye loans will be made at the applicable basic county support rate, adjusted only for the Weed Control discount where applicable. The support rate for warehouse-storage loans and for rye acquired under a loan or by purchase shall be the applicable basic support rate adjusted in accordance with the provisions of this section, and the premiums and discounts in the annual crop year supplement on the basis of quality factors on warehouse receipts or supplemental certificates in the case of rye stored in or delivered to an approved warehouse or on such other form as CCC may prescribe in the case of rye delivered to other than an approved warehouse. Settlement of loans and purchases shall be made in accordance with the provisions of § 1421.22. If two or more approved warehouses are located in the same or adjoining towns, villages, or cities which have the same freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same basic county support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(a) *Basic support rates for farm-stored rye.* The applicable basic support rate for farm-stored loans shall be the basic county support rate established for the county in which the rye is stored.

(b) *Basic support rates for warehouse-stored rye received by rail or utilizing combination barge-rail rates.* (1) *When shipped by rail.* The applicable basic support rate for warehouse-storage loans on rye which was received by rail and stored in an approved warehouse which is in line of normal commercial channels of trade shall be determined by adding to the basic support rate established for the county from which the rye was shipped, the amount of freight charges per bushel actually paid in and an amount equal to the truck receiving and rail loading-out charges in effect for the shipping warehouse. The freight rate paid into the storage point shall not exceed the lowest rate which will permit the storage intransit privilege and protect the lowest single car rate applying from origin through point of storage to a normal trade channel market that would be used in commercial channels of trade. If the rye is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a normal trade channel that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(2) *When shipped utilizing combination barge-rail rates.* The applicable basic support rate for warehouse storage loans on rye which was shipped utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission and stored in an approved warehouse shall be determined by adding to the basic support rate established for the county from which the rye was shipped the amount of freight charges per bushel actually paid in and an amount equal to the truck receiving and rail loading-out charges computed in accordance with the applicable rates of the UGSA in effect at the time the loan is made. The freight rate paid into the storage point shall be a rate which will permit the storage intransit privilege and protect the lowest single car or barge freight rate applying from origin through point of storage to a normal trade channel that would be used in commercial channels of trade. If the rye is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a normal trade channel that would be used in commercial channels of trade, such penalty of cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(c) *Basic support rates for warehouse-stored rye received by truck or nontariff barge.* (1) The basic support rate for rye delivered by truck by the producer to a warehouse at normal delivery point shall be the rate for the county where the rye is stored. (2) The basic support rate for rye delivered by truck by the producer to an in-line warehouse beyond normal delivery point, shall be the support rate for the county from which shipped plus the smaller of the actual freight charge or the following truck freight rate from the farm to the storing warehouse minus the distance from the farm to the producer's normal delivery point.

Map mileage	Allowance
0-19	$.0
20-50	$.06 per bushel
51-100 add	$.0010 per bushel per mile
101- and over add	$.0004 per bushel per mile

(3) The basic support rate for rye delivered to a warehouse and shipped by truck to an in-line warehouse, shall be the support rate for the county in which the shipping warehouse is located plus truck freight from schedule shown in subparagraph (c)(2) plus truck receiving and truck load out charges for the shipping warehouse.

(4) The basic support rate for rye shipped by barge or truck-barge to an in-line warehouse at negotiated rate shall be the support rate for the county from where shipped plus truck freight from schedule shown in subparagraph (c)(2) plus origin truck receiving and load out charge.

(d) *Storing responsibilities.* The storing warehouseman in the case of rye received by rail or utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission shall be responsible for determining the normal trade channel routes via the storing warehouse that will protect the lowest freight rate to the designated normal trade channel market that would be used in commercial channels of trade, and for protecting such routes. The storing warehouseman shall also execute supplemental certificates showing (1) the rate of freight paid into the storage point, (2) amount of penalty if any, for backhaul or out of line movement, (3) the applicable normal trade channel market that would be used in commercial channels of trade and (4) any other information which may be prescribed by CCC. The warehouseman is responsible to CCC for the accuracy or omissions of information on the supplemental certificate. Warehouseman's liability, if any, for their failure to comply with the provisions of this paragraph (d) will be determined in accordance with the provisions of the UGSA after acquisition of the warehouse receipt by CCC.

NOTE.—An approved Impact Analysis Statement is available from Orville Overboe (ASCS), (202) 447-7987.

NOTE.—Based on an assessment of the environmental impacts of the proposed action, it has been determined that an Environmental Impact Statement need not be prepared since the proposals will have no significant effect on the quality of the human environment.

Effective date: January 17, 1979.

Signed at Washington D.C., on January 9, 1979.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 63895, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for 1978 crop sorghum. Such determinations were to include operational provisions needed to carry out the program.

No comments were received concerning the operational provisions.

FINAL RULE

Therefore, the General Regulations Governing Price Support for 1978 and Subsequent Crops in this Part 1421 are supplemented as stated herein for the 1978 and subsequent crops of sorghum. The material previously appearing in this subpart remains in full force and effect as to the crops to which it was applicable. Accordingly, the regulations in 7 CFR § 1421.210 through 1421.218 and the title of the subpart are amended to read as follows:

Subpart—1978 and Subsequent Crops Sorghum Loan and Purchase Programs

Sec.
1421.210 Purpose.
1421.211 Eligible sorghum.
1421.212 Determination of quality.
1421.213 Determination of quantity.
1421.214 Warehouse receipts.
1421.215 Fees and charges.
1421.216 Warehouse charges.
1421.217 Maturity of loans.
1421.218 Support rates.

AUTHORITY: The provisions of this subpart issued under secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 105 A, 401, 63 Stat. 1051, as amended (7 U.S.C., 1444c, 1421).

§ 1421.210 Purpose.

This supplement contains program provisions which together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1978 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1978 and Subsequent Crops of sorghum.

§ 1421.211 Eligible sorghum.

(a) *General.* (1) To be eligible for a loan or purchase, the sorghum must be merchantable for food or feed or for other uses, as determined by CCC, and must not contain mercurial compounds, toxin producing molds, or other substances poisonous to man or animals. (2) The sorghum must have also been produced by a producer who has complied with the set-aside and normal crop acreage requirements, if any, as prescribed in parts 718, 722, 728, 730, 775, and 791 of this title and any amendments thereto.

(b) *Warehouse stored loan grade requirements.* To be eligible for a warehouse stored loan, the sorghum must also meet the following requirements:

(1) The sorghum must grade U.S. No. 4 or better, except for moisture, and in addition, may carry the special grade designation "Smutty."

(2) The sorghum must not grade "Weevily" or have moisture over 14 percent unless the warehouse receipt representing the sorghum is accompanied by a supplemental certificate which provides that the warehouseman shall deliver sorghum which is not "Weevily," does not contain in excess of 14 percent moisture, and is otherwise of an eligible grade and quality. The grade, quality and quantity shown on the supplemental certificate shall be as provided in § 1421.214(c).

§ 1421.212 Determination of quality.

The class, grade, grading factors, and all other quality factors shall be based on the Official Grain Standards of the United States for Sorghum, whether or not such determinations are made on basis of an official inspection. The cost of official grade determinations, when made, shall not be for the account of CCC.

§ 1421.213 Determination of quantity.

When the quantity is determined by weight, a hundred weight shall be 100 pounds of sorghum free of dockage.

(a) *In warehouse.* The quantity of sorghum on which a warehouse storage loan shall be made and the quantity delivered to or acquired by CCC in an approved warehouse shall be the net weight specified on the warehouse receipt or on the supplemental certificate, if applicable. If the sorghum has been dried or blended to reduce the moisture content, the quantity specified on the warehouse receipt or the supplemental certificate, if applicable, shall represent the quantity after drying or blending, and such quantity shall reflect a minimum shrink in the receiving weight of 1.2 times the percentage difference between the mois-

V 4 4 / 1 2 J A 1 7 7 9 UMI

ture content of the sorghum, when received, and 14 percent.

(b) *On farm.* The quantity of sorghum eligible to be placed under a farm storage loan shall be determined in accordance with § 1421.17. The quantity acquired by CCC from farm storage under a loan or purchase shall be determined by weight.

§ 1421.214 Warehouse receipts.

Warehouse receipts tendered to CCC in connection with a loan or purchase must meet the requirements of this section.

(a) *Separate receipt.* A separate warehouse receipt must be submitted for each grade and class of sorghum.

(b) *Entries.* Each warehouse receipt, or the warehousman's supplemental certificate (in duplicate) properly identified with the warehouse receipt must show: (1) Gross and net weight, (2) class, (3) grade (including special grades), (4) test weight, (5) moisture, (6) dockage, (7) any other grading factor(s) when such factor(s) and not test weight determine the grade, (8) whether the sorghum arrived by rail, truck or barge, (9) the date the sorghum was received or deposited in the warehouse, and (10) the storage start date.

(c) *Where warehouse receipt shows "Weevily," excess moisture, or both.* If a warehouse receipt tendered as security for a loan indicates the sorghum grades "Weevily" or contains over 14 percent moisture, or both, the warehouse receipt must be accompained by a supplemental certificate as provided in § 1421.211(b) (2) in order for the sorghum to be eligible for price support. The grade, grading factors, and quantity to be delivered must be shown on the supplemental certificate as follows: (1) When the warehouse receipts show "Weevily" and the sorghum has been conditioned to correct the "Weevily" condition, the supplemental certificate must show the same grade without the "Weevily" designation and the same grading factors and quantity as shown on the warehouse receipt, (2) when the warehouse receipt shows a moisture content of over 14 percent and the sorghum has been dried or blended, the supplemental certificate must show the grade, grading factors, and quantity after drying or blending the sorghum to a moisture content of not over 14 percent which shall reflect a drying or blending shrink as specified in § 1421.213(a).

The supplemental certificate must state that no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt. In the case of conditions specified in subparagraphs (1) and (2) of this paragraph, the grade, grading factors, and the quantity shown on the supplemental certificate shall supersede the entries for such items on the warehouse receipt.

(d) *Liens.* Warehouse receipts and the sorghum represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (hereinafter called "UGSA") may be subject to liens for warehouse charges, only to the extent indicated in § 1421.216. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the sorghum when CCC is holder of the warehouse receipt.

(e) Freight certificate requirements. Warehouse receipts representing sorghum which has been shipped by rail, or by barge utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission, from a country shipping point to a normal trade channel market or to a storage point and stored intransit to a normal trade channel market, must be accompanied by supplemental certificates. These certificates must be representative as to origin and date of movement of the sorghum and must reflect the rate of freight paid into the storage point and the amount of penalty, if any, for out-of-line haul. The form of the certificates will be prescribed by the ASCS commodity office and shall be signed by the warehouseman.

§ 1421.215 Fees and charges.

The producer shall pay a loan service fee and delivery charge as specified in § 1421.11.

§ 1421.216 Warehouse charges.

The Kansas City Commodity Office (KCCO) approved list of handling and storage rates will provide the rates to be deducted from the amount of the loan or purchase price in the case of sorghum stored in an approved warehouse operated under the UGSA. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipts that (a) storage charges through the loan maturity date have been prepaid or (b) that the producer has arranged with the warehouse operator for the payment of storage charges through loan maturity and the warehouseman enters an endorsement in substantially the following form on the warehouse receipt; "Warehouse storage charges through the applicable maturity date accrued or to accrue prior to the acquisition of the sorghum by CCC on sorghum represented by this warehouse receipt have been paid or otherwise provided for and a lien for such charges will not be asserted by the warehouseman against CCC or against any subsequent holder of the warehouse receipt," no storage deductions shall be made if such written evidence is submitted. The beginning date to be used for computing the storage deduction on sorghum stored in warehouses operating under the UGSA shall be the latest of the following: (1) The date the sorghum was received or deposited in the warehouse, (2) the date storage charges start, or (3) the day following the date through which storage charges have been paid.

§ 1421.217 Maturity of loans.

Loans mature on demand but no later than the date specified in the annual crop year supplement to the regulations in this subpart.

§ 1421.218 Support rates.

Basic county support rates for sorghum and the schedule of discounts will be set forth in the annual crop year supplement to the regulations contained in this subpart. Farm-stored sorghum loans will be made at the applicable basic county support rate adjusted only for the Weed Control discount, where applicable. The support rate for warehouse-storage loans and for sorghum acquired under a loan or by purchase shall be the applicable basic support rate adjusted in accordance with the provisions of this section, and the discounts in the annual crop year supplement on the basis of quality factors on warehouse receipts or supplemental certificates in the case of sorghum stored in or delivered to an approved warehouse or on such other form as CCC may prescribe in the case of sorghum delivered to other than an approved warehouse. Settlement of loans and purchases shall be made in accordance with the provisions of § 1421.22. If two or more approved warehouses are located in the same or adjoining towns, villages, or cities which have the same freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same basic county support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

(a) *Basic support rates for farm-stored sorghum.* The applicable basic support rate for farm-stored loans shall be the basic county support rate established for the county in which the sorghum is stored.

(b) *Basic support rates for warehouse-stored sorghum received by rail or utilizing combination barge-rail rates.* (1) *When shipped by rail.* The applicable basic support rate for warehouse-storage loans on sorghum which was received by rail and stored in an approved warehouse which is in line of normal commercial channels of trade shall be determined by adding to the basic support rate established for the county from which the sorghum was shipped, the amount of freight charges per hundred weight actually paid in and an amount equal to the truck receiving and rail-loading charges in effect for the shipping warehouse. The freight rate paid into the storage point shall not exceed the lowest rate which will permit the storage intransit privilege and protect the lowest single car rate applying from origin through point of storage to a normal trade channel market that would be used in commercial channels of trade. If the sorghum is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a normal trade channel market that would be used in commercial channels of trade, such penalty or cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(2) *When shipped utilizing combination barge-rail rates.* The applicable basic support rate for warehouse storage loans on sorghum which was shipped utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission and stored in an approved warehouse shall be determined by adding to the basic support rate established for the county from which the sorghum was shipped the amount of freight charges per hundred weight actually paid in and an amount equal to the truck receiving and rail loading-out charges computed in accordance with the applicable rates of the UGSA in effect at the time the loan is made. The freight rate paid into the storage point shall be a rate which will permit the storage intransit privilege and protect the lowest single car or barge freight rate applying from origin through point of storage to a normal trade channel that would be used in commercial channels of trade. If the sorghum is stored in an approved warehouse at a transit point which takes a penalty by reason of backhaul or out-of-line movement when destined to a normal trade channel that would be used in commercial channels of trade, such penalty of cost by reason of such movement shall be deducted from the support rates as determined in this paragraph.

(c) *Basic support rates for warehouse-stored sorghum received by truck or nontariff barge.* (1) The basic support rate for sorghum delivered by truck by the producer to a warehouse at normal delivery point, shall be the rate for the county where the sorghum is stored. (2) The basic support rate for sorghum delivered by truck by the producer to an in-line warehouse beyond normal delivery point shall be the support rate for the county from which shipped plus the smaller of the actual freight charge or the following truck freight rate from the farm to the storing warehouse minus the distance from the farm to the producer's normal delivery point.

Map mileage	Allowance
0-19	$.0
20-50	$.10 per cwt
51-100 add	$.0017 per cwt per mile
101 and over add	$.0007 per cwt per mile

(3) The basic support rate for sorghum delivered to a warehouse and shipped by truck to an in-line warehouse shall be the support rate for the county in which the shipping warehouse is located plus truck freight from schedule shown in subparagraph (c)(2) plus truck receiving and truck load out charges for the shipping warehouse.

(4) The basic support rate for sorghum shipped by barge or truck-barge to an in-line warehouse at negotiated rate shall be the support rate for the county from where shipped plus truck freight from schedule shown in subparagraph (c)(2) plus origin truck receiving and load out charge.

(d) *Storing responsibilities.* The storing warehouseman in the case of sorghum received by rail or utilizing combination barge-rail freight rates which are published and on file with the Interstate Commerce Commission shall be responsible for determining the normal trade channel routes via the storing warehouse that will protect the lowest freight rate to the designated normal trade channel market that would be used in commercial channels of trade, and for protecting such routes. The storing warehouseman shall also execute supplemental certificates showing (1) the rate of freight paid into the storage point, (2) amount of penalty if any, for backhaul or out of line movement, (3) the applicable normal trade channel market that would be used in commercial channels of trade and (4) any other information which may be prescribed by CCC. The warehouseman is responsible to CCC for the accuracy or omissions of information on the supplemental certificate. Warehouseman liability, if any, for their failure to comply with the provisions of this paragraph (d) will be determined in accordance with the provisions of the UGSA after acquisition of the warehouse receipt by CCC.

NOTE.—An approved Impact Analysis Statement is available from Orville Overboe (ASCS), (202) 447-7987.

NOTE.—Based on an assessment of the environmental impacts of the proposed action, it has been determined that an Environmental Impact Statement need not be prepared since the proposals will have no significant effect on quality of the human environment.

[CCC Grain Price Support Regulations, 1978 and Subsequent Crops, Soybean Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 and Subsequent Crops Soybean Loan and Purchase Program

AGENCY: Commodity Credit Corporation.

ACTION: Final Rule.

SUMMARY: This rule sets forth the general provisions under which producers may obtain price support on their 1978 and subsequent crops of soybeans. This rule changes the definition of eligible soybeans. This rule also provides for deducting warehouse storage charges from the loan. This rule is needed in order to advise producers of program provisions.

EFFECTIVE DATE: January 17, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3734 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Cecil Lower, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 63895, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for 1978 crop soybeans. Such determinations were to include operational provisions needed to carry out the program. No comments were received concerning the operational provisions.

FINAL RULE

Therefore, the General Regulations Governing Price Support for 1978 and Subsequent Crops in this Part 1421 are supplemented as stated herein for the 1978 and subsequent crops of soybeans. The material previously appearing in this subpart remains in full force and effect as to the crops to which it was applicable. Accordingly, the regulations in 7 CFR § 1421.365 through § 1421.373 and the title of the subpart are revised to read as follows:

V 4 1 - 1 2 J A 1 7 7 9 UMI

Subpart—1978 and Subsequent Crops Soybean Loan and Purchase Program

Sec.
1421.365 Purpose.
1421.366 Eligible soybeans.
1421.367 Determination of quality.
1421.368 Determination of quantity.
1421.369 Warehouse receipts.
1421.370 Fees and charges.
1421.371 Warehouse charges.
1421.372 Maturity of loans.
1421.373 Support rates.

AUTHORITY: The provisions of this subpart issued under secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 201, 401, 63 Stat. 1051, as amended (7 U.S.C. 1446, 1421).

§ 1421.365 Purpose.

This supplement contains program provisions which together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1978 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1978 and Subsequent Crops of soybeans.

§ 1421.366 Eligible soybeans.

(a) *General.* (1) To be eligible for a loan or purchase, the soybeans must be merchantable for food or feed or for other uses, as determined by CCC, and must not contain mercurial compounds, toxin producing molds, or other substances poisonous to man or animals. (2) The soybeans must have also been produced by a producer who has complied with the set-aside and normal crop acreage requirements, if any, as prescribed in parts 718, 722, 728, 730, 775, and 791 of this title and any amendments thereto.

(b) *Warehouse stored loan grade requirements.* To be eligible for a warehouse storage loan, the soybeans must also meet the following requirements:

(1) The soybeans must grade No. 4 or better.

(2) The soybeans must not grade Weevily" or have moisture over 14 percent unless the warehouse receipt representing the soybeans is accompanied by a supplemental certificate which provides that the warehouseman shall deliver soybeans which are not "Weevily," do not contain in excess of 14 percent moisture, and are otherwise of an eligible grade and quality. The grade, quality and quantity shown on the supplemental certificate shall be as provided in § 1421.369(c).

§ 1421.367 Determination of quality.

The class, grade, grading factors, and all other quality factors shall be based on the Official Grain Standards of the United States for soybeans, whether or not such determinations are made on the basis of an official inspection. The cost of official grade determinations, when made, shall not be for the account of CCC.

§ 1421.368 Determination of quantity.

When the quantity is determined by weight, a bushel shall be 60 pounds of soybeans free of foreign material in excess of 1 percent; the weight of foreign material in excess of 1 percent shall be deducted from the gross weight in the determination of the net number of bushels of soybeans.

(a) *In warehouse.* The quantity of soybeans on which a warehouse storage loan shall be made and the quantity delivered to or acquired by CCC in an approved warehouse shall be the net weight specified on the warehouse receipt or on the supplemental certificate, if applicable. If the soybeans have been dried or blended to reduce the moisture content, the quantity specified on the warehouse receipt or the supplemental certificate, if applicable, shall represent the quantity after drying or blending, and such quantity shall reflect a minimum shrink in the receiving weight of 1.2 times the percentage difference between the moisture content of the soybeans, when received, and 14 percent.

(b) *On farm.* The quantity of soybeans eligible to be placed under a farm storage loan shall be determined in accordance with § 1421.17. The quantity acquired by CCC from farm storage under a loan or purchase shall be determined by weight.

§ 1421.369 Warehouse receipts.

Warehouse receipts tendered to CCC in connection with a loan or purchase must meet the requirements of this section.

(a) *Separate receipt.* A separate warehouse receipt must be submitted for each grade and class of soybeans.

(b) *Entries.* Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt, must show: (1) Gross weight and net bushels, (2) class, (3) grade (including special grades), (4) test weight, (5) moisture content if above 14 percent, (6) percentage of foreign material (7) any other grading factor(s) when such factor(s) and not test weight or moisture determine the grade, (8) whether the soybeans arrived by rail, truck or barge, (9) the date the soybeans were received or deposited in the warehouse, and (10) the storage start date.

(c) *Where warehouse receipt shows "Weevily", excess moisture, or both.* If a warehouse receipt tendered as security for a loan indicates the soybeans grade "Weevily" or contains over 14.0 percent moisture, or both, the warehouse receipt must be accompanied by a supplemental certificate as provided in § 1421.366(b)(2) in order for the soybeans to be eligible for price support. The grade, grading factors, and quantity to be delivered must be shown on the supplemental certificate as follows: (1) When the warehouse receipts show "Weevily" and the soybeans have been conditioned to correct the "Weevily" condition, the supplemental certificate must show the same grade without the "Weevily" designation and the same grading factors and quantity as shown on the warehouse receipt, (2) when the warehouse receipt shows a moisture content of over 14.0 percent and the soybeans have been dried or blended, the supplemental certificate must show the grade, grading factors, and quantity after drying or blending the soybeans to a moisture content of not over 14.0 percent which shall reflect a drying or blending shrink as specified in § 1421.368(a). The supplemental certificate must state that no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt.

In the case of conditions specified in subparagraphs (1) and (2) of this paragraph, the grade, grading factors, and the quantity shown on the supplemental certificate shall supersede the entries for such items on the warehouse receipt.

(d) *Liens.* Warehouse receipts and the soybeans represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (hereinafter called "UGSA") may be subject to liens for warehouse charges only to the extent indicated in § 1421.371. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the soybeans when CCC is holder of the warehouse receipt.

§ 1421.370 Fees and charges.

The producer shall pay a loan service fee and delivery charge as specified in § 1421.11.

§ 1421.371 Warehouse charges.

The Kansas City Commodity Office (KCCO) approved list of handling and storage rates will provide the rates to be deducted from the amount of the loan or purchase price in the case of soybeans stored in an approved warehouse operated under the UGSA. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipts that (a) storage charges through the loan maturity date have been prepaid or (b) that the producer has arranged with the warehouseman for the payment of storage charges through loan maturity and the warehouse operator enters an endorsement in substantially the following form on the warehouse receipt; "Warehouse storage charges through the applicable maturity date accrued or to accrue prior to the acquisition of the soybeans by CCC on soybeans represented by this warehouse receipt have been paid or otherwise provided for and a lien for such charges will not be asserted by the warehouseman against CCC or against any subsequent holder of the warehouse receipt," no storage deductions shall be made. The beginning date to be used for computing the storage deduction on soybeans stored in warehouses operating under the UGSA shall be the latest of the following: (1) The date the soybeans were received or deposited in the warehouse, (2) the date storage charges start, or (3) the day following the date through which storage charges have been paid.

§ 1421.372 Maturity of loans.

Loans mature on demand but no later than the date specified in the annual crop year supplement to the regulations in this subpart.

§ 1421.373 Support rates.

Basic county support rates for soybeans and the schedule of premiums and discounts will be set forth in the annual crop year supplement to the regulations contained in this subpart. Farm-stored soybean loans will be made at the applicable basic county support rate for the county where stored and adjusted only for the Weed Control discount, where applicable. The support rate for warehouse-storage loans and for soybeans acquired under a loan or by purchase shall be the applicable basic support rate for the county where stored adjusted in accordance with the provisions of this section, and the premiums and discounts in the annual crop year supplement on the basis of quality factors on warehouse receipts or supplemental certificates in the case of soybeans stored in or delivered to an approved warehouse or on such other forms as CCC may prescribe in the case of soybeans delivered to other than an approved warehouse. Settlement of loans and purchases shall be made in accordance with provisions of § 1421.22.

If two or more approved warehouses are located in the same or adjoining towns, villages, or cities which have the same freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same basic county support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

NOTE—An approved Impact Analysis Statement is available from Orville Overboe (ASCS), (202) 447-7987.

NOTE—Based on an assessment of the environmental impacts of the proposed action, it has been determined that an Environmental Impact Statement need not be prepared since the proposals will have no significant effect on the quality of the human environment.

Signed at Washington, D.C., on January 9, 1979.

[CCC Grain Price Support Regs., 1978 and Subsequent Crops, Corn Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 and Subsequent Crops Corn Loan and Purchase Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final Rule.

SUMMARY: This rule sets forth the general provisions under which producers may obtain price support on their 1978 and subsequent crops of corn. This rule changes the definition of eligible corn. This rule also provides for deducting storage charges from the loan. This rule is needed in order to advise producers of program provisions.

EFFECTIVE DATE: January 15, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3734 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Cecil Lower, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 63895, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for 1978 crop corn. Such determinations were to include operational provisions needed to carry out the program.

No comments were received concerning the operational provisions.

FINAL RULE

Therefore, the General Regulations Governing Price Support for 1978 and Subsequent Crops in this Part 1421 are supplemented as stated herein for the 1978 and subsequent crops of corn. The material previously appearing in this subpart remains in full force and effect as to the crops to which it was applicable. Accordingly, the regulations in 7 CFR § 1421.90 through 1421.98 and the title of the subpart are amended to read as follows:

Subpart—1978 and Subsequent Crops Corn Loan and Purchase Programs

Sec.
1421.90 Purpose.
1421.91 Eligible corn.
1421.92 Determination of quality.
1421.93 Determination of quantity.
1421.94 Warehouse receipts.
1421.95 Fees and charges.
1421.96 Warehouse charges.
1421.97 Maturity of loans.
1421.98 Support rates.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 105A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1444c, 1421).

Subpart—1978 and Subsequent Crops Corn Loan and Purchase Programs

§ 1421.90 Purpose.

This supplement contains program provisions which together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1978 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1978 and Subsequent Crops of corn.

§ 1421.91 Eligible corn.

(a) *General.* (1) To be eligible for a loan or purchase, the corn must be merchantable for food or feed or for other uses, as determined by CCC, and must not contain mercurial compounds, toxin producing molds, or other substances poisonous to man or animals. (2) The corn must have also been produced by a producer who has complied with the set-aside and normal crop acreage requirements, if any, as prescribed in parts 718, 722, 728, 730, 775, and 791 of this title and any amendments thereto.

(b) *Shelling requirements.* The corn may be ear or shelled corn: *Provided,* That the corn must be shelled before being placed under a warehouse-storage loan or before delivery is made under a loan or purchase. If the corn is not shelled prior to delivery, the cost of shelling on or after delivery shall be for the account of the producer. A producer with a farm-storage loan or ear corn may with the approval of the county committee, shell the corn and keep it under loan on the farm.

(c) *Warehouse stored loan grade requirements.* In order to be eligible for

V 4 4 / 1 2 J A 1 7 7 9 UMI

a warehouse storage loan, corn must also meet the following requirements:

(1) The corn must, except for moisture, grade No. 3 or better, or No. 4 or better on the factor of test weight only, but otherwise No. 3 or better.

(2) The corn must not grade "Weevily" or have moisture over 15.5 percent unless the warehouse receipt representing the corn is accompanied by a supplemental certificate which provides that the warehouse operator shall deliver corn which is not "Weevily," does not contain in excess of 15.5 percent moisture, and is otherwise of an eligible grade and quality. The grade, quality and quantity shown on the supplemental certificate shall be as provided in § 1421.94(c).

§ 1421.92 Determination of quality.

The class, grade, grading factors, and all other quality factors shall be based on the Official Grain Standards of the United States for Corn, whether or not such determinations are made on the basis of an official inspection. The cost of official grade determinations, when made shall not be for the account of CCC.

§ 1421.93 Determination of quantity.

When the quantity is determined by weight, a bushel shall be 56 pounds of corn free of dockage.

(a) *In warehouse.* The quantity of corn on which a warehouse storage loan shall be made and the quantity delivered to or acquired by CCC in an approved warehouse shall be the net weight specified on the warehouse receipt or on the supplemental certificate, if applicable. If the corn has been dried or blended to reduce the moisture content, the quantity specified on the warehouse receipt or the supplemental certificate, if applicable, shall represent the quantity after drying or blending, and such quantity shall reflect a minimum shrink in the receiving weight of 1.2 times the percentage difference between the moisture content of the corn, when received, and 15.5 percent.

(b) *On farm.* The quantity of corn eligible to be placed under a farm storage loan shall be determined in accordance with § 1421.17. The quantity acquired by CCC from farm storage under a loan or purchase shall be determined by weight.

§ 1421.94 Warehouse receipts.

Warehouse receipts tendered to CCC in connection with a loan or purchase must meet the requirements of this section.

(a) *Separate receipt.* A separate warehouse receipt must be submitted for each grade and class of corn.

(b) *Entries.* Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt, must show: (1) Gross weight and net bushels, (2) class, (3) grade, (4) test weight, (5) moisture, (6) broken corn, and foreign material, (7) any other grading factors(s) when such factor(s) and not test weight determine the grade, (8) whether the corn arrived by rail, truck or barge, (9) the date the corn was received or deposited in the warehouse, and (10) the storage start date.

(c) *Where warehouse receipt shows "Weevily," excess moisture, or both.* If a warehouse receipt tendered as security for a loan indicates the corn grades "Weevily" or contains over 15.5 percent moisture, or both, the warehouse receipt must be accompanied by a supplemental certificate as provided in § 1421.91(c)(2) in order for the corn to be eligible for price support. The grade, grading factors, and quantity to be delivered must be shown on the supplemental certificate as follows: (1) When the warehouse receipts show "Weevily" and the corn has been conditioned to correct the "Weevily" condition, the supplemental certificate must show the same grade without the "Weevily" designation and the same grading factors and quantity as shown on the warehouse receipt, (2) when the warehouse receipt shows a moisture content of over 15.5 percent and the corn has been dried or blended, the supplemental certificate must show the grade, grading factors, and quantity after drying or blending the corn to a moisture content of not over 15.5 percent which shall reflect a drying or blending shrink as specified in § 1421.93(a). The supplemental certificate must state that no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt. In the case of conditions specified in subparagraphs (1) and (2) of this paragraph, the grade, grading factors, and the quantity shown on the supplemental certificate shall supersede the entries for such items on the warehouse receipt.

(d) *Liens.* Warehouse receipts and the corn represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (hereinafter called "UGSA") may be subject to liens for warehouse charges only to the extent indicated in § 1421.96. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the corn when CCC is holder of the warehouse receipt.

§ 1421.95 Fees and charges.

The producer shall pay a loan service fee and delivery charge as specified in § 1421.11.

§ 1421.96 Warehouse charges.

The Kansas City Commodity Office (KCCO) approved list of handling and storage rates will provide the rates to be deducted from the amount of the loan or purchase price in the case of corn stored in an approved warehouse operated under the UGSA. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipts that (a) storage charges through the loan maturity date have been prepaid or (b) that the producer has arranged with the warehouse operator for the payment of storage charges through loan maturity and the warehouseman enters an endorsement in substantially the following form on the warehouse receipt: "Warehouse storage charges through the applicable maturity date accrued or to accrue prior to the acquisition of the corn by CCC on corn represented by this warehouse receipt have been paid or otherwise provided for and a lien for such charges will not be asserted by the warehouseman against CCC or against any subsequent holder of the warehouse receipt," no storage deductions shall be made. The beginning date to be used for computing the storage deduction on corn stored in warehouses operating under the UGSA shall be the latest of the following: (1) The date the corn was received or deposited in the warehouse, (2) the date storage charges start, or (3) the day following the date through which storage charges have been paid.

§ 1421.97 Maturity of loans.

Loans mature on demand but no later than the date specified in the annual crop year supplement to the regulations in this subpart.

§ 1421.98 Support rates.

Basic county support rates for corn and the schedule of premiums and discounts will be set forth in the annual crop year supplement to the regulations contained in this subpart. Farm-stored corn loans will be made at the applicable basic county support rate for the county where stored adjusted only for the Weed Control discount where applicable. The support rate for warehouse-storage loans and for corn acquired under a loan or by purchase shall be the applicable basic support rate for the county where stored adjusted in accordance with the provisions of this section, and the premiums and discounts in the annual crop year supplement on the basis of quality factors on warehouse receipts or supplemental certificates in the case of corn stored in or delivered to an approved warehouse or on such other form as CCC may prescribe in the case of corn delivered to other than an approved warehouse. Settlement of loans and purchases shall be made in accordance with the provisions of § 1421.22. If two or more approved warehouses are located in the same or adjoining towns, villages, or cities which have the same freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same basic county support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

NOTE.—An approved Impact Analysis Statement is available from Orville Overboe (ASCS), (202) 447-7987.

NOTE.—Based on an assessment of the environmental impacts of the proposed action, it has been determined that an Environmental Impact Statement need not be prepared since the proposals will have no significant effect on the quality of the human environment.

Signed at Washington D.C., on January 9, 1979.

[CCC Grain Price Support Regs., 1978 and Subsequent Crops, Oats Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 and Subsequent Crops Oats Loan and Purchase Program

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final Rule.

SUMMARY: This rule sets forth the general provisions under which producers may obtain price support on their 1978 and subsequent crops of oats. This rule changes the definition of eligible oats and deletes the section on availability which is sufficiently covered in the General Regulations. This rule also changes warehouse charges. This rule is needed in order to advise producers of program provisions.

EFFECTIVE DATE: January 17, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3734 South Building, P.O. Box 2415, Washington, D.C. 20013

FOR FURTHER INFORMATION CONTACT:

Cecil Lower, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 63895, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for 1978 crop oats. Such determinations were to include operational provisions needed to carry out the program.

No comments were received concerning the operational provision.

FINAL RULE

Therefore, the General Regulations Governing Price Support for 1978 and Subsequent Crops in this Part 1421 are supplemented as stated herein for the 1978 and subsequent crops of oats. The material previously appearing in this subpart remains in full force and effect as to the crops to which it was applicable. Accordingly, the regulations in 7 CFR 1421.245 through 1421.253 and the title of the subpart are revised to read as follows:

Subpart—1978 and Subsequent Crops Oats Loan and Purchase Programs

Sec.
1421.245 Purpose.
1421.246 Eligible oats.
1421.247 Determination of quality.
1421.248 Determination of quantity.
1421.249 Warehouse receipts.
1421.250 Fees and charges.
1421.251 Warehouse charges.
1421.252 Maturity of loans.
1421.253 Support rates.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 105 A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1444 c, 1421).

Subpart—1978 and Subsequent Crops Oats Loan and Purchase Programs

§ 1421.245 Purpose.

This supplement contains program provisions which together with (a) the annual crop year supplement, (b) the General Regulations Governing Price Support for the 1978 and Subsequent Crops, (c) the Cooperative Marketing Association Eligibility Requirements for Price Support regulations in Part 1425 of this chapter, and (d) any amendments or revisions of such regulations, set forth the requirements with respect to price support for the 1978 and Subsequent Crops of oats.

§ 1421.246 Eligible oats.

(a) *General.* (1) To be eligible for a loan or purchase, the oats must be merchantable for food or feed or for other uses, as determined by CCC, and must not contain mercurial compounds, toxin producing molds, or other substances poisonous to humans or animals. (2) The oats must have also been produced by a producer who has complied with the set-aside and normal crop acreage requirements, if any, as prescribed in parts 718, 722, 728, 730, 775, and 791 of this title and any amendments thereto.

(b) *Warehouse stored loan grade requirements.* To be eligible for a warehouse storage loan, the oats must also meet the following requirements:

(1) The oats must grade No. 3 or better, except that (i) they may grade No. 4 on the factor of test weight, and because of being badly stained or materially weathered, and (ii) they may have the special grade designation "Garlicky."

(2) The oats must not grade "Weevily" or have moisture over 14 percent unless the warehouse receipt representing the oats is accompanied by a supplemental certificate which provides that the warehouseman shall deliver oats which are not "Weevily," do not contain in excess of 14 percent moisture, and are otherwise of an eligible grade and quality. The grade, quality and quantity shown on the supplemental certificate shall be as provided in § 1421.249(c).

(3) The oats must not grade Smutty, Ergoty, Bleached or thin or otherwise of a distinctly low quality.

§ 1421.247 Determination of quality.

The class, grade, grading factors, and all other quality factors shall be based on the Official Grain Standards of the United States for Oats, whether or not such determinations are made on the basis of an official inspection. The cost of official grade determinations, when made shall not be for the account of CCC.

§ 1421.248 Determination of quantity.

When the quantity is determined by weight, a bushel shall be 32 pounds of oats.

(a) *In warehouse.* The quantity of barley on which a warehouse storage loan shall be made and the quantity delivered to or acquired by CCC in an approved warehouse shall be the net weight specified on the warehouse receipt or on the supplemental certificate, if applicable. If the oats have been dried or blended to reduce the moisture content, the quantity specified on the warehouse receipt or the supplemental certificate, if applicable, shall represent the quantity after drying or blending, and such quantity shall reflect a minimum shrink in the receiving weight of 1.2 times the percentage difference between the moisture content of the oats, when received, and 14 percent.

(b) *On farm.* The quantity of oats eligible to be placed under a farm storage loan shall be determined in accordance with § 1421.17. The quantity acquired by CCC from farm storage under a loan or purchase shall be determined by weight.

§ 1421.249 Warehouse receipts.

Warehouse receipts tendered to CCC in connection with a loan or purchase must meet the requirements of this section.

(a) *Separate receipt.* A separate warehouse receipt must be submitted for each grade and class of oats.

(b) *Entries.* Each warehouse receipt, or the warehouseman's supplemental certificate (in duplicate) properly identified with the warehouse receipt, must show: (1) Net weight and bushels, (2) class, (3) grade (including special grades), (4) test weight, (5) moisture content if above 14 percent, (6) any other grading factor(s) when such factor(s) and not test weight determine the grade, (7) whether the oats arrived by rail, truck or barge, (8) the date the oats were received or deposited in the warehouse, and (9) the storage start date.

(c) *Where warehouse receipt shows "Weevily," excess moisture, or both.* If a warehouse receipt tendered as security for a loan indicates the oats grade "Weevily" or contain over 14 percent moisture, or both, the warehouse receipt must be accompanied by a supplemental certificate as provided in § 1421.246(b) in order for the oats to be eligible for price support. The grade, grading factors, and quantity to be delivered must be shown on the supplemental certificate as follows: (1) When the warehouse receipts show "Weevily" and the oats have been conditioned to correct the "Weevily" condition, the supplemental certificate must show the same grade without the "Weevily" designation and the same grading factors and quantity as shown on the warehouse receipt, (2) when the warehouse receipt shows a moisture content of over 14 percent and the oats have been dried or blended, the supplemental certificate must show the grade, grading factors, and quantity after drying or blending the oats to a moisture content of not over 14 percent which shall reflect a drying or blending shrink as specified in § 1421.248(a).

The supplemental certificate must state that no lien for processing will be claimed by the warehouseman from Commodity Credit Corporation or any subsequent holder of the warehouse receipt. In the case of conditions specified in subparagraphs (1) and (2) of this paragraph, the grade, grading factors, and the quantity shown on the supplemental certificate shall supersede the entries for such items on the warehouse receipt.

(d) *Liens.* Warehouse receipts and the oats represented thereby stored in an approved warehouse operating under the Uniform Grain Storage Agreement (hereinafter called "UGSA") may be subject to liens for warehouse charges only to the extent indicated in § 1421.251. However, in no event shall a warehouseman be entitled to satisfy the lien by sale of the oats when CCC is holder of the warehouse receipt.

§ 1421.250 Fees and charges.

The producer shall pay a loan service fee and delivery charge as specified in § 1421.11.

§ 1421.251 Warehouse charges.

The Kansas City Commodity Office (KCCO) approved list of handling and storage rates will provide the rates to be deducted from the amount of the loan or purchase price in the case of oats stored in an approved warehouseman under the UGSA. Such deduction shall be based on entries shown on the warehouse receipts. If written evidence is submitted with the warehouse receipts that (a) storage charges through the loan maturity date have been prepaid or (b) that the producer has arranged with the warehouseman for the payment of storage charges through loan maturity and the warehouse operator enters an endorsement in substantially the following form on the warehouse receipt; "Warehouse storage charges through the applicable maturity date accrued or to accrue prior to the acquisition of the oats by CCC on oats represented by this warehouse receipt have been paid or otherwise provided for and a lien for such charges will not be asserted by the warehouseman against CCC or against any subsequent holder of the warehouse receipt," no storage deductions shall be made. The beginning date to be used for computing the storage deduction on oats stored in warehouses operating under the UGSA shall be the latest of the following: (1) The date the oats were received or deposited in the warehouse, (2) the date storage charges start, or (3) the day following the date through which storage charges have been paid.

§ 1421.252 Maturity of loans.

Loans mature on demand but no later than the date specified in the annual crop year supplement to the regulations in this subpart.

§ 1421.253 Support rates.

Basic county support rates for oats and the schedule of premiums and discounts will be set forth in the annual crop year supplement the regulations contained in this subpart. Farm-stored oat loans will be made at the applicable basic county support rate for the county where stored, adjusted only for the Weed Control discount where applicable. The support rate for warehouse-storage loans and for oats acquired under a loan or by purchase shall be the applicable basic support rate for the county where stored, adjusted in accordance with the provisions of this section, and the premiums and discounts in the annual crop year supplement on the basis of quality factors on warehouse receipts or supplemental certificates in the case of oats stored in or delivered to an approved warehouse. Settlement of loans and purchases shall be made in accordance with the provisions of § 1421.22. If two or more approved warehouses are located in the same or adjoining towns, villages, or cities which have the same freight rate, such towns, villages, or cities shall be deemed to constitute one shipping point and the same basic county support rate shall apply even though such warehouses are not all located in the same county. Such support rate shall be the highest support rate of the counties involved.

NOTE.—An approved Impact Analysis Statement is available from Orville Overboe, (ASCS), (202) 447-7987.

NOTE.—Based on an assessment of the environmental impacts of the proposed action, it has been determined that an Environmental Impact Statement need not be prepared since the proposals will have no significant effect on the quality of the human environment.

Signed at Washington, D.C., on January 9, 1979.

STEWART N. SMITH,
Acting Executive Vice President,
Commodity Credit Corporation.

[Cotton Loan Program Reg., Amdt. 1]

PART 1427—COTTON

Interest Rate

AGENCY: Commodity Credit Corporation, USDA.

ACTION: Final Rule.

SUMMARY: The purpose of this rule is to delete the requirement that the interest rate on upland cotton shall be established on the basis of the lowest current interest rate of ordinary obligations of the United States. The rule is needed in order to conform to the Act of September 30, 1978, which amended section 103(b) of the Agricultural Act of 1949, as added by the Food and Agriculture Act of 1977. Interest rates on upland cotton loans for the 1978 and subsequent crops shall be determined in the same manner as interest rates for other commodity loans.

EFFECTIVE DATE: January 17, 1979.

ADDRESS: Price Support and Loan Division, ASCS, USDA, 3741 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Dalton J. Ustynik, ASCS, (202) 447-6611, P.O. Box 2415, Washington, D.C. 20013.

SUPPLEMENTARY INFORMATION: This amendment will benefit upland cotton producers since it will provide that interest rates will be the same as for other commodities and such rate will be lower since it will be based upon the interest rate charged Commodity Credit Corporation by the United States Treasury. It is essential that this amendment be made effective as soon as possible in order to satisfy statutory requirements and since farmers are now marketing 1978 crop upland cotton. Accordingly, it has been determined that compliance with the notice of proposed rulemaking and public procedure of 5 U.S.C. 553 and the requirements of Executive Order 12044 are impractical and contrary to the public interest. Therefore, this amendment is being issued without compliance with such procedure and requirements.

FINAL RULE

Accordingly, 7 CFR 1427.17 is amended, effective as to all loans, on 1978 and subsequent crops of cotton, to read as follows:

§ 1427.17 Interest rates.

Loans shall bear interest at the rate announced in a separate notice published in the FEDERAL REGISTER.

(Secs. 4, 5, 62 Stat. 1070, as amended (15 U.S.C. 714 b and c); secs. 101, 103, 401, 63 Stat. 1051, as amended (7 U.S.C. 1441, 1444, 1421).)

NOTE.—An approved Impact Analysis Statement is available from Charles Cunningham, ASCS (202) 447-7873.

Signed at Washington, D.C., on January 11, 1979.

STEWART N. SMITH,
Acting Executive Vice President,
Commodity Credit Corporation.

Title 10—Energy

CHAPTER II—DEPARTMENT OF ENERGY

[Docket No. ERA-R-78-20]

PART 211—MANDATORY PETROLEUM ALLOCATION REGULATIONS

Amendment To Reinstate Special Set-Aside Procedures for Middle Distillates

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Final Rule.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby adopts an amendment to the Mandatory Petroleum Allocation Regulations which reinstates, by the adoption of a Special Rule No. 6, a special middle distillate set-aside program for those states electing to participate for the period from the date of issuance of this final rule through March 31, 1979. The special set-aside procedures are intended to permit ultimate consumers of middle distillates who have made unsuccessful efforts to obtain supplies for an emergency or hardship to acquire that volume required to meet their certified requirements. The ERA is also requesting comments as to whether there will be a continuing need for a middle distillate set-aside program in future heating seasons.

DATES: Effective date: January 12, 1979. Further comments due on or before June 15, 1979.

ADDRESS: Send comments to Department of Energy, Economic Regulatory Administration, Office of Public Hearing Management, Docket No. ERA-R-78-20, Room 2313, 2000 M Street, NW., Washington, D.C. 20461.

FOR FURTHER INFORMATION CONTACT:

SUPPLEMENTARY INFORMATION:

I. Background and Discussion of Major Comments
II. Special Set-Aside Procedures Adopted
III. Comment Procedures
IV. Other Matters

I. BACKGROUND AND DISCUSSION OF MAJOR COMMENTS

On November 14, 1978, we issued a notice of proposed rulemaking and public hearing (43 FR 54180, November 20, 1978) proposing to reinstate special set-aside procedures for middle distillates by adopting a new Special Rule No. 6 for Subpart A of 10 CFR Part 211.

Written comments were invited on the proposed Special Rule No. 6 through December 20, 1978, and a public hearing was held on December 7, 1978 in Washington, D.C. Comments were received from twelve refiners, six associations of resellers, one consumer group, and seventeen state energy offices.

Refiners were unanimous in their opposition to the proposal, contending that set-aside procedures are not necessary to assure equitable distribution of middle distillates. They based this contention on the adequacy of current middle distillate supplies and the fact that many states have utilized set-aside procedures sparingly, if at all, during the past two heating seasons. Moreover, refiners indicated that set-aside procedures create disturbances in normal supply channels by delaying distribution of middle distillates until they are released from the state set-asides. Most refiners requested that set-aside volumes not exceed two percent of their supplies for distribution into a particular state in any event.

The majority of resellers' associations commenting on the proposal supported the reinstatement of a set-aside program. They generally agreed with refiners, however, that a two percent set-aside would be adequate to meet any foreseeable shortage of middle distillates.

The state energy offices and consumer group commenting on the proposal indicated strong support for the reinstatement of a four percent set-aside program to insure that any emergency or hardship needs of consumers in their states which may arise this winter are met. Many of the state energy offices stressed the need for timely implementation of the set-aside procedures and encouraged action to insure that in the future such procedures will be available from the beginning of the heating season.

We have carefully considered the comments of all persons who have participated in this rulemaking proceeding. While we recognize that set-aside procedures may create some inefficiency in middle distillate distribution systems, we have concluded that set-aside procedures should be reinstated this winter as a means of insuring adequate supplies of middle distillates to consumers in the event emergency and hardship situations arise. In view of the historical usage of set-aside procedures, it is our further determination, however, that the implementation of such procedures should be discretionary on the part of the state concerned. In addition, we have determined that the amount of the set-aside can vary up to a four percent maximum as determined by the needs of the individu-

V 4 4 / 1 2

al states. Accordingly, set-aside procedures will not be in effect in a particular state until such state notifies the ERA of its election to participate in the set-aside program and as to the amount of the set-aside.

With the issuance of this final rule, middle distillate set-aside procedures will have been in effect each winter since the exemption of middle distillates from mandatory pricing and allocation regulation in July 1976. Furthermore, as indicated by many of the state energy offices commenting in this proceeding, it appears that there will be a continuing need for a set-aside program. In view of these considerations, we are soliciting further comments and suggestions as to what action, if any, should be taken to insure the timely implementation of set-aside procedures in future heating seasons. Comments in this matter are invited through June 15, 1979.

II. Special Set-Aside Procedures Adopted

Notwithstanding the exemption of middle distillates from controls, Special Rule No. 6 provides for a special set-aside program for middle distillates for the period from the date of issuance of this final rule through March 31, 1979 so as to permit assignments to consumers and marketers by state energy offices in those states which have notified the ERA of their election to participate in the set-aside program.

A state electing to participate in the set-aside program shall notify each supplier which operates as a prime supplier in the state of such election as well as the percentage of the set-aside. Within ten days of such notification by a state, a prime supplier shall designate for that state a representative who will act on behalf of the prime supplier with regard to these special procedures. The set-aside will constitute that percent selected by the state of a prime supplier's estimated portion of its total supply of middle distillates for the particular month to be sold into the distribution system of the state for consumption therein. No state can elect a set-aside in excess of four percent in any one month. The set-aside requirement for a particular month will not be carried over to the following month. States are urged to order the release of any unrequired set-aside volumes as early as possible during the month.

Set-aside volumes will be available for assignment by participating state energy offices to wholesale purchaser-consumers and end-users who have made unsuccessful efforts to obtain supplies to meet an emergency or hardship. Such assignments will be limited to that volume required to satisfy certified requirements and conditioned upon the demonstration of hardship. Assignments may also be made to wholesale purchaser-resellers who are unable to obtain a sufficient volume of product to meet the emergency or hardship needs of those wholesale purchaser-consumers and end-users with whom the wholesale purchaser-reseller had a supplier/purchaser relationship on January 1, 1979.

Applications for assignment of set-aside volumes should be made to the appropriate state energy office which will approve or disapprove the application. Since an assignment will only be made in response to emergency situations, an applicant will not be required to make its application in writing. Each applicant will be required, however, to submit a written certification as to the validity of the emergency or hardship situation to the state energy office within five days of its verbal or written application.

If the state energy office approves an application, it will assign a prime supplier to furnish the applicant an amount from the set-aside. The state energy office will issue to both the applicant and the representative of the prime supplier a document authorizing such assignment. This document will entitle the applicant to receive the assigned volume from any convenient local distributor of the prime supplier form which the set-aside assignment has been made. Such document will expire ten days after issuance unless it has been presented to the prime supplier or a designated local distributor of the prime supplier.

Each month participating state energy offices will submit to the appropriate DOE Regional Office copies of all authorizing documents issued during the previous month and a tabulation of the usage of the middle distillate set-aside during the previous month.

III. Comment Procedures

As discussed above, we are requesting further comments as to what action, if any, we should take to insure the timely implementation of set-aside procedures in future heating seasons. We invite comments in this matter through June 15, 1979.

Comments should be submitted to the address indicated in the "Addresses" section of this preamble and should be identified on the outside envelope and on documents submitted with the designation "Middle Distillate Set-Aside—Further Comments," Docket No. ERA-R-78-20. Fifteen copies should be submitted. All comments received by the ERA will be available for public inspection in the DOE Reading Room, Room GA-152, Forrestal Building, 1000 Independence Avenue, S.W., Washington, D.C., between the hours of 8:00 a.m. and 4:30 p.m., Monday through Friday.

You should identify any information or data considered by you to be confidential and submit it in writing, one copy only. We reserve the right to determine the confidential status of the information or data and to treat it according to our determination.

IV. Other Matters

In reimposing special set-aside procedures for middle distillates, we are taking action under section 12(f) of the Emergency Petroleum Allocation Act of 1973, as amended (EPAA, Pub. L. 93-159), which permits the establishment of such a regulation upon determination that such action is necessary to and consistent with the attainment of the objectives specified in section 4(b)(1) of the EPAA. In particular, we have determined that this rule will promote public health, safety and welfare (including maintenance of residential heating for individual homes, apartments and similar occupied dwelling units) and the equitable distribution of refined petroleum products among all regions and areas of the United States, and sectors of the petroleum industry, and among all users. It is our further determination that the immediate effectiveness of this rule is necessary to promote these objectives since middle distillates are currently required for heating purposes in most areas of the nation and any delay in the implementation of Special Rule No. 6 could contribute to supply distortions.

(Emergency Petroleum Allocation Act of 1973, Pub. L. 93-159, as amended, Pub. L. 93-511, Pub. L. 94-99, Pub. L. 94-133, Pub. L. 94-163, and Pub. L. 94-385; Federal Energy Administration Act of 1974, Pub. L. 93-275, as amended, Pub. L. 94-332, Pub. L. 94-385, Pub. L. 95-70 and Pub. L. 95-91; Energy Policy and Conservation Act, Pub. L. 94-163, as amended, Pub. L. 94-385, and Pub. L. 95-70; Energy Conservation and Production Act, Pub. L. 94-385, as amended, Pub. L. 95-70, Pub. L. 95-91; Department of Energy Organization Act, Pub. L. 95-91; E.O. 11790, 39 FR 23185; E.O. 12009, 42 FR 46267).

In consideration of the foregoing, Part 211 of Chapter II, Title 10 of the Code of Federal Regulations, is amended as set forth below, effective immediately.

Issued in Washington, D.C., January 12, 1979.

David J. Bardin,
Administrator,
Economic Regulatory
Administration.

The Appendix to Subpart A of Part 211 is amended by adding Special Rule No. 6 to read as follows:

Special Rule No. 6—Special Set-Aside Procedures for Middle Distillates

1. *Scope.* This Special Rule provides for a set-aside program for middle distillates for the period from the date of issuance of this Special Rule through March 31, 1979, as provided below, notwithstanding the exemption of middle distillates from the Mandatory Petroleum Allocation and Price Regulations effective July 1, 1976.

2. *Provision for middle distillate set-aside.* Notwithstanding the provisions of paragraphs (b) and (c) of § 210.35 of Part 210 of this chapter and of subparagraphs (b) (5) and (6) of § 211.1 of this part, a set-aside is hereby established for the period from the date of issuance of this Special Rule through March 31, 1979 for designated middle distillates for assignment by State Offices in accordance with the provisions of this Special Rule.

For purposes of this Special Rule the term middle distillates includes the following, as defined in § 212.31 of Part 212 of this chapter: No. 1 heating oil, No. 1-D diesel fuel, No. 2 heating oil, No. 2-D diesel fuel and kerosene.

3. *State election to participate in set-aside program.* The special set-aside procedures provided in this Special Rule will not be in effect in a particular State prior to notification to the Office of Fuels Regulation, ERA, by the appropriate State Office that such State elects to participate in the set-aside program provided for by this Special Rule.

4. *State representative.* A State electing to participate shall notify each prime supplier operating within that State of such election. A prime supplier receiving such notification shall designate a representative for that State to act for and on behalf of the prime supplier with respect to set-aside petitions and assignments from the set-aside to be supplied by that prime supplier. The appropriate State Office shall be informed in writing of such designation within ten (10) days following the State's notification to the prime supplier of its election to participate. The State Office shall to the maximum extent possible consult with a prime supplier's representative prior to issuing any authorizing document affecting set-aside volumes to be provided by the prime supplier.

5. *Set-aside volume.* A prime supplier shall inform each appropriate participating State Office monthly of the estimated volume of middle distillates to be sold into a State for consumption within that State. The set-aside volume available in a participating State for a particular month shall be that percent elected by the state. The amount will be calculated by multiplying the elected percentage of no more than four (4) percent by each prime supplier's estimated portion of its total supply for that month which will be sold into that State's distribution system for consumption within the State. The set-aside for a particular month cannot be accumulated from prior months or deferred to later months; it shall be made available from stocks of prime suppliers whether directly or through their wholesale purchaser-resellers.

6. *Eligible recipients of set-aside volumes.* The set-aside provided for by this Special Rule shall be utilized by participating State Offices in issuing authorizations to applicants for designated middle distillates to be supplied by a prime supplier to meet hardship and emergency requirements of wholesale purchaser-consumers and end-users. To facilitate relief of the hardship and emergency requirements of wholesale purchaser-consumers and end-users, the State Office may also direct that a wholesale purchaser-reseller be supplied from the set-aside to enable the wholesale purchaser-reseller to supply the emergency and hardship needs of wholesale purchaser-consumers and end-users with whom the wholesale purchaser-reseller had a supplier/purchaser relationship on January 1, 1979.

7. *Term of assignments.* Assignments to eligible end-users and wholesale purchaser-consumers under section 6 of this Special Rule by a State Office shall be made to meet the emergency or hardship conditions being experienced during that period. Assignments to wholesale purchaser-resellers shall be only for the period necessary to preclude hardship and provide emergency requirements to that wholesale purchaser-reseller's wholesale purchaser-consumers and end-users. No assignments under this Special Rule shall relate to any period subsequent to March 31, 1979.

8. *Application for assignment.* All applications for assignment under this Special Rule shall be made to the State Office having jurisdiction over the State in which the applicant conducts its business operations, in accordance with the procedures set forth in §§ 205.211-218 of Subpart Q of Part 205 of this chapter with respect to the state set-aside, except as otherwise provided in this Special Rule. Within five (5) days of its application for assignment of middle distillates under these special procedures, an applicant shall submit to the State Office a written certification that such application was for a valid hardship or emergency situation.

9. *Approval of application.* If a State Office approves an application for assignment, it shall assign a prime supplier an amount from the set-aside to the applicant necessary to meet the expressed emergency or hardship condition. To determine an appropriate prime supplier, the State Office may coordinate with the State representatives of prime suppliers.

10. *Authorizing document.* The State Office shall issue to an applicant granted an assignment a document authorizing such assignment. A copy of the authorizing document (or a summary) shall also be provided by the State Office to the designated State representative of the prime supplier assigned to the applicant. An authorizing document not presented to either the prime supplier or a designated local distributor of the prime supplier within ten (10) days of issuance shall expire after that ten-day period. The State Office shall by the twentieth day of each month submit to the appropriate DOE Regional Office copies of all authorizing documents issued during the previous month and a tabulation of the usage of the middle distillate set-aside during the previous month.

11. *Supplier's responsibilities.* When presented with an authorizing document, suppliers shall provide the assigned amount of middle distillates to an applicant. The authorizing document shall entitle the applicant to receive product from any convenient local distributor of the prime supplier from which the set-aside assignment has been made. Wholesale purchaser-resellers of prime suppliers shall, as non-prime suppliers, honor such authorizing documents upon presentation and shall not delay deliveries required by the authorizing documents while confirming such deliveries with the prime supplier. Any non-prime supplier which provides middle distillates pursuant to an authorizing document shall in turn receive from its prime supplier an equivalent volume of the product. The requirements of paragraph (b) of § 210.62 of Part 210 of this chapter continue to apply to suppliers to whom an authorizing document is presented pursuant to this Special Rule to prohibit any form of discrimination (including price discrimination) which has the effect of circumventing, frustrating or impairing the objectives, purposes and intent of this Special Rule.

12. *Prime suppliers.* All prime suppliers shall supply designated middle distillates from their set-aside volume each month, as directed by the State Offices, not to exceed the total set-aside volume for such middle distillates for that month for the State concerned.

13. *Release of set-aside.* At any time during the month, a State Office may order the release of part or all of a prime supplier's set-aside volume through the prime supplier's normal distribution system in the State.

14. *Orders issued by State Offices.* Authorizing documents and other

A 17 7 9 UMI

orders issued pursuant to this Special Rule shall be in writing and effective immediately upon presentation to the prime supplier's designated State representative. Authorizing documents shall represent a call on the prime supplier's set-aside volumes for the month of issuance irrespective of the fact that delivery cannot be made until the following month. Any order issued by a State Office pursuant to this Special Rule may be appealed to the DOE Regional Office that has jurisdiction over the State involved, in accordance with the procedures set forth in Subpart H of Part 205 of this chapter. Any appeal from such an order shall be filed within ten (10) days of service of the order from which the appeal is taken. If a State Office fails to take action on an application within ten (10) days of filing, the applicant may treat the application as having been denied in all respects and may appeal therefrom as provided in this section.

Title 12—Banks and Banking

CHAPTER V—FEDERAL HOME LOAN BANK BOARD

SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

PART 545—OPERATIONS

Amendments Concerning Investment in the Inter-American Savings and Loan Bank

AGENCY: Federal Home Loan Bank Board.

ACTION: Final rule.

SUMMARY: These amendments permit Federal savings and loan associations to invest within certain limitations in the Inter-American Savings and Loan Bank, as authorized by section 22 of the Housing Authorization Act of 1976. The amendments are needed because the Bank Board's present regulations do not permit such investment.

EFFECTIVE DATE: February 20, 1979.

FOR FURTHER INFORMATION CONTACT:

Harry W. Quillian, Associate General Counsel, Federal Home Loan Bank Board, 1700 G Street, NW., Washington, D.C. 20552 (202-377-6440).

SUPPLEMENTARY INFORMATION: Section 22 of the Housing Authorization Act of 1976 (Pub. L. 94-375, 90 Stat. 1067; August 3, 1976) amended Section 5(c) of the Home Owners' Loan Act of 1933 to permit Federal savings and loan associations to invest in the share capital and capital reserve of the Inter-American Savings and Loan Bank (BIAPE). The statute provides that such investment, when combined with investments in loans guaranteed under the Foreign Assistance Act of 1961, as amended (AID Housing Guaranty Program), shall not exceed the amount previously authorized for such guaranteed loans, i.e., one percent of the association's assets.

BIAPE was formed in November, 1975, by the savings and loan industry in Latin America to create an international secondary mortgage market to increase the volume of capital available for housing loans in Latin America. BIAPE, a privately-owned investment bank specializing in housing and housing finance on an international basis, is empowered to borrow from, and lend and guarantee loans to, its members to facilitate their housing finance operations. Its initial subscribers represent ten Latin American countries and a group of state-chartered savings and loan associations located in the southwestern part of the United States.

Because of the present illiquidity of investments in BIAPE, due to lack of an organized secondary market in its shares and absence of a repurchase arrangement, and the fact that the organization is now in its formative period, the Bank Board proposed to limit implementation of the statutory authority by imposition of certain conditions on a Federal association's investment: (1) threshold eligibility criteria to preclude illiquid investments by marginal associations, (2) aggregate investment limitations to assure that an association's investment does not exceed the *lesser* of one-quarter of one percent of assets or $100,000 and (3) inclusion of both paid-in and callable capital in the aggregate investment limitation.

The proposal appeared in the FEDERAL REGISTER on June 1, 1978 (43 FR 23727), and the public comment period closed July 3, 1978. Comments were received from two Federal savings and loan associations; both expressed approval of the amendments as proposed.

The Bank Board is pleased to adopt these amendments to permit Federal associations to invest in BIAPE in view of the substantial contributions which it has already made to improve housing in the Central and South Americas. It is the Bank Board's hope that BIAPE will continue to develop into a strong and useful vehicle for establishment of an international secondary mortgage market.

Accordingly, the Board hereby amends Part 545 by revising § 545.6-20(c) and adding a new paragraph (h) to § 545.9 thereof, to read as set forth below.

§ 545.6-20 Loans guaranteed under the Foreign Assistance Act of 1961.

. . . . . .

(c) *Percentage-of-assets limitations.* No Federal association may invest in any loan, or interest therein, pursuant to paragraph (a) of this section if, as a result, its aggregate outstanding principal amount of investment in such loans or interests therein and in investments made pursuant to § 545.9(h) of this Part would exceed one percent of its assets.

§ 545.9 Securities and other investments.

A Federal association may invest in the following:

. . . . . .

(h) The share capital and capital reserve of the Inter-American Savings and Loan Bank, subject to the following conditions:

(1) The association's net worth meets the requirements of § 563.13 of this chapter, its scheduled items do not exceed 2.5 percent of its specified assets, and all appraised losses have been offset by specific loss reserves to the extent required by § 563.17-2 of this chapter;

(2) The association's aggregate investment pursuant to this paragraph, including the amount of any obligations undertaken to provide said Bank with reserve capital in the future (callable capital), will not, as a result of such investment, exceed one-quarter of one percent of its assets or $100,000, whichever is less; and

(3) The association's aggregate investment under this paragraph and its aggregate outstanding principal amount of investment under § 545.6-20 of this Part, will not, as a result of such investment, exceed one percent of its assets.

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464. Reorg. Plan No. 3 of 1947, 12 FR 4981, 3 CFR, 1943-48 Comp., p. 1071.)

By the Federal Home Loan Bank Board.

RONALD A. SNIDER,
Assistant Secretary.

Title 14—Aeronautics and Space

CHAPTER II—CIVIL AERONAUTICS BOARD

SUBCHAPTER A—ECONOMIC REGULATIONS

[Regulation ER-1092; Amendment No. 35; Docket No. 30537]

PART 241—UNIFORM SYSTEM OF ACCOUNTS AND REPORTS FOR CERTIFICATED AIR CARRIERS

Elimination of CAB Form 41 Schedule P-13, "Passenger Revenue and Traffic Data by Type of Fare—48 States"

AGENCY: Civil Aeronautics Board.

ACTION: Final rule.

SUMMARY: This final rule eliminates the requirement that certificated route air carriers file CAB Form 41 Schedule P-13, "Passenger Revenue and Traffic Data—48 States." It also terminates EDR-339, dated November 10, 1977, which proposed modifications to Schedule P-13 and related schedules. This rule reflects a change in the Board's data needs and relieves carriers from filing data that are no longer needed.

DATES: Effective: February 15, 1979; adopted: January 11, 1979.

FOR FURTHER INFORMATION CONTACT:

Raymond Kurlander, Director, Bureau of Accounts and Statistics, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, 202-673-5270.

SUPPLEMENTARY INFORMATION: Adopted by the Civil Aeronautics Board at its office in Washington, D.C., January 11, 1979.

CAB FORM 41 SCHEDULE P-13

In ER-956 (41 FR 28268, July 9, 1976), the Board established CAB Form 41 Schedule P-13, "Passenger Revenue and Traffic Data by Type of Fare—48 States." Schedule P-13 was designed to provide the data necessary for monitoring the 48-State fare level in light of the fare level policy adopted in Phase 5 of the *Domestic Passenger Fare Investigation* (DPFI) (Orders 72-12-18, 73-5-2, 73-8-55), and for monitoring the results of particular discount fares.

By EDR-339 (42 FR 59884, November 22, 1977), the Board proposed to add three additional markets to those markets for which data are reported on Schedule P-13. The Mainland U.S.-Puerto Rico/Virgin Islands market was proposed as a result of a petition from Eastern Air Lines, Inc., dated February 22, 1977, which requested that revenue and traffic data be collected for this market so that the Board could evaluate tariff filings and monitor the effects of discount fares. The Board also proposed that carriers be required to file Schedule P-13 data for the Mainland U.S.-Alaska and Mainland U.S.-Hawaii markets so that information would be available to monitor the entity fare level and the results of particular discount fares, to evaluate tariff filings, and to measure the effect on yields resulting from discount fare dilution.

Five comments were received on the proposal; four were from carriers—American Airlines, Inc., Eastern Air Lines, Inc., Northwest Airlines, Inc., Pan American World Airways, Inc.—and the fifth was from the Puerto Rico Planning Board. Essentially, all the carriers supported the Board's proposal, although some made suggestions to change certain portions of it.

The Puerto Rico Planning Board indicated that passenger traffic data for the Mainland-Puerto Rico Market would be very useful in preparing studies for the Government of Puerto Rico, but that the proposal would not serve that purpose unless Mainland-Puerto Rico traffic data were separated from Mainland-Virgin Islands traffic data. The Planning Board, therefore, suggested that Puerto Rico and the Virgin Islands be treated as separate markets in the final rule. It should be noted that information on passenger traffic between specific points in Puerto Rico and the Mainland is contained in the Board's international service segment data files and, although such information is restricted from public disclosure, it has been made available to the Planning Board over the years upon a showing of its need for the data to be in the public interest.

The comments of the carriers will not be discussed in detail in this rule because the Board has decided against adopting the proposals made in EDR-339. Instead, the requirement that certificated route air carriers file revenue and traffic data on Schedule P-13 is eliminated. While the Board still has the responsibility to monitor the effects of discount fares, the occurrence of two events has eliminated the need for Schedule P-13 reporting.

First, on August 25, 1978, the Board adopted a policy statement, PS-80 (43 FR 39522, September 5, 1978), "Domestic Passenger-Fare Level Policies; Domestic Passenger-Fare Structure Policies; Discount Fare Policy," which removed the requirements established in Phase 5 of the DPFI. With liberalized policies as to the institution of fares by air carriers, it is no longer necessary to obtain the detailed revenue and traffic statistics included in Schedule P-13.

Second, on April 17, 1978, the Director, Bureau of Accounts and Statistics, issued Passenger Origin-Destination Directive No. 65, which added fare level data to the information submitted on the quarterly origin and destination survey reports. This information should enable the Board to oversee the general impact of discount fares on various markets, so Schedule P-13 will no longer be needed for that purpose.

CAB FORM 41 SCHEDULES P-2(a) AND T-7

EDR-339 proposed several changes to CAB Form 41 Schedules P-2(a), "Revenue Market Report," and T-7, "Statistical Market Report," which were designed to improve and clarify the reporting requirements. These proposed changes included:

(1) adding the reporting of Virgin Islands operations to Schedules P-2(a) and T-7 by establishing a new market entitled "Mainland U.S.-Puerto Rico/Virgin Islands";

(2) clarifying Schedules P-2(a) and T-7 by incorporating "the market concept" included in Accounting and Reporting Interpretation Letter No. 19; that is, data to be reported for a market should be limited to the service segments operated between two named regions;

(3) excluding the reporting of data on Schedules P-2(a) and T-7 for military charters; and

(4) changing the format of Schedule P-2(a) by substituting Form 41 account numbers for the data lines that are currently contained on the schedule.

While the Board believes that these changes would improve the reporting on Schedules P-2(a) and T-7, the Board is currently reconsidering the need for the information collected on these and other CAB Form 41 schedules in view of the gradual deregulation of the air transportation industry. We are also considering changes in reporting adapted to the requirements of the Airline Deregulation Act of 1978. It would not be worthwhile to adopt a proposal to modify schedules that the Board is considering modifying in other respects.

Accordingly, the Board amends Part 241 of the Economic Regulations (14 CFR Part 241) as follows:

1. Amend the List of Schedules in CAB Form 41 Report in Section 22—*General Reporting Instructions* by deleting Schedule P-13 to read:

V 4 4 / 1 2 J A 1 7 7 9 UMI

SECTION 22.—*General Reporting Instructions*

LIST OF SCHEDULES IN CAB FORM 41 REPORT

Schedule No.	Schedule Title	Filing Frequency	Applicability by Carrier Group		
			I	II	III
. . .	. . .	. . .	.	.	.
P-12(a)	Fuel Consumption by Type of Service and Specific Operational Markets.	Monthly	X	X	X
T-1(a)	Traffic and Capacity Statistics by Class of Service.	Monthly	(²)	(²)	(²)
. . .	. . .	. . .	.	.	.

2. Amend Due Dates of Schedules in CAB Form 41 Report in Section 22—*General Reporting Instructions* by deleting Schedule P-13 to read:

Due Dates of Schedules in CAB Form 41 Report

Due Dates[1]	Schedule No.
Jan. 20	P-12, P-12(a)

Title 17—Commodity and Securities Exchanges

CHAPTER II—SECURITIES AND EXCHANGE COMMISSION

[Release Nos. 33-6012, 34-15462, 35-20877, IC-10542, IA-654, FOIA-57]

PART 200—ORGANIZATION; CONDUCT AND ETHICS; AND INFORMATION AND REQUESTS

Delegation of Authority to Comptroller

AGENCY: Securities and Exchange Commission.

ACTION: Final rule.

SUMMARY: The Commission is adopting a rule delegating to the Commission's Comptroller the function of compromise and collection of Federal claims as required by the Federal Claims Collection Act of 1966, 31 U.S.C. 951 *et seq.*

EFFECTIVE DATE: January 9, 1979.

FOR FURTHER INFORMATION CONTACT:

Philip Becker, Law Clerk, Office of the General Counsel, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549, (202) 755-1234.

SUPPLEMENTARY INFORMATION: The Commission is amending its regulations governing delegation of authority to delegate authority to its Comptroller to compromise and collect Federal claims as required by the Federal Claims Collection Act of 1966, 31 U.S.C. 951 *et seq.* in conformance with standards and procedures which have been jointly promulgated by the Attorney General and Comptroller General, 4 CFR 101.1-105.7.

Accordingly, 17 CFR 200 is amended by adding a new section as follows:

§ 200.30-13 Delegation of authority to Comptroller.

Pursuant to the provisions of Pub. L. 94-29, 89 Stat. 163, Pub. L. 87-592, 76 Stat. 395, 15 U.S.C. 78d-1, 78d-2, the Securities and Exchange Commission hereby delegates, until the Commission orders otherwise, the following function to the Comptroller of the Commission, to be performed by him or under his direction by such person or persons as may be designated from time to time by the Chairman of the Commission: The compromise and collection of Federal claims as required by the Federal Claims Collection Act of 1966, 31 U.S.C. 951 *et seq.*, in conformance with standards and procedures jointly promulgated by the Attorney General and Comptroller General, 4 CFR 101.1-105.7.

(Sec. 25, 89 Stat. 163, 15 U.S.C. 78d-1; Sec. 2, 76 Stat. 395 15 U.S.C. 78d-2)

The Commission finds, in accordance with the Administrative Procedure Act, 5 U.S.C. 553(b)(A), 5 U.S.C. 553(d), that the foregoing action relates solely to a rule of agency organization, procedure or practice and does not relate to a substantive rule. Accordingly, the foregoing action becomes effective immediately. In addition, the Commission finds that there is no burden on competition imposed by the foregoing action.

By the Commission.

GEORGE FITZSIMMONS,
Secretary.

JANUARY 9, 1979.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE, DEPARTMENT OF THE TREASURY

[T.D. 79-20]

PART 159—LIQUIDATION OF DUTIES

Chains and Parts Thereof, of Cast Iron, Iron or Steel From Italy; Countervailing Duties

AGENCY: United States Treasury Department.

ACTION: Modification of Final Countervailing Duty Order and Declaration of Net Amount of Bounty or Grant.

SUMMARY: This notice is to advise the public of the net amount of benefits given by the Government of Italy, which constitute bounties or grants upon manufacture, production, or exportation of chains and parts thereof within the meaning of the countervailing duty law. Based upon a review of information received, the net amount of such bounties or grants has been determined to be 15 lire per kilogram. Accordingly, entries of chains and parts thereof from Italy will be subject to countervailing duties in accordance with this determination.

This notice is to further advise the public that the Treasury is modifying its order with respect to chains and parts thereof from Italy manufactured by Acciaierie Weissenfels S.p.A. It has been determined that this firm receives benefits upon the manufacture, production or exportation of this product from the Government of Italy in an amount less than 15 lire per kilogram and the countervailing duty is being adjusted accordingly.

EFFECTIVE DATE: January 17, 1979.

FOR FURTHER INFORMATION CONTACT:

Donald W. Eiss, Office of Tariff Affairs, U.S. Treasury Department, 15th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20220 (202-566-8256).

SUPPLEMENTARY INFORMATION: On October 11, 1977, Treasury Decision 77-249 was published in the FEDERAL REGISTER (42 FR 54799). In that decision, the Treasury Department found that rebates paid to Italian exporters of chain and parts thereof under Italian Law 639 constituted the bestowal of a bounty or grant within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (hereinafter referred to as "the Act"). The products covered by this determination are provided for in

V 4 4 - 1 2 J A 1 7 7 9 UMI

the Tariff Schedules of the United States under item numbers 652.24, 652.27, 652.30, 652.33 and 652.35 and include chains and parts thereof, of cast iron, iron, or steel, including terminal and connecting links, hooks, rollers, pivots and plates.

Italian Law 639 provides for a rebate to manufacturers of certain steel products, including the subject chain, when the product is exported. The rebate is calculated to cover certain customs duties, indirect taxes and a number of stamp taxes assessed during the manufacturing process. Certain portions of the Italian Law 639 rebates have been determined in previous proceedings under the Act to constitute bounties or grants within the meaning of the Act. In those cases, the countervailing duty was set equal to the amount of the 639 rebate associated with indirect taxes not directly related to the manufacture of the products.

In the case of chain, the Italian Law 639 rebate is set at 15 lire per kilogram. During the course of the investigation no information was supplied by the Italian Government which would have enabled the Treasury to differentiate between directly related and not directly related elements of the rebate. In our final determination, the bounty or grant was estimated to be the full 15 lire per kilogram rebate.

However, during the course of the investigation, the principal exporter of chain to the U.S., Acciaierie Weissenfels, S.p.A. (Weissenfels), alleged that it pays customs duties and indirect taxes directly related to the manufacture of chain which are not rebated upon export and which exceed the 639 rebate. Because the rebate of such duties and taxes would not be considered a bounty or grant by Treasury, the "effective" subsidy provided by the 639 rebate would be reduced to the extent that Weissenfels had foregone the rebate of those duties and indirect taxes when exporting chain.

The Treasury was unable to determine the validity of Weissenfels' claims prior to the final determination and therefore the liquidation of all entries for consumption or withdrawals from warehouse for consumption was suspended pending clarification of the net amount of bounty or grant applicable to Weissenfels.

It has now been determined that Weissenfels pays a number of customs duties on imported raw materials and component parts which should be allowed as offsets to the Italian Law 639 rebate. A request for an offset in an amount equal to taxes paid on electricity, fuels, lubricants, water and insurance has been denied. In a notice published contemporaneously with this decision, the Treasury Department has established that only taxes and duties paid on elements physically incorporated into the exported product (or its packing) should be allowed as offsets to benefits otherwise received. Since the elements upon which the above enumerated taxes were paid do not meet the physical incorporation test, no offset has been granted. The net benefit received by Weissenfels has been calculated to be 6.88 lire per kilogram which represents an *ad valorem* benefit of 0.8 percent.

Absent any information regarding offsets to the 639 rebate for other Italian manufacturers/exporters of the product covered by this order, it is determined that the net amount of the bounty or grant paid or bestowed, directly or indirectly, upon the manufacture, production or exportation, of chains or parts thereof from Italy is 6.88 lire per kilogram for merchandise produced by Acciaierie Weissenfels, S.p.A. and 15 lire per kilogram for this merchandise manufactured or produced by all other firms in Italy.

Accordingly, notice is hereby given that countervailing duties in the amount ascertained in accordance with the above declaration will be collected upon the liquidation of all entries of the subject merchandise for consumption or withdrawals from warehouse for consumption which were suspended pursuant to T.D. 77-249 during the period October 11, 1977 to the present. Customs officers are instructed to proceed with liquidation of all such entries of chains and parts thereof from Italy in accordance with the terms of this order.

Effective January 17, 1979, and until further notice, upon the entry, or withdrawal from warehouse, for consumption of this merchandise, imported directly or indirectly from Italy, which benefits from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration. To the extent that it can be established to the satisfaction of the Commissioner of Customs that imports of the merchandise covered by this determination are benefiting from a bounty or grant smaller than the amount which otherwise would be applicable under the above declaration, the smaller amount so established shall be collected.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be paid or credited or bestowed, directly or indirectly, upon the manufacture, production or exportation of such chains and parts thereof from Italy.

The table in §159.47(f) of the Customs Regulations (19 CFR 159.47(f)), is amended by adding after the last entry from Italy for "Certain chains and parts thereof" in the column headed "Commodity", the number of this Treasury Decision in the column headed "Treasury Decision", and the words "Final Rate Declared; Modified as to chains and parts thereof manufactured by Acciaierie Weissenfels S.p.A." in the column headed "Action".

(R.S. 251, secs. 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2049 (19 U.S.C. 66, 1303), as amended, 1624).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190, Revision 15, March 16, 1978, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and §159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the issuance of a countervailing duty order by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

DECEMBER 21, 1978.

[4810-22-M]

(T.D. 79-18)

PART 159—LIQUIDATION OF DUTIES

Countervailing Duties—Non-rubber Footwear From Argentina

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Final Countervailing Duty Determination.

SUMMARY: This notice is to inform the public that a countervailing duty investigation has resulted in a determination that the Government of Argentina provides benefits which constitute bounties or grants within the meaning of the countervailing duty law on the manufacture, production or exportation of non-rubber footwear. Deposited countervailing duties in the amount of these benefits will be required at the time of entry in addition to duties normally due on dutiable shipments of the merchandise.

EFFECTIVE DATE: January 17, 1979.

FOR FURTHER INFORMATION CONTACT:

James Lyons, Office of Tariff Affairs, U.S. Treasury Department, 15th Street and Pennsylvania Avenue, NW., Washington, D.C. 20220 (202-566-8256).

SUPPLEMENTARY INFORMATION: On July 12, 1977, a "Preliminary Countervailing Duty Determination" was published in the FEDERAL REGISTER (42 FR 35927). The notice stated that it had been preliminarily determined that benefits had been received by Argentine manufacturer/exporters of non-rubber footwear which might constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (hereinafter referred to as "the Act").

The merchandise in question is described in part 1A of Schedule 7 of the Tariff Schedules of the United States (TSUS), excluding TSUS items 700.51, 700.52, 700.53, 700.54 and 700.60.

A reembolso, or export rebate, granted by the Government of Argentina to exporters in the amount of 20 percent of the f.o.b. value of the merchandise, was preliminarily determined to be a bounty or grant. The stated purpose of this rebate is to reimburse exporters for various taxes paid in the production or sale of the exported article and for various taxes passed on to the exporter from earlier production stages. Information contained in a survey conducted by the Argentine Government (which examined the cost structure of a preponderance of the non-rubber footwear manufacturers who export) indicates that indirect taxes assessed on the exported product or physically incorporated components which could be, but which have not been, rebated have a total incidence of 20.46 percent. According to past Treasury practice, such taxes may be rebated and are considered eligible as an offset against the reembolso. Other taxes which the Argentine Government also had presented as eligible for rebate and, thus, appropriate as an additional offset have not been determined to constitute taxes directly related to the exported product or its physical components and therefore are ineligible as an offset. These levies include labor-related taxes, calculated as a percentage of wages, and taxes on real estate, bank credits, and credits to industrial companies. The indirect taxes which are eligible for rebate, however, are more than sufficient to offset the entire reembolso. Consequently, this practice has been determined not to constitute bounty or grant within the meaning of the Act.

The 10 percent income tax exemption on export-related income is the only other practice investigated which has been determined to constitute a bounty. The value of the income tax benefit to exporters of non-rubber footwear has been calculated at 1.32 percent of f.o.b. value.

It has been determined that none of the other practices examined during the investigation constitute a bounty or grant. The non-excessive rebate of value added taxes upon the export of goods and the rebate of import duties paid on raw materials used in the production of non-rubber footwear for export were determined not to constitute bounties or grants within the meaning of the Act. Programs found not to have been utilized by the non-rubber footwear industry include the issuance of tax rebate certificates, economic development incentives, the drawback of duty on industrial equipment and export risk insurance at low rates. Two other practices, the use of multiple exchange rates and preferential financing, have been eliminated by the Government of Argentina. The current rates of interest reflect those which are prevalent commercially.

After consideration of all information received subsequent to the preliminary determination, it is hereby determined that exports of non-rubber footwear from Argentina benefit from bounties or grants within the meaning of section 303 of the Act (19 U.S.C. 1303) in the form of the income tax exemption on export-related income.

Accordingly, notice is hereby given that non-rubber footwear, imported directly or indirectly from Argentina, if entered, or withdrawn from warehouse, for consumption on or after January 17, 1979, will be subject to payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed.

In accordance with section 303 of the Act and until further notice, the net amount of such bounties or grants has been determined to be .86 percent of the f.o.b. price for export of non-rubber footwear to the United States.

Effective on or after January 17, 1979, upon the entry, or withdrawal from warehouse, for consumption of the merchandise from Argentina which benefits from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration. To the extent that it can be established to the satisfaction of the Commissioner of Customs that imports of non-rubber footwear from Argentina are subject to a bounty or grant smaller than the amount which otherwise would be applicable under the above declaration, the smaller amount so established shall be assessed and collected.

The Government of Argentina has suggested that additional information regarding the applicable rates of indirect taxes assessed on the exported footwear or its physical components may be forthcoming. Should any additional information, once received and analyzed, result in any change in the size of the bounties or grants presently determined to exist, notice thereof will be published, declaring whether new rates would then be applicable to entries of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of such a notice in the FEDERAL REGISTER.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be credited or bestowed, directly or indirectly, upon the manufacture, production or exportation of non-rubber footwear manufactured in Argentina.

The table in §159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting, after the last entry for "Argentina", the words "non-rubber footwear" under the column headed "Commodity," the number of this Treasury Decision in the column headed "Treasury Decision" and the words "Bounty Declared-Rate" in the column headed "Action."

(R.S. 251, as amended, secs. 303, as amended, 624, 46 Stat. 687 as amended, 759 (19 U.S.C. 66, 1303, 1624). This final determination is published pursuant to section 303(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 (Revision 15) March 16, 1978, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and §154.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the issuance of a final countervailing duty determination by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

PART 159—LIQUIDATION OF DUTIES

Vitamin K From Spain—Declaration of Net Amount of Bounty or Grant

AGENCY: U.S. Customs Service, Treasury Department.

ACTION: Net Amount of Bounty or Grant Declared.

SUMMARY: This notice is to advise the public of the new rate of countervailing duty applicable to imports of vitamin K from Spain. Based upon a review of information received, the net amount of benefits given by the Government of Spain which constitute bounties or grants within the meaning of the countervailing duty law upon the manufacture, production, or ex-

V 4 4 / 1 2 J A 1 7 7 9 UMI

portation of vitamin K has been determined to be 3.07 percent of the f.o.b. or ex-works price to the United States. Accordingly, effective today, vitamin K from Spain will be subject to countervailing duty in accordance with this declaration.

EFFECTIVE DATE: January 17, 1979.

FOR FURTHER INFORMATION CONTACT:

Mr. Charles F. Goldsmith, Economist, Office of Tariff Affairs, U.S. Department of the Treasury, 15th Street and Pennsylvania Avenue, NW., Washington, D.C. 20220, telephone (202) 566-2323.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of November 16, 1976 (41 FR 50419), a notice, T.D. 76-321, was published stating that it had been determined that exports of vitamin K from Spain received bounties or grants within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303).

At that time, notice was given that vitamin K imported directly or indirectly from Spain, if entered for consumption or withdrawn from warehouse for consumption on or after November 16, 1976, would be subject to the payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed. In accordance with section 303 and based on the information then available, the net amount of bounties or grants was determined to be 10.5 percent of f.o.b. or ex-works price to the United States.

On the basis of subsequent information submitted regarding the tax incidence on the manufacture of vitamin K, it has been ascertained and determined that the net amount of benefits paid or bestowed, directly or indirectly, by the Government of Spain on the exportation of vitamin K is 3.07 percent. The benefits are received as a result of the rebate upon export of certain elements of the Spanish indirect tax, the "Desgravacion Fiscal". The rebate consists of: (1) Taxes on services and inputs which are not physically incorporated in the final product; (2) the special tax levied on the sales of a product from a manufacturer to a wholesaler which, in fact, is not levied on export sales; and (3) the amount of a number of "parafiscal" taxes included in the computation of the rebate, all of which are deemed charges assessed for services provided and are not levied on an *ad valorem* basis on the product.

Accordingly, effective on January 17, 1979, and until further notice, upon the entry for consumption or withdrawal from warehouse for consumption of such dutiable vitamin K imported directly or indirectly from Spain which benefit from such bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration.

Any merchandise subject to the terms of this declaration shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be paid or credited, directly or indirectly, upon the manufacture, production, or exportation of such vitamin K from Spain.

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting after the last entry for "vitamin K" under the country heading "Spain", the number of this Treasury Decision in the column so headed and the words "New rate" in the column headed "Action".

(R.S. 251, section 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2049, (19 U.S.C. 66, 1303), as amended, 1624).

PART 159—LIQUIDATION OF DUTIES

Unwrought Zinc From Spain—Declaration of Net Amount of Bounty or Grant

AGENCY: Customs Service, United States Treasury Department.

ACTION: Net Amount of Bounty or Grant Declared.

SUMMARY: This notice is to advise the public of the decision to reinstate the basis for calculating the countervailing duty applicable to imports of unwrought zinc from Spain which prevailed prior to the Treasury Department's decision with respect to the product announced on June 15, 1978 (43 FR 25812). A countervailing duty is imposed when the Treasury Department determines that a bounty or grant is being paid to producers and exporters of merchandise. Based upon a review of the decision made in June, the Treasury Department has determined that only those indirect taxes which are directly related to the product, in the sense that the tax is assessed on the exported product or its physical components or packing (making allowance for waste) may be considered as an offset against the benefits represented by the Desgravacion Fiscal. The net amount of benefits given by the Government of Spain which constitute bounties or grants upon the manufacture, production or exportation of unwrought zinc, within the meaning of the countervailing duty law, has been determined to be 3.24 percent of the f.o.b. price to the United States. Accordingly, effective today, unwrought zinc from Spain will be subject to countervailing duty in accordance with this determination.

EFFECTIVE DATE: January 7, 1979.

FOR FURTHER INFORMATION CONTACT:

James Lyons, Office of Tariff Affairs, United States Treasury Department, 15th and Pennsylvania Avenue, N.W., Washington, D.C. 20220, telephone 202-566-8256.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of April 8, 1977 (42 FR 18587), notice was given (T.D. 77-103) that it had been determined that exports of unwrought zinc from Spain are subject to bounties or grants within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303).

At that time, notice was given that unwrought zinc imported directly or indirectly from Spain, if entered for consumption or withdrawn from warehouse for consumption after the expiration of 30 days after publication of the notice in the Customs Bulletin would be subject to the payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed. The amount of the bounties or grants was determined to be 4 percent of the f.o.b. price to the United States.

As is indicated in the notice published contemporaneously, the Treasury Department has determined that the net amount of the bounty or grant being paid or bestowed, directly or indirectly within the meaning of section 303 of the Act, upon the exportation of unwrought zinc from Spain should be that which was determined to exist prior to June 15, 1978 less adjustments for a lower value base and taxes on export licenses and metals. This amount 2.64 percent, represents the difference between the Desgravacion Fiscal net rebate and those amounts the Government of Spain has estimated is paid by the producers of unwrought zinc or any prior stage producers in indirect taxes on any components that were physically incorporated in the exported product or its packing (making normal allowance for waste).

Effective on January 17, 1979, and until further notice, upon the entry for consumption or withdrawal from warehouse for consumption of such dutiable unwrought zinc imported directly or indirectly from Spain which benefit from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be paid or credited, directly or indirectly, upon the manufacture, production, or exportation of such unwrought zinc from Spain.

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting in respect of the commodity "unwrought zinc" and of the country "Spain", the number of this Treasury Decision in the column headed "Treasury Decision" and the words "new rate" in the column headed "Action". (R.S. 251, secs. 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2049, 19 U.S.C. 66, 1303, as amended, 1624).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 15, March 16, 1978, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47) insofar as they pertain to the issuance of a countervailing duty determination by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

PART 159—LIQUIDATION OF DUTIES

Bottled Green Olives From Spain—Declaration of Net Amount of Bounty or Grant

AGENCY: Customs Service, United States Treasury Department.

ACTION: Net Amount of Bounty or Grant Declared.

SUMMARY: This notice is to advise the public of the decision to reinstate the basis for calculating the countervailing duty applicable to imports of bottled green olives from Spain which prevailed prior to the Treasury Department's decision with respect to the product announced on June 15, 1978 (43 FR 25812). A countervailing duty is imposed when the Treasury Department determines that a bounty or grant is being paid to producers and exporters of merchandise. Based upon a review of the decision made in June, the Treasury Department has determined that only those indirect taxes which are directly related to the product, in the sense that the tax is assessed on the exported product or its physical components or packing (making allowance for waste) may be considered as an offset against the benefits represented by the Desgravacion Fiscal. The net amount of benefits given by the Government of Spain which constitute bounties or grants upon the manufacture, production or exportation of bottled green olives, within the meaning of the countervailing duty law, has been determined to be 2.84 percent of the f.o.b. price to the United States. Accordingly, effective today, bottled green olives from Spain will be subject to countervailing duty in accordance with this determination.

EFFECTIVE DATE: January 17, 1979.

FOR FURTHER INFORMATION CONTACT:

James Lyons, Office of Tariff Affairs, United States Treasury Department, 15th and Pennsylvania Avenue, NW., Washington, D.C. 20220, telephone 202-566-8256.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of September 12, 1974 (39 FR 32904), notice was given (T.D. 74-234) that it had been determined that exports of bottled green olives from Spain are subject to bounties or grants within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303).

At that time, notice was given that bottled green olives imported directly or indirectly from Spain, if entered for consumption or withdrawn from warehouse for consumption after the expiration of 30 days after publication of the notice in the Customs Bulletin would be subject to the payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed. The amount of the bounties or grants was determined to be 2.9 percent of the f.o.b. price to the United States.

As is indicated in the notice published contemporaneously, the Treasury Department has determined that the net amount of the bounty or grant being paid or bestowed, directly or indirectly within the meaning of section 303 of the Act, upon the exportation of bottled green olives from Spain should be that which was determined to exist prior to June 15, 1978 less adjustments for tax on export license. This amount 2.44 percent, represents the difference between the Desgravacion Fiscal net rebate and those amounts the Government of Spain has estimated is paid by the producers of bottled green olives or any prior stage producers in indirect taxes on any components that were physically incorporated in the exported product or its packing (making normal allowance for waste).

Effective on January 17, 1979, and until further notice, upon the entry for consumption or withdrawal from warehouse for consumption of such dutiable bottled green olives imported directly or indirectly from Spain which benefit from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be paid or credited, directly or indirectly, upon the manufacture, production, or exportation of such bottled green olives from Spain.

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting in respect of the commodity "bottled green olives" and of the country "Spain", the number of this Treasury Decision in the column headed "Treasury Decision" and the words "new rate" in the column headed "Action". (R.S. 251, secs. 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2049, 19 U.S.C. 66, 1303, as amended, 1624).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 15, March 16, 1978, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47) insofar as they pertain to the issuance of a countervailing duty determination by the Commissioner of Customs, are hereby waived.

PART 159—LIQUIDATION OF DUTIES

Non-rubber Footwear From Spain—Declaration of Net Amount of Bounty or Grant

AGENCY: Customs Service, United States Treasury Department.

ACTION: Net Amount of Bounty or Grant Declared.

SUMMARY: This notice is to advise the public of the decision to reinstate the basis for calculating the countervailing duty applicable to imports of non-rubber footwear from Spain which prevailed prior to the Treasury Department's decision with respect to the product announced on June 15, 1978 (43 FR 25812). A countervailing

V 4 4 / 1 2 J A 1 7 7 9 UMI

duty is imposed when the Treasury Department determines that a bounty or grant is being paid to producers and exporters of merchandise. Based upon a review of the decision made in June, the Treasury Department has determined that only those indirect taxes which are directly related to the product, in the sense that the tax is assessed on the exported product or its physical components or packing (making allowance for waste) may be considered as an offset against the benefits represented by the Desgravación Fiscal. The net amount of benefits given by the Government of Spain which constitute bounties or grants upon the manufacture, production or exportation of non-rubber footwear, within the meaning of the countervailing duty law, has been determined to be 2.54 percent of the f.o.b. price to the United States. Accordingly, effective today, non-rubber footwear from Spain will be subject to countervailing duty in accordance with this determination.

EFFECTIVE DATE: January 17, 1979.

FOR FURTHER INFORMATION CONTACT:

James Lyons, Office of Tariff Affairs, United States Treasury Department, 15th and Pennsylvania Avenue, N.W., Washington, D.C. 20220, telephone 202-566-8256.

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of September 12, 1974 (39 FR 32904), notice was given (T.D. 74-235) that it had been determined that exports of non-rubber footwear from Spain are subject to bounties or grants within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303).

At that time, notice was given that non-rubber footwear imported directly or indirectly from Spain, if entered for consumption or withdrawn from warehouse for consumption after the expiration of 30 days after publication of the notice in the Customs Bulletin would be subject to the payment of countervailing duties equal to the net amount of any bounty or grant determined or estimated to have been paid or bestowed. The amount of the bounties or grants was determined to be 3 percent of the f.o.b. price to the United States.

As is indicated in the notice published contemporaneously, the Treasury Department has determined that the net amount of the bounty or grant being paid or bestowed, directly or indirectly within the meaning of section 303 of the Act, upon the exportation of non-rubber footwear from Spain should be that which was determined to exist prior to June 15, 1978 less adjustments for an export license tax and a previous overvaluation of the basis upon which the Desgravacion Fiscal was calculated. This amount, 2.27 percent, represents the difference between the Desgravacion Fiscal net rebate and those amounts the Government of Spain has estimated is paid by the producers of non-rubber footwear or any prior stage producers in indirect taxes on any components that were physically incorporated in the exported product or its packing (making normal allowance for waste).

Effective on January 17, 1979, and until further notice, upon the entry for consumption or withdrawal from warehouse for consumption of such dutiable non-rubber footwear imported directly or indirectly from Spain which benefit from these bounties or grants, there shall be collected, in addition to any other duties estimated or determined to be due, countervailing duties in the amount ascertained in accordance with the above declaration.

Any merchandise subject to the terms of this order shall be deemed to have benefited from a bounty or grant if such bounty or grant has been or will be paid or credited, directly or indirectly, upon the manufacture, production, or exportation of such non-rubber footwear from Spain.

The table in § 159.47(f) of the Customs Regulations (19 CFR 159.47(f)) is amended by inserting in respect of the commodity "non-rubber footwear" and of the country "Spain", the number of this Treasury Decision in the column headed "Treasury Decision" and the words "new rate" in the column headed "Action". (R.S. 251, secs. 303, as amended, 624; 46 Stat. 687, 759, 88 Stat. 2049, 19 U.S.C. 66, 1303, as amended, 1624).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 Revision 15, March 16, 1978, the provisions of Treasury Department Order No. 165, Revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47) insofar as they pertain to the issuance of a countervailing duty determination by the Commissioner of Customs, are hereby waived.

PART 159—LIQUIDATION OF DUTIES

Notice of Revised Method for Calculation of Bounty or Grant With Regard to Certain Indirect Taxes

AGENCY: Treasury Department.

ACTION: Method of Calculation of "Net Amount" of bounty or grant in determining countervailing duties revised.

SUMMARY: A notice published in the June 15, 1978, issue of the FEDERAL REGISTER set forth a revised method by which the Treasury Department would determine the "net amount" of bounties or grants under the countervailing duty law with regard to the rebate of various indirect taxes. This notice is to advise the public that the Department has reviewed the bases for its determination of June 15, 1978, and hereby restores the rule previously applied. Treasury Decisions establishing new rates of duty with respect to affected products from Spain are being published contemporaneously. A notice which applies the revised method of calculation to certain textiles and textile products from Colombia and India and chains from Italy also is published today. Two final determinations involving leather products from Argentina which reflect the revised method of calculation announced today are also published. In several other investigations which have not yet proceeded beyond preliminary determinations, the revision in the method by which bounties or grants will henceforth be calculated will be reflected in the final determinations.

FOR FURTHER INFORMATION CONTACT:

Richard B. Self, Director, Office of Tariff Affairs, U.S. Treasury Department, Room 1124, Washington, D.C. 20220, telephone (202-566-8585).

SUPPLEMENTARY INFORMATION: In the FEDERAL REGISTER of June 15, 1978 (43 FR 25812) a notice was published adopting a revised method by which the "net amounts" of bounties or grants would be determined under the countervailing duty law, 19 U.S.C. section 1303, with regard to the rebate of various indirect taxes. A subsequent notice, published on August 29, 1978 (43 FR 38658), indicated that the Department had decided to review the bases upon which it had revised its method of calculating the "net amounts" of bounties or grants in such instances. Comments from interested persons were invited.

The Department, having considered the comments received, has recalculated the "net amount" of the "bounty" or "grant" bestowed prior to the June 15, 1978 notice for the reasons set forth herein. With regard to affected products from countries with a cascade-type turnover tax system and to other countervailing duty investigations in which the net amount of the bounty or grant has been calculated on the basis of the "directly related" concept adopted in the June 15 decision, the net amount of the bounty or grant shall be determined by subtracting from the aggregate amounts of the rebates paid to exporters of a particular product, only those amounts which the government providing such rebates has, to the satisfaction of the Secretary, estimated are paid by the producers of those products, or prior stage producers, in indirect taxes on any components physically incorporated in the exported product or its packing (making normal allowances for waste). The Department consistently has considered the export rebate of indirect taxes directly related to an exported product or its components as not being a bounty or grant under the countervailing duty law. Upon review, it has been concluded that this standard insofar as it applied to prior stage taxes will continue to guide the Treasury as it applies the countervailing duty law to the rebate of certain non-excessive indirect taxes.

All Treasury Decisions with respect to products imported from countries remitting or rebating on export value added taxes uniformly have determined that the remission or rebate of the full amount of final stage value added taxes is not a "bounty" or "grant" within the meaning of the countervailing duty law. In the decision announced last June, it was noted that a turnover tax system may be, in its economic effects, similar to a system using taxes on "value added." Accordingly, it was determined that as the amount of the final stage value added tax rebated or remitted to the exporter of merchandise from one country includes any taxes on prior stages and is not treated as a "bounty" or "grant", it would be inappropriate to deny to an exporter in a country using a cascade turnover tax system similar treatment with respect to individual indirect taxes paid both at the final stage and in prior stages of the production of the exported merchandise.

A final stage tax on value added is, in form and effect, no different from sales and excise taxes, whose non-excessive remission on the export of the affected merchandise has long been regarded as not constituting a bounty or grant. The principle of not regarding the non-excessive rebate of final stage sales and excise taxes as countervailable was affirmed by the Supreme Court in *Zenith Radio Corp. v. United States*, 437 U.S. 433 (1978). The rebate of the final stage sales tax in a cascade tax system will continue to be regarded as not constituting a bounty or grant under this rule.

However, in addition, all producers and exporters in a country in which a value added tax applies receive rebates of prior stage value added taxes, whether or not the product is exported. On the other hand, only exporters receive rebates of prior stage taxes under a cascade type tax, giving the latter system a potential for favoring exports. Furthermore, under a value added tax system, the total tax borne by the product is determined precisely and solely by its value at the final stage and it is irrelevant to the size and incidence of that tax and its rebate or remission upon exportation whether the taxes assessed at prior stages were on physical components of the final product, or, indeed, whether any taxes were assessed at earlier stages. On the other hand, the total tax borne by a product under a cascade type tax system is very difficult to determine, and may only in small part be composed of the final stage tax; the bulk of the tax burden may arise from taxes assessed at prior stages. Thus, whatever general similarity may exist between the two systems in broad economic effect, they differ in their application and in their impact upon manufacturers or exporters. Equalizing them is not required by either domestic law or international practice.

Furthermore, experience with a number of determinations made since the publication of the decisions announced in June suggests that the effort made to equalize the effects of the two tax systems is not practical. Nevertheless, the Department has long recognized the propriety of permitting rebates of prior stage indirect taxes on the physical components (or necessary waste) and packing of exported merchandise. Generally, these constitute the largest proportion of prior stage taxes incurred. Such taxes are readily identifiable and capable of reasonable estimation. This principle will continue to be applied. Other taxes, although in an accounting or economic sense perhaps regarded as "directly related" to production, may in fact relate to labor inputs or to elements of overhead. Rebates intended to cover such taxes, often numerous, complex and difficult to quantify, will be regarded as countervailable grants. This standard should be easily understood and appears to be fair and equitable.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-4345]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of Flushing, Genesee County, Mich.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of Flushing, Genesee County, Michigan. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the City of Flushing, Genesee County, Michigan.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of Flushing are available for review at the City Hall, Flushing, Michigan.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the City of Flushing, Genesee County, Michigan.

V 4 4 / 1 2 J A 1 7 7 9 UMI

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Flint River	Northeast corporate limit.	667
	2,700 feet downstream of Main Street.	669
	At Main Street	674
	2,650 feet upstream of Main Street.	677
	7,600 feet upstream of Main Street.	680
	5,300 feet downstream of east corporate limit.	684
	At east corporate limit	687
Cole Creek	20 feet downstream of Grand Trunk Western Railroad.	669
	80 feet upstream of Seymour Road.	674
	360 feet upstream of Seymour Road.	674
	1,430 feet upstream of Seymour Road.	679
	1,830 feet upstream of Seymour Road.	681
	120 feet downstream of Pierson Road.	684
	50 feet upstream of Pierson Road.	690
	540 feet upstream of Pierson Road.	691
	730 feet upstream of Pierson Road.	692
	200 feet downstream of Grand Trunk Western Railroad.	694
	50 feet downstream of Seymour Road.	696
	50 feet upstream of Seymour Road.	698
	550 feet upstream of Seymour Road.	699
	At southwest corporate limit.	702
Mud Creek	At corporate limit downstream of Morrish Road.	688
	50 feet downstream of Morrish Road.	691
	50 feet upstream of Morrish Road.	695
	450 feet upstream of Morrish Road.	695

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and the Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

Issued: December 8, 1978.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the City of New Madrid, New Madrid County, Mo.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the City of New Madrid, New Madrid County, Missouri. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the City of New Madrid, New Madrid County, Missouri.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the City of New Madrid are available for review at the City Hall, 560 Mott Street, New Madrid, Missouri

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for City of New Madrid, New Madrid County, Missouri.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mississippi River...	Adjacent to community..	304
Rainfall Ponding Within Community.	Intersection of Line Street and Mill Street.	297
	Intersection of Capital Boulevard and Mill Street.	297
	Intersection of Pinnell Lane and Second Street.	297
	Intersection of Dawson Road and Sycamore Street.	297

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this rule has been granted waiver of Congressional review requirements in order to permit it to take effect on the date indicated.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Town of Sanbornton, Belknap County, New Hampshire. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the Town of Sanbornton, Belknap County, New Hampshire.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Sanbornton, Belknap County, New Hampshire, are available for review at the Town Office, Sanbornton, New Hampshire.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the Town of Sanbornton, Belknap County, New Hampshire.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Black Brook	Mouth at Lake Winnisquam.	486
	950 feet Downstream of Black Brook Road.	486
	40 feet Downstream of Black Brook Road.	489
	Just Upstream of Black Brook Road.	492
	975 feet Upstream of Black Brook Road.	492
Chapman Brook	Mouth at Lake Winnisquam.	486
	1,650 feet Upstream of Bay Road.	486
	100 feet Downstream of Chapman Road.	491
	Just Upstream of Chapman Road.	494
	Just Downstream of Philbrook Road.	500
	Just Upstream of Philbrook Road.	502
	300 feet Upstream of Philbrook Road.	502
	50 feet Downstream of Poplar Road.	518
	50 feet Upstream of Poplar Road.	522
Tributary A (located entering Lake Winnisquam, approximately 700 feet North of the Mouth of Chapman Brook).	Mouth at Lake Winnisquam.	486
	40 feet Downstream of Lower Bay Road.	499
	Just Upstream of Lower Bay Road.	503
	50 feet Downstream of Bay Road.	517
	Just Downstream of Bay Road.	520
	Just Upstream of Bay Road.	523
	150 feet Upstream of Bay Road.	523
	1,260 feet Upstream of Bay Road.	547
	3,400 feet Upstream of Bay Road.	574
Salmon Brook	Downstream Corporate Limit.	414
	2,530 feet Downstream of Prescott Road.	418
	25 feet Upstream of Prescott Road.	468
	160 feet Upstream of Prescott Road.	472
	50 feet Downstream of Interstate 93.	587
	180 feet Upstream of Interstate 93.	588
	100 feet Downstream of Tilton Bridge Road.	589
	100 feet Upstream of Tilton Bridge Road.	591
	2,400 feet Upstream of Tilton Bridge Road.	594

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Amendments of 1978, Pub. L. 95-557, 92 Stat. 2080, this rule has been granted waiver of Congressional review requirements in order to permit it to take effect on the date indicated.

Issued: December 8, 1978.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Borough of Island Heights, Ocean County, N.J.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Borough of Island Heights, Ocean County, New Jersey.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the Borough of Island Heights, Ocean County, New Jersey.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Borough of Island Heights, Ocean County, New Jersey, are available for review at the Island Heights Borough Hall, Island Heights, New Jersey.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the Borough of Island Heights, Ocean County, New Jersey.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Barnegat Bay	Entire Shoreline	6

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719).

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Amendments of 1978, Pub. L. 95-557, 92 Stat. 2080, this rule has been granted waiver of Congressional review requirements in order to permit it to take effect on the date indicated.

Issued: December 8, 1978.

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation Determination for the Town of Maynard, Middlesex County, Mass.

AGENCY: Federal Insurance Administration, HUD.

ACTION: Final rule.

SUMMARY: Final base (100-year) flood elevations are listed below for selected locations in the Town of Maynard, Middlesex County, Mass. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

EFFECTIVE DATE: The date of issuance of the flood insurance rate map (FIRM), showing base (100-year) flood elevations, for the Town of Maynard are available for review at the Town Clerk's Office, Maynard, Mass.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations for the Town of Maynard, Middlesex County, Mass.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the final determinations of flood elevations for the Town of Maynard, Middlesex County, Mass.

This final rule is issued in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)). An opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. No appeals of the proposed base flood elevations were received from the community or from individuals within the community.

The Administrator has developed criteria for flood plain management in flood-prone areas in accordance with 24 CFR Part 1910.

The final base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Assabet River.....	At Acton-Maynard Town Line.	146
	120 feet Downstream of Waltham Street.	146
	700 feet Upstream of Waltham Street.	152
	At Walnut Street.....	155
	Just Downstream of Florida Road.	160
	1500 feet Upstream of Florida Road.	165
	100 feet Downstream of Mill Street.	169
	100 feet Upstream of Mill Street.	170
	130 feet Upstream of Great Road.	174
	Just Downstream of American Woolen Co. Dam.	175
	Just Upstream of American Woolen Co. Dam.	179
	At Western Corporate Limits.	180
Fort Pond Brook Branch.	160 feet Upstream of Stone Culvert.	200
	60 feet Upstream of Rockland Street.	205

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 1017-7]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Wood Residue-Fired Steam Generators

APPLICABILITY DETERMINATION

AGENCY: Environmental Protection Agency.

ACTION: Notice of Determination.

SUMMARY: This notice presents the results of a performance review of particulate matter control systems on wood residue-fired steam generators. On November 22, 1976 (41 FR 51397), EPA amended the standards of performance of new fossil-fuel-fired steam generators to allow the heat content of wood residue to be included with the heat content of fossil-fuel when determining compliance with the standards. EPA stated in the preamble that there were some questions about the feasibility of units burning a large portion of wood residue to achieve the particulate matter standard and announced that this would be reviewed. This review has been completed, and EPA concludes that the particulate matter standard can be achieved, therefore, no revision is necessary.

ADDRESSES: The document which presents the basis for this notice may be obtained from the Public Information Center (PM-215), U.S. Environmental Protection Agency, Washington, D.C. 20460 (specify "Wood Residue-Fired Steam Generator Particulate Matter Control Assessment," EPA-450/2-78-044.)

The document may be inspected and copied at the Public Information Reference Unit (EPA Library), Room 2922, 401 M Street, S.W., Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

Don R. Goodwin, Director, Emission Standards and Engineering Division, Environmental Protection Agency, Research Triangle Park, North Carolina 27711, telephone number (919) 541-5271.

SUPPLEMENTARY INFORMATION: On November 22, 1976, standards under 40 CFR Part 60, Subpart D for new fossil-fuel-fired steam generators were amended (41 FR 51397) to clarify that the standards apply to each fossil-fuel and wood residue-fired steam generating unit capable of firing fossil-fuel at a heat input of more than 73 megawatts (250 million Btu per hour). The primary objective of this amendment is to allow the heat input provided by wood residue to be used as a dilution agent in the calculations necessary to determine sulfur dioxide emissions. EPA recognized in the preamble of the amendment that questions remained concerning the ability of affected facilities which burn substantially more wood residue than fossil-fuel to comply with the standard for particulate matter. The preamble also stated that EPA was continuing to gather information on this question. The discussion that follows summarizes the results of EPA's examination of available information.

INTRODUCTION

Wood residue is a waste by-product of the pulp and paper industry which consists of bark, sawdust, slabs, chips, shavings, and mill trims. Disposal of this waste prior to the 1960's consisted mostly of incineration in Dutch ovens or open air tepees. Since then the advent of the spreader stroker boiler and the increasing costs of fossil-fuels has made wood residue an economical fuel to burn in large boilers for the generation of process steam.

There are several hundred steam generating boilers in the pulp and paper and allied forest product industry that use fuel which is partly or totally derived from wood residue. These boilers range in size from 6 megawatts (20 million Btu per hour) to 146 megawatts (500 million Btu per hour) and the total emissions from all boilers is estimated to be 225 tons of particulate matter per day after application of existing air pollution control devices.

Most existing wood residue-fired boilers subject to State emission standards are equipped with multitube-cyclone mechanical collectors. Manufacturers of the multitube collector have recognized that this type of control will not meet present new source standards and have been developing processes and devices to meet the new regulations. However, the use of these various systems on wood residue-fired boilers has not found widespread use to date, resulting in an information gap on expected performance of collector types other than conventional mechanical collectors.

In order to provide needed information in this area and to answer questions raised in the November 22, 1976 (41 FR 51397), amendment, a study was conducted on the most effective control systems in operation on wood residue-fired boilers. Also the amount and characteristics of the particulate emissions from wood residue-fired boilers was studied. The review that follows presents the results of that study.

PERFORMANCE REVIEW

The combustion of wood residue results in particulate emissions in the form of bark char or fly ash. Entrained with the char are varying amounts of sand and salt, the quantity depending on the method by which the original wood was logged and delivered. The fly ash particulates have a lower density and are larger in size than fly ash from coal-fired boilers. In general, the bark boiler exhaust gas will have a lower fly ash content than emissions from similar boilers burning physically cleaned coals or low-sulfur Western coals.

The bark fly ash, unlike most fly ash, is primarily unburned carbon. With collection and reinjection to the

V 4 4 / 1 2 J A 1 7 7 9 UMI

boiler, greater carbon burnout can increase boiler efficiency from one to four percent. The reinjection of collected ash also significantly increases the dust loading since the sand is also recirculated with the fly ash. This increased dust loading can be accommodated by the use of sand separators or decantation type dust collectors. Collectors of this type in combination with more efficient units of air pollution control equipment constitute the systems currently in operation on existing plants that were found to operate with emissions less than the 43 nanograms per joule (0.10 pounds per million Btu) standard for particulate matter.

A survey of currently operated facilities that fire wood residue alone or in combination with fossil-fuel shows that most operate with mechanical collectors; some operate with low energy wet scrubbers, and a few facilities currently use higher energy venturi scrubbers (HEVS) or electrostatic precipitators (ESP). One facility reviewed is using a high temperature baghouse control system.

Currently, the use of multitube-cyclone mechanical collectors on hogged-fuel boilers provides the sole source of particulate removal for a majority of existing plants. The most commonly used system employs two multiclones in series allowing for the first collector to remove the bulk of the dust and a second collector with special high efficiency vanes for the removal of the finer particles. Collection efficiency for this arrangement ranges from 65 to 95 percent. This efficiency range is not sufficient to provide compliance with the particulate matter standard, but does provide a widely used first stage collection to which other control systems are added.

Of special note is one facility using a Swedish designed mechanical collector in series with conventional multiclone collectors. The Swedish collector is a small diameter multitube cyclone with a movable vane ring that imparts a spinning motion to the gases while at the same time maintaining a low pressure differential. This system is reducing emissions from the largest boiler found in the review to 107 nanograms per joule.

Electrostatic precipitators have been demonstrated to allow compliance with the particulate matter standard when coal is used as an auxiliary fuel. Available information indicates that this type of control provides high collection efficiencies on combination wood residue coal-fired boilers. One ESP collects particulate matter from a 50 percent bark, 50 percent coal combination fired boiler. An emission level of 13 nanograms per joule (.03 pounds per million Btu) was obtained using test methods recommended by the American Society of Mechanical Engineers.

The fabric filter (baghouse) particulate control system provides the highest collection efficency available, 99.9 percent. On one facility currently using a baghouse on a wood residue-fired boiler, the sodium chloride content of the ash being filtered is high enough (70 percent) that the possibility of fire is practically eliminated. Source test data collected with EPA Method 5 showed this system reduces the particulate emissions to 5 nanograms per joule (0.01 pounds per million Btu).

The application of fabric filters to control emissions from hogged fuel boilers has recently gained acceptance from several facilities of the paper and pulp industry, mainly due to the development of improved designs and operation procedures that reduce fire hazards. Several large sized boilers, firing salt and non-salt laden wood residue, are being equipped with fabric filter control systems this year and the performance of these installations will verify the effectiveness of fabric filtration.

Practically all of the facilities currently meeting the new source particulate matter standard are using wet scrubbers of the venturi or wet-impinger type. These units are usually connected in series with a mechanical collector. Three facilities reviewed which are using the wet-impingement type wet scrubber on large boilers burning 100 percent bark are producing particulate emissions well below the 43 nanograms per joule standard at operating pressure drops of 1.5 to 2 kPa (6 to 8 inches, H_2O). Five facilities using venturi type wet scrubbers on large boilers, two burning half oil and half bark and the other three burning 100 percent bark, are producing particulate emissions consistently below the standard at pressure drops of 2.5 to 5 kPa (10 to 20 inches, H_2O).

One facility has a large boiler burning 100 percent bark emitting a maximum of 5023 nanograms per joule of particulate matter into a multi-cyclone dust collector rated at an efficiency of 87 percent. The outlet loading from this mechanical collector is directed through two wet impingement-type scrubbers in parallel. With this arrangement of scrubbers, a collection efficiency of 97.7 percent is obtained at pressure drops of 2 kPa (8 inches, H_2O). Source test data collected with EPA Method 5 showed particulate matter emissions to be 15 nanograms per joule, well below the 43 nanograms per joule standard.

Another facility with a boiler of similar size and fuel was emitting a maximum of 4650 nanograms per joule into a multi-cyclone dust collector operating at a collection efficiency of 66 percent. The outlet loading from this collector is drawn into two wet-impingement scrubbers arranged in parallel. The operating pressure drop on these scrubbers was varied within the range of 1.6 to 2.0 kPa (6 to 8 inches, H_2O), resulting in a proportional decrease in discharged loadings of 25.8 to 18.5 nanograms per joule. Source test data collected on this source was obtained with the Montana Sampling Train.

Facilities using a venturi type wet scrubber were found to be able to meet the 43 nanogram per joule standard at higher pressure drops than the impingement type scrubber. One facility with a large boiler burning 100 percent bark had a multi-cyclone dust collector in series with a venturi wet scrubber operating at a pressure drop of 5 kPa (20 inches, H_2O). Source test data using EPA Method 5 showed this system consistently reduces emissions to an average outlet loading of 17.2 nanograms per joule of particulate matter. Another facility with a boiler burning 40 percent bark and 60 percent oil has a multi-cyclone and venturi scrubber system obtaining 25.8 nanograms per joule at a pressure drop of 2.5 kPa (10 inches, H_2O). The Florida Wet Train was used to obtain emission data on this source. A facility of similar design but burning 100 percent bark is obtaining the same emission control, 25.8 nanograms per joule, at a pressure drop of 3 kPa (12 inches, H_2O). Source test data collected on this source were obtained with the EPA Method 5.

This review has shown that the use of a wet scrubber, ESP, or a baghouse to control emissions from wood bark boilers will permit attainment of the particulate matter standard under 40 CFR Part 60. The control method currently used which has the widest application is the multitube cyclone collector in series with a venturi or wet-impingement type scrubber. Source test data have shown that facilities which burn substantially more wood residue than fossil-fuel have no difficulty in complying with the 43 nanogram per joule standard for particulate matter. Also the investigated facilities have been in operation successfully for a number of years without adverse economical problems. Therefore EPA has concluded from evaluation of the available information that no revision is required of the particulate matter standard for wood residue-fired boilers.

Dated: January 3, 1979.

DOUGLAS M. COSTLE,
Administrator.

Title 49—Transportation

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER C—ACCOUNTS, REPORTS, AND RECORDS

[Docket No. 36873]

PART 1201—RAILROAD COMPANIES

Subpart A—Uniform System of Accounts

JANUARY 10, 1979.

DEFINITION OF RAIL TRANSPORTATION PROPERTY

AGENCY: Interstate Commerce Commission.

ACTION: Final rule.

SUMMARY: The Railroad Revitalization and Regulatory Reform Act of 1976 made it illegal for a State to levy or collect an ad valorem property tax on rail transportation property at a tax rate that exceeds the tax rate applicable to commercial and industrial property in the same assessment jurisdiction. This final rule defines rail transportation property to include all property and other assets that comprise the entire operating unit devoted to the rail transportation service. This revision will provide a uniform definition for State taxing authorities to use in determining ad valorem and other property taxes for railroads.

DATES: This rule is effective for the year beginning January 1, 1979.

FOR FURTHER INFORMATION CONTACT:

Bryan Brown, Jr., Chief, Section of Accounting, Tele. No. (202) 275-7448.

SUPPLEMENTAL INFORMATION: Section 306 of the Railroad Revitalization and Regulatory Reform Act (4-R Act) added a new section to the Interstate Commerce Act, section 11503 (formerly section 28), which makes it unlawful for any State to levy or collect an ad valorem property tax on rail transportation property at a tax rate that exceeds the tax rate applicable to commerical and industrial property in the same assessment jurisdiction (49 U.S.C. 11503(b)(3)). "Rail transportation property" means property, as defined by the Commission (49 U.S.C. 11503 (a)(3)). In a notice of proposed rulemaking published August 3, 1978 (43 FR 34172), the Commission noted that its interpretation of rail transportation property did not consider cash, accounts receivable, materials and supplies and the franchise or "going concern" value, thus making it possible for some States to circumvent the intent of section 306. The Commission proposed to redefine rail transportation property to include all assets comprising the entire operating unit devoted to transportation service.

In response to its notice, the Commission received comments from Western Pacific Railroad Company (WPRC), the Association of American Railroads (AAR), and Trailer Train Company (TTX) and American Rail Boxcar Company (Railbox).

WPRC expressed its concern that the revised definition, which includes a Railroad's "going concern" value, could lead to increased Federal income taxes for certain railroads. In recent Federal tax cases, the courts have ruled that, in acquisitions where going concern value is included in the adjusted tax basis of the assets, the tax basis of depreciable property must be reduced by the going concern value. This reduction in basis would lessen the depreciation expense, which would correspondingly increase income taxes. The Commission believes that section 11503(a) makes it clear that the definition of "Rail transportation property" being adopted in this proceeding applies only for purposes of section 11503. This definition does not affect transportation property as defined by the Internal Revenue Code nor does it affect the tax basis of depreciable property for Federal income tax purposes.

In response to the concern expressed by TTX and Railbox, the Commission has adopted a definition which clearly indicates that rail transportation property includes equipment held under lease or pooling agreements. This has always been the Commission's intent. In a notice published May 10, 1976 (41 FR 19185), the Commission stated that transportation property leased from others, that is used but not owned, will be considered transportation property if such property would be included in Account 731, Road and equipment property, and Account 732, Improvements on leased property, if owned.

In its comments, AAR unconditionally endorsed the revised definition and expressed its belief that it will provide for more effective interpretation of accounting regulations.

This is not a major Federal action significantly affecting the quality of the human environment.

This action is taken under the authority of 49 U.S.C. 10311 and 11142 and 5 U.S.C. section 553.

It is ordered: 49 CFR part 1201, Subpart A is amended by adding definition Number 33 "Rail Transportation Property" to "Regulations Prescribed," section (ii), "Definitions", as set forth below.

Decided December 13, 1978.

By the Commission, Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham and Clapp.

H.G. HOMME, Jr.,
Secretary.

33. "Rail Transportation Property." Rail transportation property is all property and other assets, irrespective of ownership, that comprise the entire operating unit devoted to rail transportation service. This definition comprises the following accounts:

701 Cash
702 Temporary cash investments
703 Special deposits
704 Loans and notes receivable
705 Accounts receivable—interline and other balances
706 Accounts receivable—customers
707 Accounts receivable—other
708.5 Receivables with affiliated companies
709 Accrued accounts receivable
710 Working funds
711 Prepayments
712 Material and supplies
713 Other current assets
714 Deferred income tax charges
731 Road and equipment property
732 Improvements on leased property

[Ex Parte No. MC-85]

PART 1062—SPECIAL REGULATIONS FOR FOR-HIRE MOTOR CARRIERS ENGAGED IN THE TRANSPORTATION FOR RECYCLING OR REUSE OF "WASTE" PRODUCTS IN FURTHERANCE OF RECOGNIZED POLLUTION CONTROL PROGRMS

Statement of Policy

AGENCY: Interstate Commerce Commission.

ACTION: Statement Policy.

SUMMARY: This statement is being issued by the Commission to inform the public that the Commission no longer follows the practice of limiting grants of authority to participate in the Special Certificate of Public Convenience and Necessity (49 CFR 1062.1(e)) to specified points. Therefore, when the Commission publishes the notice of the filing of an application, it will not longer specify the specific points applicant seeks to serve.

EFFECTIVE DATE: This policy is effective January 17, 1979.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg (202) 275-7292.

V 4 4 / 1 2 J A 1 7 7 9 UMI

SUPPLEMENTARY INFORMATION: The Special Rules set forth in 49 CFR 1062.1 govern the filing and handling of applications seeking the right to operate pursuant to a special certificate of public convenience and necessity authorizing operations in interstate or foreign commerce, by motor vehicle over irregular routes, of "waste" products for recycling or reuse in furtherance of recognized pollution control programs, between all points in the United States (including Alaska and Hawaii). Under this regulation, once an applicant has established that it seeks to transport "waste" products pursuant to a "recognized pollution control program," as these terms are used in the regulation, and that it is otherwise fit, it is entitled to participate in the Special Certificate. In the past, the Commission's notice of the authority sought published in the FEDERAL REGISTER specified the points to be served. Grants of authority were limited to these points. The Commission no longer follows the practice of limiting grants of authority to participate in the special certificate to specified points. The particular points an applicant serves are limited only by the tariffs it files with the Commission. Therefore, pursuant to 49 CFR 1062.1(d), it is now the policy of the Commission to publish in the FEDERAL REGISTER a notice of each applicant's intention to participate in the special certificate of public convenience and necessity "between points in the United States". The specific commodities sought as well as a named sponsor or sponsors will continue to be listed in the FEDERAL REGISTER notice. The appendix to this notice contains a sample FEDERAL REGISTER notice under the new policy.

Dated December 20, 1978.

By the Commission, Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham, and Clapp. Commissioner Stafford dissenting.

H. G. HOMME, Jr.,
Secretary.

APPENDIX—SAMPLE FEDERAL REGISTER NOTICE

INTERSTATE COMMERCE COMMISSION

TRANSPORTATION OF "WASTE" PRODUCTS FOR REUSE OR RECYCLING

SPECIAL CERTIFICATE LETTER NOTICE(S)

The following letter notices request participation in a Special Certificate of Public Convenience and Necessity for the transportation of "waste" products for reuse or recycling in furtherance of a recognized pollution control program under the Commission's regulations (49 CFR 1062) promulgated in *"Waste" Products*, Ex Parte No. MC-85, 124 M.C.C. 583 (1976). Requests are processed as seeking authority between all points in the United States.

An original and one copy of protests (including protestant's complete argument and evidence) against applicant's participation may be filed with the Interstate Commerce Commission *within 20 days* from the date of this publication. A copy must also be serve upon applicant or its representative. Protests against the applicant's participation will not operate to stay commencement of the proposed operation.

If the applicant is not otherwise informed by the Commission, operations may commence *within 30 days* of the date of its notice in the FEDERAL REGISTER, subject to its tariff publication effective date.

P-O-79 (SPECIAL CERTIFICATE—WASTE PRODUCTS) Filed July 25, 1979. Applicant: ABC CARRIERS CORPORATION, P.O. Box 000, Houston, TX 77088. Representative: John Doe, K Street, NW., Washington, D.C. 20005. Sponsor: Sunshine Recyclers, Main Street, Houston, TX 77088. Commodities: Scrap metal and waste paper.*

By the Commission.

H. G. HOMME, Jr.,
Secretary.

[FR Doc. 79-1890 Filed 1-16-79; 8:45 am]

*Applicants may seek broader commodity authority.

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

[6750-01-M]

FEDERAL TRADE COMMISSION

[16 CFR Part 461]

CHILDRENS ADVERTISING

Revisions of Notice of Proposed Trade Regulation Rulemaking and Public Hearing

AGENCY: Federal Trade Commission.

ACTION: Revision of notice of proposed rulemaking.

SUMMARY: This notice sets forth a revision in the Commission's prior notice of a rulemaking to consider certain restrictions regarding television advertising directed towards children (43 FR 17967 (April 27, 1978)). The revision concerns a requirement to produce studies and surveys pertaining to a person's testimony or comments.

DATES: Comments should be submitted on or before February 1, 1979.

ADDRESS: All documents submitted in response to this notice should be submitted in five copies, when feasible, to Morton Needleman, Presiding Officer, Children's Advertising, Federal Trade Commission, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Barry R. Rubin, Assistant General Counsel, Federal Trade Commission, 6th & Pennsylvania, N.W., Washington, D.C. 20580; (202) 523-3520.

SUPPLEMENTARY INFORMATION: In the Commission's original notice of proposed rulemaking, paragraph D(2)(e) provided as follows:

e. *Other information relevant to the rule.* Any person who seeks to present information either orally or in writing, shall also present any studies or surveys in the possession, custody or control of the person or the organization he represents or is otherwise compensated by in connection with this proceeding which support, contradict or otherwise pertain to the person's presentation. This need not include information submitted by any other person or information which is publicly available.

On April 28, 1978, the Grocery Manufacturers of America moved for "clarification" of the requirements of this paragraph, raising eleven specific questions. In Order No. 2 dated May 9, 1978, the Presiding Officer promptly granted the motion and gave answers to the questions. By order issued July 31, 1978, the Commission endorsed the Presiding Officer's rulings (pp. 13-15). As the Commission noted in its order, paragraph D(2)(e), adopted pursuant to the Commission's authority under Sections 6(g) and 18(c)(2) of the FTC Act, was not entirely novel, but rather was derived from a similar provision in the general rules of the Food & Drug Administration for formal public evidentiary hearings, 21 CFR §§ 12.85(a)(2), (b).[1]

Although the Presiding Officer and the Commission had demonstrated a willingness to deal promptly with questions raised with respect to paragraph D(2)(e), several persons interested in the subject matter of the Commission's rulemaking filed suit seeking to have paragraph D(2)(e) held invalid on various grounds, including grounds based on the plaintiffs' asserted concerns about possible applications of paragraph D(2)(e) which they had not raised before the Presiding Officer or the Commission. The district court dismissed these actions on the ground that such objections should be presented to the Commission in the first instance, subject to judicial review in the course of review of any trade regulation rule the Commission might adopt. *Chocolate Mfrs. Ass'n Inc., et al.* v. *FTC*, No. 78-1372 (D.D.C. Nov. 17, 1978). In the course of the hearing, however, the court expressed concern about a number of points pertaining to paragraph D(2)(e), and suggested that the Commission give it further consideration. Other questions concerning paragraph D(2)(e) were raised in connection with comments or proposed testimony actually submitted on or before the deadline (November 27, 1978).

Accordingly, the Commission has further considered paragraph D(2)(e) in light of its intended purpose and the questions that have been raised about it either before the Commission or in court, and has concluded that the following revisions should be made to clarify or refine its appropriate scope:

1. The revised paragraph defines "studies" and "surveys."

2. The revised paragraph applies only to persons who refer to or rely upon any published or unpublished study or survey in their testimony or comments.

3. The revised paragraph makes clear that it applies only to the person or organization on whose behalf testimony or comments are submitted, and not to the person's attorney or the members of an organization (unless the attorney or member also submits testimony or comments on the attorney or member's behalf).

4. The revised paragraph requires identification and production only of those studies or surveys that are known to or in the files of an individual involved in the preparation of the testimony or comments.

5. The revised paragraph makes clear that relief may be sought as to studies that are confidential, privileged, or not under a person's control, such as limitations on access or use, masking, deletion, coding, or non-production.

6. The revised paragraph makes clear that submission of materials to the Presiding Officer in connection with a request for relief as to asserted-ly privileged materials does not waive the privilege.

7. The revised paragraph explicitly authorizes the Presiding Officer to impose appropriate sanctions for unexcused noncompliance.

8. The revised paragraph expressly requires that the Presiding Officer specifically indicate in the rulemaking record his disposition of requests for relief and his imposition of sanctions.

9. The revised paragraph, in an effort to minimize unnecessary duplication of materials in the rulemaking record, specifies that studies or surveys called for by paragraph D(2)(e) should not be produced if they are publicly available or have already been made part of the rulemaking record.

It has been suggested that some persons may have declined to submit comments or proposed testimony because of questions they had about paragraph D(2)(e) and that the contents of comments or proposed testimony submitted by others may have been af-

[1] Section 12.85(a) provides: Before the notice of hearing is published pursuant to § 12.35, the director of the bureau responsible for the matters involved in the hearing shall submit to the Hearing Clerk:

• • • • •

(2) All documents in his files containing factual data and information, whether favorable or unfavorable to his position, which relate to the issues involved in the hearing.

(3) All other documentary data and information on which he relies.

Section 12.85(b) extends this requirement to each participant in the hearing.

V 4 4 / 1 2 J A 1 7 7 9 UMI

fected by questions the submitter had about paragraph D(2)(e). Although the Commission has seen little persuasive evidence that this is the case, in an effort to assure maximum participation in the rulemaking the Commission is affording an additional opportunity for submission of comments or proposed testimony or revisions therein by those whose prior actions may have been based on assumptions about the scope of paragraph D(2)(e) contrary to the scope as set forth in this notice. The Commission is also authorizing and directing the Presiding Officer to implement this revision with respect to comments and proposed testimony previously submitted.

Accordingly, paragraph D(2)(e) of the Commission's Children Advertising, rulemaking notice is amended to read as follows:

e. Studies and surveys relevant to a person's presentation. Any person who seeks to present testimony or written comments which refer to or rely upon any study or survey whether published or unpublished shall also identify and submit to the presiding officer any studies or surveys in existence as of the date of the submission of the comments or proposed testimony that (1) are in the possession, custody or control of that person or of the organization he represents or is otherwise compensated by in connection with this proceeding; (2) support, contradict or otherwise pertain to the person's testimony or comments; and (3) are known to or in the files of any individual involved in the preparation of the testimony or comments. Such studies and surveys should not be submitted if they are publicly available or have been made part of the rulemaking record by any other person. For purposes of this paragraph, the terms "survey" and "study" means research and investigations such as literature searches, experiments, clinical tests, and polls.

The requirements of this paragraph apply only to the person on whose behalf testimony is given or comment made, and do not apply to the attorneys for such a person, unless and to the extent that the attorneys themselves testify or submit comments on their own behalf, and do not apply to members of an organization that testifies or comments unless and to the extent that the member also testifies or comments on the member's own behalf.

If a study or survey is deemed privileged or confidential, or is subject to the control of a third party, the person may request that the presiding officer grant relief from the operation of this paragraph, in which event the study or survey will not be put on the rulemaking record until the presiding officer has disposed of the request. The submission of a survey or study to the presiding officer pending its disposition shall not be deemed a waiver of any privilege asserted in a request for relief. Such relief may include, for example, *in camera* treatment under appropriate limitations on access, use or disclosure; deletion, masking or coding of data, a determination that in view of the relative pertinence and sensitivity, or absence of control, the study or survey need not be produced; or such other relief as the presiding officer may deem reasonable and appropriate.

In the event of unexcused or unjustified non-compliance with this paragraph, the presiding officer may (1) impose appropriate sanctions, including, for example, striking or assigning diminished weight to the person's testimony or comment, or drawing adverse inferences; and (2) may issue subpoenas.

All determinations made by the presiding officer with respect to a request for relief or the imposition of sanctions under this paragraph shall be specifically identified and made part of the rulemaking record.

On or before February 1, 1979, any person may submit comments or proposed testimony or revisions in previously submitted comments or proposed testimony or request from the Presiding Office and extension of time to make such a submission. Such requests should indicate the length of time desired and whether the person desires to present his views orally; requests for oral presentations will be accommodated at the close of the hearings in Washington, D.C., or as soon thereafter as practicable. Persons submitting comments or proposed testimony or revisions therein under this provision must (1) certify that the prior failure to submit or the difference embodied in the revision was solely the consequence of the person's understanding that the meaning and potential effect of this paragraph D(2)(e) of the Commission's original notice of proposed rulemaking was otherwise than as delineated in this revision; (2) specify the particular respects in which the original version of paragraph D(2)(e) caused the person not to submit testimony or comments or to submit testimony or comments in the form originally submitted as opposed to the revised form; and (3) certify that the provisions of paragraph D(2)(e) as revised have been met.

The Presiding Officer is authorized and directed to apply paragraph D(2)(e) as revised by this notice to comments and proposed testimony previously submitted to the maximum extent possible to assure that its purpose is served without substantially prejudicing those who wish to participate in the rulemaking.

By direction of the Commission. dated January 9, 1979. Commissioner Pitofsky and Chairman Pertschuk did not participate.

CAROL M. THOMAS,
Secretary.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Federal Insurance Administration

[24 CFR Part 1917]

[Docket No. FI-4900]

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Athens, Limestone County, Alabama

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Athens, Limestone County, Alabama. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the City Clerk, City Hall, P.O. Box 268, Athens, Alabama. Send comments to: Honorable DeWitt Garratt, Mayor of Athens, or Mr. Bill Owens, City Clerk, Athens City Hall, P.O. Box 268, Athens, Alabama 35611.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Athens, Limestone County, Alabama, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Swan Creek	Just downstream of City Street.	635
	Just upstream of U.S. Highway 72.	657
	Just upstream of State Highway 251.	662
	Just downstreamstream of Elkton Street.	706
Tributary to Swan Creek at Mile 9.74.	Just upstream of Hobbs Street.	676
	Just upstream of Elkton Street.	706
Town Creek	Just upstream of Humane Road.	652
	Just upstream of Washington Street.	690
	Just downstream of Elm Street.	710
Tributary to Town Creek Mile 2.21.	Just downstream of Monroe Street.	675
	Just downstream of Levert Street.	687
	Approximately 100 feet downstream of Sommers Road.	696
Tributary to Town Creek Mile 3.91.	Approximately 60 feet downstream of Westbrook Street.	706
	Approximately 110 feet downstream of Hines Street.	700

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of East St. Louis, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a)).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Mississippi River...	At southern corporate limits.	426
	800 feet north of Interstate 70.	427
	At northern corporate limits.	428
Interior drainage within community due to rainfall (ponding AH zones).	500 feet south of St. Clair Avenue along Lansdowne Street.	409
	800 feet north of St. Clair Avenue along 2nd Street.	419
	Intersection of Exchange Avenue and 13th Street.	416
	Intersection of College Avenue and 18th Street.	416
	Intersection of St. Louis Avenue and 7th Street.	416
	Intersection of Bond Avenue and 4th Street.	409
	Intersection of Missouri Avenue and 24th Street.	413
	500 feet south of State Street along 31st Street.	416
	500 feet north of Belmont Avenue along 39th Street.	414
	Intersection of Audubon Avenue and 25th Street.	415
	Intersection of Bushmore Avenue and 35th Street.	414
	Intersection of Dickman Place and 61st Street.	413
	500 feet east of Harding Ditch along Marybell Avenue.	417

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, Pub. L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of St. John, Lake County, Indiana

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of St. John, Lake County, Indiana. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town Hall, Clerk's Office, West 93rd Street, St. John, Indiana. Send comments to: The Honorable William Tuley, President of Town Board, Town of St. John, Town Hall, West 93rd Street, St. John, Indiana 46373. Attention: Ms. Betty Siedelmann, Town Clerk.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of St. John, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Bull Run.....	At the confluence with West Creek.	675
	Just downstream of Dirt Road.	676
	Just downstream of White Oak Avenue (corporate limits).	679
St. John Ditch.....	At the confluence with West Creek.	675
	At Farm Lane.....	678
	Just downstream of U.S. 41.	683
	Just upstream of U.S. 41	686
	Just downstream of Conrail.	687
	Just upstream of Conrail.	691
	Just upstream of Louisville & Nashville Railroad.	694
	3,750 feet upstream of Hart Street (at upstream corporate limits).	694
West Creek.....	Downstream corporate limits.	674
	Confluence with St. John Ditch & Bull Run.	675

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and the Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted wavier of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Village of Tangipahoa, Tangipahoa Parish, Louisiana

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Village of Tangipahoa, Tangipahoa Parish, Louisiana. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the City Clerk, City Hall, P.O. Box 156, Tangipahoa, Louisiana. Send comments to: Honorable Walter D. Tyrney, Mayor of the Village of Tangipahoa or Ms. Betty Lou Hutchinson, Town Clerk, Town Hall, P.O. Box 156, Tangipahoa, Louisiana.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Village of Tangipahoa, Tangipahoa Parish, Louisiana, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Beaver Creek	At the Eastern Corporate Limits.	173
	Just upstream of U.S. Highway 51.	176
	Approximately 170 feet west of L.A. Highway 1050 along the Northern Corporate Limits.	180

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Seekonk, Bristol County, Massachusetts; Correction

AGENCY: Federal Insurance Administration, HUD.

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 43 FR 42271 of the FEDERAL REGISTER of September 20, 1978.

EFFECTIVE DATE: September 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

The following:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum)
Ten Mile River	Corporate limit near Central Avenue.	67
Oak Hill Stream	At northern Corporate limit.	79
Coles Brook	At western corporate limit (Mouth at Central Pond).	52
Runnins River	Just downstream of School Street.	10

Should be corrected to read:

Ten Mile River	Just upstream of Central Avenue.	67
Oak Hill Stream	At downstream corporate limit.	79
Coles Brook	Mouth at Central Pond.	52
Runnins River	Mouth at Barrington River.	10

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Township of Gaines, Genesee County, Michigan

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Township of Gaines, Genesee County, Michigan. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at 12124 West Hill Road, Swartz Creek, Michigan. Send comments to: Mr. Rodney May, Township Supervisor, Township of Gaines, 9305 Shendon Road, Gaines, Michigan 48436.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of Gaines, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum)
West Branch Swartz Creek.	Downstream corporate limits.	772
	About 1,175 feet upstream of corporate limits.	772
Crapo Drain	Mouth at Algor Creek	772
	2,400 feet upstream of Van Vleet Road.	773
Davison Drain	Downstream corporate limits.	771
	2,400 feet upstream of corporate limits.	771
	300 feet downstream of Hill Road.	778
	2,000 feet upstream of Hill Road.	784
	About 2,100 feet upstream of Hill Road.	786
	About 125 feet upstream of Duffield Road.	794
	350 feet upstream of Duffield Road.	797
	1,250 feet upstream of Duffield Road.	797
Jones Creek	Downstream corporate limits.	771
	1,550 feet downstream of Reid Road.	772
	2,500 feet upstream of Grand Trunk Western Railroad.	782
	Just downstream of Duffield Road.	786
	Just upstream of Duffield Road.	787
	1,400 feet upstream of Grand Blanc Road.	789
	3,000 feet upstream of Grand Blanc Road.	793
Alger Creek	Downstream corporate limits.	772
	Just upstream of Hill Road.	774
	Just upstream of Reid Road.	784
	Just downstream of Morrish Road.	789
	Just upstream of Morrish Road.	791
	Just downstream of Grand Blanc Road.	795

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Township of Lake, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a)).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Lake Michigan	Lake Michigan (entire length of shoreline).	584

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Township of Shelby, Macomb County, Michigan; Correction

AGENCY: Federal Insurance Administration, HUD.

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 43 FR 50201 of the FEDERAL REGISTER of October 27, 1978.

EFFECTIVE DATE: October 27, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

The following:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Newland Drain	1,100 feet downstream of northern corporate limits.	738
	At northern corporate limits.	741

Should be corrected to read:

Newland Drain	1,100 feet downstream of 25 Mile Road.	738
	At 25 Mile Road	741

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Scribner, Dodge County, Nebraska

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Scribner, Dodge County, Nebraska.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Hall, Scribner, Nebraska. Send comments to: The Honorable Donald Berg, Mayor, City of Scribner, c/o City Clerk's Office, Scribner, Nebraska 68057.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Scribner, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selection locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Elkhorn River	Downstream extraterritorial limits.	1,244
	Just downstream of Bridge Street.	1,253
	Upstream extraterritorial limits.	1,260
Pebble Creek	Downstream extraterritorial limits.	1,252
	Just downstream of Main Street.	1,254
	Approximately 400 feet upstream of Main Street.	1,256
	Just downstream of County Road 13.	1,259
	Upstream extraterritorial limits.	1,262

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and the Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Village of Snyder, Dodge County, Nebraska

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Village of Snyder, Dodge County, Nebraska. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Village Office, Snyder, Nebraska. Send comments to: The Honorable David Heywood, Chairman of the Village Board, Village of Snyder, Village Office, Snyder, Nebraska 68664.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Village of Snyder, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Middle Pebble Creek.	Just upstream of County Road 16.	1,312
	500 feet downstream from Rangeline Street.	1,317
	700 feet upstream from Rangeline Street.	1,322
	1.36 miles upstream from Rangeline Street.	1,326

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and the Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of LaGrange, Dutchess County, New York

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of LaGrange, Dutchess County, New York.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the La-Grange Town Hall, Springham Road, Pleasant Valley, New York.

Send comments to: Mr. Arthur McCluskey, Town Supervisor, or Mr. George Wade, Town Board Member, LaGrange Town Hall, Springham Road, Pleasant Valley, New York 12569.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of LaGrange, Dutchess County, New York in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Wappinger Creek	Approximately 425 feet downstream of State Route 376.	134
	Approximately 1500 feet upstream of Red Oaks Mill Dam.	148
	Just upstream of State Route 55.	160
Branch 3	Just upstream of Noxon Road.	245
Wappinger Creek	Just downstream State Highway 55.	345
Branch 4	Approximately 100 feet upstream of Sleight-Plass Road.	178
Wappinger Creek	Just downstream of Birch Hill Drive.	250
	Just upstream of Birch Hill Drive.	258
	Old Overlook Road	362
Sprout Creek	Just upstream of Noxon Road.	297
	Just upstream of Stringham Road.	311
	Just upstream of Barmore Road.	336
Jackson Creek	Approximately 100 feet downstream of Arthursburg Road.	307
	Approximately 60 feet upstream of Arthursburg Road.	310
	Emans Road	344
	Just downstream of State Route 82.	365
Branch 3	Just upstream of Todd Hill-Bushwick Road.	308
Sprout Creek	Dr. Fink Road	315
Branch 4	Just upstream of Velie Road.	329
Sprout Creek	Just downstream of State Route 82.	385
	Just upstream of State Route 82.	390
Whortle Kill Creek.	Just upstream of Arthursburg Road.	339
	Just upstream of Clapp Hill Road.	400

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for Town of Webster, Monroe County, New York

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Webster, Monroe County, New York. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Town of Webster, Monroe County, New York. Send comments to: Mr. William J. Lochner, Town Supervisor of Webster, 1000 Ridge Road, Webster, New York 14580.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Webster, Monroe County, New York in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more

stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Fourmile Creek	Confluence with Lake Ontario.	249
	Lake Road	272
	Salt Road Upstream	284
	Basket Road Upstream	316
	Woodward Road Upstream.	343
	Schlegel Road Upstream	385
	County Line Road Upstream.	395
	Ridge Road Upstream	432
	Salt Road	441
	State Road	455
Mill Creek	Downstream Corporate Limits.	274
	Woodhull Road	288
	Imperial Drive Upstream.	345
	Wall Road Upstream	352
	Klem Road	359
	Holley Road	375
	Orchard Street Upstream.	398
	Sanford Street	449
	State Road	479
Shipbuilders Creek.	Lake Road	264
	Vosburg Road	282
	Upstream Conrail	289
	Klem Road	336
	Gravel Road	389
	Adeline Drive	403
	Route 404	428
East Branch Shipbuilders Creek.	Upstream Conrail	328
	Klem Road Upstream	349
	Independence Drive Upstream.	363
	Fivemile Line Road	396
	Route 104 (Ridge Road).	428

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Statesville, Iredell County, North Carolina

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Statesville, Iredell County, North Carolina. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the City Clerk, City Hall, P.O. Box 1111, Statesville, North Carolina. Send comments to: Mayor Thomas Fanjoy or Mr. Jerry Loudy, City Planner, City Hall, P.O. Box 1111, Statesville, North Carolina.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Statesville, Iredell County, North Carolina, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Third Creek	Just upstream of Amity Hill Road.	774
	Just downstream of U.S. Highway 21.	787
	Just downstream of Buffalo Shoals Road.	801
Fourth Creek	Just upstream of Broad Street.	773
	Just downstream of I-77	787
	Just upstream of U.S. Highway 21.	795
Morrison Creek	Confluence with Fourth Creek.	798
	Just upstream of N.C. State Route 1907.	819
Gregory Creek	Gaither Road	819
	Just downstream of N.C. Highway 115.	825
Free Nancy Branch.	Just upstream of Georgia Avenue.	805
	Just upstream of North Mulberry Street.	847
Tributary A	Just upstream of Gregory Road.	850
	Just upstream of Hendricks Road.	873
Tributary B	Just downstream of Newton Drive.	838
Tributary 1	Approximately 1700 feet upstream of the confluence with Fourth Creek.	771
Tributary 2	Valley Stream Road	808
	Just downstream of Salisbury Road.	834
Tributary 3	Just upstream of I-40	803

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and the Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Thomasville, Davidson County, North Carolina

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Thomasville, Davidson County, North Carolina. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the City Engineer Department, City Hall, Engineers Department, P.O. Box 368, Thomasville, North Carolina. Send comments to: Mayor Dalton Meyers or Mr. Kyle Williams, City Manager, City Hall, Thomasville, North Carolina 27306.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Thomasville, Davidson County, North Carolina, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Beck Creek	Approximately 50 feet upstream of the confluence of Short Creek.	770
Black Creek	Just downstream of Doak Street.	737
	Just upstream of Doak Street.	744
Brooke Branch	Just upstream of Doak Street.	739
	Approximately 100 feet upstream of Fairview Road.	796

Proposed Flood Elevation Determinations for the City of Dayton, Montgomery County, Ohio; Correction

AGENCY: Federal Insurance Administration, HUD.

ACTION: Correction of proposed rule.

SUMMARY: This document corrects a proposed rule on base (100-year) flood elevations that appeared on page 43 FR 42279 of the FEDERAL REGISTER of September 20, 1978.

EFFECTIVE DATE: September 20, 1978.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410 (202) 755-5581 or Toll Free Line 800-424-8872.

The following:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Stillwater River	2,800 feet upstream of Ridge Ave.	748

Should be corrected to read:

Stillwater River	2,270 feet upstream of Ridge Ave.	748

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Willowick, Lake County, Ohio

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Willowick, Lake County, Ohio. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Hall, 30435 Lakeshore Boulevard, Willowick, Ohio. Send comments to: The Honorable Raymond Kaluba, Mayor, City of Willowick, City Hall, 30435 Lakeshore Boulevard, Willowick, Ohio 44090.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Willowick in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).)

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Lake Erie	Entire Shoreline of community.	576

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Bixby, Tulsa and Wagoner Counties, Oklahoma

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Bixby, Tulsa and Wagoner Counties, Oklahoma. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the City Clerk, 112 North Armstrong Street, Bixby, Okla. 74008.

Send comments to: Honorable Charles Allbread, Mayor of the City of Bixby, or Mr. Fred Keas, City Manager, 112 North Armstrong Street, Bixby, Okla.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Bixby, Tulsa and Wagoner Counties, Okla., in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Arkansas River	Just upstream Mingo Road.	600
	Just upstream Memorial Drive Bridge (Okla. Highway 64).	602
Haikey Creek	Just upstream 131st St.	607
	Just upstream 121st St.	621
Little Haikey Creek.	Just downstream 111th St.	631
White Church Creek.	Just downstream Garnett Road.	615
Fry Ditch No. 1	Just upstream 116th St.	629
	Just upstream South 89th East Ave. Bridge.	642
Fry Ditch No. 2	East 118th St. South Extended.	624
Tributary Snake Creek.	Just upstream Garnett Road.	599
	Just upstream Mingo Road.	604
Tributary Arkansas River.	Just upstream Mingo Road.	600
	Just downstream 151st St.	602

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Borough of Moosic, Lackawanna County, Pennsylvania

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Borough of Moosic, Lackawanna County, Pennsylvania.

These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain

qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Borough of Moosic, Pennsylvania Send comments to: Honorable John Segilia, Mayor of Moosic, 611 Hollenback Street, Moosic, Pennsylvania 18507.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Borough of Moosic, Lackawanna County, Pennsylvania in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Lackawanna River	Confluence of Mill Creek.	618
	Confluence of Spring Brook.	624
	Third Street	636
	Pennsylvania Turnpike Northeast Extension.	648
	Conrail Bridge (Downstream).	652
	Conrail Bridge (Upstream).	659
	Upstream Corporate Limit.	660
Mill Creek	Confluence with the Lackawanna River.	616
	Dick Street	622
	Abandoned Railroad Bridge.	629
	Downstream end of Culvert.	633
	Upstream end of Culvert.	636
	County Boundary	636
Spring Brook	Confluence with the Lackawanna River.	624
	Delaware and Hudson Railroad.	641
	Scranton Highway	646
	Interstate 81	669
	State Route 502 just upstream from Interstate 81.	680
	Second crossing of State Route 502.	717
	Conrail Bridge	734
	Pennsylvania Turnpike Northeast Extension.	751
	County Boundary	762

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the Town of Conway, Horry County, South Carolina

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the Town of Conway, Horry County, South Carolina. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the Building Inspector, P.O. Box 1075, Conway, South Carolina. Send comments to: Honorable Philip A. Thompson, Mayor of the Town of Conway, or Mr. S. E. Hendricks, City Building Inspector, P.O. Box 1075, Conway, South Carolina.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the Town of Conway, Horry County, South Carolina, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Waccamaw River	Just downstream of U.S. 501 Bypass.	13
	Just upstream of Main Street (U.S. 501 Business).	13
	Confluence of Kingston Lake Swamp.	13
Crab Tree Swamp (Backwater effects of Waccamaw River).	Just upstream of Long Avenue.	13

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determination for the City of Bruceville-Eddy, McLennan County, Texas

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Bruceville-Eddy, McLennan County, Texas. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the Bruceville-Eddy Fire Department, Bruceville-Eddy, Texas, Send comments to: Honorable Richard Relyea, Mayor of Bruceville-Eddy, P.O. Box 9, Eddy, Texas 76524.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Bruceville-Eddy, McLennan County, Texas in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Hoolia Creek	Upstream Corporate Limits.	687
	West Frontage Road (Upstream).	667
	Downstream Corporate Limits.	667
Tributary to Hoolia Creek.	Upstream Corporate Limits.	677
	West Frontage Road (Upstream).	673
	East Frontage Road (Upstream).	672
	Old Farm to Market Road 107 (Upstream).	666
Tributary to Hoolia Creek.	Downstream Corporate Limits.	653
South Cow Bayou, Lusk Branch.	Upstream Corporate Limits.	583
	Centerline of Soil Conservation Service Structure Number 5 (upstream).	583

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of LeRoy, McLennan County, Texas. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the Office of the City Secretary, P.O. Box 86, LeRoy, Texas 76654. Send comments to: Mayor W. H. Janes, P.O. Box 56, or

V 4 4 - 1 2 JA 17 79 UMI

Mrs. Yvonne Martin, City Secretary, P.O. Box 86, LeRoy, Texas 76654.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of LeRoy, McLennan County, Texas, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Rice Creek	Southernmost corporate limits.	459

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

NATIONAL FLOOD INSURANCE PROGRAM

Proposed Flood Elevation Determinations for the City of Hayward, Sawyer County, Wisconsin

AGENCY: Federal Insurance Administration, HUD.

ACTION: Proposed rule.

SUMMARY: Technical information or comments are solicited on the proposed base (100-year) flood elevations listed below for selected locations in the City of Hayward, Sawyer County, Wisconsin. These base (100-year) flood elevations are the basis for the flood plain management measures that the community is required to either adopt or show evidence of being already in effect in order to qualify or remain qualified for participation in the national flood insurance program (NFIP).

DATE: The period for comment will be ninety (90) days following the second publication of this proposed rule in a newspaper of local circulation in the above-named community.

ADDRESS: Maps and other information showing the detailed outlines of the flood-prone areas and the proposed base (100-year) flood elevations are available for review at the City Clerk's, Office, Hayward, Wisconsin. Send comments to: Mr. Rolf Williamson, City Clerk, City of Hayward, Box 593, Hayward, Wisconsin 54843.

FOR FURTHER INFORMATION CONTACT:

Mr. Richard Krimm, Assistant Administrator, Office of Flood Insurance, Room 5270, 451 Seventh Street SW., Washington, D.C. 20410, 202-755-5581 or toll-free line 800-424-8872.

SUPPLEMENTARY INFORMATION: The Federal Insurance Administrator gives notice of the proposed determinations of base (100-year) flood elevations for the City of Hayward, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448)), 42 U.S.C. 4001-4128, and 24 CFR Part 1917.4(a).

These elevations, together with the flood plain management measures required by § 1910.3 of the program regulations, are the minimum that are required. They should not be construed to mean the community must change any existing ordinances that are more stringent in their flood plain management requirements. The community may at any time enact stricter requirements on its own, or pursuant to policies established by other Federal, State, or regional entities. These proposed elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and their contents.

The proposed base (100-year) flood elevations for selected locations are:

Source of flooding	Location	Elevation in feet, national geodetic vertical datum
Namekagon River	400 feet upstream from western corporate limits (4,120 feet downstream from the dam).	1,171
	Downstream of the dam.	1,176
	Upstream of the dam.....	1,189
	At eastern corporate limits.	1,189
Smith Lake Creek	Upstream of Chicago & Northwestern Railroad.	1,196
	Downstream of 3rd Street.	1,198
	Upstream of 3rd Street ..	1,202
	At the dam.....	1,204
	At Highways 27 and 77...	1,207
	At northern corporate limits.	1,208

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended (42 U.S.C. 4001-4128); and the Secretary's delegation of authority to Federal Insurance Administrator, 43 FR 7719.)

In accordance with Section 7(o)(4) of the Department of HUD Act, Section 324 of the Housing and Community Development Amendments of 1978, P.L. 95-557, 92 Stat. 2080, this proposed rule has been granted waiver of Congressional review requirements in order to permit publication at this time for public comment.

Issued: January 3, 1979.

GLORIA M. JIMENEZ,
Federal Insurance Administrator.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

[29 CFR Part 1601]

706 AGENCIES

Proposed Designations

AGENCY: Equal Employment Opportunity Commission.

ACTION: Proposed rule.

SUMMARY: The Equal Employment Opportunity Commission proposes to amend its regulations on designation of certain State and local agencies so that they may handle employment discrimination charges filed with the Commission. Proposed are State and local agencies that requested deferral designation as provided under the authority of Title VII of the Civil Rights Act of 1964, as amended. The proposal would authorize the agencies listed to process charges deferred to them by the Commission.

DATES: Comments must be received by February 1, 1979.

ADDRESS: Comments should be sent to: Equal Employment Opportunity Commission, Office of Field Services (State and local), 2401 E Street, NW., Washington, D.C. 20506.

FOR FURTHER INFORMATION CONTACT:

Ann C. Jeffreys, Equal Employment Opportunity Commission, Office of Field Services (State and local), 2401 E Street, NW., Washington, D.C. 20506, telephone 202-634-6040.

SUPPLEMENTARY INFORMATION: Pursuant to § 1601.71, Title 29, Chapter XIV of the Code of Federal Regulations as revised and published in the FEDERAL REGISTER, 42 FR 55388, October 14, 1977, the Equal Employment Opportunity Commission (hereinafter referred to as the Commission) proposes that each of the agencies listed below be designated as a "706 Agency," § 1601.70(a). Three (3) purposes for such designation are as follows: First, that the agencies receive charges deferred by the Commission pursuant to Section 706 (c) and (d) of Title VII of the Civil Rights Act of 1964, as amended; second, that the Commission accord "substantial weight" to the final findings and orders of the agencies pursuant to Section 706(b) of Title VII of the Civil Rights Act of 1964, as amended; and third, to commence the 15-day period within which any person or organization may file written comments as provided for under § 1601.71(i).

At the expiration of the 15-day period, the Commission may effect designation of the agencies by publishing them as an amendment to § 1601.74(a).

§ 1601.74 [Amended]

The proposed "706 Agencies" are as follows:

Anchorage (Alaska) Equal Rights Commission.

Broward County (Florida) Human Relations Division.

Written comments pursuant to this notice must be filed with the Commission on or before February 1, 1979.

Signed at Washington, D.C. this 11th day of January 1979.

For the Commission.

ELEANOR HOLMES NORTON,
Chair, Equal Employment Opportunity Commission.

DEPARTMENT OF THE INTERIOR

Geological Survey

[30 CFR Part 250]

OIL AND GAS AND SULPHUR OPERATIONS IN THE OUTER CONTINENTAL SHELF

AGENCY: Department of the Interior, U.S. Geological Survey.

ACTION: Proposed rule.

SUMMARY: Enactment of Pub. L. 95-372 necessitates revision of the regulations contained in 30 CFR 250.34. By notice of November 1, 1978 (43 FR 50903), the Department of the Interior identified provisions of 30 CFR 250.34, published in the FEDERAL REGISTER on January 27, 1978 (43 FR 3880), which it temporarily suspended pending full implementation of the provisions of Pub. L. 95-372. The proposed revisions to 30 CFR 250.34, contained in this notice, are intended to implement those provisions of Pub. L. 95-372 which relate to (1) exploration activities on OCS oil and gas leases, (2) coordination and consultation with the Governors of affected States and the executives of affected local governments, and (3) development and production activities on OCS oil and gas leases.

DATE: Written comments and recommendations should be submitted on or before March 16, 1979.

ADDRESS: Interested persons are invited to submit written comments and recommendations with respect to the proposed regulations. Responses should identify the subject matter and be directed to the Chief, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 600, Reston, Virginia 22092 (703/860-7524).

FOR FURTHER INFORMATION CONTACT:

Don E. Kash, Chief, Conservation Division, U.S. Geological Survey, National Center (Mail Stop 600), Reston, Virginia 22092 (703/860-7524).

SUPPLEMENTARY INFORMATION: Regulations to revise and more clearly define procedures for the submission by oil and gas lessees of plans for exploration and development and production activities on the Outer Continental Shelf (OCS) were published as final rules on January 27, 1978 (43 FR 3880). Those regulations are found in 30 CFR 250.34 and are herein referred to as "existing regulations." On September 18, 1978, the OCS Lands Act Amendments of 1978 were enacted (Pub. L. No. 95-372). Certain provisions of those Amendments supersede the procedures established by the existing regulations and necessitate their revision.

EXPLORATION PLANS: § 250.34-1

Section 11 of the OCS Lands Act, as amended, (herein referred to as "the Act") creates a process for the submission, evaluation and approval of exploration plans. While the new statutory provisons are similar to the existing regulations governing the submission of explorations plans, some significant changes have been made and are reflected in the proposed regulations. Differences between the existing regulations and the proposed regulations, as well as additions to the proposed regulations which are not present in the existing regulations, are discussed below.

TIMEFRAMES AND APPROVAL PROCESS

Section 11(c)(1) of the Act establishes specific criteria for decisions regarding approval of an exploration plan and provides that the Secretary shall approve, disapprove, or require modifications of such a plan within 30 days of its submission. Accordingly, the proposed regulations establish criteria which the Director must use to evaluate an exploration plan. If a plan is consistent with the criteria, the Director is required to approve the plan within 30 days of submission except that the plan must be disapproved within the 30-day period if it is determined that any activity under the plan would probably cause serious harm or damage to life, property, mineral resources, national security or defense, or the marine, coastal, or human environment, and the harm or damage cannot be avoided by modification of the plan. If the plan is inconsistent with the criteria, the Director must require the lessee to modify the plan. The lessee may then resubmit the plan, as modified, to the Director

V 4 4 / 1 2 J A 1 7 7 9 UMI

who must approve or disapprove the modified plan within 30 days of the resubmission date.

These provisions differ from existing regulations which require the Supervisor to withhold a decision on a plan until written comments have been received from each affected State or until 30 days after each State receives a copy of the plan, whichever comes first. Also, the provisions of the proposed regulations allowing for modification of a plan and establishing specific disapproval criteria are not in the existing regulations.

Environmental Reports

While Section 11 of the Act does not specifically refer to Environmental Reports, subsections 11(c) (1) and (2) impose on the Secretary the obligation to make decisions concerning the environmental impact of OCS exploration activities. To do this, the Secretary must have access to or have the ability to require that environmental information be provided by lessees. Accordingly, the proposed regulations require the lessee to submit an Environmental Report at the same time the exploration plan is submitted to the Director; the Environmental Report will be considered part of the exploration plan and will accompany the plan through all the review processes. An exception to this requirement is made for a lessee submitting an exploration plan in the Gulf of Mexico, except in that area adjacent to the State of Florida. In such cases, Environmental Reports are not automatically required unless the proposed activities would affect a State with an approved Coastal Zone Management (CZM) program, in which case an Environmental Report is required and furnished to the State. Even where this Gulf of Mexico exemption is applicable, however, the Director may request a complete Environmental Report or specific environmental information in lieu of the report, where such report or information is necessary to enable the Director to make required findings pursuant to the Act or the National Environmental Policy Act (NEPA), and the necessary information is otherwise unavailable. The discretion to require certain environmental information in lieu of a complete Environmental Report in the exempted areas of the Gulf of Mexico gives the Director the flexibility to require only that environmental information which is needed but is otherwise unavailable.

The exception for leases in the Gulf of Mexico (except off the coast of Florida) has been created because sufficient environmental information is generally available for this area. Exploration and development and production activities in the Gulf have occurred for the past 30 years and during that period a great amount of environmental data have been collected. This exception eliminates the requirement for the submission of duplicative and unneccessary environmental information but insures that, where a void in such information exists, the Director may require that it be furnished. The Director's discretionary authority to require an Environmental Report will be relied upon where information concerning the onshore air quality impacts of offshore activities is needed or in other situations where existing environmental data are not sufficient, such as where unusual environmental conditions exist or unprecedented activities are proposed.

This approach differs from the provisions of the existing regulations which make Environmental Reports mandatory throughout the entire OCS and which require that each affected State be furnished an advance copy of the Environmental Report prior to the Supervisor's determination that the plan and report are complete.

Opportunity for Comment

Copies of an exploration plan will be distributed by the Director to the Office of Coastal Zone Management of the Department of Commerce, the Governor and coastal zone management agency of each affected State with an approved CZM program, and the Governors of each affected State (except that copies will not be furnished to the Governor of an affected State adjacent to the Gulf of Mexico, other than the State of Florida, unless the Governor submits a written request for such plans). The lessee will be responsible for providing a sufficient number of copies of the plans to accomplish this distribution.

Section 11 of the Act is silent on the subject of whether the Secretary should consult with affected States without an approved CZM program, or give such States an opportunity to comment on exploration plans prior to the Director's decision to approve, require modification, or disapprove plans. However, because the general policy of the Secretary of the Interior and the Act is to encourage consultation, the proposed regulations provide that the Governor of an affected State without an approved CZM program will be furnished exploration plans. The exception to this procedure for States in the Gulf of Mexico other than the state of Florida is created in order to comply with Congress' desire for the Secretary to ". . . . minimize delays in the search for . . . . oil and gas" (House Conference Report No. 95-1474, p. 115).

The procedures outlined above differ from the current procedures in that under existing regulations the Governors of affected States have 30 days from the date of receipt to submit written comments to the Supervisor, who is required to respond to those comments in writing. The 30-day time limit imposed by section 11(c)(1) of the Act necessitates the elimination of the 30-day period provided for comments by affected states and the requirement that comments be responded to in writing. Despite the changes proposed in these new regulations, it should be emphasized that affected States will continue to receive exploration plans and that if the affected States' comments are submitted in a timely manner, they will be considered by the Director during the plan evaluation process.

Coastal Zone Management Considerations

The Coastal Zone Management Act (CZMA), as amended, gives States with approved CZM programs up to six months to concur or object to OCS exploration activities described in detail in an exploration plan. In some circumstances the time period may be shortened to 3 months, but in all cases it is within the State's power to insure that the full 6-month period is available. Section 11(c)(2) of the OCS Lands Act provides that the Secretary shall not approve any activity described in detail in an exploration plan and affecting any land or water use in the coastal zone of a State with an approved CZM program until such State or its designated agency concurs or is conclusively presumed to concur with the consistency certification accompanying the plan. The Secretary of Commerce may override a State's objection and allow exploration to proceed if it is found that such exploration is in the national interest. To accommodate both the 30-day approval deadline of the Act and the consistency requirements of the CZMA, the proposed regulations are written in such a way that conditional approval of a plan which is in conformance with the provisions of the Act, the regulations, and the lease must occur within 30 days of plan submission whether or not the State has concurred with the lessee's consistency determination. Conditional approval will become final immediately upon receipt of the State concurrence in the consistency certification for the conditionally approved plan. However, if the State objects to the consistency certification, the lessee has two choices: (1) the State's objection may be appealed to the Secretary of Commerce pursuant to the procedures described in the CZMA and implementing regulations; or (2) the lessee may revise the plan in a manner acceptable to the Director to address the State's objection. Where the latter course is chosen, the revised plan must then be

resubmitted to the Director and to the State for review. The Director's decision to approve or disapprove the revised plan must be made within 30 days of the resubmission date.

This regulatory scheme insures that even though the lessee has a conditionally approved exploration plan, no activities can occur on a lease until the State concurs or is conclusively presumed to concur with the consistency certification, or until the Secretary of Commerce overrides the State's objection. This manner of complying with the consistency provisions of the CZMA is different from the existing regulations which provide that the Supervisor may not approve or disapprove an exploration plan until the consistency concurrence is received.

The proposed regulations also contain a provision which advises States with an approved CZM program to notify the lessee and Director as soon as possible after it has determined that the exploration activities described in a plan will have no significant impacts on the land and water use in the State's coastal zone. The purpose of this provision is to encourage any State that has completed its consistency review, or that may decide not to review a consistency certification, to notify the lessee and Director as soon as possible.

Other Additions to the Proposed Rules

Timely Submission of Plans—Provisions setting a deadline for submission of exploration plans have been included to insure the prompt and efficient exploration of a leased area. For leases issued prior to the effective date of the regulations, an exploration plan must be submitted within 90 days following the first lease anniversary date subsequent to the effective date of the proposed regulations, or before the end of the second lease year, whichever is later. For leases issued after the effective date of the regulations, the exploration plan must be submitted before the end of the second lease year.

Scope of Activities—Provisions requiring that an exploration plan comprehensively address all anticipated drilling activities on the entire leased area have been added to more clearly indicate the scope of activities to be covered by the plan.

Submission of Plans—Provisions have been added to the proposed regulations which state that a plan (including where applicable the Environmental Report) shall not be deemed submitted until the Director has determined that the plan contains all necessary information. Such a determination shall be made within ten (10) working days of the filing of the plan. The 30 day review period will begin running on the date that the completeness determination is made. This provision has been added to insure the prompt and efficient processing of plans and to insure that the document reproduced by the lessee for distribution is complete.

Clean Air Act—A provision stating that the Director shall require modification of the plan if it is determined that onshore air quality will be significantly affected by offshore activities has been included in the proposed regulations. A detailed description of the regulatory procedures the Secretary will follow in implementing the air quality requirement of Section 5(a)(8) of the Act, will be published in a separate rulemaking action and, when completed, will be fully integrated with these regulations.

Development and Production Plans: § 250.34-2

Section 25 of the Act creates a process for the submission, evaluation, and approval of development and production plans. Although the new statutory provisions are similar to the existing regulations governing development and production plan approval, several major changes have been made which are reflected in the proposed regulations. Differences between the existing and proposed regulations, as well as new features of the proposed regulations, are discussed below.

Submission of a Development and Production Plan

Information historically contained in development and production plans is critical to the efficient administration of the OCS oil and gas development program, and the proposed regulations indicate that the Director will continue to require the submission of development and production plans from all lessees. Section 25(a)(1) of the Act contains an exemption for tracts in the Gulf of Mexico other than off the coast of Florida (see section 25(e)), and for tracts for which a lease was issued before enactment of the Amendments (September 18, 1978) and on which oil and gas in paying quantities has been discovered. For these exempt leases it is not mandatory that the Secretary require the submission of development and production plans; however, the Secretary is not prohibited from doing so.

For those leases covered by the statutory exception, Environmental Reports will generally not be required and procedures and timeframes for State consultation will not be followed except as described below (see discussion of "Environmental Reports" and "Opportunity for Comment"). This regulatory scheme is consistent with the Congress' express intent that the Secretary continue to apply "existing law and requirements to tracts which have commenced development and production, and to other areas in the Gulf of Mexico, where development and production activities have been going on for a number of years, in such a manner as to limit bureaucratic red tape and otherwise minimize delays in the search for and production of oil and gas." (House Conference Report No. 95-1474, p. 115).

Timeframes and Approval Process

Section 25 of the Act establishes specific criteria and timeframes for the Secretary to follow in deciding whether to approve a development and production plan. The Governors of affected States and executives of affected local governments (except those covered by the exception described below) will have 60 days from the date of receipt of the plan to submit comments and recommendations to the Director. During that same 60-day period the Director will prepare an Environmental Assessment and decide whether approval of the plan will be a major Federal action requiring an Environmental Impact Statement (EIS). In making this determination the Director will follow the guidelines promulgated by the Council on Environmental Quality [43 FR 55978 (1978)] the Department's regulations governing such determinations, and the provisions of 30 CFR 250.34-4.

If it is determined that approval of the plan will not be a major Federal action, the Director will review all comments and recommendations and will approve, require modification, or disapprove the plan no later than 60 days after the last day of the comment period. If it is determined that approval of the plan will be a major Federal action, the procedures and comment periods provided in NEPA and its implementing regulations will be followed and the Director, after reviewing the record of the EIS public hearing, will approve, require modification, or disapprove the plan within 60 days of the date that the final EIS is released.

The proposed regulations set forth the criteria which the Director will use to determine the acceptability of a plan. These criteria are derived from Section 25(h) and Section 5(a) of the Act. If a plan is consistent with the criteria, the Director is required to approve the plan within 60 days of the close of the comment period except that the plan must be disapproved within the 60 day period if: (1) State concurrence with the consistency certification has not been received or the State objects to the consistency certification and the Secretary of Commerce does not overrule the objection; (2) activities described in the plan threaten national security or national

V 4 4 / 1 2 J A 1 7 7 9 UMI

defense; or (3) exceptional circumstances exist which would probably cause serious harm or damage to life (including fish and other aquatic life) to property, to any mineral deposits (in areas leased or not leased), to the national security or defense, or to the marine, coastal, or human environments, and the threat of harm or damage will not disappear or decrease to an acceptable extent within a reasonable period of time and the advantages of disapproving the plan outweigh the advantages of development and production.

If the plan does not meet the criteria but is not subject to disapproval for reasons (1), (2), or (3) above, the Director will require modification of the plan to meet the criteria. The lessee may then resubmit the plan, as modified, to the Director who must approve or disapprove the plan within 60 days of the resubmission date.

The 60-day limit on the Director's approval decision, the modification procedures, specific approval and disapproval criteria, and the provisions for approvals which constitute major Federal actions are new provisions not found in the existing regulations

ENVIRONMENTAL REPORTS

Although Section 25 of the Act does not specifically require the preparation of Environmental Reports, subsections 25(e), (f) and (h) impose on the Secretary the obligation to make certain decisions concerning the environmental impact of OCS development and production. Accordingly, the proposed regulations require the lessee to submit an Environmental Report at the same time the development and production plan is submitted to the Director; the Environmental Report will be considered part of the development and production plan and will accompany the plan through all the review processes. An exception to the Environmental Report requirement is made for a lessee submitting a plan for a lease or leases in the Gulf of Mexico (except off Florida) and for leases anywhere on the OCS on which oil and gas in paying quantities was discovered before the date of enactment of the Amendments (September 18, 1978). In such cases Environmental Reports are not required unless the development and producion plan would affect a State with an approved CZM program, in which case an Environmental Report is required and will be furnished to the State. Even where the exemptions are applicable, the Director may request a complete Environmental Report or specific environmental information in lieu of the report where such report or information is necessary to enable the Director to make findings pursuant to the Act or NEPA, and the necessary information is otherwise unavailable. These exceptions have been created in order to comply with the statutory exemption created in Section 25 and Congress' desire for the secretary "to limit bureaucratic red tape and otherwise minimize delays in the search for and production of oil and gas" (House Conference Report No. 95-1474, p. 115). Despite the exception it should be noted that the Director will always require from the lessee the information necessary to determine the onshore air quality effects of offshore activities, pursuant to Section 5(a)(8) of the Act.

The proposed regulations differ from the provisions of § 250.34-2 of the existing regulations which make Environmental Reports mandatory throughout the entire OCS and requires that each affected State be furnished an advance copy of the report prior to the Supervisor's determination that the plan and report are complete.

OPPORTUNITY FOR COMMENT

Copies of a development and production plan will be distributed by the Director to the Office of Coastal Zone Management, the Governor and coastal zone management agency of each affected State that has an approved CZM program, and the Governors of each affected State (except that copies will not be furnished to the Governor of an affected State adjacent to the Gulf of Mexico, other than the State of Florida, unless the Governor submits a written request for such plans) within 10 days after the plan is received. The lessee will be responsible for providing a sufficient number of copies of the plan to accomplish this distribution.

If it is determined that approval of a development and production plan is a major Federal action, the Director will transmit the draft environmental impact statement to the Governor of each affected State, the coastal zone management agency of each affected State that has an approved CZM program, the U.S. Office of Coastal Zone Management and, upon request, to the executive of each affected local government. The Director shall also make copies of the statement available to any appropriate interstate entity and the public. All parties will have an opportunity to comment on the plan during the comment periods established in NEPA and implementing regulations. If approval of a development and production plan is found not to be a major Federal action, the Governor of each affected State receiving a copy of the plan, will have 60 days from the date of receipt of the plan to submit comments and recommendations.

The Director will provide an opportunity for consultation with the Governors of affected States and the executives of affected local governments and will accept recommendations that provide for a reasonable balance between the national interest and the well-being of the citizens of the affected State. Reasons for accepting or rejecting any Governor's recommendations or for implementing any alternative means identified during consultations with the Governor shall be provided to the Governor in writing.

The 60-day period for opportunity to comment is the same as the period available under existing regulations. Under existing regulations the Supervisor is required only to "consider comments received from the Governors of affected States"; according to the proposed regulations, the Director shall accept recommendations of the Governor if the recommendations provide a reasonable balance between the national interest and the well-being of the citizens of the affected State. This change is based on the language of Section 19 of the Act (43 U.S.C. 1345). Under the existing regulations there is no exception to the comment opportunity for Gulf of Mexico States which do not request copies of the plan.

COASTAL ZONE MANAGEMENT CONSIDERATIONS

As in the case of exploration plans, the 6-month consistency review period afforded States with approved CZM programs may create a situation where the Director must take approval action on a plan without knowing whether the State will object to or concur with the lessee's consistency certification. This situation is most likely to occur where the approval is determined not to be a major Federal action, in which case the Director must take some action on the plan no later than 120 days after its submission to the Governors of affected States. The Act specifically provides that the Director shall disapprove a plan "if any of the activities described in detail in the plan for which a Federal license or permit is required • • • do not receive concurrence • • • with respect to the consistency certification • • • ." To accommodate both CZMA's consistency requirements and the time limitations imposed by Section 25 of the Act, the proposed regulations provide for disapproval of a plan where State concurrence with the consistency certification has not been received but provides for an immediate reversal of the disapproval decision upon receipt of the State's concurrence or at the time when concurrence is conclusively presumed. If a State objects to the consistency certification, the lessee may either appeal the State's objection to the Secretary of Commerce pursuant to the procedures described in the CZMA and implementing regulations or may revise the plan in a manner acceptable to the Director to address the State's objection.

Where the latter course is chosen, the revised plan must then be resubmitted to the Director and the State for review. The Director's decision to approve or disapprove the revised plan must be made within 60 days of the resubmission date.

The existing regulations, unlike the proposed regulations, require the Supervisor to wait until the State's consistency concurrence with the lessee's certification is made before approving or disapproving a plan. This change is necessary in order to comply with the statutory time constraints imposed in Section 25(h) of the Act. The proposed regulations also contain provisions which encourage States with approved CZM programs to notify the lessee and Director at the earliest possible time if a determination is made that activities described in the plan will have no significant impacts on the land and water uses in the State's coastal zone. The purpose of this provision is to encourage any State with an approved CZM program that has completed its consistency review, or decides not to review a plan, to notify the lessee and the Director as soon as possible so that the approval process may not be delayed unnecessarily.

OTHER ADDITIONS TO THE PROPOSED RULES

Scope of Activities—Provisions requiring that the initial development and production plan describe in detail all development and production activities that the lessee proposes to undertake during the time period covered by the plan up to and including the commencement of sustained production have been included to indicate the scope of activities to be covered by the initial plan.

Submission of Plans—Provisions have been added to the proposed regulations which state that a plan shall not be deemed submitted until the Supervisor has determined that the plan contains all necessary information. Such a determination shall be made within twenty (20) working days of the filing of the plan. This provision has been added to insure the prompt and efficient processing of plans and to insure that the document reproduced by the lessee for distribution is complete.

Clean Air Act—A provision stating that the Director shall require modification of a plan, if it is determined that onshore air quality will be significantly affected by offshore activities, has been included in the proposed regulations. A detailed description of the regulatory procedures the Secretary will follow in implementing the air quality requirements of Section 5(a)(8) of the Act will be published in a separate rulemaking action and, when completed, will be fully integrated with these regulations.

ENVIRONMENTAL REPORTS: § 250.34-3

Minor modifications have been made to the section of the regulations which describes the contents of Environmental Reports associated with exploration plans and development and production plans. Duplicative requirements have been eliminated; the intent is to insure that a lessee is not required to include the same information in both the plans and the Environmental Reports. No substantive requirements of the existing regulations have been deleted from the proposed regulations.

COMPLIANCE WITH THE NATIONAL ENVIRONMENTAL POLICY ACT (NEPA): § 250.34-4

This section of the regulations, along with other Department regulations and Council on Environmental Quality guidelines, will be used by the Director to determine whether approval of an exploration plan or development and production plan is a major Federal action pursuant to NEPA. To implement Section 25(e)(1), a provision has been added to the proposed regulations which requires that at least once the Director will declare the approval of a development and production plan in any area or region of the OCS, except in the Gulf of Mexico other than the State of Florida, to be a major Federal action.

ENVIRONMENTAL IMPACT AND REGULATORY ANALYSIS STATEMENTS

The Department of the Interior has determined that the revision of the regulations in 30 CFR 250.34, as proposed in this notice, will not have a significant impact on the quality of the human environment and, therefore, will not require preparation of an Environmental Impact Statement. The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

AUTHORS

Thomas McCloskey, Office of the Assistant Secretary—Energy and Minerals, U.S. Department of the Interior (202/343-4457); Theresa Hooks, Office of the Solicitor, U.S. Department of the Interior (202/343-4325); and Gerald Rhodes, Geological Survey, U.S. Department of the Interior (703/860-7531).

Dated: January 10, 1979.

JOAN M. DAVENPORT,
Assistant Secretary of the Interior.

It is proposed to modify 30 CFR 250.34 to read:

Sec.
250.34 Exploration, development, and production plans.
250.34-1 Exploration plan.
250.34-2 Development and production plan.
250.34-3 Environmental Report.
250.34-4 Compliance with the National Environmental Policy Act.

AUTHORITY: Outer Continental Shelf Lands Act, 43 U.S.C. § 1331 et seq., as amended, Pub. L. 95-372; National Environmental Policy Act of 1969, 42 U.S.C. 4332 et seq. (1970); Coastal Zone Management Act of 1972, as amended, 16 U.S.C. § 1451 et seq.

§ 250.34 Exploration, development, and production plans.

§ 250.34-1 Exploration plan.

(a)(1) No exploration activities, except for preliminary activities, may be commenced on any leased area until an exploration plan covering that area has been submitted to and approved by the Director. For the purposes of this section, preliminary activities are geological, geophysical, and other surveys necessary to develop a comprehensive exploration plan. Such preliminary activities are those which do not result in any physical penetration of the seabed of greater than three hundred (300) feet of unconsolidated formations, or fifty (50) feet of consolidated formations, whichever is less, and which do not result in any significant adverse impact on the natural resources of the Outer Continental Shelf (OCS). A proposed exploration plan may apply to one or more leases held by an individual lessee, or may be submitted by a group of lessees acting under an approved unitization, pooling, or drilling agreement. An exploration plan shall be based upon all available information and shall identify, to the maximum extent possible, all the wells that the lessee proposes to drill to evaluate the prospective hydrocarbon accumulations on the entire leased area. An exploration plan shall include:

(i) The proposed type and sequence of exploration activities to be undertaken together with a tentative timetable for their performance from commencement to completion;

(ii) A description of the drilling vessels, platforms, or other installations or devices permanently or temporarily attached to the seabed indicating the important features thereof with special attention to safety features and pollution-prevention and control features;

(iii) Types of geophysical equipment to be utilized;

(iv) Approximate location of each proposed exploratory well, including surface and projected bottom hole lo-

cation of each directionally drilled well;

(v) Current structure maps and, as appropriate, schematic cross sections showing expected depths of marker formations, and

(vi) Such other relevant data and information as the Director may require.

(2)(i) Except as provided in (a)(2)(ii) of this section, at the same time a lessee submits an exploration plan, an Environmental Report (Exploration) shall be submitted pursuant to the provisions of § 250.34-3(a). The report will be considered part of the exploration plan and will accompany it through all review processes.

(ii) A lessee submitting an exploration plan for leases in the Gulf of Mexico, except in that area adjacent to the State of Florida, is not required to submit an Environmental Report, unless:

(A) The proposed exploration activities would affect a State with a coastal zone management program, approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455); or

(B) The Director determines that an Environmental Report is necessary to make required findings under the Outer Continental Shelf Lands Act, (43 U.S.C. § 1331 et seq.), as amended, (Pub. L. 95-372) and the National Environmental Policy Act of 1969, [42 U.S.C. 4332 et seq. (1970)].

(3) The Director may require that an exploration plan be accompanied by a general statement of development and production intentions, which shall be for planning purposes only and shall not be binding on any party.

(4) (i) The owners of oil and gas leases issued or maintained under the Outer Continental Shelf Lands Act, (43 U.S.C. § 1331 et seq.), as amended, (Pub. L. 95-372), prior to the effective date of the regulations in this section, and for which a plan of exploration has not been submitted, shall submit a plan within 90 days following the first lease anniversary date subsequent to the effective date of this section, or before the end of the second lease year, whichever is later. The plan must conform to the requirements of § 250.34-1(a) and § 250.34-3(a).

(ii) The owners of oil and gas leases issued under the Outer Continental Shelf Lands Act, (43 U.S.C. § 1331 et seq.), as amended, (Pub. L. 95-372), after the effective date of the regulations in this section, shall submit a plan of exploration before the end of the second lease year. The plan must conform to the requirements of § 250.34-1(a) and § 250.34-3(a).

(5) The lessee shall indicate which portions of the exploration plan are believed to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. § 552) and implementing regulations (43 CFR Part 2).

(6) An exploration plan shall not be deemed submitted to the Director until it has been determined that it is complete and contains the information required by §§ 250.34-1(a) and 250.34-3(a). Such a determination shall be made within ten (10) working days of the filing of the plan.

(b) (1) Once a plan is deemed submitted, the lessee shall provide to the Director a sufficient number of copies of each exploration plan to permit the Director to transmit copies of the plan to: the Governor of each affected State, except as provided in (b)(3) of this section; the coastal zone management agency of each affected State that has a coastal zone managment program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455); and to the United States Office of Coastal Zone Management. The Director shall determine and advise the lessee of the number of plans needed to comply with this section.

(2) Immediately after receiving copies of a plan under (b)(1) of this section, the Director shall transmit a copy of the plan except for those portions determined to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. § 552) and implementing regulations (43 CFR Part 2), to: the Governor of each affected State, except as provided in (b)(3) of this section; the coastal zone management agency of each affected State that has a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455); and to the United States Office of Coastal Zone Management in accordance with established Departmental procedures, the Director shall also make copies available to any appropriate interstate regional entity and the public, except for those portions of the plan determined to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. § 552) and implementing regulations (45 CFR Part 2).

(3) The Governor of an affected State adjacent to an area in the Gulf of Mexico (other than the State of Florida) may receive copies of exploration plans by submitting to the Director a written request for the documents. The Director shall notify the appropriate lessees immediately upon receipt of such a request.

(4) If the Governor of an affected State that has a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455) determines that the activities described in detail in an exploration plan will have no significant impacts on land and water uses in the State's coastal zone, the lessee and the Director should be notified of that determination at the earliest possible time.

(c) The Director shall prepare an Environmental Assessment for each exploration plan pursuant to the provisions of § 250.34-4.

(d) In the evaluation of an exploration plan the Director shall consider comments received from the Governors of affected States, whether or not such States have coastal zone management programs approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455). The Director may consult directly with affected States regarding matters contained in the comments.

(e) (1) In the evaluation of an exploration plan the Director shall consider whether the plan is consistent with:

(i) The terms of the lease; and

(ii) The Outer Continental Shelf Lands Act, (43 U.S.C. § 1331 et seq.), as amended, (Pub. L. 95-372), and regulations prescribed under the Act, including air quality regulations prescribed by the Secretary pursuant to section 5(a)(8) of the Act and environmental, safety, and health requirements.

(2) Within 30 days of submission of the proposed plan, the Director shall:

(i) Approve, either finally or conditionally, any plan which is consistent with the criteria in (e)(1)(i) and (ii) of this section;

(ii) Require modification by the lessee of any plan which is inconsistent with (e)(1)(i) or (ii) to achieve consistency; or

(iii) Disapprove any plan if it is determined that any proposed activity under such plan would probably cause serious harm or damage to life (including fish and other aquatic life), to property, to any mineral deposits (in areas leased or not leased), to the national security or defense, or to the marine, coastal, or human environment and that such proposed activity cannot be modified to avoid such condition.

(3) The Director shall notify the lessee in writing of the reason(s) for disapproving a plan or for requiring modification of a plan and the conditions that must be met for plan approval.

(f) The lessee may resubmit a plan, as modified, to the Director. Within 30 days of resubmission, the Director shall approve or disapprove the modified plan based upon the criteria in (e)(1) of this section.

(g) Conditional approval of any plan will be granted for a plan that is otherwise approvable when it is determined that proposed activities will significantly affect any land or water use

in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455), and final approval will be granted immediately upon receipt of the State's concurrence or upon the State being conclusively presumed to concur with the consistency certification accompanying a plan pursuant to section 307 of the Coastal Zone Management Act of 1972, as amended, [16 U.S.C. § 1456(c)(3)(B)].

(h) When a State objects to a lessee's consistency certification, the lessee may revise the plan to accommodate the State's objection(s) and resubmit the plan to the Director for review pursuant to the criteria in (e)(1) of this section and to the State for review pursuant to the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1456) and implementing regulations (15 CFR § 930.83 and 930.84), or may appeal to the Secretary of Commerce pursuant to the procedures described in the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1456) and implementing regulations (Subpart H of 15 CFR § 930).

(i) A modified plan which has been disapproved pursuant to (f) of this section, may be revised and resubmitted to the Director for approval in the same manner as, and with the same information required for, a new plan of exploration.

(j) If the Director disapproves an exploration plan, pursuant to (e)(2)(iii) of this section, the Director may, subject to the provisions of § 5(a)(2)(B) of the Outer Continental Shelf Lands Act, (43 U.S.C. § 1331 et seq.), as amended, (43 U.S.C. 1334) and implementing regulations (30 CFR § 250.12), cancel the lease(s) and the lessee shall be entitled to compensation in accordance with section (5)(a) of the Act, as amended, and implementing regulations (30 CFR § 250.12)

(k) The Director shall periodically review approved plans. The frequency and extent of his review shall be based upon the significance of any changes in available information and in other onshore or offshore conditions affected or impacted by exploration activities pursuant to such plan. If the review indicates that the plan should be revised to meet the requirements of this Part, the Director shall require such revision pursuant to (1) of this section.

(l) Proposals to revise an approved exploration plan, whether initiated by the lessee or ordered by the Director, shall be submitted to the Director for approval in the same manner as, and with the same information required for, a new plan of exploration. When the Director determines that a proposed revision could result in a significant change in the impacts previously identified and evaluated, the revision shall be subject to the procedures in (b) through (e) of this section.

(m) The Director may authorize or direct the lessee to conduct such geological, geophysical, or other surveys as the Director determines to be necessary for the evaluation of activities to be carried out under an exploration plan or being carried out under an approved exploration plan. The lessee shall provide the Director, upon request and without cost to the lessor, copies of any data obtained as a result of such surveys.

(n) The lessee may not drill any well until the Director's approval of an application for permit to drill, filed in accordance with the requirements of 30 CFR 250.41(a) and 250.91(a), has been received. The Director shall not approve any permit which does not conform to the applicable approved exploration plan. Pursuant to (16 U.S.C. § 1456(c)(3)(B)(iii)) of the Coastal Zone Management Act, as amended, once the affected State has concurred in the consistency determination accompanying the exploration plan, subsequent permit applications for activities described in detail in the plan are not subject to State consistency review under the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455).

(o) Nothing in this section shall be viewed as limiting the lessee's responsibility to take appropriate measures to meet emergency situations. In such situations, the Director may approve or require departures from an approved exploration plan.

§ 250.34-2 Development and production plan.

(a) (1) No development or production activities may be commenced on an oil and gas lease issued in any area of the OCS, until a plan of development and production has been submitted to and approved by the Director. A development and production plan may apply to one or more leases held by an individual lessee, or may be submitted by a group of lessees acting under an approved unitization, pooling, or drilling agreement. A plan of development and production must describe in detail all the development and production activities that the lessee proposes to undertake during the time period covered by the plan. The initial development and production plan must include a description of all activities to be undertaken up to and including the commencement of sustained production. A development and production plan must provide for the effective and efficient development and production of all known accumulations of hydrocarbons found on the leasehold that are capable of production in paying quantities. A development and production plan shall include:

(i) A description of the specific work to be performed;

(ii) A description of all drilling vessels, platforms, pipelines, or other facilities and operations located on the OCS which are proposed by the lessee or known by him (whether or not owned or operated by such lessee) to be directly related to the proposed development, including the location, size, design, and important features (with emphasis on features pertaining to safety and to pollution prevention and control) of such facilities and operations; and the labor, material and energy requirements associated with such facilities and operations;

(iii) The location of each well, including surface and projected bottom hole locations for each directionally drilled well;

(iv) Current interpretations of all available geological and geophysical data, including structure maps and schematic cross sections of productive formations;

(v) A description of the environmental safeguards to be implemented in the course of development and production operations under the plan, together with a discussion of how such safeguards are to be implemented;

(vi) All safety standards to be met and the safety features to be utilized in order to meet those standards;

(vii) An expected rate of development and production and a time schedule for the performance of activities from commencement to completion; and

(viii) Such other relevant data and information as the Director may require.

(2) (i) Except as provided by (a)(2)(ii) of this section, at the same time the lessee submits a development and production plan to the Director, an Environmental Report (Development/Production) shall also be submitted pursuant to the provisions of § 250.34-3(b). The report will be considered part of the development and production plan and will accompany it through all review processes.

(ii) Submission of an Environmental Report will not be required for leases in the Gulf of Mexico, except as provided in (a)(2)(iii), or for leases anywhere on the OCS on which oil and gas in paying quantities had been discovered before enactment of Outer Continental Shelf Lands Act Amendments of 1978 (Pub. L. 95-372), unless:

(A) The proposed activities will have a significant impact on the land and water uses in the coastal zone of a State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management

V 4 4 / 1 2 J A 1 7 7 9 UMI

V 4 4 / 1 2 J A 1 7 7 9 UMI

Act of 1972, as amended (16 U.S.C. § 1455); or

(B) An Environmental Report is necessary to enable the Director to make required findings under the Outer Continental Shelf Lands Act, (43 U.S.C. § 1331 et seq.), as amended, (Pub. L. 95-372), or the National Environmental Policy Act of 1969, [42 U.S.C. 4332 et seq. (1970)], except that the Director may request specific environmental information in lieu of an entire report described in § 250.34-3(b).

(iii) Submission of an Environmental Report will be required for leases located in the area of the Gulf of Mexico adjacent to the State of Florida.

(3) The Director may require the lessees of tracts on which oil or gas, or both, have been discovered in paying quantities and which are adjacent to or nearby the area covered in the development and production plan, to submit a preliminary description of their plans for development and production from leases on adjacent or nearby areas.

(4) The lessee shall indicate which portions of the development and production plan are believed to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. § 552) and implementing regulations (43 CFR Part 2).

(5) A development and production plan shall not be deemed submitted to the Director until it has been determined that it is complete and contains the information required by §§ 250.34-2(a) and 250.34-3(b). Such a determination shall be made within twenty (20) working days of the filing of the plan.

(b) (1) Once a plan is deemed submitted the lessee shall provide to the Director a sufficient number of copies of each plan of development and production to permit the Director to transmit copies of the plan to: the Governor of each affected State, except as provided in (b)(3) of this section; the coastal zone management agency of each affected State with a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455); the United States Office of Coastal Zone Management; and, upon request and where applicable, to the executive of each affected local government. The Director shall determine and advise the lessee of the number of plans needed to comply with this section.

(2) Within ten (10) days after the Director receives the required number of copies of a plan under (b)(1) of this section, the Director shall transmit a copy of the plan, except for those portions of the plan determined to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. § 552) and implementing regulations (43 CFR Part 2) to: the Governor of each affected State, except as provided in (b)(3) of this section; the coastal zone management agency of each affected State that has a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455); to the United States Office of Coastal Zone Management, and, upon request, and where applicable, to the executive of each affected local government. In accordance with established Departmental procedures, the Director shall also make copies of the plan available to any appropriate interstate regional entity and the public, except for those portions of the plan determined to be exempt from disclosure under the Freedom of Information Act (5 U.S.C. § 552) and implementing regulations (43 CFR Part 2).

(3) The Governor of an affected State adjacent to an area in the Gulf of Mexico (other than the State of Florida) may receive copies of development and production plans by submitting to the Director a written request for the documents. The Director shall notify the appropriate lessees immediately upon receipt of such a request.

(c) (1) The Governor of each affected State, except those not submitting a request under (b)(3) of this section, the coastal zone management agency of each affected State that has a coastal zone mangement program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455), the United States Office of Coastal Zone Management, and the executive of each affected local government shall have 60 days from the date of receipt of the plan from the Director to submit comments and recommendations. Prior to submitting recommendations to the Director, the executive of any affected local government must forward his recommendations to the Governor of the State. Such comments and recommendations shall be made available to the public upon request. In addition, any interested person may submit comments and recommendations.

(2) The Director shall accept recommendations of the Governor, any may accept the recommendations of the executive of any affected local government, if it is determined, after having provided the opportunity for consultation, that the recommendations provide for a reasonable balance between the national interest and the well-being of the citizens of the affected State. The Governor shall be provided, in writing, the reasons for accepting or rejecting the Governor's recommendations, or for implementing any alternative means identified during consultations with the Governor.

(3) (i) If the Governor of an affected State that has a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455) determines that the activities described in detail in a development and production plan will have no significant impacts on land and water uses in the State's coastal zone, the lessee and the Director should be notified of that determination at the earliest possible time.

(ii) The Governor of an affected State that does not have a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455) may advise the Director that the State does not wish to receive or review development and production plans under section 19 of the Outer Continental Shelf Lands Act, as amended, (43 U.S.C. 1345).

(d) The Director shall prepare an Environmental Assessment for each development and production plan pursuant to the provisions of § 250.34-4.

(e) (1) If the Director determines that approval of a development and production plan is a major Federal action, subject to the provisions of section 102(2)(C) of the National Environmental Policy Act of 1969 [42 U.S.C. 4332 et seq. (1970)], the Director shall transmit the draft environmental impact statement to the Governor of each affected State, the coastal zone management agency of each affected State that has a coastal zone management program approved pursuant to section 306 of the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1455), the United States Office of Coastal Zone Management; and, upon request, to the executive of each affected local government. The Director shall also make copies of the environmental impact statement available to any appropriate interstate entity and the public.

(2) The Director may require lessees of tracts for which development and production plans have not been approved, to submit preliminary or final plans for their leases, prior to or immediately after a determination by the Director that approval of a development and production plan requires that the procedures under the National Environmental Policy Act of 1969 [42 U.S.C. 4332 et seq. (1970)] shall commence.

(f) After reviewing the record of any public hearing held with respect to the approval of a plan for which an environmental impact statement was prepared, the Director shall, within 60 days after the release of the final environmental impact statement, approve, require modification, or disapprove the plan. Where no environmental impact statement was prepared, the Director shall, after reviewing all comments and recommendatios submitted pursuant to (c)(1) of this section, approve, require modification, or disapprove a plan no later than 60 days after the last day of the comment period.

(g) (1) In the evaluation of a development and production plan the Director shall consider whether the plan is consistent with:

(i) The terms of the lease;

(ii) The Outer Continental Shelf Lands Act, (43 U.S.C. § 1331 et seq.), as amended, (Pub. L. 95-372), and regulations prescribed under the Act, including air quality regulations prescribed by the Secretary pursuant to section 5(a)(8) of the Act;

(iii) Other applicable Federal laws, including, but not limited to, the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1451 et seq.);

(iv) Environmental, safety, and health requirements; and

(v) The statutory requirement to protect property, any mineral deposits (in areas leased or not leased), and the national security or defense.

(2) The Director shall:

(i) Approve any plan which is consistent with the criteria in (g)(1) of this section;

(ii) Require modification of any plan which is inconsistent with the criteria in (g)(1) of this section to achieve consistency; or

(iii) Disapprove any plan if the Director determines that:

(A) State concurrence with the consistency certification has not been received or the state objects to the consistency certification and the Secretary of Commerce does not make the determination authorized by subsection 307(c)(3)(B)(iii) of the Coastal Zone Management Act of 1972, as amended, [16 U.S.C. § 1456(c)(3)(B)];

(B) Operations threaten national security or national defense; or

(C) Exceptional geological conditions in the lease area, exceptional resource value in the marine or coastal environment, or other exceptional circumstances exist, and that (*1*) implementation of the plan would probably cause serious harm or damage to life (including fish and other aquatic life), to property, to any mineral deposits (in areas leased or not leased), to the national security or defense, or to the marine, coastal, or human environments, (*2*) the threat of harm or damage will not disappear or decrease to an acceptable extent within a reasonable period of time, and (*3*) the advantages of disapproving the plan outweigh the advantages of development and production.

(3) The Director shall notify the lessee in writing of the reason(s) for disapproving a plan or for requiring modification of a plan and the conditions which must be met for plan approval.

(h) (1) The lessee may resubmit a development and production plan, as modified, to the Director. Within 60 days of resubmission, the Director shall approve, or disapprove the modified plan based upon the criteria in (g)(1) or (g)(2)(iii)(A) of this section.

(2) The Director shall notify the lessee in writing of the reason(s) for disapproval of a plan and the conditions which must be met for approval.

(i)(1) If a development and production plan is disapproved for the sole reason that a State concurrence with the consistency certification has not been received by the Director, the Director shall approve the plan upon receipt of the concurrence or at the time when concurrence is conclusively presumed.

(2) If a development and production plan is disapproved because a State objects to the consistency certification, the lessee may revise the plan to accommodate the State's objection(s) and resubmit the plan to the Director for review pursuant to the criteria in (g)(1) of this section and to the State for review pursuant to the Coastal Zone Management Act of 1972, as amended (16 U.S.C. §§ 930.83 and 930.84), or may appeal to the Secretary of Commerce pursuant to the procedure described in the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1456), and implementing regulations (Subpart H of 15 CFR § 930). The Director shall approve or disapprove a plan, as revised, within 60 days of the resubmission date.

(3) A modified plan which has been disapproved pursuant to (h)(1) of this section, may be revised and resubmitted to the Director for approval in the same manner as, and with the same information required for, a new plan of development and production.

(j) All development and production plans disapproved pursuant to (g)(2)(iii) and (h)(1) of this section are subject to the provisions of section 25(h)(2) of the Outer Continental Shelf Lands Act (43 U.S.C. § 1334 et seq.), as amended (Pub. L. 95-372), and implementing regulations (30 CFR Part 250.12).

(k) (1) The Director shall, from time to time, review approved development and production plans. The frequency and extent of this review shall be based upon the significance of any changes in available information and in other onshore or offshore conditions affecting or impacted by development or production pursuant to such plan. If the review indicates that the plan should be revised to meet the requirements of this Part, the Director shall require such revision pursuant to (k)(2) of this section.

(2) Proposals to revise an approved development and production plan, whether initiated by the lessee or ordered by the Director, shall be submitted to the Director for approval in the same manner as, and with the same information required for, a new development and production plan. When the Director determines that a proposed revision could result in a significant change in the impacts identified, the revision shall be subject to the procedures of (b) through (h) of this section.

(3) The Director may approve any revision of an approved plan proposed by the lessee if it is determined that such revision will lead to greater recovery of oil and natural gas, improve the efficiency, safety, and environmental protection of the recovery operation, is the only means available to avoid substantial economic hardship to the lessee, or is otherwise not inconsistent with the provisions of the Outer Continental Shelf Lands Act (43 U.S.C. § 1331 et seq.), as amended (Pub. L. 95-372), to the extent such revision is consistent with protection of the human, marine, and coastal environments.

(l) Whenever the lessee fails to submit a plan in accordance with provisions of this section, or fails to comply with an approved plan, the lease may be canceled in accordance with section (5) (c) and (d) of the Outer Continental Shelf Lands Act (43 U.S.C. § 1334), and implementing regulations (30 CFR Part 250.12).

(m) The lessee may not drill any well until the Director's approval of an application for permit to drill filed in accordance with the requirements of 30 CFR § 250.41(a) and § 250.91(a) has been received. The Director shall not approve any permit which does not conform with the applicable approved plan of development and production. Pursuant to 16 U.S.C. §1456(c)(3)(B)(iii) of the Coastal Zone Management Act of 1972, as amended, once the affected State has concurred in the consistency certification for a development and production plan, subsequent permit applications for activities described in detail in the plan are not subject to State consistency review under the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1456).

(n) The Director may authorize or direct the lessee to conduct such geological, geophysical, or other surveys as the Director determines to be necessary for the evaluation of activities to be carried out under a development and production plan or being carried out under an approved development

V 4 4 / 1 2 J A 1 7 7 9 UMI

and production plan. The lessee shall provide the Director, upon request and without cost to the lessor, copies of any data obtained as a result of such surveys.

(o) Nothing in this section shall be viewed as limiting the lessee's responsibility to take appropriate measures to meet emergency situations. In such situations, the Director may approve or require departures from an approved development and production plan.

(p) The lessee shall contemporaneously submit to the Federal Energy Regulatory Commission that portion of any development and production plan which relates to production of natural gas and the facilities for transportation of natural gas.

§ 250.34-3 Environmental report.

(a) Environmental Report (Exploration). At the same time the lessee submits an exploration plan to the Director, an Environmental Report (Exploration) shall be submitted except as provided for in § 250.34-1(a)(2)(ii). The report shall identify the name of the lessee or operator and the lease(s) involved. The report should be in summary form and should reference information contained in the related exploration plan and the most recent environmental impact statement prepared for the area. The Environmental Report (Exploration) shall include information available at the time of the plan's submission to the extent that such information is accurate, current, and applicable to the geographic area covered by the exploration plan. The Environmental Report (Exploration) shall include the following:

(1) To the extent that information is not contained in the related exploration plan, the Environmental Report shall contain:

(i) A brief description of the following:

(A) The procedures, personnel, and equipment that are to be used for preventing, reporting, and cleaning up spills of oil or waste materials which might occur during the exploration activities, including information on response time, capacity, and location of equipment;

(B) The location, size, number and land requirements (including rights-of-way and easements) of onshore support and storage facilities, and, where possible, a timetable regarding the acquisition of lands and the construction or expansion of any facilities;

(C) The estimated number of persons expected to be employed in support of offshore, onshore, and transportation activities, and, where possible, the approximate number of new employees and families likely to move into the affected area;

(D) The most likely travel routes for boat and aircraft traffic between offshore and onshore facilities, the probable location of onshore terminals, and the estimated frequency such routes will be traversed;

(E) The quantity and composition of solid, liquid, and gaseous wastes and pollutants likely to be generated by offshore, onshore, and transport operations;

(F) Major supplies, services, energy, water, or other resources within affected States necessary for carrying out the related plan;

(G) The directly affected offshore and onshore areas, including a general description of water depths, currents, water quality, weather patterns, ambient air quality, flora and fauna, cultural resources, other uses of the area, affected socioeconomic conditions, and geology. This will include a description of environmentally sensitive or potentially hazardous areas which might be affected by the proposed exploration activities. Such areas shall include, but are not limited to, those of cultural (e.g., archeological), biological (e.g., fisheries), or geological (e.g., seismic) significance, and areas of particular concern designated by affected States pursuant to the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1451 et seq.). Emphasis is to be placed on those environmental values that may be affected by the proposed activity.

(ii) An assessment of the affects on the offshore and onshore environments expected to occur as a result of implementation of the exploration plan, expressed in terms of magnitude and duration, with special emphasis upon the identification and evaluation of unavoidable and irreversible impacts on the environment.

(2) Such other data and information as the Director may require.

(3) Copies of all consistency certifications required pursuant to the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1456) and implementing regulations (15 CFR § 930.76). The consistency certification shall be accompanied by the information required by 15 CFR § 930.77 (2) and (3).

(4) The name, address, and telephone number of an individual employee of the lessee to whom inquiries by the Director and the affected States may be made.

(b) Environmental Report (Development/Production). At the same time the lessee submits a development and production plan to the Director, an Environmental Report (Development/Production) shall be submitted except as provided for in § 250.34-2(a)(2)(ii). The report shall identify the name of the lessee or operator, and the lease(s) involved. The report shall be as detailed as necessary to enable identification and evaluation of the significant environmental consequences of the proposed activities and should reference information contained in the related development and production plan. The Environmental Report (Development/Production) shall include information available at the time of the plan's submission to the extent that such information is accurate, current, and applicable to the geographic area covered by the development and production plan.

(1) To the extent that information is not contained in the related development and production plan, the Environmental Report shall contain:

(i) A brief description of the following:

(A) The location, description, and size of any offshore and, to the maximum extent practicable, land-based operations to be conducted or contracted for as a result of the proposed activity.

This shall include: (*1*) The acreage required within a State for facilities, rights-of-way, and easements;

(*2*) The means proposed for transportation of oil and gas to shore, the routes to be followed by each mode of transportation, and the estimated quantities of oil or gas, or both, to be moved along such routes;

(*3*) An estimate of the frequency of boat and aircraft departures and arrivals, the onshore location of terminals, and the normal routes for each mode of transportation; and

(*4*) Quantities, types, and plans for disposal of solid, liquid, and gaseous wastes and pollutants likely to be generated by offshore, onshore, and transport operations, and, regarding any wastes which may require onshore disposal, the means of transportation to be used to bring the wastes to shore and the location of onshore waste disposal or treatment facilities.

(B) The requirements for land, labor, material, and energy for the items identified above including:

(*1*) The approximate number, timing, and duration of employment of persons who will be engaged in onshore development and production activities, and approximate number of local personnel who will be employed for or in support of the development activities (classified by the major skills or crafts that will be required from local sources and estimated number of each such skill needed), and the approximate total number of persons who will be employed during the onshore construction activity and during all activities related to offshore development and production;

(*2*) The approximate number of people and families to be added to the population of local near-shore areas as a result of the planned development;

(*3*) An estimate of significant quantities of energy and resources to be used or consumed, including electricity, water, oil and gas, diesel fuel, aggregate, or other supplies, which may be purchased within an affected State; and

(*4*) The type of contractors or vendors which will be needed, although not specifically identified, and which may place a demand on local goods and services.

(C) A schedule setting forth specific near and onshore development activities which correspond to the offshore development and production activities described in detail in the related plan. To the maximum extent possible, individual activities are to be projected on a year-to-year basis. The schedule shall include:

(*1*) Sequence in which events are expected to be accomplished;

(*2*) Best estimate of time required to complete specific activities;

(*3*) Month and year that specific actions are most likely to occur onshore and offshore; and

(*4*) Month and year that other pertinent activities associated with development of onshore and offshore activities are likely to be accomplished.

(D) A description of any environmental monitoring systems proposed by the lessee.

(E) A description of the contingency plans that are in effect for the area to be developed together with a discussion of the population-prevention and cleanup equipment that is or will be maintained on the drill site and in the area pursuant to a Regional Contingency Plan.

(F) A narrative description of the existing environment, with an emphasis placed on those environmental value that may be affected by the proposed action. This section shall contain a description of the physical environment of the leased lands covered by the related plan. This portion of the report shall include data and information obtained or developed by the lessee together with other pertinent data and information available to the lessee from other sources. The lessee should cross-reference information on the physical environment in the most recent environmental impact statement and should summarize pertinent information contained in other published accredited reports. The report shall clearly identify the source of all data and information contained therein. The data and information to be included in the lessee's report on the environment shall include where appropriate:

(*1*) Cultural and historical resource surveys of the lease or unit area;

(*2*) Seafloor configuration, stability, foundation characteristics, sedimentation, and erosion potential at the site of structural components described in the plan;

(*3*) Seismic risk and conditions (geophysical high resolution surveys of sites, routes, and corridors);

(*4*) Aquatic biota, including a description of fishery and marine mammal significance and utilization of the lease or unit area;

(*5*) Predevelopment water column quality (ambient) and temperature data for incremental depths for the area encompassed by the plan;

(*6*) Ocean currents described as to prevailing direction, seasonal variations and variations at different depths in the lease or unit area;

(*7*) Meteorologic conditions, including storm frequency and magnitude, wind direction and velocity, and ambient air quality, listing, where possible, the means and extremes of each;

(*8*) Other uses of the area;

(*9*) Socioeconomic conditions; and

(*10*) Existing monitoring systems that are currently measuring impacts of activities on the environment in the lease sale area.

(ii) An assessment of the affects on the environment expected to occur as a result of implementation of the related plan. This section of the report shall identify specific and cumulative impacts that may occur both onshore and offshore and measures proposed to mitigate these impacts. Such impacts shall be quantified to the fullest extent possible and shall be accumulated for all activities for each of the major elements of the environment (i.e., air, water, biota, etc.). In every case, impacts shall be expressed in terms of magnitude and duration. The report shall place special emphasis upon the identification and evaluation of unavoidable and irreversible impacts on the environment and additional environmental monitoring systems that may be needed to provide accurate reporting of cumulative impacts on the environment.

(iii) A discussion of alternatives to the activities proposed that were considered during the development of the related plan; for example, a comparison of development and production operations using a bottom-supported platform which extends above the surface of the ocean with a similar degree of oil and gas development using seafloor completion and production techniques. Any significant differences in the environmental impacts of the use of alternative technologies shall be identified and discussed.

(2) Such other data and information as the Director may require.

(3) Copies of all consistency certifications required pursuant to the Coastal Zone Management Act of 1972, as amended (16 U.S.C. § 1456) and implementing regulations (15 CFR § 930.76). The consistency certification shall be accompanied by the information required by 15 CFR § 930.77.

(4) The name, address, and telephone number of an individual employee of the lessee to whom inquires by the Director and the affected States may be directed.

§ 250.34-4 Compliance with the National Environmental Policy Act (NEPA)

(a)(1) Prior to approval of an exploration or development and production plan, or approval of significant revisions to approved exploration or development and production plans the Director shall prepare an Environmental Assessment under § 250.34-1(c) or § 250.34-2(c) of this Part in accordance with applicable policies and guidelines, to determine whether approval of the proposed activities constitute a major Federal action significantly affecting the quality of the human environment requiring preparation of an Environmental Impact Statement pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 [42 U.S.C. § 4332(2)(C)]. In this assessment, the Director may utilize information contained in the lessee's Environmental Report.

(2) In the assessment the Director shall give particular attention to:

(i) Location of major engineering structures in areas of high seismic risk or seismicity;

(ii) Location of major engineering structures within or near the boundary of a marine sanctuary, wildlife refuge, or other areas of high ecological sensitivity;

(iii) Location of bottom-founded structures in areas of potentially hazardous natural bottom conditions; and

(iv) Use of new and/or unusual technology.

(3) At least once the Director shall declare the approval of a development and production plan in any area or region (as defined by the Director) of the Outer Continental Shelf, except in the Gulf of Mexico other than the State of Florida, to be a major Federal action.

(4) An Environmental Impact Statement shall be prepared when the Director determines that the impacts of activities described in the plan or revision have not been adequately considered in a previous Environmental Impact Statement. In this regard, the Director shall consider:

(i) Whether implementation of the activities described in the plan or revision would require construction of new onshore processing, storage, treatment, or transportation facilities which could have significant adverse impacts upon the human, marine, or coastal environments that have not been adequately considered in a previous Environmental Impact Statement;

V 4 4 / 1 2

(ii) Whether the cumulative impact of proposed activities have not been previously considered, or whether the impacts are significantly greater than those previously analyzed.

(iii) The likelihood of adverse impacts on the human, marine, or coastal environments that differ significantly in magnitude, duration, or nature from the impacts considered in a previous Environmental Impact Statement.

(b) Where it has been determined that an Environmental Impact Statement will be prepared, the Director shall decide whether the Statement will cover the activities described in a single development and production plan or in a number of such plans covering an area of the OCS where there is a likelihood of significant development.

[FR Doc. 79-1489 Filed 1-16-79; 8:45 am]

[4310-31-M]

[30 CFR Part 252]

OUTER CONTINENTAL SHELF (OCS) OIL AND GAS INFORMATION PROGRAM

AGENCY: U.S. Geological Survey, Department of the Interior.

ACTION: Proposed rule.

SUMMARY: Enactment of the Outer Continental Shelf (OCS) Lands Act, 43 U.S.C. 1331 et seq., as amended, Pub. L. 95-372, necessitates revision of the regulations contained in 30 CFR Part 252. The proposed rule establishes new procedures and, to the extent required, modifies existing procedures which require the Director, U.S. Geological Survey to make certain information available to the Governors of affected States in accordance with the provisions of the Freedom of Information Act (5 U.S.C. 552), and the OCS Lands Act Amendments of 1978 (43 U.S.C. 1352).

DATE: Written comments should be submitted on or before March 16, 1979.

ADDRESS: Interested persons are invited to submit written comments and recommendations with respect to the proposed regulations. Responses should identify the subject matter and be directed to the Chief, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 600, Reston, Virginia 22092 (703/860-7524).

FOR FURTHER INFORMATION CONTACT:

Don E. Kash, Chief, Conservation Division, U.S. Geological Survey, National Center (Mail Stop 600), Reston, Virginia 22092 (703/860-7524).

SUPPLEMENTARY INFORMATION: Background: Regulations establishing procedures for the Director, U.S. Geological Survey, to make available summary reports of data and information to the Governors of affected States were published as final rules on January 27, 1978 (43 F.R. 3887). On September 18, 1978, the OCS Lands Act Amendments of 1978 were enacted (Public Law No. 95-372). Certain provisions of those amendments (43 U.S.C. § 1352) supersede the procedures established by the existing regulations and necessitate their revision. The most significant revisions are the expansion of the scope of the information covered by the provisions of section 252.5, "Information made available to affected States," and the addition of a new section 252.7, entitled "Privileged and proprietary data and information to be made available to affected States."

ENVIRONMENTAL IMPACT AND REGULATORY ANALYSIS: The Department of the Interior has determined that the revision of the regulations in 30 CFR Part 252, as proposed in this notice, is not a major Federal action significantly affecting the quality of the human environment and will not require preparation of an Environmental Impact Statement. The Department has also determined that this notice of proposed rule does not require preparation of a regulatory analysis under Executive Order 12044.

AUTHORS: Thomas J. McCloskey, Office of the Assistant Secretary—Energy and Minerals, U.S. Department of the Interior (202/343-4457); and Gerald Rhodes, Geological Survey, U.S. Department of the Interior (703/860-7531).

Dated: January 12, 1979.

JOAN M. DAVENPORT,
Assistant Secretary of the Interior.

It is proposed to modify 30 CFR Part 252 to read:

PART 252—OUTER CONTINENTAL SHELF (OCS) OIL AND GAS INFORMATION PROGRAM

Sec.

252.1 Purpose.
252.2 Definitions.
252.3 Oil and gas data and information to be provided for use in the OCS Oil and Gas Information Program.
252.4 Summary report to affected States.
252.5 Information to be made available to affected States.
252.6 Freedom of Information Act requirements.
252.7 Privileged and proprietary data and information to be made available to affected States.

AUTHORITY: Outer Continental Shelf Lands Act, 43 U.S.C. § 1331 et seq., as amended, Pub. L. 95-372; Freedom of Information Act (5 U.S.C. 552).

§ 252.1 Purpose.

The purpose of this Part is to supplement the procedures contained in Parts 250 and 251 of this Chapter for the submission of oil and gas data and information resulting from exploration, development, and production operations on the Outer Continental Shelf (OCS) to the Director, U.S. Geological Survey. In addition, this Part establishes procedures for the Director to make available certain information to the Governors of affected States and, upon request to the executives of affected local governments in accordance with the provisions of the Freedom of Information Act and the OCS Lands Act Amendments of 1978.

§ 252.2 Definitions.

(a) "Act" refers to the Outer Continental Shelf Lands Act, as amended (43 U.S.C. § 1331 et seq.).

(b) "Affected State" means, with respect to any program, plan, lease sale, or other activity, proposed, conducted, or approved pursuant to the provisions of the Act, any State—

(1) the laws of which are declared, pursuant to section 4(a)(2)(A) of the Act, to be the law of the United States for the portion of the OCS on which such activity is, or is proposed to be, conducted;

(2) which is, or is proposed to be, directly connected by transportation facilities to any artificial island or installations, and other devices permanently, or temporarily attached to the seabed;

(3) which is receiving, or in accordance with the proposed activity will receive, oil for processing, refining, or transshipment which was extracted from the OCS and tranported directly to such State by means of vessels or by a combination of means including vessels;

(4) which is designated by the Secretary as a State in which there is a substantial probability of significant impact on or damage to the coastal, marine, or human environment, or a State in which there will be significant changes in the social, governmental, or economic infrastructure, resulting from the exploration, development, and production of oil and gas anywhere on the OCS; or

(5) in which the Secretary finds that because of such activity there is, or will be, a significant risk of serious damage, due to factors such as prevailing winds and currents, to the marine or coastal environment in the event of any oilspill, blowout, or release of oil or gas from vessels, pipelines, or other transshipment facilities.

(c) "Analyzed geological information" means data collected under a permit (or for the purposes of § 250.97 of this Chapter under a lease) which have been analyzed. Analysis may include, but is not limited to, identification of lithologic and fossil content, core analyses, laboratory analyses of physical and chemical properties, logs or charts of electrical, radioactive, sonic, and other well logs, and descriptions of hydrocarbon shows or hazardous conditions.

(d) "Data" means facts and statistics or samples which have not been analyzed or processed.

(e) "Development" means those activities which take place following discovery of oil or natural gas in paying quantities, including geophysical activity, drilling, platform construction, and operation of all onshore support facilities, and which are for the purpose of ultimately producing the oil and gas discovered.

(f) "Director" means the Director of the U.S. Geological Survey or a designee of the Director.

(g) "Exploration" means the process of searching for oil and natural gas, including (1) geophysical surveys where magnetic, gravity, seismic, or other systems are used to detect or imply the presence of such oil or natural gas, and (2) any drilling, whether on or off known geological structures, including the drilling of a well in which a discovery of oil or natural gas in paying quantities is made and the drilling of any additional delineation well after such discovery which is needed to delineate any reservoir and to enable the lessee to determine whether to proceed with development and production.

(h) "Governor" means the Governor of a State, or the person or entity designated by, or pursuant to, State law to exercise the powers granted to a Governor pursuant to the Act.

(i) "Information", when used without a qualifying adjective, includes analyzed geological information, processed geophysical information, interpreted geological information, and interpreted geophysical information.

(j) "Interpreted geological information" means knowledge, often in the form of maps, developed by determining the geological significance of data and analyzed geological information.

(k) "Interpreted geophysical information" means knowledge, often in the form of maps, developed by determining the geological significance of geophysical data and processed geophysical information.

(l) "Lease" means any form of authorization which is issued under section 8 or maintained under section 6 of the Act and which authorizes exploration for, and development and production of, oil or natural gas, or the land covered by such authorization, whichever is required by the context.

(m) "Lessee" means the party authorized by a lease, or an approved assignment thereof, to explore for and develop and produce the leased deposits in accordance with the regulations in Part 250 of this Chapter, including all parties holding such authority by or through the lessee.

(n) "Outer Continental Shelf (OCS)" means all submerged lands (1) which lie seaward and outside of the area of lands beneath navigable waters as defined in the Submerged Lands Act (67 Stat. 29) and (2) of which the subsoil and seabed appertain to the United States and are subject to its jurisdiction and control.

(o) "Permittee" means the party authorized by a permit issued pursuant to Part 251 of this Chapter to conduct activities on the OCS.

(p) "Processed geophysical information" means data collected under a permit (or for the purposes of § 250.97 of this Chapter under a lease) which have been processed. Processing involves changing the form of data so as to facilitate interpretation. Processing operations may include, but are not limited to, applying corrections for known perturbing causes, rearranging or filtering data, and combining or transforming data elements.

(q) "Production" means those activities which take place after the successful completion of any means for the removal of oil or natural gas, including such removal, field operations, transfer of oil or natural gas to shore, operation monitoring, maintenance, and workover drilling.

(r) "Secretary" means the Secretary of the Interior or a designee of the Secretary.

§ 252.3 Oil and gas data and information to be provided for use in the OCS oil and gas information program.

(a) Any permittee or lessee engaging in the activities of exploration for, or development and production of, oil and gas on the OCS shall provide the Director access to all data and information obtained or developed as a result of such activities, including geological data, geophysical data, analyzed geological information, processed and reprocessed geophysical information, interpreted geophysical information, and interpreted geological information. Copies of these data and information and any interpretation of these data and information shall be provided to the Director upon request. No permittee or lessee submitting interpreted geological information or interpreted geophysical information, where such interpreted information has been submitted in good faith, shall be held responsible for any consequence of the use or reliance upon such interpretations.

(b)(1) Whenever a lessee provides any data or information, at the request of the Director and specifically for use in the OCS Oil and Gas Information Program, in the form and manner of processing which is utilized by the lessee in the normal conduct of business, the Director shall pay the reasonable cost of reproducing such data and information. The cost shall be computed and paid in accordance with the applicable provisions of (e)(1) of this section.

(2) Whenever a permittee provides any data or information, at the request of the Director and specifically for use in the OCS Oil and Gas Information Program, in the form and manner of processing which is utilized by the permittee in the normal conduct of business, the Director shall pay the permittee the reasonable cost of reproducing such data and information for the Director and shall pay at the lowest rate available to any purchaser for processing such data and information the costs attributable to such processing. The cost is to be computed and paid in accordance with the applicable provisions of (e)(3) of this section.

(3) Whenever a lessee or permittee provides any data or information, at the request of the Director and specifically for use in the OCS Oil and Gas Information Program, in a form and manner of processing not normally utilized by the lessee or permittee in the normal conduct of business the Director shall pay the reasonable cost of processing and reproducing such data and information. The cost is to be computed and paid in accordance with the applicable provisions of (e)(2) of this section.

(c) Data or information requested by the Director shall be provided as soon as practicable, but not later than 30 days following receipt of the Director's request.

(d) The Director reserves the right to disclose any data or information acquired from a lessee or permittee to an independent contractor or agent for the purpose of reproducing, processing, reprocessing, and interpreting such data or information. Prior to any such disclosure, the contractor or agent shall be required to execute a written commitment not to disclose any data or information to anyone without the express consent of the Director. In the event of any unauthorized disclosure of data or information by the contractor or agent or by an employee thereof the responsible contractor or agent or employee thereof shall be liable for penalties pursuant to section 24 of the Act.

(e)(1) After delivery in accordance with (b)(1) of this section of data or information, the lessee shall, upon request for reimbursement and upon determination by the Director that the requested reimbursement is proper, be reimbursed for the cost of reproducing the data or information at the lessee's

A 1 7 7 9 UMI

lowest rate or at the lowest commercial rate established in the area, whichever is less.

(2) After delivery in accordance with (b)(3) of this section of data or information which has been processed at the Director's specific request in a form or manner not utilized by the permittee or lessee in the normal conduct of business, the permittee or lessee shall, upon request and upon determination by the Director that the requested reimbursement is proper, be reimbursed for the cost of processing or reproducing. Reimbursement shall be for only the costs attributable to processing and reproducing, as distinguished from the costs of data acquisition.

(3) After delivery in accordance with (b)(2) of this section of data or information which has been processed in the manner utilized by the permittee in the normal conduct of business, the permittee, upon request, shall be reimbursed for the reasonable costs attributed to reproducing the data and information and also for the processing costs at the lowest rate at which the processed information is made available by the permittee to any purchaser. The permittee shall refund to the United States any amount paid by the United States in excess of the amount paid by any other purchaser of the same processed information.

(4) Requests for reimbursement will contain a cost breakdown in sufficient detail to allow separation of reproduction, processing, and reprocessing costs from acquisition costs. No reimbursement to a lessee or permittee shall be made until the Director determines that the request for reimbursement as originally submitted or as revised is proper.

(f) Each Federal department or agency shall provide the Director with any data which it has obtained pursuant to section 11 of the Act, and any other information which may be necessary or useful to assist the Director in carrying out the provisions of the Act.

§ 252.4 Summary report to affected States.

(a) The Director, as soon as practicable after analysis, interpretation, and compilation of oil and gas data and information developed by the U.S. Geological Survey and of oil and gas data and information furnished by lessees, permittees, or other government agencies, shall make available to affected States and, upon request, to the executive of any local government whose jurisdiction covers an area impacted by OCS activities, a Summary Report of data and information designed to assist them in planning for the nearshore and onshore impacts of potential OCS oil and gas development and production. The Director shall consult with affected States and other interested parties to define the nature, scope, content, and timing of the Summary Report. The Summary Report shall not contain data or information which the Director determines is exempt from disclosure in accordance with § 252.6 of this Part. The Summary Report shall include:

(1) estimates of oil and gas reserves, estimates of the oil and gas resources that may be found within areas which the Secretary plans to offer for lease, and when available, projected rates and volumes of oil and gas to be produced from leased areas;

(2) approximate projections of the magnitude and timing of development, if and when oil or gas (or both) is discovered;

(3) methods of transportation to be used, including pipelines and approximate location of routes to be followed; and

(4) general location and nature of near-shore and onshore facilities expected to be utilized.

(b) When the Director determines that significant changes occur in the information contained in a Summary Report, the Director shall prepare and distribute the new information to each affected State, and, upon request, to the executive of any affected local government.

§ 252.5 Information to be made available to affected States.

The Director shall make available on a regular basis to each affected State and, upon request, to the executive of any affected local government, a copy of an index which lists, to the best of the Department's knowledge, all relevant, actual or proposed programs, plans, reports, environmental impact statements, lease sale information (See: 43 CFR 3301.8), and any similar type of relevant information, and all modifications and revisions thereof and comments thereon, prepared or obtained by the Director pursuant to the Act. Upon request, the Director shall make available to such affected States and local governments copies of any information listed in the index and which is subject to the control of the U.S. Geological Survey. The Director shall not make available any information which identifies any particular tract with the name or names of any party or parties participating in the tract nomination process. The Director shall not make available any information which the Director determines is exempt from disclosure in accordance with § 252.6 of this Part.

§ 252.6 Freedom of Information Act requirements.

(a) The Director shall make available data and information in accordance with the requirements of the Freedom of Information Act (5 U.S.C. 552) and of the regulations contained in 43 CFR Part 2 (Records and Testimony), and the requirements of the Act and the regulations contained in 30 CFR Part 250 (Oil and Gas Sulphur Operations in the Outer Continental Shelf) and 30 CFR Part 251 (Geological and Geophysical Explorations of the Outer Continental Shelf).

(b) Except as provided in § 252.7 of this Part, no data or information determined by the Director to be exempt from public disclosure under (a) of this section shall be made available to the public or provided to any affected State or to the executive of any affected local government unless the lessee, or the permittee and all persons to whom that permittee has sold such data or information under promise of confidentiality, agree to such transmittal.

§ 252.7 Privileged and proprietary data and information to be made available to affected States.

(a)(1)(i) When the Secretary includes, in a solicitation for nominations for leasing, land areas within three miles of the seaward boundary of any coastal State, the Governor of the affected State may designate an appropriate State official to receive privileged or proprietary data or information regarding any field, geological structure, or trap located within this three-mile zone.

(ii) The Secretary, after receipt of nominations for leasing areas within three miles of the seaward boundary of a coastal State, may designate a portion of the nominated area for further consideration for leasing. For the purposes of consultation, the Governor may designate an appropriate State official to receive relevant privileged or proprietary data and information on the possible existence of oil or gas pools or fields underlying both the OCS lands and lands subject to the jurisdiction of such State in the areas designated by the Secretary.

(iii) After the issuance of a lease, the Governor of any affected State may designate an appropriate State official to inspect, at a regional location which the Director shall designate, any privileged or proprietary data or information regarding any activity in an area adjacent to such State covered by the lease sale. For purposes of this section, "area adjacent to such State" is defined as the area within three miles of the seward boundary of a State.

(2) Data and information obtained by a State under (a)(1)(i), (ii), and (iii) of this section shall be subject to the requirements of the Freedom of Information Act (5 U.S.C. 552) and of the regulations contained in 43 CFR Part 2 (Records and Testimony), and the Act (92 Stat. 629) and of the regulations contained in 30 CFR Part 250 (Oil and Gas Sulphur Operations in the Outer Continental Shelf), 30 CFR Part 251 (Geological and Geophysical Explorations of the Outer Continental Shelf), and this Part 252 (Outer Continental Shelf Oil and Gas Information Program).

(3) Prior to transmitting any privileged or proprietary data or information to any State, or granting such State access to such data or information, the Director shall enter into a written agreement with the Governor of each State in accordance with Section 26(e) of the Act in which the State agrees, as a condition precedent to receiving or being granted access to such data or information, to: (i) protect and maintain the confidentiality of privileged or proprietary data and information; (ii) waive the defenses set forth in (b)(2) of this section, and (iii) hold the United States harmless from any violations of the agreement to protect the confidentiality of privileged or proprietary data or information by the State or its employees.

(b)(1) Whenever any employee of the Federal Government or of any State reveals privileged or proprietary data or information obtained pursuant to the regulations in this Chapter, the lessee or permittee who supplied such information to the Director or any other Federal official, and any person to whom such lessee or permittee has sold such data or information under the promise of confidentiality, may commence a civil action for damages in the appropriate district court of the United States against the Federal Government or the State, as the case may be. Any Federal or State employee who fails to comply with any of the requirements of this section shall be subject to the penalties described in section 24 of the Act.

(2) In any action commenced against the Federal Government or a State pursuant to (b)(1) of this section, the Federal Government or the State, as the case may be, may not raise as a defense any claim of sovereign immunity, or any claim that the employee who revealed the privileged or proprietary data or information which is the basis of the suit was acting outside the scope of the person's employment in revealing such data or information.

(c) If the Director finds that any State cannot or does not comply with the constraints described in the agreement in (a)(3) of this section, the Director shall thereafter withhold transmittal of privileged or proprietary data or information to the State and shall deny the State the right of inspection until the Director finds that the State can and will comply with those constraints.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 65]

[FRL 1038-2; Docket No. DCO-78-46]

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of Delayed Compliance Order Issued by the North Carolina Environmental Management Commission to E. J. Snyder and Co., Inc.

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: EPA proposes to approve a delayed compliance order issued by the North Carolina Environmental Management Commission to E. J. Snyder and Company, Inc., in Albemarle, North Carolina. The delayed compliance order requires E. J. Snyder and Company, Inc., to bring air emissions from the two (2) Fabcon tenter frames in Complex B in Albemarle, North Carolina, into compliance with an applicable regulation contained in the North Carolina State Implementation Plan (SIP) by April 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with the provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before February 16, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30308. The State order, supporting material, and public comments received in response to this notice may be inspected and copies (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Floyd Ledbetter, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30308. Telephone number: (404) 881-4298.

SUPPLEMENTARY INFORMATION: E. J. Snyder and Company, Inc. operates a textile manufacturing and finishing plant in Albemarle, Stanley County, North Carolina. The order under consideration addresses emissions from the two (2) Fabcon tenter frames in Complex B, which is subject to the North Carolina Administrative Code (NCAC) Title 15, Chapter 2D, Section .0521. This regulation limits the visible emissions from process and fuel burning sources, and is part of the federally-approved North Carolina State Implementation Plan. The order requires compliance with the regulations by April 1, 1979, through the implementation of the following schedule for the construction or installation of control equipment:

(1) Begin construction of devices to implement the control plan on or before December 1, 1978.

(2) Complete construction of all devices to implement the control plan on or before April 1, 1979.

(3) Show that the two Fabcon tenter frames meet 15 NCAC 2D.0521 on or before April 1, 1979.

The source has consented to the terms of the order and has agreed to meet the order's increments during the period of this informal rulemaking. As an interim limit, the two units shall not exceed sixty (60%) percent opacity averaged over any one (1) hour period, prior to the attainment of the last milestone.

Because this order has been issued to a major source of particulate matter emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before becoming effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection. EPA has tentatively determined that the order satisfies these requirements.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the North Carolina SIP. Compliance with the proposed order will not exempt the company from complying with applicable requirements contained in any subsequent revisions to the SIP which are approved by EPA.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will

be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

(42 U.S.C. 7413, 7601)

Dated: January 9, 1979.

JOHN A. LITTLE,
Acting Regional Administrator,
Region IV.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of Delayed Compliance Order Issued by the North Carolina Environmental Management Commission to Camp Lejeune Marine Corps Base

AGENCY: Environmental Protection Agency.

ACTION: Proposed Rule.

SUMMARY: EPA proposes to approve a delayed compliance order issued by the North Carolina Environmental Management Commission to Camp Lejeune Marine Corps Base in Camp Lejeune, North Carolina. The delayed compliance order requires Camp Lejeune Marine Corps Base to bring air emissions from the 4 coal fired boilers at the central heating plant in Camp Lejeune, North Carolina, into compliance with an applicable regulation contained in the North Carolina State Implementation Plan (SIP) by June 30, 1979. Because the order has been issued to a major source and permits a delay in compliance with the provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be sued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before February 16, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30308. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Floyd Ledbetter, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30308. Telephone number (404) 881-4298.

SUPPLEMENTARY INFORMATION: Camp Lejeune Marine Corps Base is operated by the U.S. Marine Corps for the purpose of housing and training recruits for combat. The order under consideration addresses emissions from the four coal fired boilers at the central heating plant, which is subject to the North Carolina Administrative Code (NCAC) Title 15, Chapter 2D, Section .0503 and Section .0521. These regulations limit emissions of particulates and visible emissions from fossil fuel burning boilers, and is part of the federally-approved North Carolina State Implementation Plan. The order requires compliance with the regulation by June 30, 1979, through the implementation of the following schedule for the construction or installation of control equipment:

(1) Begin installation of devices to implement the control plant on or before April 15, 1979.

(2) Complete construction of emission control equipment on or before April 30, 1979.

(3) Achieve and document compliance with Emission Standards and 15 NCAC 2D.0521 on or before June 30, 1979.

The source has consented to the terms of the order and has agreed to meet the order's increments during the period of this informal rulemaking. As an interim limit, the 4 coal fired boilers shall not emit more than .72 pounds/million BTU's and visible emissions shall not exceed 70% opacity aggregate of more than 6 minutes in any one hour, prior to the attainment of the last milestone.

Because this order has been issued to a major source of particulate matter emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before becoming effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection. EPA has tentatively determined that the order satisfies these requirements.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the North Carolina SIP. Compliance with the proposed order will not exempt the company from complying with applicable requirements contained in any subsequent revisions to the SIP which are approved by EPA.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

STATE AND FEDERAL ADMINISTRATIVE ORDERS PERMITTING A DELAY IN COMPLIANCE WITH STATE IMPLEMENTATION PLAN REQUIREMENTS

Proposed Approval of Delayed Compliance Order Issued by the North Carolina Environmental Management Commission to Drexel Heritage Furnishings, Inc.

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: EPA proposes to approve a delayed compliance order issued by the North Carolina Environmental Management Commission to Drexel Heritage Furnishings Plant Number 43 in Hildebran, North Carolina. The delayed compliance order requires Drexel Heritage Furnishings Plant Number 43 to bring air emissions from the wood/coal fired boiler in Hildebran, North Carolina, into compliance with an applicable regulation contained in the North Carolina State Implementation Plan (SIP) by January 1, 1979. Because the order has been issued to a major source and permits a delay in compliance with the provisions of the SIP, it must be approved by EPA before it becomes effective as a delayed compliance order under the Clean Air Act (the Act). If approved by EPA, the order will constitute an addition to the SIP. In addition, a source in compliance with an approved order may not be issued under the federal enforcement or citizen suit provisions of the Act for violations of the SIP regulations covered by the order. The purpose of this notice is to invite public comment on EPA's proposed approval of the order as a delayed compliance order.

DATE: Written comments must be received on or before February 16, 1979.

ADDRESSES: Comments should be submitted to Director, Enforcement Division, EPA, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30308. The State order, supporting material, and public comments received in response to this notice may be inspected and copied (for appropriate charges) at this address during normal business hours.

FOR FURTHER INFORMATION CONTACT:

Floyd Ledbetter, U.S. Environmental Protection Agency, Region IV, 345 Courtland Street, NE., Atlanta, Georgia 30308. Telephone number: (404) 881-4298.

SUPPLEMENTARY INFORMATION: Drexel Heritage Furnishings, Inc., operates a furniture manufacturing plant in Hildebran, Burke County, North Carolina. The order under consideration addresses emissions from the wood/coal fired boiler, which are subject to the North Carolina Administrative Code (NCAC), Title 15, Chapter 2D, Section .0504 and .0503. These regulations limit the particulate emissions from Wood Burning Indirect Fired Heat Exchangers and Fuel Burning Sources, and is part of the federally-approved North Carolina State Implementation Plan. The order requires final compliance with the regulations by January 1, 1979, through the implementation of the following schedule for the construction or installation of control equipment:

(1) Resubmit plans detailing modifications to achieve compliance on or before September 1, 1978.

(2) Complete modification to eliminate fly ash reinjection on or before November 1, 1978.

(3) Achieve compliance and submit a source test documenting compliance with 15 NCAC 2D.0504 and 15 NAC 2D.0503 on or before January 1, 1979.

The source has consented to the terms or the order and has agreed to meet the order's increments during the period of this informal rulemaking. As an interim limit, the wood/coal fired boiler shall not emit more than 0.68 pounds/million BTU's and visible emissions shall not exceed the limits in 15 NCAC 2D.0521 prior to the attainment of the last milestone.

Because this order has been issued to a major source of particulate matter emissions and permits a delay in compliance with the applicable regulation, it must be approved by EPA before becoming effective as a delayed compliance order under Section 113(d) of the Clean Air Act (the Act). EPA may approve the order only if it satisfies the appropriate requirements of this subsection. EPA has tentatively determined that the order satisfies these requirements.

If the order is approved by EPA, source compliance with its terms would preclude federal enforcement action under Section 113 of the Act against the source for violations of the regulation covered by the order during the period the order is in effect. Enforcement against the source under the citizen suit provision of the Act (Section 304) would be similarly precluded. If approved, the order would also constitute an addition to the North Carolina SIP. Compliance with the proposed order will not exempt the company from complying with applicable requirements contained in any subsequent revisions to the SIP which are approved by EPA.

All interested persons are invited to submit written comments on the proposed order. Written comments received by the date specified above will be considered in determining whether EPA may approve the order. After the public comment period, the Administrator of EPA will publish in the FEDERAL REGISTER the Agency's final action on the order in 40 CFR Part 65.

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Proposed Exemption From Requirement of a Tolerance for an Inert Ingredient in Pesticide Formulations

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed Rule.

SUMMARY: This notice proposes that an additional inert (or occasionally active) ingredient in pesticide formulations be exempted from the requirement of a tolerance. The proposal was submitted by BASF Wyandotte Corp. This amendment would permit the use of the exempted inert in pesticide products.

DATE: Comments must be received on or before February 16, 1979.

ADDRESS COMMENTS TO: Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M Street, SW, Washington DC 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. David Ritter, Toxicology Branch, Hazard Evaluation Division (TS-729), Office of Pesticide Programs, EPA (202/426-2680).

SUPPLEMENTARY INFORMATION: At the request of BASF Wyandotte Corp., Wyandotte, MI 48192, the Administrator is proposing to amend 40 CFR 180.1001 by exempting an additional presticide chemical which is an inert (or occasionally active) ingredient in pesticide formulations from the requirement of a tolerance.

Inert ingredients are all ingredients which are not active ingredients as defined in 40 CFR 162.3(c), and include, but are not limited to the following types of ingredients (except when they have pesticidal efficacy of their own): Solvents such as water; baits such as sugar, starches, and meat scraps; dust carriers such as talc and clay; fillers; wetting and spreading agents; propellants in aerosol dispensers; and emulsifiers. The term inert is not intended to imply nontoxicity; the ingredient may or may not be chemically active.

The preables to proposed rulemaking documents of this nature include the common or chemical name of the substance under consideration, the name and address of the firm making the request for the exemption, and the toxicological and other scientific bases used in arriving at a conclusion of safety in support of the exemption.

Inert Ingredient	Firm	Bases for Approval
α-Alkyl(C_{10}-C_{16})-ω-hydroxy-poly(oxyethlene)-poly(oxy- r propylene) mixture of di- and monohydrogen phosphate esters and the corresponding ammonium, calcium, magnesium, monoethanolamine, potassium, sodium, and zinc salts of the phosphate esters; the combined poly-(oxyethylene)poly(oxypropylene) content averages 3-20 moles.	BASF Wyandotte Corp., Wyandotte, MI 48192.	Broadening the edible fatty alcohol range will not materially alter the nontoxic nature of these moieties.

Based on the above information, available information on the chemistry of these substances, and a review of their use, it has been found that, when used in accordance with good agricultural practice, these substances are useful and do not pose a hazard to the environment. It is concluded, therefore, that the proposed amendment to 40 CFR 180.1001 will protect the public health, and it is proposed that the regulation be established as set forth below.

Any person who has registered or submitted an application for the registration of a pesticide under the Federal Insecticide, Fungicide, and Rodenticide Act, which contains any of the ingredients listed herein, may request within 30 days after publication in the FEDERAL REGISTER that this proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject matter and the OPP document control number "OPP-300019". All written comments filed in response to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: December 1, 1978.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

STATUTORY AUTHORITY: Section 408(e) of the Federal Food, Drug, and Cosmetic Act [21 U.S.C. 346(e)].

It is proposed that Part 180, Subpart D, section 180.1001 be amended by alphabetically inserting "α-Alkyl(C_{10}-C_{16})-ω-• • • in the table of inert ingredients in paragraph (d) to read as follows:.

§ 180.1001 Exemptions from the requirement of a tolerance.

• • • • •

(d) • • •

Inert Ingredient	Limits	Uses
• • • • • • •		
α-Alkyl(C_{10}-C_{16})-ω-hydroxypoly-(oxyethylene)poly- (oxypropylene) mixture of di and monohydrogen phosphate esters and the corresponding ammonium, calcium, magnesium, monoethanolamine, potassium, sodium, and zinc salts of the phosphate esters; the combined poly(oxyethylene)-poly(oxypropylene) content averages 3-20 moles. PROGRAMS FOR EDUCATIONALLY DEPRIVED CHILDREN

Decision to Develop Regulations

AGENCY: Office of Education, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: The Commissioner of Education proposes to publish regulations for the program for educationally disadvantaged children under Title I of the Elementary and Secondary Education Act. These revisions are required by the Education Amendments of 1978 and Operation Common Sense. The revised Title I Regulations are intended to clarify existing provisions that are still applicable and to reflect statutory changes with respect to State and local applications, Title I project areas, parent advisory councils, maintenance of effort, the equitable use of State and local funds for the education of children in Title I projects, and the participation of children enrolled in private schools. These regulations are policy significant.

FOR FURTHER INFORMATION CONTACT:

Dr. John F. Staehle, Room 3642, Regional Office Building 3, 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone: 202/245-2720.

FOLLOW THROUGH PROGRAM

Decision to Develop Regulations

AGENCY: Office of Education, HEW.

ACTION: Notice of Decision to Develop Regulations.

SUMMARY: The Commissioner of Education proposes to recodify the regulations for the Follow Through Program, authorized by Title V of the Community Services Act. The regulations govern the selection of all grantees and some contractors for funding under the Follow Through Program. The recodification of these regulations is necessary for needed program reform. The regulations state the criteria for the funding of a second generation of projects and sponsors as well as the criteria for the refunding of existing projects and sponsors. These criteria for the refunding of existing projects and sponsors. These criteria also indicate the performance expected of grantees. The role of technical assistance recipients in terms of projects conducting expanded demonstration activities (Resource Centers) is explained. The emphasis placed upon the training of parents is clarified. These regulations are policy significant.

FOR FURTHER INFORMATION CONTACT:

Mr. Fred Bresnick (Room 3624, ROB3), 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone: (202) 245-2500.

Dated: September 29, 1978.

INTERSTATE COMMERCE COMMISSION

[49 CFR Ch. X]

[Ex Parte No. 361]

EXEMPTION OF CERTAIN DESIGNATED OPERATORS FROM SECTION 11343 (FORMERLY SECTION 5(2) OF THE INTERSTATE COMMERCE ACT)

JANUARY 12, 1979.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Interstate Commerce Commission is proposing the exemption of companies operating exclusively as designated operators from the requirements of Section 5(2) of the Interstate Commerce Act (recodified at 49 U.S.C. 11343-11347). The purpose of the exemption is to reduce the regulatory burden imposed upon companies operating exclusively as designated operators.

COMMENTS: Send comments (15 copies) to the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

DATES: Effective February 15, 1979. Comments due on or before February 16, 1979.

FOR FURTHER INFORMATION CONTACT:

G. Marvin Bober, (202) 275-7564.

SUPPLEMENTARY INFORMATION: The Commission realizes that companies operating exclusively as designated operators are few in number and generally very small in size. It believes that those companies are unduly burdened with little or no useful public purpose by the requirements of Section 5(2) and, that the application of this provision is not necessary to carry out the transportation policy set forth in the preamble of the Act (recodified at 49 U.S.C. 10101).

This proceeding is instituted under the authority of section 12(1)(b) of the Interstate Commerce Act (recodified at 49 U.S.C. 10505) and pursuant to sections 553 and 559 of the Administrative Procedure Act (5 U.S.C. 553, 559).

This proceeding is not a major Federal action significantly affecting the quality of the human environment or the consumption of energy.

Dated: January 3, 1979.

By the Commission, Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham and Clapp.

H. G. HOMME, Jr.,
Secretary.

DEPARTMENT OF AGRICULTURE

Agriculture Marketing Service

MOUNTAIN HOME HORSE AUCTION, MOUNTAIN HOME, ARK., ET AL.

Proposed Posting of Stockyards

The Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards, Agriculture Marketing Service, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in Section 302 of the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the Act.

AR-159 Mountain Home Horse Auction, Mountain Home, Arkansas.
GA-186 Tri State Livestock Co., Valdosta, Georgia.
MN-171 Minnesota Feeder Pig Markets, Inc., Windom, Minnesota.
MN-172 Winger Livestock Sales, Winger, Minnesota.
SD-161 Gettysburg Livestock Exchange, Inc., Gettysburg, South Dakota.
SD-162 Yankton Livestock Auction Market, Yankton, South Dakota.

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 *et seq.*), proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Act as provided in Section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule, may do so by filing them with the Chief, Registrations, Bonds, and Reports Branch, Packers and Stockyards, Agriculture Marketing Service, United States Department of Agriculture, Washington, D.C. 20250, by February 1, 1979.

All written submissions made pursuant to this notice shall be made available for public inspection at such times and places in a manner convenient to the public business (7 U.S.C. 1.27(b)).

Done at Washington, D.C., this 11th day of January, 1979.

EDWARD L. THOMPSON,
Chief, Registrations, Bonds, and Reports Branch, Livestock Marketing Division.

Forest Service

COOL-BURNT PLANNING UNIT, KOOTENAI NATIONAL FOREST, LINCOLN COUNTY, MONT.

Intent To Prepare an Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, will prepare an Environmental Statement for implementation of land management guidelines proposed for Cool-Burnt Planning Unit #39.

Cool-Burnt is presently being managed under the Multiple Use Plan for the Yaak Ranger Disrtict, which places approximately 83 percent of the Unit under optimized timber production while providing for dispersed recreation and big game winter range. In formulating new guidelines for this Unit, input from other government agencies and from public organizations and inidividuals was solicited. The protection or grizzly bear habitat is a primary concern in development of this plan.

Robert H. Torheim, Regional Forester, is the responsible official; and Floyd J. Marita, Forest Supervisor, and his staff will prepare this statement.

The Draft Environmental Statement for the Cool-Burnt Planning Unit is scheduled for completion by January 1979, with a 60-day minimum review period. The Final Environmental Statement is scheduled for filing with the Environmental Protection Agency in July 1979.

Comments on the Notice of Intent or on management proposals for the Unit should be sent to Floyd J. Marita, Forest Supervisor, Kootenai National Forest, Libby, Montana 59923.

JANUARY 8, 1979.

JAMES E. REID,
Director, Planning, Programming, and Budgeting.

[FR Doc. 79-1539 Filed 1-16-79; 8:45 am]

[3410-11-M]

PILGRIM PLANNING UNIT, KOOTENAI NATIONAL FOREST, SANDERS COUNTY, MONT.

Intent To Prepare an Environmental Statement

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture, will prepare an Environmental Statement for the Pilgrim Planning Unit Land Management Plan. This Plan will allocate land to various uses, specify which activities are permissible, desirable, and/or necessary according to use, and prescribe measures to be taken in order to mitigate any environmental impacts caused by projects undertaken in accordance with each allocation.

Pilgrim is presently being managed under the Multiple Use Plan (revised 1969) for the Cabinet Ranger District. Roughly half of the Unit has been designated for some form of timber harvesting, 25 percent is involved in the RARE II process, 15 percent is being managed to protect soils and water, and 10 percent is being managed for recreation and big game habitat.

In formulating new guidelines for this Unit, comment from other government agencies and from public organizations and individuals has been solicited by the Forest Service. The Pilgrim Planning Unit mailer was published and distributed to interested parties in October 1978 and public meetings were held November 14 and 16 in Heron and Noxon. Issues of primary concern are: development vs. nondevelopment; management direction for important wildlife habitat and for productive timber stands, and possible conflicts between these two uses; maintenance of soil productivity and water quality; protection of sites or artifacts of historical or prehistorical value; land adjustments; and existing and potential power transmission lines.

Robert H. Torheim, Regional Forester, is the responsible official; and Floyd J. Marita, Forest Supervisor, and his staff will prepare the statement.

The Draft Environmental Statement for the Pilgrim Planning Unit is scheduled for completion by April 1979, with a 60-day minimum review period. The Final Environmental Statement is scheduled for filing with the Environmental Protection Agency in October 1979.

Comments on the Notice of Intent or on management proposals for the Unit should be sent to Floyd J. Marita, Forest Supervisor, Kootenai National Forest, Libby, Montana 59923.

JAMES E. REID,
Director, Planning, Programming, and Budgeting.

JANUARY 8, 1978.

Science and Education Administration

FOOD AND NUTRITION INFORMATION AND EDUCATION RESOURCES CENTER

Expansion and Transfer to Existing Program

Pursuant to Section 1411(b) of Public Law 95-113, the "Food and Agriculture Act of 1977," the Science and Education Administration has established a "Food and Nutrition Information and Education Resources Center" (FNIERC) as a permanent entity of the National Agricultural Library (NAL). The NAL is a component of Technical Information Systems (TIS), Science and Education Administration (SEA).

As of October 1, 1978, the Department's Food and Nutrition Service (FNS) terminated the agreement under which it has financially supported a similar but smaller center since its inception in 1971. The shift of support from the FNS to the TIS/NAL will permit the Center to enlarge its role from support of FNS programs to broad dissemination of food and nutrition information to other Federal and State educational agencies, private institutions and interested individuals.

Until the expansion of its mandate this year, the primary mission of the Center was to provide information and educational materials to those who administered the FNS Child Nutrition Programs: School Breakfast, School Lunch, Summer Recreations, and Day Care. In 1973, the Center published the "Catalog of the Food and Nutrition Information and Educational Materials Center." With eight supplements issued to date, the catalog contains approximately 16,000 citations. A separate "Audio Visual Guide" has been issued. The Center's citations are included in NAL's AGRICOLA data base which is available for on-line retrieval

The basic scope of the Center's collection of serials, monographs, and audio-visuals has been in foods, nutrition education, and service management. The Center will continue to collect materials in these subject areas, but will put new emphasis on human nutrition research. In addition to servicing school food service personnel, the expansion of the Center's program will include providing information to educators, dietitians, nutritionists, cooperative extension personnel, and other interested persons.

Services provided by the Center include lending, reference, and on-line retrieval of food and nutrition information.

Further information may be obtained from Dr. Richard A. Farley, Deputy Director for Technical Information Systems, Science and Education Administration, Room 109-A, National Agricultural Library Building, Beltsville, Maryland 20705, Telephone 301-344-4248.

Done at Washington, D.C., this 12th day of January, 1979.

ANSON R. BERTRAND,
Director, Science and Education.

CIVIL AERONAUTICS BOARD

[Docket No. 34435; Order No. 79-1-70]

AIR CARRIER RULES PERTAINING TO TRANSPORTATION OF CERTAIN CATEGORIES OF PASSENGERS

Order To Show Cause

Adopted by the Civil Aeronautics Board at its offices in Washington, D.C., on the 11th day of January 1979.

Most U.S. certificated scheduled service air carriers have adopted a tariff rule which permits them to refuse to transport passengers "whose conduct, status, age, or mental or physical condition" makes them unable to care for themselves without assistance, makes refusal "necessary for the reasonable safety or comfort of other passengers," or presents "any unusual hazard or risk to himself or to other persons (including, in cases of pregnant passengers, unborn children) or to property." [1] The rule is apparently intended to give the carriers discretion to refuse transportation to passengers who are intoxicated or abusive, or to passengers who, because of severe illness, infirmity or other condition (including, in some cases, advanced pregnancy) may present unusual dangers to themselves or to other passengers. We understand the need for this type of rule, and there are many individual situations in which the rule might properly be applied. But, as presently written, the rule allows carriers almost unfettered discretion to refuse carriage. We believe that it is unlawfully vague, overbroad, and unjustly discriminatory.

Under this rule, airlines may refuse to carry pregnant women at any stage of pregnancy, elderly people regardless of the state of their health, and almost anyone else whose "status" may displease a fellow passenger. This discretion is clearly much greater than is required in the interest of safety, or even of "reasonable comfort."

In some respects, the present rule is patently unjustly discriminatory. Pregnant women as a class, for example, cannot lawfully be refused air transport over the term of the pregnancy. Sufficient medical and legal precedent exists to warrant limitation of any restriction to some much shorter period.[2] The use of "age" as a criterion for refusal of service is also discriminatory. While this category, more narrowly drawn, might properly be applied to refuse service to unaccompanied children, carriage of children is already fully covered by Rule 25 of C.A.B. No. 142. And there is no other circumstance in which age, standing alone, can possibly justify a refusal of service. Elderly persons who are infirm may be refused service, if warranted, on the basis of their condition. Those who are not have the same right to travel as any other passenger.

Even those aspects of the rule that are not blatantly discriminatory are so broad and ambiguous that they are capable of unlawful application. What, for example, is a "status" which might justify a refusal of service? Where the "reasonable comfort" of other passengers is a sufficient standard for exclusion, this might permit an air carrier to refuse service on the basis of appearance, manner of dress, apparent economic class, or even race. If there is any "status" which would justify a refusal of service, carriers should set it forth specifically instead of couching it in a vague, overbroad term. While it

[2] Cf. *Burwell v. Eastern Airlines*, 458 F. Supp. 474 (E.D. Va. 1978), *appeal pending; Harness v. Pan American World Airways, Inc.*, 437 F. Supp. 143 (N.D. Cal. 1977); *In re National Airlines, Inc.*, 434 F. Supp. 249 (S.D. Fla. 1977). Alternatively or in addition, carriers might require medical certificates from passengers in specific stages of pregnancy which present special risks.

is easier to see the purpose for the inclusion of "conduct" in the rules, this term too is far broader than necessary, potentially including much more than the inebriated, abusive, or violent conduct which would justify a legitimate refusal of service. Section 221.38(e) of the Board's rules requires that tariff rules be clear and explicit. This rule falls far short of that standard.

By contrast, most carriers have adopted more detailed provisions governing carriage of nonambulatory and physically handicapped passengers. Questions have been raised about these tariff provisions, and they are undergoing comprehensive review. However, the problems they present are more complex than those we are dealing with in this order, and we do not intend to reach any conclusions about those rules at this time.

In summary, these tariff rules, which rely on terms as broad as conduct, status and age to permit refusal of service, and use those terms to measure the applicability of equally vague standards such as "reasonable comfort" and "unusual risk", appear to be unclear, unjustly discriminatory and unlawful. For these reasons, the Board tentatively finds and concludes that the carriers' present rules governing refusal of service in interstate and overseas air transportation on the basis of conduct, status, age, or pregnancy are unjustly discriminatory, contrary to § 221.38(e) of the Board's rules and unlawful, and therefore should be cancelled.

Accordingly: 1. We direct all interested persons to show cause why the Board should not issue an order making final the tentative findings and conclusions stated here;

2. Any interested person objecting to the issuance of an order making final the findings and conclusions set forth here shall, no later than February 7, 1979, file with the Board and serve upon all certificated air carriers a statement of objections together with a summary of testimony, statistical data and any other evidence that is expected to be relied upon to support the stated objections; answers to objections, which should also be filed with the Board and served upon all certificated air carriers, shall be filed no later than February 22, 1979; parties requesting an evidentiary on-the-record hearing in this matter shall set forth in detail the reasons therefor, accompanied by a statement of the facts which they intend to develop in a hearing;

3. If timely and properly supported objections are filed, we will accord full consideration to the matters or issues raised by the objections before taking further action;

4. In the event no objections are filed, all further procedural steps will be deemed to have been waived, and the matter will be submitted to the Board for final action; and

5. This order shall be served on all U.S. certificated scheduled service air carriers.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,[3]
Secretary.

[6320-01-M]

[Docket No. 33288; Order No. 79-1-61]

ROCKFORD PARTIES

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 11th day of January, 1979. Petition of James R. Thompson, Governor, State of Illinois; John B. Anderson, Member of Congress; Adlai E. Stevenson, U.S. Senator; Charles H. Percy, U.S. Senator; Greater Rockford Airport Authority; Rockford Area Chamber of Commerce; Winnebago County Board of Supervisors; City of Rockford, Illinois; and City of Loves Park, Illinois, for an order to show cause.

On August 24, 1978, the Rockford Parties (detailed in the caption above) filed a petition for an order to show cause why the certificates of the air carriers authorized to serve Chicago, Illinois, but not Rockford, Illinois,[1] should not be amended to add Rockford as a hyphenated point with Chicago.

In support of their petition, they point out that the overcrowding of runway, air traffic control, terminal, and access road facilities at O'Hare requires the designation of a satellite airport to absorb some of that airport's current traffic. They go on to state that Greater Rockford Airport is well suited for the role of a satellite airport for Chicago; can handle increased airline service; and has traffic potential better than that indicated by past O&D figures.

No answers to the petition were filed.

We have tentatively concluded, based on the tentative findings below, that it is consistent with the public convenience and necessity to amend the certificates of all airlines authorized to serve Chicago, but not Rockford, to show Rockford and Chicago as a hyphenated point.[2] Authority for service via the Greater Rockford Airport will be permissive.[3]

The air travel needs of the Rockford area, despite the fact that it has its own airport, are met almost exclusively by Chicago O'Hare Airport. A bus which makes 16 daily round trips between Rockford and O'Hare carried 211,020 passengers in 1977. A survey of travel agencies in Rockford in 1973 revealed that there were 374,223 domestic and 23,532 international passengers generated by Rockford; and the majority of these passengers originated their air travel at Chicago rather than at Greater Rockford Airport. Although Chicago is 90 miles from Rockford, O'Hare Airport is convenient to Rockford air travelers. The airport is on the west side of Chicago, which still places it 70 miles from Rockford, but it is directly connected to Rockford by Interstate 90. This results in fast access to O'Hare for both automobile and the express airport bus traffic out of Rockford. Hyphenation would take account of this relationship.

Further, while we are not sanguine about the prospect of many Chicago travelers going 90 miles to Rockford when O'Hare, for all its overcrowding, offers more service to more destinations than any other airport in the country, it is conceivable that if one or more carriers take advantage of this new authority resulting from hyphenation, use of air service at Rockford Airport would increase. As the Rockford Parties state in their petition for hyphenation, "[this petition] contains the risk that no carrier will in fact use the authority." The grant of additional rights, however, at Rockford will best effect the 1978 Airline Deregulation Act's policy objective of placing maximum reliance on the decisions of the marketplace and on actual and potential competition. This will occur because the carriers with hyphenated authority will be free to enter the market in order to exploit unmet

---

[3]All Members concurred.

[1]The only carrier that currently has authority at both points is Ozark Air Lines.

[2]Order E-18533, *North Central Area Airline Service Airport Investigation*, establish a 50-mile radius as a maximum distance for hyphenating two points. Although Chicago and Rockford are 90 miles apart, O'Hare Airport is only 70 miles from Rockford and the easy access to O'Hare from Rockford (via direct interstate highway and frequent express bus) makes it as accessible to Rockford as other airports are to their own hyphenated cities which are less than 50 miles distant. The hyphenation in this case is being allowed because of the special set of circumstances involved, and thus should not be viewed as setting a 90-mile precedent for hyphenation.

[3]This authority will create no obligation, expressed or implied, for the carriers certificated at Chicago-Rockford to offer service through the Greater Rockford Airport. Our policy is to allow each carrier to select which airport to serve at a hyphenated point.

Ozark is the only carrier certificated at both points. We will not amend its certificate by hyphenating Chicago and Rockford as this would preclude it from carrying local traffic between the two points as it currently does.

demand, and the threat of that additional entry should encourage the incumbent to operate at or near the optimum.[4]

No environmental evaluation has been submitted by the Rockford Parties. We nonetheless find that hyphenation is not a major Federal acton significantly affecting the quality of the environment since little immediate change in aircraft operations is anticipated.

We direct interested persons objecting to this order to show cause to show, within 30 days of the date of service of this order, why the tentative findings and conclusions set forth above should not be made final. We expect such persons to support their objections, if any, with detailed answers, specifically setting forth the tentative findings and conclusions to which objection is taken. Such objections should be accompanied by arguments of fact or law and should be supported by legal precedent or detailed economic analysis. If an evidentiary hearing is requested, the objector should state in detail why such a hearing is necessary, and what the objector could establish that cannot be established by written pleadings. We will not entertain general, vague, or unsupported objections.

ACCORDINGLY, 1. We direct all interested persons to show cause why we should not issue an order making final the tentative findings and conclusions stated here, and amending the certificates of public convenience and necessity of Airlift International, Allegheny Airlines, American Airlines, Braniff Airways, Chicago Helicopter Airways, Continental Air Lines, Delta Air Lines, Eastern Air Lines, The Flying Tiger Line, Frontier Airlines, North Central Airlines, Northwest Airlines, Pan American World Airways, Piedmont Aviation, Seaboard World Airlines, Southern Airways, Trans World Airlines, and United Air Lines, so as to replace Chicago, Illinois, with the hyphenated point Chicago-Rockford, Illinois, wherever it appears in their certificates;

2. We direct any interested persons having objections to the issuance of an order making final any of the proposed findings, conclusions, or certificate amendments set forth here, by February 14, 1979, to file with us and serve upon all persons listed in paragraph 6, a statement of objections together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections. Answers shall be due no later than February 26, 1979;

3. If timely and properly supported objections are filed, we will accord full consideration to the matters and issues raised by them before we take further action;

4. In the event no objections are filed, we will deem all further procedural steps to have been waived and may proceed to enter an order in accordance with the tentative findings and conclusions set forth in this order;

5. We shall serve a copy of this order upon Airlift International, Allegheny Airlines, American Airlines, Braniff Airways, Chicago Helicopter Airways, Continental Air Lines, Delta Air Lines, Eastern Air Lines, The Flying Tiger Line, Frontier Airlines, North Central Airlines, Northwest Airlines, Ozark Air Lines, Pan American World Airways, Piedmont Airlines, Seaboard World Airways, Southern Airways, Trans World Airlines, United Air Lines, the Mayor, Chicago, Illinois, and the Rockford Parties.

We shall publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 79-1700 Filed 1-16-79; 8:45 am]

[6320-01-M]

[Order No. 79-1-34; Docket Nos. 32315, 32722, etc.]

TEXAS INTERNATIONAL AIRLINES, INC. ET AL.

Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 4th day of January, 1979.

Application of TEXAS INTERNATIONAL AIRLINES, INC., for amendment of its certificate of public convenience and necessity. Docket 32315

Application of FRONTIER AIRLINES, INC., for amendment of its certificate of public convenience and necessity. Docket 32722

Application of AMERICAN AIRLINES, INC., for amendment of its certificate of public convenience and necessity. Docket 32728

Application of SOUTHWEST AIRLINES CO. for a certificate of public convenience and necessity under section 401 of the Federal Aviation Act of 1958, as amended. Docket 32734

Application of CONTINENTAL AIR LINES, INC., for amendment of its certificate of public convenience and necessity. Docket 32938

Application of NORTHWEST AIRLINES, INC., for the amendment of its certificate of public convenience and necessity Docket 33540. Order to show cause.

On March 29, 1978, Texas International Airlines (TXI) filed an application in Docket 32315, under Subpart M of the Board's Procedural Regulations, requesting (1) nonstop authority between Dallas/Ft. Worth and New Orleans, and (2) one-stop authority in the New Orleans-Albuquerque market. TXI's realigned route contains a one-stop restriction on the former and a two-stop restriction on the latter. Statements requesting dismissal of the application were filed by Continental Air Lines, Braniff Airways, and Delta Air Lines. TXI filed a response to Continental's pleading, along with a motion for leave to file.[1]

We took no action on TXI's application by April 26, 1978,[2] and therefore, under the provisions of Subpart M, the application automatically moved forward to the next procedural stage. We received motions to consolidate applications into this proceeding by Frontier Airlines (Docket 32722), American Airlines (Docket 32728), and Southwest Airlines (Docket 32734). The Southwest motion to consolidate has raised two issues which have been addressed by several parties. The first issue is service to Dallas/Ft. Worth through Love Field. The Dallas and Ft. Worth parties,[3] Frontier, American, and Delta[4] have filed answers opposing the inclusion of authority to serve that airport, arguing that we were instrumental in advancing the concept of a single regional airport and in securing the agreement between the two cities which resulted in the construction of the Dallas/Ft. Worth Regional Airport (DFW) and the ultimate consolidation of certificated services there;[5] and that Southwest's proposal is contrary to our previous directives and should not be allowed. The second issue raised by Southwest's proposal is whether it may carry interstate traffic beyond Dallas to points on its intrastate system as a result of any award in this proceeding. Southwest filed a reply, contending that its right to serve Love Field has been upheld by the courts, and that it is not seeking a certificate authorizing air transportation be-

---

[4]We also tentatively conclude that the carriers listed in ordering paragraph 1 are citizens of the United States and based on officially noticeable data are fit, willing, and able to provide the services made possible by the proposed certificate amendment, and comply with the Act and our rules and regulations.

[1]We will grant the motion.

[2]Ordinarily, the action date would have been April 12, or 14 days after the application was filed. However, the time allowed for filing statements requesting dismissal was extended by two weeks, and all subsequent procedural steps were deferred by a similar period.

[3]City of Dallas, Dallas Chamber of Commerce, City of Ft. Worth, Ft. Worth Chamber of Commerce, and North Texas Commission.

[4]Delta's answer was accompanied by a motion for leave to file an otherwise unauthorized document. We will grant the motion.

[5]These parties refer to the *Dallas-Ft. Worth Regional Airport Investigation*, Docket 13959, Order E-18719, *et. seq.*

V 4 4 / 1 2 J A 1 7 7 9 UMI

tween New Orleans and any point other than Dallas, or, between any points within Texas.[6]

Petitions for leave to intervene have been filed by the Dallas and Ft. Worth Parties, the Texas Aeronautics Commission, and the International Association of Machinists and Aerospace Workers.[7]

On September 1, 1978, TXI filed a Motion for Final Board Order, under Rule 18 of the Rules of Practice, requesting the issuance of a final order granting all applications for nonstop Dallas/Ft. Worth-New Orleans authority. It recommends, however, that the effectiveness of Southwest's certificate be stayed pending resolution of the federal jurisdiction and Love Field issues. It submits that, since no answers were filed in opposition to its application, the incumbent carriers have waived their right to a hearing; that we are under no obligation to hold a hearing; and that we can, therefore, issue a final order as requested. It contends that, except for issues raised by Southwest's application, there has been no controversy in this case, and therefore only the incumbents benefit from the delay resulting from holding a hearing on the important issues raised by Southwest's pleadings.

Braniff and Delta filed answers in opposition to TXI's motion. American supports the motion, and Southwest argues that its application should be granted at the same time as those of the other three carriers.

Continental filed an answer conditionally supporting TXI's motion,[8] accompanied by a motion for leave to file an otherwise unauthorized document,[9] to which was attached a motion to consolidate the applicable portion of its certificate amendment application in Docket 32938 with the applications of American, Frontier, Southwest, and TXI. It states that it is not requesting that its application be considered on a comparative basis with the Subpart M applicants, but only that its application for Dallas/Ft. Worth-New Orleans nonstop authority also be granted in the event we decide to grant multiple permissive authority to all of the Subpart M applicants.

On September 26, Northwest Airlines filed a motion for leave to file an otherwise unauthorized document,[10] to which was attached a motion to consolidate its newly-filed certificate application in Docket 33540 with the Subpart M proceeding.

Delta filed a consolidated contingent answer in opposition to the motions to consolidate of Continental and Northwest, contending that they have failed to show good cause why their late-filed motions should be granted.[11] American filed an answer in opposition to Northwest's motion.[12]

On November 20, TXI filed a motion for immediate action, contending that there has been undue delay in considering its application. American and Delta filed answers. Southwest filed a response to the motion and to the answers of American and Delta.[13]

We have decided to grant TXI's motions for a final Board order and for immediate action, in part, by issuing an order to show cause as outlined below. On the basis of tentative findings more fully described later, we have tentatively concluded that it is consistent with the public convenience and necessity to grant, on a Category II subsidy-ineligible basis, the Dallas/Ft. Worth-New Orleans applications of TXI, American, Frontier, Continental, Northwest and any other fit, willing and able applicant whose fitness, willingness and ability can be established by officially noticeable data.[14] Further, we tentatively conclude that no oral evidentiary hearing is needed here since there are no material determinative issues of fact requiring such a hearing for their resolution. Finally, upon submission of further evidence concerning fitness and section 408 and 409 questions by Southwest,[15] we will deal with its request in a subsequent show-cause order.[16]

Under the Airline Deregulation Act of 1978, we must approve an application for certificate authority unless we find, by a preponderance of the evidence, that approval would not be consistent with the public convenience and necessity (Pub. L. No. 95-504, section 14). The new Act creates a presumption that the grant of all applications is consistent with the public convenience and necessity. It places on any opponents of these applications the burden of proving them inconsistent with the public convenience and necessity (Pub. L. No. 95-504, section 14). To give such opponents a reasonable opportunity to meet an admittedly heavy burden of proof, it is our view that applicants must indicate what type of service they would provide if, after receiving authority, they chose to serve the markets at issue. This does not mean that an applicant must show that it will provide service if it receives authority but rather what the nature of its service would be if it decided to serve. We will give Continental, Northwest, and any further applicants 15 days from the date of service

[6] Southwest states that only a small portion of the traffic in its forecast is made up of beyond passengers and that its application is not heavily dependent on beyond benefits it could offer. Its application includes a request to combine its certificated services with its intrastate services. We note that under the new Act, Southwest's intrastate authority must be included in any certificate we give it.

[7] Southwest filed a motion for leave to file an otherwise unauthorized document, to which was attached an answer in opposition to IAM's petition. We will grant the petition, since in numerous other cases labor parties have participated (see *Colorado Ski-Points Investigation*, Order 78-1-47).

[8] It contends that grant of multiple permissive authority to American, Frontier, Southwest and TXI, without at the same time also granting its application for similar nonstop authority in Docket 32938, would raise serious notice problems, in that other parties would not have an opportunity to respond to and apply for multiple permissive authority in a proceeding which traditionally involves carrier selection after hearing.

[9] We will grant the motion. We are cognizant of America's answer to Continental's motion to consolidate, in which it contends that the filing is over three months late, that it contains no plausible justification, and that to grant it would be inconsistent with orderly Board procedures. However, we have concluded that Continental's timing has prejudiced no one (American's answer was accompanied by a motion for leave to file, which we will grant).

[10] We will grant the motion.

[11] Delta argues that both carriers have been on notice since May that multiple awards might be granted as a matter of policy, or at least would be a decisional option in ongoing cases, whether such cases proceed under Subpart A or Subpart M.

[12] The answers were accompanied by motions for leave to file. We will grant the motions.

[13] American states that with the new Act, its request for unused authority between Dallas/Ft. Worth and New Orleans is entitled to at least as great, if not greater, priority than the applications that are the subject of TXI's motion, and it opposes the grant of Southwest's application unless it is subject to a condition that service at Dallas/Ft. Worth be rendered only through the Dallas-Ft. Worth Regional Airport. Delta opposes TXI's motion. Southwest's response was accompanied by a motion for leave to file. We will grant the motion.

[14] Officially noticeable data consist of that material filed under section 302.24(m) of our Procedural Regulations. Applicants whose fitness cannot be so established must make a showing of fitness, as well as deal with any questions under sections 408 and 409 of the Act. Should such applications be filed, we will then consider how to deal with them procedurally.

On the basis of officially noticeable data, we find that TXI, American, Frontier, Continental, and Northwest are citizens of the United States and are fit, willing and able to perform the air services proposed and to conform to the provisions of the Act and our rules, regulations and requirements.

[15] We will allow Southwest 21 days from the date of service of this order to supply the data detailed in Appendix A.

[16] We will not deal with the matter of airport selection at Dallas/Ft. Worth here. We acknowledge the contentions of the civic parties and the opposing carriers regarding service at Love Field. However, we have not limited the certificates of existing interstate carriers to service to DFW (see Orders 77-10-36 and 78-1-38), and we do not see any reason to reverse that finding here. However, Southwest's proposal raises different questions and all interested persons will have an opportunity to fully address the Love Field question in the show-cause proceeding dealing with Southwest's application.

of this order to supply data,[17] in order to give interested persons sufficient information on the nature of the applicant's proposal to assess consistency with the public convenience and necessity. Our tentative findings concerning all applicants that have not filed illustrative service proposals are contingent on such findings.

Upon review, of all the facts and pleadings in this case, we have tentatively determined that there is no reason why we should not grant multiple awards. Our tentative conclusions comport with the letter and spirit of the Airline Deregulation Act of 1978, particularly the declaration of policy set forth in section 102 which instructs us to rely, to the maximum extent possible, on competitive forces, including potential competition.[18] See our general conclusions about the benefits of multiple permissive authority in *Improved Authority to Wichita Case, et al.*, Order 78-12-106, December 14, 1978. Accordingly, we conclude that it is desirable to award the additional authority sought by the applicants, whether or not services are in fact operated. The existence of additional operating rights in markets now being served by incumbent carriers or authorized to be served will best effect the statute's policy objective of placing maximum reliance on the decisions of the marketplace. This will occur because newly authorized carriers may actually enter the market in order to exploit unmet demand, both in terms of price and service, or because incumbents will be encouraged by the realistic threat of entry to meet that demand. Because demand is dynamic in character and therefore constantly changing, the most effective means to assure that competitive forces will operate quickly and efficiently is to award multiple operating authority to carriers that are fit, willing and able to provide service.

Notwithstanding the foregoing tentative conclusions in support of multiple authority in this proceeding, we wish to make clear that we in no way desire to deter objections that might be asserted under the 1978 Act by air carriers, civic interests or other interested persons. The new statute contains a completely revised declaration of policy in section 102, as well as numerous additional and modified substantive provisions. Some of these statutory changes relate to considerations not expressly covered in the preceding statute. For example, while diversion from existing carriers will not be given decisive weight in rejecting applications for new authority except upon an extraordinary showing of financial jeopardy on the part of one or more existing air carriers, with the consequent loss of essential air service which cannot be immediately replaced, other provisions suggest that the Congress desires us to take into account other factors. These include, but not limited to, satellite airport questions, the degree of concentration within the industry, and safety. Any party in this proceeding may explain in full why the authority that we propose to grant should not issue. Such explanations should apply specifically to the applications in issue, and should be sufficiently detailed to overcome the statutory presumption of favorable treatment that the Act bestows on applications.

We also tentatively conclude that it is consistent with the public convenience and necessity to grant New Orleans-Albuquerque nonstop authority to TXI. No party has objected to this aspect of its application, and currently there is no single-plane service in the market. Although it requested only one-stop authority, unrestricted authority will give it maximum operating flexibility in serving the market.

Finally, upon review of the environmental evaluations submitted by TXI, American, and Frontier in their applications, to which no answers have been filed, we tentatively find that our decision to award them authority does not constitute a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969, or a major regulatory action under the Energy Policy and Conservation Act of 1975.[19] We reserve judgment on the environmental consequences of other applications, pending submission of environmental data.

We will give interested persons 30 days following the service date of this order to show cause why the tentative findings and conclusions set forth here should not be made final; replies will be due within 10 days thereafter. We expect such persons to direct their objections, if any, to specific findings, and to support such objections with detailed economic analysis. If an evidentiary hearing is requested, the objector should state, in detail, why such a hearing is necessary and what relevant and material facts he would expect to establish through such a proceeding that cannot be established in written pleadings. We will not entertain general, vague, or unsupported objections.

Accordingly, 1. We direct all interested persons to show cause why we should not issue an order making final the tentative findings and conclusions stated above and amending the certificates of public convenience and necessity of Texas International Airlines for Route 82, American Airlines for Route 4, Frontier Airlines for Route 73, Continental Air Lines for Route 29, and Northwest Airlines for Route 3, so as to authorize them to engage in nonstop operations between Dallas/Ft. Worth and New Orleans; amending the certificate of Texas International so as to authorize it to provide nonstop service between New Orleans and Albuquerque; and amending, to grant Dallas/Ft. Worth-New Orleans authority, the certificates of any other fit, willing, and able applicants whose fitness can be established by officially noticeable material;

2. We direct any interested persons having objections to the issuance of an order making final any of the proposed findings, conclusions, or certificate amendments set forth here, to file with us and serve upon all persons listed in paragraph 11, no later than February 12, 1979, a statement of objections together with a summary of testimony, statistical data, and other material expected to be relied upon to support the stated objections; answers shall be due no later than February 22, 1979;

3. If timely and properly supported objections are filed, we will accord full consideration to the matters and issues raised by the objections before we take further action; [20]

4. In the event no objections are filed, we will deem all further procedural steps to have been waived and we may proceed to enter an order in accordance with the tentative findings and conclusions set forth here;

5. Except to the extent granted here, we will deny the motions of Texas International Airlines for a final Board order and for immediate action;

[17] They should submit an illustrative schedule of service in the market at issue, which shows all points that they might choose to serve, the type and capacity of the equipment they would likely use and the elapsed trip time of flights in block hours over the segments. For the market at issue only, they should also provide an environmental evaluation as required by Part 312 of our Regulations, and an estimate of the gallons of fuel to be consumed in the first year of operations in the market if they instituted the proposed service, as well as a statement on the availability of the required fuel.

[18] Section 102(a) specifies as being in the public interest, among other things: "The placement of maximum reliance on competitive market forces and on actual and potential competition (a) to provide the needed air transportation system, and (b) to encourage efficient and well-managed carriers to earn adequate profits and to attract capital" and "The encouragement, development, and maintenance of an air transportation system relying on actual and potential competition to provide efficiency, innovation, and low prices, and to determine the variety, quality, and price of air transportation services."

[19] We assumed that the maximum amount of new service in the market and additional fuel consumed would not exceed the maximum proposed by any applicant.

[20] Since provision is made for the filing of objections to this order, we will not entertain petitions for reconsideration.

6. We grant the motions of American Airlines, Southwest Airlines, Frontier Airlines, Continental Air Lines, and Northwest Airlines to consolidate their applications in Dockets 32728, 32734, 32722, 32938, and 33540, respectively, with Docket 32315,[1] to the extent that they involve nonstop authority between Dallas/Ft. Worth and New Orleans;

7. We grant the motions of Texas International Airlines, Delta Air Lines, Southwest Airlines, Continental Air Lines, American Airlines, and Northwest Airlines for leave to file otherwise unauthorized documents;

8. We grant the petitions for leave to intervene filed by the Dallas and Ft. Worth Parties, the Texas Aeronautics Commission, and the International Association of Machinists and Aerospace Workers;

9. We direct Southwest Airlines to file the data indicated in Appendix A by February 1, 1979;

10. We direct Continental Air Lines, Northwest Airlines, and any other applicant for the authority at issue, to file the data indicated in footnote [17] by January 26, 1979; and

11. We will serve this order on Texas International Airlines; American Airlines; Southwest Airlines; Frontier Airlines; Continental Air Lines; Northwest Airlines; Braniff Airways; Delta Air Lines; the Texas Aeronautics Commission; the Dallas and Ft. Worth Parties; and the International Association of Machinists and Aerospace Workers.

We will publish this order in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

All Members concurred.

APPENDIX A.—FITNESS EVIDENCE TO BE SUBMITTED BY NON-CERTIFICATED APPLICANTS

(1) *Identity, Citizenship, and Relationships*

(a) Name and Address.

(b) Type of organization and the name of the state under the laws of which it is organized.

(c) Statement that the applicant is a citizen of the United States as defined in section 101(14) of the Federal Aviation Act.

(d) List the names and addresses and briefly indicate the expertise and responsibilities of all directors, officers and key management personnel of the applicant.

(1) Is each a U.S. citizen? If not, give citizenship;

(2) Set forth for each, the amount of applicant's stock held by class, the number of options and warrants held, including value and the exercise dates and price;

(3) Each should submit a statement describing the shares of stock (if 5% or more of total voting stock is owned), officerships and directorships, or other interests held in any (1) air carrier, (2) foreign air carrier, (3) person engaged in a phase of aeronautics, (4) common carrier, or (5) person whose principal business (in purpose or in fact) is the holding of stock in or control of (1), (2), (3) or (4).

(e) State the name, address, citizenship and principal business of each person holding 5% or more of applicant's total voting stock, together with the amount and percentages held, and the name, address, citizenship and principal business of any person for whose account, if other than the holder, such interest is held; if any of these people are related by blood or marriage, include the relationship;

(1) Is any person or is any subsidiary [1] of any person listed in (e) an (1) air carrier, (2) foreign air carrier, (3) person engaged in a phase of aeronautics, (4) common carrier, (5) officer or director of (1)-(4), or (6) an owner of 10% or more of the total voting stock of (1)-(4)? If so, describe.

(f) List any person not included in (d) or (e) above, who has the power to substantially influence the management of the applicant.

(g) List all subsidiaries of the applicant, briefly describing the relationship to the applicant and principal business.

(h) Describe the shares of stock or other interests the applicant or any of its subsidiaries holds in any (1) air carrier, (2) foreign air carrier, (3) person engaged in a phase of aeronautics, (4) common carrier, and (5) person whose principal business (in purpose or in fact) is the holding of stock in or control of (1)-(4).

(2) *Financial Information*

(a) Supply copies of 10K reports filed with the SEC for the past three years, if such reports were filed.

(b) To the extent not supplied under 2(a) supply for the most recent twelve month period and the two preceding calendar years (audited if possible, otherwise notarized), separating out for (2) and (3) transport and nontransport activities:

(1) balance sheet;
(2) profit and loss statement;
(3) cash flow statement.

(3) *Operational Information*

(a) Provide a brief chronological narrative of the ownership and operations of the applicant, including

(1) CAB, State and FAA authority under which the applicant has conducted operations;

(2) For the past three calendar years, total aircraft hours, aircraft miles, revenue passenger miles, and revenue ton miles flown;

(3) Types of aircraft used, types of service performed, and major (*e.g.* 10) markets served.

(b) Provide a list of aircraft currently operated indicating aircraft type, capacity, and whether owned or leased.

(c) Describe equipment (other than aircraft), ground facilities, and personnel currently utilized.

(4) *Compliance Disposition*

(a) Provide a description of each formal or docketed complaint lodged against the applicant, any predecessor or affiliate thereof (or against any other transportation company over which the applicant or predecessor exercises or has ever exercised control) in the past five years regarding compliance with the Federal Aviation Act or the rules, regulations and requirements thereunder. Indicate the final disposition, if any, of the matters.

(b) State whether any of the persons and/or companies listed in Item 1 above, either as a partner, officer, director or stockholder, have been affiliated with, controlled, or participated in control of any air carrier which during such association, was found to have committed knowing willful violations of the Act, or of any order, rule, or regulation issued pursuant to the Act. If so, list the orders covering the period from ten years ago to date.

(c) Indicate any action taken by the FAA under 14 CFR 13.15 (involving civil penalties of $500 or more per violation), 13.17, 13.19, and 13.23 and the disposition of each.

(d) Has the applicant, any predecessor, or any of the persons listed in 1. (d), (e), or (f) ever been convicted of a felony, anti-trust violation, or fraud (criminal or civic) within the past ten years? If so, identify the proceeding and provide a description, including current status or final disposition.

[FR Doc. 79-1703 Filed 1-16-79; 8:45 am]

[1] As used in this request, a subsidiary means any business of which the applicant owns 10 percent or more of the total voting stock, and any subsidiaries of the applicant's subsidiary.

[6320-01-M]

[Docket No. 30356 Order No. 79-1-75]

TRANSCONTINENTAL LOW—FARE ROUTE PROCEEDING

Order

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 11th day of January 1979.

The Board has considered the record and issued its opinion containing its findings, conclusions and decision which is attached to and made a part of this order.[1]

Therefore, the Board: 1. Issues new certificates in the form attached to Capitol International Airways and World Airways;

2. Amends the certificates of public convenience and necessity of American Airlines for Route 4, Pan American World Airways for Route 132A, Trans World Airlines for Route 2, and United Airlines for Route 1;

3. Makes the authority awarded in paragraphs 1 and 2 effective 60 days after the date of service of this order unless the Board extends the effective date on its own initiative or in response to a petition for reconsideration; provided that the continued effectiveness of the authority granted here shall be conditioned upon the timely payment of such license fees as may be prescribed by the Board.

4. Defers action on the applications of Trans International Airlines, Air Transport Associates, Air United States, Standard Airways, and United States Overseas Airways;

5. Reopens the record in this case to receive an illustrative service proposal (containing the information described in Appendix B) from Trans International Airlines and replies to that submission from parties to this proceeding; the illustrative service proposal shall be filed within 30 days from the service date of this order and replies shall be filed within 15 days therefter;

6. Reopens and remands the record for additional oral evidentiary proceedings to reexamine the qualifications of the other carriers listed in paragraph 4 to engage in scheduled transcontinental air transportation;

7. Refers the matter of Pan American's violation of Part 300 of our Procedural Regulations to the Bureau of Consumer Protection for the purpose of instituting an enforcement proceeding consistent with our decision in this case.

8. Denies all other applications, motions, and other requests, except to the extent that they have been granted or deferred here.

9. Invites interested persons to show cause why the attached certificates should not be amended to authorize American, Capitol, Pan American and World to serve the following city-pair markets on transcontinental flights: Between New York, N.Y.-Newark, N.J. and Washington, D.C.-Baltimore, Md. (in the case of Capitol and World); and between Los Angeles-Ontario-Long Beach and San Francisco-Oakland-San Jose (in the case of American, Capitol, Pan American and World).

10. Requests that comments supporting or opposing our findings that these certificates should be so amended, be filed no later than 21 days from the service date of this order. If timely and properly supported objections are filed, full consideration will be accorded the matters and issues raised before the Board takes further action.* If no objections are filed, all further procedural steps will be deemed waived, and we will proceed to enter an order effectuating our findings contained in our opinion.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

UNITED STATES OF AMERICA CIVIL AERONAUTICS BOARD, WASHINGTON, D.C.

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR ROUTE 191

CAPITOL INTERNATIONAL AIRWAYS, INC. is authorized subject to the following provisions, the provisions of Title IV of the Federal Aviation Act of 1958, as amended, and the orders, rules and regulations issued under it, to engage in interstate air transportation of persons, property, and mail:

Between the alternate terminal points New York, N.Y.-Newark, N.J., and Washington, D.C.-Baltimore, Md., on the one hand, and the alternate terminal points Los Angeles-Ontario-Long Beach and San Francisco-Oakland-San Jose, Calif., on the other.

This service is subject to the following terms, conditions and limitations:

(1) The holder may continue to serve regularly any point named here through the airport it last used regularly to serve that point before the effective date of this certificate. Upon compliance with such procedures as the Board may prescribe, the holder may, in addition, regularly serve points named here through any convenient airport.

(2) The authority granted here is permissive.

(3) The holder's authority to engage in the transportation of mail in these operations is limited to carriage on a non-subsidy basis, i.e., on a service mail rate to be paid entirely by the Postmaster General. The holder acknowledges and agrees that it is entitled to receive only service mail pay in connection with these operations, and that it is not authorized to request or receive any compensation for mail service rendered or to be rendered for such operations in excess of the amount payable by the Postmaster General.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This certificate shall be effective on March 13, 1979: *Provided, however,* That prior to the date on which this certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of January 11, 1979 (Order 79-1-75) insofar as such order authorizes the issuance of this certificate, may by order or orders extend such effective date from time to time: *Provided, further,* That the continued effectiveness of the authority granted here shall be conditioned upon the timely payment by the holder of such license fee as may be established under rules to be prescribed by the Board.

The Civil Aeronautics Board has directed its Secretary to execute this certificate and affix the Board's seal, on January 11, 1979.

PHYLLIS T. KAYLOR,
Secretary.

UNITED STATES OF AMERICA, CIVIL AERONAUTICS BOARD, WASHINGTON, D.C.

CERTIFICATE OF PUBLIC CONVENIENCE AND NECESSITY FOR ROUTE 192

WORLD AIRWAYS, INC. is authorized subject to the following provisions, the provisions of Title IV of the Federal Aviation Act of 1953, as amended, and the orders, rules and regulations issued under it, to engage in interstate air transportation of persons, property, and mail:

Between the alternate terminal points New York, N.Y.-Newark, N.J., and Washington, D.C.-Baltimore, Md., on the one hand, and the alternate terminal points Los Angeles-Ontario-Long Beach and San Francisco-Oakland-San Jose, Calif., on the other.

This service is subject to the following terms, conditions and limitations:

(1) The holder may continue to serve regularly any point named here through the airport it last used regularly to serve that point before the effective date of this certificate. Upon compliance with such procedures as the Board may prescribe, the holder may, in addition, regularly serve points named here through any convenient airport.

(2) The authority granted here is permissive.

(3) The holder's authority to engage in the transportation of mail in these operations is limited to carriage on a non-subsidy basis, i.e., on a service mail rate to be paid entirely by the Postmaster General. The holder acknowledges and agrees that it is entitled to receive only service mail pay in connection with these operations, and that it is not authorized to request or receive any compensation for mail service rendered or to be rendered for such operations in excess of the amount payable by the Postmaster General.

The exercise of the privileges granted by this certificate shall be subject to such other reasonable terms, conditions, and limitations required by the public interest as may from time to time be prescribed by the Board.

This certificate shall be effective on March 13, 1979: *Provided, however,* That prior to the date on which this certificate would otherwise become effective the Board, either on its own initiative or upon the timely filing of a petition or petitions seeking reconsideration of the Board's order of January 11, 1979 (Order 79-1-75) insofar as such order authorizes the issuance of this certificate, may by order or orders extend such effective date from time to time: *Provided, further,* That the continued effectiveness of the authority granted here shall be conditioned upon the timely payment by the holder of such license fee as may be established under rules to be prescribed by the Board.

The Civil Aeronautics Board has directed its Secretary to execute this certificate and affix the Board's seal, on January 11, 1979.

PHYLLIS T. KAYLOR,
Secretary.

APPENDIX A TO ORDER 79-1-75

AMENDMENTS TO THE CERTIFICATE OF AMERICAN AIRLINES (ROUTE 4)

Add a new segment:

Between the alternate terminal points New York, N.Y.-Newark, N.J., and Washington, D.C.-Baltimore, Md., on the one hand, and the alternate terminal points Los Angeles-Ontario-Long Beach and San Francisco-Oakland-San Jose, Calif., on the other hand.

Amend condition (1) to make service over this segment permissive.

Amend condition (20) to authorize single-plane service between Ontario, Calif., on the one hand, and New York, Newark, Washington and Baltimore, on the other hand.

AMENDMENT TO THE CERTIFICATE OF PAN AMERICAN WORLD AIRWAYS (ROUTE 132A)

Add a new segment:

Between the terminal point New York, N.Y.-Newark, N.J., on the one hand, and the alternate terminal points Los Angeles-Ontario-Long Beach and San Francisco-Oakland-San Jose, on the other hand.

AMENDMENT TO THE CERTIFICATE OF TRANS WORLD AIRLINES (ROUTE 2)

Amend condition (36) to authorize single-plane service between Ontario, Calif., on the

[1] The opinion is attached to the original of the Board's order and to the official copies in the Board's files and may be examined there.

*If lengthy comments are filed, parties are requested to include a summary of no more than five pages.

one hand, New York, Newark, Washington and Baltimore, on the other hand.

AMENDMENT TO THE CERTIFICATE OF UNITED AIR LINES (ROUTE 1)

Amend condition (16) to authorize single-plane service between Ontario, Calif., on the one hand, New York, Newark, Washington and Baltimore, on the other hand.

EFFECTIVE: March 13, 1979

APPENDIX B

EVIDENCE TO BE SUPPLIED IN ILLUSTRATIVE SERVICE PROPOSAL

1. *Illustrative Schedule*

The illustrative schedule of proposed nonstop or one-stop operations shall show all points to be served, type and capacity of equipment to be used, frequency of service and elapsed flight time, in block hours, over each segment.

2. *Illustrative Cost Estimate*

Applicants shall make, for the market(s) at issue only, an estimate of the cost of operating the illustrative schedule using current Subpart K methodology with appropriate adjustments to reflect innovative features of the proposal. All such adjustments shall be clearly noted. The applicant shall estimate the annual amount of traffic needed to generate sufficient revenue for profitable operation of the illustrative schedule.

3. *Price/Quality Options*

The applicant shall state the normal and discount fares to be offered in the market(s) applied for, estimate the proportion of total traffic that would use each fare category, and estimate yield for each market.

[6335-01-M]

COMMISSION ON CIVIL RIGHTS

WEST VIRGINIA ADVISORY COMMITTEE

Agenda and Notice of Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the West Virginia Advisory Committee (SAS) of the Commission will convene at 2:00 p.m. and will end at 5:45 p.m. at Charleston House, Room 1021-23; 600 Kanawha Boulevard East, Charleston, West Virginia and again at 6:00 p.m. to 8:55 p.m. at the Kanawha County Public Library; 123 Capitol Street, Charleston, West Virginia 25301 on February 1, 1979.

Persons wishing to attend this open meeting should contact the Committee Chairperson, or the Mid-Atlantic Regional Office of the Commission, 2120 L Street, NW., Washington, D.C., Room 510, Washington, D.C., 20037.

Primarily to discuss Alderson Federal Correctional Institution review, State Affirmative Action project, Multi-Cultural Education Task Force plans, and to view Public Broadcasting TV presentation on D.C. Full Voting Representation Constitutional Amendment.

This meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, D.C., January 12, 1979.

JOHN I. BINKLEY,
Advisory Committee Management Officer.

[3510-25-M]

DEPARTMENT OF COMMERCE

Industry and Trade Administration

CHEMICAL INDUSTRY INSTITUTE OF TOXICOLOGY ET AL.

Applications for duty free entry of scientific articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before February 6, 1979.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue, N.W. Washington, D.C. 20230.

Docket Number: 79-00097. Applicant: Chemical Industry Institute of Toxicology, P.O. Box 12137, Research Triangle Park, North Carolina 27709. Article: Electron Microscope, Model EM 400 and accessories. Manufacturer: Philips Electronics Instruments NVD, The Netherlands. Intended use of article: The article is intended to be used for studies of tissues from experimental animals used in toxicology research. Liver will be the major tissue examined; although kidney, lung and nervous tissue will also be frequently examined. Crystallized enzyme preparations and DNA molecules from research animals will also be examined. The article will be used to identify and study changes in the earliest identifiable cancer cells. Application received by Commissioner of Customs: December 18, 1978.

Docket Number: 79-00098. Applicant: National Aeronautics and Space Administration, George C. Marshall Space Flight Center, Marshall Space Flight Center, Alabama 35812. Article: Mitra 125 S Computer and accessories. Manufacturer: Compagnie D' Information Militare Spatiple ET Aeronautique, France. Intended use of article: The article is intended to be used in research and development in coordination with Spacelab equipment developed by ESA and several European sources. The article will provide NASA the simulated capability to that existing in Europe in order to develop, train, maintain, and verify flight computer programs in the Spacelab hardware. In addition, the article is to be used for development of computer software (programs) on the NASA Space Shuttle/Spacelab to simulate the communication data on board the flight orbiter. Application received by Commissioner of Customs: December 18, 1978.

Docket Number: 79-00099. Applicant: University of Pennsylvania, Dept. of Metallurgy and Materials Science, Laboratory for Research on the Structure of Matter-K1 3231 Walnut St., Philadelphia, PA 19104. Article: (2) Two of HPT2—High Precision Translator with Tilt Capability, and (2) Two RD2-S—High Precision Rotary Drive with Axial Motion Capability. Manufacturer: Vacuum Generators Ltd., United Kingdom. Intended use of article: The article is intended to be used in the investigation of segregation of impurity and alloying elements, to free surfaces of oriented single crystal and polycrystalline from iron and nickel. The investigations will include both time dependent and equilibrium aspects of segregation. Single crystal experiments will consist of a comparison of low energy electron diffraction data (LEED) and Auger electron spectra (AES) of surfaces after sulfur segregation from the bulk with similar data on surfaces after gas phase adsorption of sulfur. Similar comparisons on other impurity elements for which suitable gas phase species can be found will also be conducted. In the polycrystal experiments, the applicant will combine segregation studies by scanning Auger microscopy with direct observations by optical, X-ray, and electron microscopy. High purity oriented single crystals will be doped with pairs of alloying elements and used in ternary cosegregation studies. The articles will also be used routinely by several Ph.D. candidates in persuance of the thesis research necessary for the Ph.D. degree. Application received by Commissioner of Customs: December 18, 1978.

Docket Number: 79-00100. Applicant: Pinceton University, Flight Research Laboratory, Forrestal Campus, Princeton, NJ 08540. Article: Research Aircraft Navigation Computer. Manufacturer: Canadian Marconi Company, Canada. Intended use of article: The article is intended to be used to investigate flight safety requirements, fuel efficiency, human factors, and navigational accuracies for general aviation and transport aircraft. Experiments will be conducted to investigate flying qualities criteria for single-pilot instrument flight operations. The article may also be used to supplement the material contained in the graduate course MAE 565, 566, Aircraft Dynamics. Application received by Commissioner of Customs: December 18, 1978.

Docket Number: 79-00101. Applicant: Boston University School of Medicine, Dept. of Dermatology, Houseman Research Building, Rm. 316, 80 East Concord Street, Boston, MA 02118. Article: LKB 2088 Ultrotome V Ultramicrotome and accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used to prepare human and animal specimens for investigations which will include: ultrastructural studies on normal and pathologic tissues, developmental studies on skin, blood vessels and muscle systems, cyto and histochemical studies on enzyme and subcellular organelle localization in cells and tissues, membrane interactions and subcellular changes in cells induced by changes in their biochemical and physical environments. The article will also be used in the courses Ultrastructure and Cell Biology which will involve a study of general principles on techniques and the use of the electron microscope to study the fine structure of cells and various subcellular organelles and the employment of cytochemical staining methods to localize various enzymes. Application received by Commissioner of Customs: December 19, 1978.

Docket Number: 79-00102. Applicant: National Institutes of Health, Neuromuscular Diseases Section, IRP, Building 10/10D20, Clinical Center, 9000 Rockville Pike, Bethesda, Maryland 20014. Article: LKB 2088 Ultrotome V Ultramicrotome and Accessories. Manufacturer: LKB Produkter AB, Sweden. Intended use of article: The article is intended to be used for investigations which include ultrastructural studies of normal and pathological human and animal tissues. Developmental studies of cytochemical and histochemical staining for enzymes and subcellular organelle localization. Subcellular changes in cells induced by changes in their biochemical and physical environs will be investigated. Application received by Commissioner of Customs: December 19, 1978.

Docket Number: 79-00103. Applicant: USAF Medical Center/SGLE, Wilford Hall, Lackland AFB, TX 78326. Article: Electron Microscope, Model EM 10A and accessories. Manufacturer: Carl Zeiss, West Germany. Intended use of article: The article is intended to be used for the investigation of human and animal tissues as well as bacteria and virus in order to determine a diagnosis or rule out a condition in an attempt to properly treat patients. Application received by Commissioner of Customs: December 29, 1978.

Withdrawal of Application for Duty-Free Entry of Scientific Article

The National Institutes of Health has withdrawn its application (Docket Number 79-00054) for duty-free entry of a Model LKB 8800A Ultramicrotome.

Accordingly, further administrative proceedings will not be taken by the Department of Commerce with respect to this application.

Applications for Duty-Free Entry of Scientific Articles

The following are notices of the receipt of applications for duty-free entry of scientific articles pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651; 80 Stat. 897). Interested persons may present their views with respect to the question of whether an instrument or apparatus of equivalent scientific value for the purposes for which the article is intended to be used is being manufactured in the United States. Such comments must be filed in triplicate with the Director, Statutory Import Programs Staff, Bureau of Trade Regulation, U.S. Department of Commerce, Washington, D.C. 20230, on or before February 6, 1979.

Regulations (15 CFR 301.9) issued under the cited Act prescribe the requirements for comments.

A copy of each application is on file, and may be examined between 8:30 A.M. and 5:00 P.M., Monday through Friday, in Room 6886C of the Department of Commerce Building, 14th and Constitution Avenue, N.W. Washington, D.C. 20230.

DOCKET NUMBER: 79-00091. APPLICANT: Princeton University, P.O. Box 33, Princeton, New Jersey 08540. ARTICLE: JNM/FX-90Q NMR Spectrometer and Accessories. MANUFACTURER: JEOL Ltd., Japan. INTENDED USE OF ARTICLE: The article is intended to be used to obtain routine H^1 and ^{13}C spectra to determine chemical shifts, coupling constants and lineshapes, nuclear overhauser effects, variable temperature effects, and relaxation times (T_1 and $T_{1\rho}$) for various molecules investigated under the following projects:

1. Studies of Carbene Rearrangements.
2. Dynamic Stereochemistry of Molecular Propellers.
3. Conformational Analysis of Tetraarylethanes.
4. Studies of the Gear Effect.
5. Inversion Barrier of Stibines.
6. Barriers to Rotation about Metal-carbon σ Bonds.
7. Polynuclear Cations: Racemization Barriers and Catalytic Properties.
8. Mechanisms of Reductive Elimination.
9. Palladium-catalyzed Synthesis of Methylene Lactones.
10. Organometallic Reagents for Organic Synthesis: New Routes to Prostacyclins Through Novel Organometallic Catalytic Reactions, Reductive Polymerization of Carbon Monoxide by Transition Metal Catalysts and Oxidation of Organic Compounds Using Organometallic Catalysts.
11. Natural Product Synthesis and Development of New Synthetic Methods.
12. Synthesis of Heterocycles.
13. Organic Synthetic Transformation Involving the Use of Thallium.
14. Studies of Hydrocarbons Adsorbed on Surfaces.
15. Organometallic and Spirocyclic Synthesis: Studies in Total Synthesis, New Synthetic Methods, Mechanisms of Organometallic Reactions and Synthesis and Study of Spirocyclic Molecules.

APPLICATION RECEIVED BY COMMISSIONER OF CUSTOMS: December 18, 1978.

DOCKET NUMBER: 79-00092. APPLICANT: Duke University, Durham, N.C. 27706. ARTICLE: M301 1000W Lamp Power Supply and Starter with

V 4 4 / 1 2

ALH 220 Housing for 1000W Arc Lamp and ORC XL-1000W Xenon Arc Lamp. MANUFACTURER: Photochemical Research Association, Canada. INTENDED USE OF ARTICLE: The article is intended to be used as the radiation source for a photoacoustic spectrometer being constructed for employment in the study of various condensed phase materials, particularly eye lens cataracts (not in vivo). Other materials to be studied include crystalline powders, single crystals and solutions. The objectives of the research on eye lens cataracts are to gain an understanding of the nature of the pigments occurring in cataractous lenses and to explore the relationship between both UV and IR radiation, and the formation of cataracts. The objective of the work with crystalline materials is to determine the electronic structures of various materials which (like cataractous lenses) are highly scattering and/or highly absorbing, and thus not easily studied by optical transmission techniques. The article will be used in the training of graduate students as well as undergraduates students in chemistry courses. APPLICATION RECEIVED BY COMMISSIONER OF CUSTOMS: December 18, 1978.

DOCKET NUMBER: 79-00093. APPLICANT: The M.S. Hershey Medical Center of the Pennsylvania State University, Department of Obstetrics and Gynecology, Division of Reproductive Biology, Hershey, Pennsylvania 17033. ARTICLE: Vickers M85 Scanning Microdensitometer and accessories. MANUFACTURER: Vickers Instruments Inc., United Kingdom. INTENDED USE OF ARTICLE: The article is intended to be used to examine the properties and activities of a number of enzymes and of stored lipid within the Leydig cells of the testes of normal (rat) fetuses and fetuses of stressed mothers. The objective of these studies is to examine the role of the Leydig cells in differentiation of the brain along normal masculine lines. These studies of fetal testicular Leydig cells in the rat should provide information as to the physical and enzymatic state of the testosterone-producing component of the testis at a time during fetal life when circulating androgen is likely to be required for normal masculinization of the brain. In addition, the article is to be used for training of undergraduate, graduate and medical students in the courses Problem Solving Projects and Anatomy Research Problems. These courses will enable the student to gain experience in research problems, planning of experiments, experimental techniques, experimental methodologies and analysis of data. APPLICATION RECEIVED BY COMMISSIONER OF CUSTOMS: December 18, 1978.

DOCKET NUMBER: 79-00094. APPLICANT: National Aeronautics and Space Administration, George C. Marshall Space Flight Center, AL 35812. ARTICLE: Data Display System and accessories. MANUFACTURER: Thomson CSF, France. INTENDED USE OF ARTICLE: The article is intended to be used in research and development in coordination with Spacelab equipment developed by ESA and several European sources. The article will provide the capability to develop, train, maintain and verify flight computer programs in Spacelab hardware. In addition, the article will be used for astronaut training to simulate the flight equipment on the NASA Space Shuttle Spacelab to support the communication data onboard the flight orbiter. APPLICATION RECEIVED BY COMMISSIONER OF CUSTOMS: December 18, 1978.

DOCKET NUMBER: 79-00095. APPLICANT: National Aeronautics and Space Administration, George C. Marshall Space Flight Center, Marshall Space Flight Center, AL 35812. ARTICLE: High Rate Multiplexer Interface Simulator. MANUFACTURER: Messerschmidt Boelkow-Blohm GmbH, West Germany. INTENDED USE OF ARTICLE: The article is intended to be used in research and development in coordination with Spacelab equipment developed by ESA and several European sources. The article will provide the capability to develop, train, maintain and verify flight computer programs in Spacelab hardware. In addition, the article will be used for development of computer software (programs) on the NASA Space Shuttle/Spacelab to support the communication data on board the flight orbiter. APPLICATION RECEIVED BY COMMISSIONER OF CUSTOMS: December 18, 1978.

DOCKET NUMBER: 79-00096. APPLICANT: National Aeronautics and Space Administration, George C. Marshall Space Flight Center, Marshall Space Flight Center, AL 35812. ARTICLE: SDF and Level IV CDMS Simulator and accessories. MANUFACTURER: Matra Service, France. INTENDED USE OF ARTICLE: The article is intended to be used in research and development in coordination with Spacelab equipment developed by ESA and several European sources. The article will provide the capability to develop, train, maintain, and verify flight computer programs in Spacelab hardware. In addition, the article will be used for development of computer software (programs) on the NASA Space Shuttle/Spacelab to support the communication data on board the flight orbiter. APPLICATION RECEIVED BY COMMISSIONER OF CUSTOMS: December 18, 1978.

UNIVERSITY OF CALIFORNIA—SAN DIEGO

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to ths decision is available for public review between 8:30 a.m. and 5:00 p.m. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue NW., Washington, D.C. 20230.

DOCKET NUMBER: 78-00341. APPLICANT: University of California, San Diego, Purchasing Division, Q-026, La Jolla, Calif. 92093. ARTICLE: High Resolution Superconducting Magnet System and accessories. MANUFACTURER: Oxford Instrument Co., Ltd., United Kingdom. INTENDED USE OF ARTICLE: The article is intended to be used in research which centers on the study of nuclear spin relaxation in a variety of chemical systems, in particular organic liquid and liquid crystalline solutions. The objectives of this research are to: (a) Develop appropriate descriptions of relaxation processes in multilevel nuclear spin systems by studies of nuclei such as ^{2}H, ^{14}N, and ^{13}C, in particular in ordered fluids such as thermotropic nematic liquid crystals; (b) characterize the motional processes in such ordered fluids; (c) develop new experimental techniques for studies of nuclear relaxation in multilevel systems; and (d) explore the potential for use of less sensitive nuclei such as ^{17}O and ^{33}S for general structural and dynamic studies of organic molecules. The article will also be used as part of the education of graduate and postdoctoral students. COMMENTS: No comments have been received with respect to this application. DECISION: Application approved. No instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, is being manufactured in the United States. REASONS: The foreign article provides a field strength of 5.9 tesla and a bore size of 73 millimeters. The National Bureau of Standards advises in its memorandum dated December 14, 1978 that (1) the combination of capabilities of the foreign article described above are pertinent to the applicant's intended purpose and (2) it knows of no domestic instrument or apparatus of equivalent scientific value to the foreign article for the applicant's intended use.

The Department of Commerce knows of no other instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, which is being manufactured in the United States.

UNIVERSITY OF CHICAGO

Decision on Application for Duty-Free Entry of Scientific Article

The following is a decision on an application for duty-free entry of a scientific article pursuant to Section 6(c) of the Educational, Scientific, and Cultural Materials Importation Act of 1966 (Pub. L. 89-651, 80 Stat. 897) and the regulations issued thereunder as amended (15 CFR 301).

A copy of the record pertaining to the decision is available for public review between 8:30 A.M. and 5:00 P.M. in Room 6886C of the Department of Commerce Building, at 14th and Constitution Avenue, NW., Washington, D.C. 20230.

DOCKET NUMBER: 76-00460. APPLICANT: University of Chicago, Enrico Fermi Institute, 5640 South Ellis Avenue, Chicago IL 60637. ARTICLE: Isotope Micromass, Model 602C. MANUFACTURER: VG Micromass Ltd., United Kingdom. INTENDED USE OF ARTICLE: The article is intended to be used in research which involves determination of the abundances of the stable isotopes of nitrogen (N^{15} and N^{14}) extracted from lunar rocks and soils. Nitrogen and other trace gases will be extracted from lunar samples by one of the following alternative procedures: (1) pyrolysis at various temperatures in a high-vacuum furnace; (2) acid dissolution of the sample followed by a Kjeldahl distillation of ammonia and a hypobromite oxidation to produce N_2.

COMMENTS: No comments have been received with respect to this application. A letter dated December 1, 1976 was received from Nuclide Corporation (Nuclide) after expiration of the comment period. This letter is being treated as an offer to provide additional information in accordance with Subsection 301.10(a) of the regulations. DECISION: Application denied. An instrument or apparatus of equivalent scientific value to the foreign article, for such purposes as this article is intended to be used, was being manufactured in the United States at the time the foreign article was ordered (October 10, 1973). REASONS: This application is resubmission of Docket Number 74-00302-65-40600 which was denied without prejudice to resubmission on April 6, 1976 for informational deficiencies. The applicant, in response to question 8, alleges that the following features of the article are pertinent to its intended use and are not available in a domestic instrument, specifically those manufactured by Nuclide:

1. A sample inlet system of all-metal construction which is bakable for decontamination.

Minimum sample size for full precision of 0.025 atmosphere cubic centimeter (atm. cm^3).

3. Vacuum system background pressure in 10^{-9} torr range.

4. Sensitivity of 10^{-2} amperes/torr for carbon dioxide (CO_2).

5. Accelerating voltage of 5000 volts (v) for nitrogen (N_2).

6. Reproducibility for isotope ratio measurement of ±0.0025 percent (%).

7. Magnet of the permanent type which is important for stability.

The National Bureau of Standards (NBS) advises in its memorandum dated February 10, 1977 that the Model 6-60-RMS ratio mass spectrometer manufactured by Nuclide is the domestic instrument which is most closely comparable to the article. NBS further advises that the 6-60-RMS was of equivalent scientific value to the foreign article for the article's intended purposes at the time the article was ordered. A discussion of each of the features alleged to be pertinent prefaced by a discussion of the nature of the applicant's contact with Nuclide follows.

APPLICANT'S CONTACT WITH NUCLIDE

Question 8.c. of the application form provides guidelines needed for justification of duty-free entry. The applicant is asked to identify the particular domestic instrument(s) that were compared with the foreign article and to list the features of that article that are both pertinent to the intended program and unmatched in domestic instrument(s) being compared. An important facit in selection of the instrument(s) to be compared with the foreign article depends very much on the information that the applicant obtains on the instrumentation available from the domestic manufacturer. However, the information that one obtains from manufacturers can vary greatly with the manner in which one approaches them. Question 9 of the application form as well as Subsections 301.7 and 301.9(c)(7) of the regulations are intended, in part, to ascertain whether the domestic manufacturer was made sufficiently aware of the applicant's needs to furnish the required information. Both question 9 and Subsection 301.7 request that documentation be enclosed with the application to support the applicant's statements relative to the nature of the contact with the domestic manufacturer.

The record contains no evidence that Nuclide was made aware of the complete specifications alleged by the applicant to be pertinent to the intended use of the article described in this application. As indicated below the record actually indicates the opposite. The applicant did not formally seek a Request for Quote on such specifications from Nuclide. In this connection, it is explained in the applicant's letter of June 8, 1976, that after the intended application was described in a long telephone conversation, Nuclide responded with sufficient information to allow selection of the instrument superior for the intended purposes. However, Nuclide's response (a copy of which was provided by the applicant) was dated December 20, 1972 (11 months before purchase of the foreign article) and was clearly preliminary in nature. For example, Nuclide suggested (as though the foreign article and its features had not been discussed previously with the applicant) that its competitively priced 3-60-RMS be compared with the foreign article (a brief comparison was provided which involved only one of the detailed specifications now deemed pertinent), Nuclide suggested, in anticipation of a RFQ delayed by funding problems, that allowance should be made for a 10% price increase, Nuclide indicated that it would be interested in any areas of disagreement, and, finally Nuclide asked if other information was needed. If a properly worded RFQ had been sent to Nuclide the applicant would have known whether Nuclide could meet the specifications deemed pertinent and there was ample time to send such a RFQ. As will be seen in the discussion of specifications below, Nuclide could have met the applicant's needs if such needs were expressed in formal RFQ.

Of nine purchases of the foreign article involving applications for duty-free entry, in only one instance was Nuclide provided the opportunity to respond to a formal RFQ prior to the placement of a purchase order by the applicant. In that case, Nuclide of-

JAN 17 79 UMI

fered to meet all of the applicant's technical requirements (Docket Number 78-00046). Many of these requirements, including some at issue in this application (Docket Number 76-00460), appear to be tailored exactly to those quoted for the foreign article. In June, 1974, Nuclide accepted an order for a 6-60-RMS matching and even exceeding several of the specifications of the foreign article in question. The Department has no knowledge of failure on Nuclide's part to offer the specifications at issue in this decision after receiving formal RFQ. In this regard, it is noted that the legislative history and the Department's regulations (15 C.F.R. § 301.11 (1978)) require the Department to take into account the capability of a domestic manufacturer to produce an instrument with certain specifications, even if it has not previously done so. No evidence has been supplied which suggests that Nuclide would not have been willing and able to supply the pertinent specifications of the foreign article.

All Metal Bakeable Inlet

Dated specifications show that Nuclide has been delivering glass or metal bakeable inlets since 1965 or earlier. In its recommendation, relating to the applicant's initial submission (Docket Number 74-00302-65-40600), NBS advised that bakeable inlet systems in both glass-and-metal and all-metal designs were available from Nuclide at the time of order of the foreign article. NBS's advice was conveyed to the applicant as part of the Denial Without Prejudice to resubmission (DWOP) of the initial application. On resubmission, (Docket Number 76-00460) the applicant provides no new information or evidence to show that such inlets were not available from Nuclide. Further, NBS advises in its memorandum dated February 10, 1977 that the specific choice of materials of which the inlet system is made is a design feature which is not pertinent within the meaning of Subsection 301.2(n) of the regulations and that a bakeable inlet system is pertinent to the applicant's intended purposes.

The Department notes that the specifications of the foreign article which were included in Docket Number 74-00302-65-40600 (the initial submission) state that the all-metal sample inlet system of the foreign article is bakeable to 300°C except for the mercury/glass manometers which are only required for initial adjustments and can be subsequently valved off and removed. (These same specifications stipulate that bakeout is provided by a 250°C oven.) At the time the foreign article was ordered Nuclide provided two bakeout systems, the BS-1, insulated heating tapes with temperatures of 200°C to 300°C and the BS-2, an oven enclosure with temperatures of up to 300°C to 400°C. Both of these systems provide a matching specification for the pertinent bakeable inlet system of the foreign article. NBS advises that the 6-60-RMS matches the article with respect to the bakeable inlet. Based on a review of the above, the Department finds that the 6-60-RMS is scientifically equivalent to the article with respect to the pertinent feature.

Minimum Sample Size for Full Precision

In response to question 8 the applicant alleges that the minimum sample size for "full precision" is 0.1 atm cm^3 for Nuclide and 0.025 atm cm^3 for the article. The applicant further alleges that the article can analyze a sample "40 times smaller than the Nuclide system" (though 0.025 is only 4 times as small as 0.1). These claims should be examined from several points of view, especially from the standpoint of the applicant's intended purposes, the specifications of the article relating to these purposes and Nuclide's ability to meet such specifications.

The response to question 7 clearly indicates that only Nitrogen (N_2) analysis is to be performed. The Department's review is limited to an analysis of the guaranteed specifications of the foreign article for the intended use of the article (in this case N_2 analysis) pursuant to Subsection 301.11(a) of the regulations. The applicant's purchase order references Technical Information Sheet (TIS) 01.625. This sheet provides specifications of the article including the article's small sample capability. Although the small sample capability for CO_2 with the small sample inlet option purchased by the applicant (C_s) is stated to be 0.02 atm cm^3 with a precision of 0.01% on page 1 and to be 0.025 atm cm^3 on page 3, no information is provided on small sample capability for analysis of N_2. The applicant attached to the application a copy of two pages of the foreign manufacturer's brochure, Publication No. (P) 02.214, which provides more detail on many of the article's specifications, including small sample capability. The pages supplied by the applicant indicate that the small sample inlet is used only for CO_2 and that the minimum quantity of N_2 that is analyzed from the standard inlet is 0.1 atm cm^3 at a precision of 0.01%. If "full precision" means the best precision of the article regardless of sample size, P 02.214 shows that value to be 0.0025%. TIS 01.625 indicates that the normal sample requirement is in the range 1-20 atm cm^3. Thus, specifications do not confirm that a small sample capability of 0.025 atm cm^3 for N_2 was guaranteed to the applicant. Further, the precision of the article at the smallest N_2 sample size specified is not the best precision specified.

A scientific report on the applicant's work, in which the applicant exceeded the specified N_2 small sample capability of the article, was attached to the application. (In the applicant's letter dated June 8, 1976, it is stated that a very small volume inlet was, in part, a factor in attaining results.) Samples were chosen to yield at least 0.01 atm cm^3 of N_2 gas. Analytical precision under normal conditions was ±0.03% although most of the analyses, due to small sample sizes used, had 20 errors of ±0.025%. In some cases (19%), the uncertainties were of the order of 0.1% and higher to a maximum of ±1.4%. These results cannot be used to confirm the guaranteed specifications of the foreign article but they do indicate that precision with the article suffers considerably as sample size decreases.

No evidence is presented to show that Nuclide was asked if it could provide analysis of 0.025 atm cm^3 at any specified precision (or even 0.1 atm cm^3 at a precision of 0.01%). Further, there is evidence to indicate that if Nuclide had been asked to provide 0.025 atm cm^3 it could have complied. First, specifications for the 6-60-RMS (PUBS 1002-A-0172) match those in the foreign manufacturer's literature on analysis of small quantities of N_2. These specifications state, "an optional modification makes it possible to successfully analyze samples as small as 0.1 cc [cubic centimeters] STP [standard temperature and pressure] or *less* [emphasis added]. A Toepler pump is available to facilitate analysis of non-LN_2. [liquid N_2] condensible gases such as nitrogen, hydrogen and argon". Second, Nuclide's precision matches that of the foreign article (as will be shown in the discussion of "reproducibility" below). Third, Nuclide met a 1974 RFQ by providing 0.025 atm cm^3 at an internal precision of ±0.01% for CO_2 analysis to match the foreign manufacturer's quotation of April 6, 1973. Fourth, Nuclide's optional small sample system is offered at a very small price indicating both that it is not difficult to make and the matching or bettering of the foreign article's small sample reservoir volume (0.5 cc) in glass or metal would represent no great technological breakthrough.

The primary difficulty in small sample analysis of non-condensible gases such as N_2 is quantitative transfer of sample to the reservoir. This can be accomplished in both the Nuclide and the foreign systems through the use of the Toepler pump or by cooling the sample with liquid Helium to condense it. Other techniques for small sample analysis such as the static technique, gas dilution and the use of low pressure reservoirs with matched molecular leaks are also amenable to analysis of samples equal to or less than 0.025 cc STP. In view of this and NBS advice received, the Department finds that Nuclide was capable of satisfying the applicant's 0.025 atm cm^3 small sample requirement at the time of order.

Vacuum System Background Pressure

The specifications for the foreign article (quotation of April 6, 1973 and TIS 01.625) state that its vacuum system provides a background pressure in the 10^{-9} torr range. NBS notes that the term "10^{-9} torr range" is ambiguous as it is not a quantitative definition but advises that the best available vacuum, at least 10^{-9} torr, is pertinent to the applicant's intended use. In support of the contention that Nuclide could not provide the required background pressure, the applicant noted that the background at mass 28 of a spectrum enclosed with Nuclide's letter of December 20, 1972 was 5.4×10^{-14} amperes (A) and stated that the article gives 1.5×10^{-14} A (without providing a spectrum or stating conditions involved). The cited Nuclide data was obtained in 1967 and it is clear from the text accompanying the spectrum that conditions were not ideal and the background obtained was not representative of Nuclide's full capability. Thus, the Department does not find the applicant's background comparison useful. However, NBS advises that at the time of order the Nuclide Model 6-60-RMS was available with ion pumps capable of producing a vacuum better than 10^{-9} torr. Accordingly, the Department finds that the 6-60-RMS matches the foreign article with respect to background pressure.

Sensitivity

The foreign article's sensitivity specification, 10^{-2} A/torr for CO_2, is not well-defined because it lacks statements of resolution, ionizing current and site of measurement of current and pressure. Although the specification is not directly comparable with Nuclide specifications published at the time the foreign article was ordered, it is clear from the discussion below, however, that Nuclide would have offered to provide 10^{-2} A/torr for CO_2, in response to a RFQ.

Nuclide indicated to the applicant in material attached to its letter of December 20, 1972 that (1) its 3-60-RMS uses a 7.5 centimeter (cm.) 60° sector magnet, while the article has a 6 cm. 90° magnet and (2) the resolving power sensitivity product of the 3-60 is 25% greater than that of the article. The applicant, aware that sensitivity is directly related to magnetic sector radius, stated in response to question 8.c.(2) (of both the initial submission and this submission) that, "[the foreign manufacturer] quotes a value [for sensitivity] which is typical of a good 6-inch [15 cm.] radius mass spectrometer; . . .". From Nuclide's letter of December 20, 1972, the Department learned that the applicant played a key role in the development of Nuclide's 6-60-RMS and, in the absence of statements to the contrary, assumes that the 6-60 is regarded as a good 6-inch radius instrument.

In response to a 1974 RFQ tailored to the specifications of the foreign article, Nuclide offered 4×10^{-3} A (measured at the collector) at a pressure in the analyzer of 2×10^{-7} torr for CO_2. (This is 2×10^{-2} A/torr for CO_2) better than the quoted sensitivity of the foreign article.)

In the DWOP of the initial application (Docket Number 74-00302-65-40600) the applicant was informed of NBS advice that at the time of order Nuclide was capable of satisfying the sensitivity specification of the article. Although the applicant attempted to rebut some of NBS's advice, no attempts was made to rebut the advice on sensitivity.

In view of the above, the Department finds that the 6-60-RMS was capable of matching the sensitivity specification of the foreign article.

Accelerating Voltage

The foreign article provides an ion accelerating voltage of 5000 v for N_2. The Nuclide Model 6-60-RMS also provided 5000 v for N_2 at the time the foreign article was ordered. Based on this information and on the recommendation of NBS, the Department finds that the Nuclide 6-60-RMS matched the ion accelerating voltage of the foreign article at the time of order.

Reproducibility

In the initial submission (Docket Number 74-00302-65-40600), the applicant alleged that the article's reproducibility for isotope ratio measurement is ±0.0025% whereas the corresponding specification for the Nuclide 3-60-RMS was ±0.02%. However, after being informed via DWOP that the comparable Nuclide 6-60-RMS provided an internal precision (a term which corresponds to "reproducibility" as defined by the foreign manufacturer) of ±0.0002%, the applicant (on resubmission) stated that the precision for N_2 of the article (±0.0025%) exceeds the *best* value in the range given by Nuclide (±0.003%) for the 6-60-RMS. An examination of this new statement from the standpoint of the applicant's work, the article's specifications, Nuclide specifications and NBS advice follows.

Specifications of the foreign article and other technical literature attached to the application indicate that precision, reproducibility and/or internal reproducibility are defined as the $2\sigma_{10}$ (two sigma sub ten) value calculated from results of a single run (one sample/standard pair) of ten ratio measurements. For an undefined sample size, the article's $2\sigma_{10}$ is 0.0025% on N_2 and CO_2; and for a sample size of 0.01 atm cm^3 using the small volume inlet, the $2\sigma_{10}$ is 0.01%. No information is given in the article's specifications on the reproducibility specified for the very small samples of N_2 utilized in the applicant's work but the scientific report on this work attached to the application indicates that for samples yielding at least 0.01 atm cm^3 of N_2 precision under normal conditions was ±0.03% and the uncertainties varied from ±0.1% to ±1.4% for 19% of the analyses. Thus, with the context of the applicant's work, reproducibility in the article (which under normal conditions is ±0.03%) is effected considerably by conditions of the experiment.

Nuclide defines precision as the differences between eight out of ten ratio pairs of two samples varying by approximately 0.5% in isotopic composition. Nuclide specifications attached to the application (PUBS 1151-0771, page 2) state precision as a range with the explanation that ranges are given since precision achievable in ratio determination depends on many factors such as the ratio difference itself, available sample size, sample purity, the time per analysis allocated by the analyst, whether the instrument is dedicated to only one kind of work or to many types of work and operator experience.

V 4 4 / 1 2 J A 1 7 7 9 UMI

2) state precision as a range with the explantion that ranges are given since precision achievable in ratio determination depends on many factors such as the ratio difference itself, available sample size, sample purity, the time peranalysis allocated by the analyst, whether the instrument is dedicated to only one kind of work or to many types of work and operator experience.

The range for carbon as CO_2 is $\pm 0.002\%$ while that for Oxygen and N_2 is $\pm 0.003\%$ to $\pm 0.02\%$. The worst value of these ranges compares favorably with the $\pm 0.03\%$ and larger amount achieved by the applicant in the report cited above. The best values of these ranges to be compared with the article's $\pm 0.0025\%$ are $\pm 0.002\%$ and $\pm 0.003\%$.

In 1974 Nuclide provided a 6-60-RMS to a customer in response to specifications patterned after those of the foreign article. Precision was defined in a manner analogous to the foreign manufacturer's definition of reproducibility and Nuclide matched the article's specifications.

NBS advises that without regard to differences in definition, there is no significant difference between the numerical value of the article's reproducibility and that specified by Nuclide and moreover, taking into account that the specified values are not on the same terms, the Nuclide specifications is considered to be more meaningful. Using equivalent definitions NBS advises that Nuclide's "reproducibility" is $\pm 0.0002\%$.

In view of the above, the Department finds that the Nuclide 6-60-RMS was capable of matching the reproducibility specifications of the foreign article at the time the article was ordered.

PERMANENT MAGNET

The foreign article is equipped with a permanent magnet. Nuclide specifications of July 1971, attached to the application, indicate that a permanent magnet was available for the 3-60-RMS. Similarly, specifications for the 6-60-RMS (e.g., those of March 1965) indicate that a permanent magnet was available for that instrument. The Department therefore finds that Nuclide was capable of matching the permanent magnet of the article at the time of order.

Based on the foregoing considerations, NBS advice and our own review of the application as well as other factual information in our possession (specifications, textbooks, etc.), we find that the Nuclide Model 6-60-RMS was of equivalent scientific value to the foreign article for such purposes as this article is intended to be used at the time the article was ordered.

NUMERICALLY CONTROLLED MACHINE TOOL TECHNICAL ADVISORY COMMITTEE

Partially Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act, as amended, 5 U.S.C. App. (1976), notice is hereby given that a meeting of the Numerically Controlled Machine Tool Technical Advisory Committee will be held on Tuesday, February 6, 1979, at 10 a.m. in Room 3817, Main Commerce Building, 14th Street and Constitution Avenue NW., Washington, D.C.

The Numerically Controlled Machine Tool Technical Advisory Committee was initially established on January 3, 1973. On December 20, 1974 and January 13, 1977, and August 28, 1978, the Assistant Secretary for Administration approved the recharter and extension of the Committee, pursuant to Section 5(c)(1) of the Export Administration Act of 1969, as amended, 50 U.S.C. App. Sec. 2404(c)(1) and the Federal Advisory Committee Act.

The Committee advises the Office of Export Administration with respect to questions involving (A) technical matters, (B) worldwide availability and actual utilization of production technology, (C) licensing procedures which may affect the level of export controls applicable to numercially controlled machine tools, including technical data or other information related thereto, and (D) exports of the aforementioned commodities and technical data subject to multilateral controls in which the United States participates including proposed revisions of any such multilateral controls.

The Committee meeting agenda has six parts:

GENERAL SESSION

(1) Opening remarks by the Chairman.
(2) Presentation of papers or comments by the public.
(3) Nomination and election of a new Chairman.
(4) Discussion of accuracy parameters.
(5) New business.

EXECUTIVE SESSION

(6) Discussion of matters properly classified under Executive Order 11652 or 12065, dealing with the U.S. and COCOM control program and strategic criteria related thereto.

The General Session of the meeting is open to the public, at which a limited number of seats will be available. To the extent time permits members of the public may present oral statements to the Committee. Written statements may be submitted at any time before or after the meeting.

With respect to agenda item (6), the Acting Assistant Secretary of Commerce for Administration, with the concurrence of the delegate of the General Counsel, formally determined on September 6, 1978, pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended by Section 5(c) of the Government In The Sunshine Act, Pub. L. 94-409, that the matters to be discussed in the Executive Session should be exempt from the provisions of the Federal Advisory Committee Act relating to open meetings and public participation therein, because the Executive Session will be concerned with matters listed in 5 U.S.C. 552b(c)(1). Such matters are specifically authorized under criteria established by an Executive Order to be kept secret in the interests of the national defense or foreign policy. All materials to be reviewed and discussed by the Committee during the Executive Session of the meeting have been properly classified under Executive Order 11652 or 12065. All Committee members have appropriate security clearances.

The complete Notice of Determination to close meetings or portions thereof of the series of meetings of the Numerically Controlled Machine Tool Technical Advisory Committee and of any subcommittees thereof, was published in the FEDERAL REGISTER on October 25, 1978 (43 FR 49828).

Copies of the minutes of the General Session will be available by calling Mr. Charles C. Swanson, Director, Operations Division, Office of Export Administration, U.S. Department of Commerce, Washington, D.C. 20230, telephone A/C 202-377-4196.

For further information, contact Mr. Swanson either in writing or by telephone at the address or number shown above.

Dated: January 12, 1979.

RAUER H. MEYER,
Director, Office of Export Administration, Bureau of Trade Regulation, U.S. Department of Commerce.

National Oceanic and Atmospheric Administration

GULF OF MEXICO FISHERY MANAGEMENT COUNCIL, SCIENTIFIC AND STATISTICAL COMMITTEE

Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Gulf of Mexico Fishery Management Council was established by the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265) and the Council has established a Scientific and Statistical Committee (SSC). The Committee will meet to review a draft fishery management plan for spiny lobster.

DATES: The meeting will convene on Thursday, February 1, 1979, at 8:00 a.m. and will adjourn on Friday, February 2, 1979, at 12:00 noon.

ADDRESS: The meeting will take place in the Capri Room of the Landmark Motor Hotel, 2601 Severn Avenue, Metairie, Lousiana:

FOR FURTHER INFORMATION CONTACT:

Wayne E. Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Florida 33609. Telephone: (813) 228-2815.

Dated: January 12, 1979.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

DEPARTMENT OF DEFENSE

Department of the Air Force

USAF SCIENTIFIC ADVISORY BOARD

Meeting

JANUARY 8, 1979.

The USAF Scientific Advisory Board Tactical Cross-Matrix Panel will meet on February 13 and 14, 1979 at Langley AFB, Virginia from 8:30 a.m. to 4:30 p.m. each day. The purpose of the meeting is to receive classified briefings on TAC mission area analysis, Ground Launch Cruise Missile Operational Concepts, Assault Breaker and other subjects relevant to current tactical operations.

The meeting concerns matters listed in Section 552b(c) of Title 5, United States Code, specifically subparagraph (1) thereof, and accordingly, will be closed to the public.

For further information contact the Scientific Advisory Board Secretariat at (202) 697-8404.

CAROL M. ROSE,
Air Force Federal Register Liaison Officer.

Office of the Secretary

DEFENSE INTELLIGENCE AGENCY ADVISORY COMMITTEE

Closed Meeting

Pursuant to the provisions of Subsection (d) of Section 10 of Pub. L. 92-463, as amended by Section 5 of Pub. L. 94-409, notice is hereby given that a closed meeting of a Panel of the DIA Advisory Committee will be held as follows:

Wednesday and Thursday, February 21-22, 1979, Missile Intelligence Agency, Redstone Arsenal, Alabama.

The entire meeting, commencing at 0900 hours, each day, is devoted to the discussion of classified information as defined in Section 552b(c)(1), Title 5 of the U.S. Code and therefore will be closed to the public. Subject matter will be used in a study on the growth and the potential implications of Soviet technology.

MAURICE W. ROCHE,
Director, Correspondence and Directives, Washington Headquarters Services, Department of Defense.

JANUARY 12, 1979.

DEFENSE SCIENCE BOARD

Advisory Committee Meeting

The Defense Science Board will meet in closed session February 15-16, 1979 in the Pentagon, Arlington, Virginia.

The mission of the Defense Science Board is to advise the Secretary of Defense and the Under Secretary of Defense, Research and Engineering on scientific and technical matters as they affect the perceived needs of the Department of Defense.

A meeting of the Board has been scheduled for February 15-16, 1979 to discuss interim findings and tentative recommendations resulting from ongoing Task Force activities associated with Strategic, Tactical, Intelligence/Command, Control and Communication, and Technology issues. The Board will also discuss plans for future consideration of scientific and technical aspects of specific strategies, tactics, and policies as they may affect the U.S. national defense posture.

In accordance with Section 10(d) of Appendix I, Title 5, United States Code, it has been determined that this Defense Science Board meeting concerns matters listed in Section 552b(c) of Title 5, of the United States Code, specifically subparagraph (1) thereof, and that accordingly this meeting will be closed to the public.

MAURICE W. ROCHE,
Director, Correspondence and Directives, DoD/WHS.

JANUARY 12, 1979.

ENDANGERED SPECIES COMMITTEE

GRAYROCKS DAM AND RESERVOIR IN WYOMING; TELLICO DAM AND RESERVOIR IN TENNESSEE

Meeting

AGENCY: Endangered Species Committee.

ACTION: Notice of meeting.

SUMMARY: The Endangered Species Committee will meet to consider whether or not the Grayrocks Dam and Reservoir in Wyoming and the Tellico Dam and Reservoir in Tennessee should be granted exemptions from the requirements of Section 7(a) of the Endangered Species Act.

DATE: January 23, 1979.

FOR FURTHER INFORMATION CONTACT:

Raphaelle Semmes, Room 4160, Interior Building, 18th & C Streets, N.W., Washington, D.C. 20240, Phone: 202-343-5978.

FOR MEDIA CONTACTS: Harmon Kallman, Office of Public Affairs, Phone: 202-343-3171.

SUPPLEMENTARY INFORMATION: Secretary of the Interior Cecil D. Andrus, in his capacity as Chairman, has called a meeting of the Endangered Species Committee for Tuesday, January 23, 1979, at 9:00 a.m. in the auditorium of the Interior Building, 18th and C Streets, N.W., Washington, D.C.

The Endangered Species Act Amendments of 1978 (Amendments) create the Endangered Species Committee. The Committee is charged with the responsibility of determining whether exemptions should be granted from the requirement of § 7(a) of the Endangered Species Act of 1973, as amended, that Federal agency actions not jeopardize the continued existence of endangered or threatened species or adversely modify their critical habitat.

V 4 4 / 1 2 J A 1 7 7 9 UMI

The Amendments directed the Committee to give prompt consideration to exemptions for two specific projects, the Grayrocks Dam and Reservoir on the Laramie River in Wyoming, and the Tellico Dam and Reservoir on the Little Tennessee River in Tennessee.

The Endangered Species Committee is made up of six permanent Federal members, the Secretary of the Interior, the Secretary of Agriculture, the Secretary of the Army, the Chairman of the Council of Economic Advisors, the Administrator of the Environmental Protection Agency, and the Administrator of the National Oceanic and Atmospheric Administration. Members of the Committee are also appointed by the President from States affected by the particular project which is being considered for exemption.

The Director of the Fish and Wildlife Service has concluded that the Tellico Dam and Reservoir Project will cause the extinction of the endangered snail darter (*Percina tanasi*) and will destroy its critical habitat, and that the Grayrocks Dam and Reservoir is likely to jeopardize the continued existence of the endangered whooping crane (*Grus americana*) and is likely to adversely modify its critical habitat.

Public hearings were held on January 8, 1979, to receive information and public comment on the issues before the Committee in considering exemptions for the Grayrocks and Tellico Projects. Tellico hearings were held in Washington, D.C. and Knoxville, Tennessee; Grayrocks hearings were held in Washington, D.C. and Cheyenne, Wyoming.

The meeting will commence with Committee consideration of the Grayrocks Project, to be followed by consideration of the Tellico Project. In the course of the meeting the Committee may vote on wether or not exemptions will be granted for either the Grayrocks or Tellico Projects.

The meeting will be open to the public.

Dated: January 10, 1979.

CECIL D. ANDRUS,
Secretary of the Interior, Chairman, Endangered Species Committee.

DEPARTMENT OF ENERGY

STUDY PLAN FOR STUDY REQUIRED BY TITLE III OF THE PETROLEUM MARKETING PRACTICES ACT

AGENCY: Department of Energy.

ACTION: Notice.

SUMMARY: This notice contains the study plan for Title III of the Petroleum Marketing Practices Act (Pub. L. 95-297). This study will examine alleged subsidization in the marketing of motor fuel and functional profitability in the petroleum industry. On October 6-7, 1978, a public hearing was held in Washington, D.C. which addressed the scope and methodology of this study. Comments on this study plan and requests for futher information regarding it should be addressed to: William C. Lane, Jr. or David W. Penn, Office of Competition, Department of Energy, 20 Massachusetts Avenue, NW., Room 7127, Washington, D.C. 20845 (202) 376-9495.

SUPPLEMENTARY INFORMATION:

I. INTRODUCTION

This document constitutes the plan of the Office of Competition for studying the alleged subsidization of motor fuel sales. Its publication in the FEDERAL REGISTER is part of the continuing effort to solicit comments and suggestions from all interested parties. The sooner that these comments are received, the earlier they can be evaluated and incorporated into our plans wherever possible. Concurrently, we are field testing various elements of the data collection strategy as outlined in this document.

A. BACKGROUND

Title III of the Petroleum Marketing Practices Act (hereinafter "Title III") requires the Secretary of Energy to examine the extent to which producers, refiners, and other suppliers of motor fuel subsidize the sale of such fuel at retail or wholesale with profits obtained from other operations.[1] Section 301(b) of the Act specifies that the study shall examine:

(1) The role of vertically integrated operations in facilitating subsidization of sales of motor fuel at wholesale or retail;

(2) The extent to which such subsidization is predatory and presents a threat to competition;

(3) The profitability of various segments of the petroleum industry;

(4) The impact of prohibiting such subsidization on the competitive viability of various segments of the petroleum industry, on prices of motor fuel to consumers and on the health and structure of the petroleum industry as a whole; and

(5) Such other matters as the Secretary considers appropriate.

Within DOE, the Office of Competition has the responsibility for conducting this study.

In its deliberations on the Title III legislation, Congress took special note of the impact of possible subsidization on the consuming public. In addition, the Department of Justice observed that "limiting the pricing flexibility of integrated firms could significantly impede the functioning of competition in the motor fuel market, thereby increasing the cost of those products to consumers."[2] Congressman Dingell further stated that the Title III study "• • • will explore questions relating to market strtucture, competition, and consumer costs" and will examine the extent to which present pricing practices may be resulting in lower motor fuel prices to ultimate consumers.[3] The Office of Competition has developed the following study plan with this Congressional perspective in mind.

B. PUBLIC HEARING

The Office of Competition held a public hearing on October 6 and 7, 1978, soliciting comments on the following areas: (1) The direction of the study and the issues to be emphasized; (2) the most appropriate methodology; and (3) the potential problem areas. Oral and/or written statements have been received from the following individuals and organizations:

Professor Fred Allvine
American Petroleum Refiners Association
Ashland Oil Company
Atlantic Richfield Co.
Beacon Oil Co.
Chevron USA, Inc.
Committee of Independent Refiner/Marketers
Continental Oil Co.
Exxon Co., USA
Georgia Independent Oil Mens' Assoc.
Gulf Refining and Marketing Co.
Senator Floyd Haskell
Independent Gasoline Marketers Council
Independent Refiners Assoc. of America
Independent Terminal Operators Assoc.
Senator Edward M. Kennedy
Marathon Oil Co.
Mobil Oil Co.
Mt. Airy Refining Co.
National Congress of Petroleum Retailers
National Oil Jobbers Council
Pine Tree Gasoline Retailers Assoc.
Rock Island Refining Corp.
Shell Oil Co.
Society of Independent Gasoline Marketers of America
Standard Oil (Indiana)
Texas Oil Marketers Assoc.
Thunderbird Resources, Inc.
Union Oil Co.
United Refining Corp.
Vickers Petroleum Co.
Virginia Gasoline Retailers Assoc.

Many statements stressed the importance of the Title III Study. For example, a representative of the Independent Refiners Association noted that:

[1] Petroleum Marketing Practices Act, Pub. L. 95-297 (June 19, 1978).

[2] Letter from Patricia M. Wald, Assistant Attorney General, to Hon. Clifford P. Hansen, May 3, 1978. 124 *Congressional Record* S7000 (May 4, 1978).

[3] 124 *Congressional Record* H5002 (June 6, 1978).

> The subject of the present hearing • • • represents potentially the most important government action in many years.[4]

Professor Fred Allvine echoed these sentiments:

> (T)his investigation has the potential for being one of the most important studies ever made of the petroleum industry.[5]

The Office of Competition agrees with these observations. The conclusions of the Title III study could significantly affect the future marketing patterns of motor gasoline.

II. THE CONCEPT OF SUBSIDIZATION

A. FOCUS OF THE TITLE III STUDY

At the October 6-7, 1978 hearings, many speakers expressed opinions, as requested, concerning the scope and methodology of the study. These opinions covered a wide range of views and reflected a broad spectrum of interests in the petroleum industry. They ranged from suggesting a very narrowly-defined project, in which only functional profitability would be analyzed, to recommending a very comprehensive investigation, where every facet of the petroleum industry is researched.

To some degree, the background of each speaker played an important role in his recommendations. For instance:

> Retailers want the study to focus on the rival operations of refiner-and wholesaler-owned retail outlets. They allege that integrated companies are subsidizing operations at their retail outlets.

Wholesalers (jobbers) want the study to focus on the favorable treatment that refiners allegedly give their own directly supplied retail outlets.

Large independent refiners want the study to focus on the refinery operations of major crude producers. They allege that the major oil companies are subsidizing their refinery operations with crude oil profits.

Small refiners want the study to focus on a broad spectrum of refinery products, and not merely on motor gasoline which acccounts for an insignificant proportion of their output. These refiners argue that they suffer significant competitive disadvantages due to the majors' control of crude oil.

Independent terminal operators want the study to examine the manner in which majors price their products to various classes of consumers, including independent terminal operators. They imply that the majors are engaging in price discrimination, particularly against terminal operators.

> The majors contend that the study should focus on government induced subsidization, alleged to be the only possible type of subsidization in today's industry.

[4] See, hearing transcript, pp. 6-7.

[5] Ibid., p. 116. Also, see references at p. 292 and p. 310.

Nevertheless, most speakers felt that the study should focus primarily on the marketing of motor fuel. We share this opinion. However, this evaluation will include an examination of motor fuel marketing activity relative to operations in other segments of the industry.

B. THE DEFINITION OF SUBSIDIZATION

1. *Opinions at the Hearings.* Nearly every speaker at the October 6-7, 1978 hearing argued that a precise definition of subsidization was an essential starting point for conducting the Title III Study. We agree. Given the diverse backgrounds and perceptions of these speakers, however, it is not surprising that many alternative definitions of subsidization were suggested.

Most speakers opined that subsidization in the petroleum industry involved integrated companies (either vertically integrated refiners or wholesaler/chain retailers) purposely setting the retail price of motor gasoline below a level which would enable a non-integrated or less completely integrated firm to realize a "competitive" return from its gasoline operations.[6] It is alleged that vertically integrated firms are pricing gasoline in their directly operated and supplied retail outlets at prices "below cost." Thus, retail outlets in direct competition with these "subsidized" outlets, are forced by the integrated companies' pricing policy to accept such a low price-cost margtin on their gasoline sales taht they cannot earn a competitive return in this line of business.

The phenomenon is considered subsidization because many observers believe that integrated petroleum companies "finance" low prices at the marketing stage through high profits at another stage of their operations. In other words, the low price and resultant low or negative profits of the vertically integrated companies' downstream operations are subsidized by their high (excessive) profits in upstream operations (crude oil exploration and production).

Another view expressed at the hearings, holds that the artifically low prices set downstream by vertically integrated companies *enable* them to earn higher profits at another stage of operation perhaps in crude oil production. Thus, low downstream prices are not "financed" from upstream earnings, but actually enable the vertically integrated petroleum companies to be more profitable on a companywide basis. Curiously, this is also considered subsidization by those who advance this thesis.

2. *Problems with subsidization definitions.* The Office of Competition believes that subsidization should be defined so that it is meaningful, operational, and empirically testable. Nearly every definition we have reviewed, however, has its own operational shortcomings. Consider the empirical test of subsidization that relies on functional profitability. Some speakers at the hearing argued that lower profits in the vertically integrated firm's downstream operations, in comparison to its upstream operations, was evidence of subsidization. Although Title III requires us to analyze the profitability of these companies at various functional levels, these profits will not tell the whole story. First, computing functional profits requires adjustments for the differing risks involved in different levels of a company's business. Second, reserves constitute a substantial share of a company's asset base upstream. No method of accounting consistently and accurately portrays the economic value of these assets. Finally, the determination of appropriate transfer prices and the allocation of joint and corporate outlays yield, at best, only estimates of functional profitability. Small changes in the estimated transfer price could potentially lead to large swings in the relative profitability between functions. Because of these problems, the Office of Competition has decided not to rely exclusively on differentials in functional profits to determine subsidization.

3. *Empirical test of subsidization.* For the purposes of this study, subsidization in the marketing of motor gasoline exists when a supplier's directly operated stations (refiner/marketer or wholesaler/chain retailer) sell gasoine at a price that, after netting out marketing and transportation expenses, is below the wholesale commodity price and cannot be justified on the basis of economic efficiency. Economic efficiency in terms of motor gasoline production and distribution refers to a method of operation (e.g., a new distribution technique) which has the effect of either reducing real resource costs for a given output or increasing output for a fixed resource base. We cannot merely compare the pump price of an integrated company's operations to the pump price of an independent retailer because of differences in the amount of services offered, the scale of operations, and other factors which

[6] For the purpose of this study an independent jobber or wholesaler is an individual or firm which purchases gasoline from refiners and resells this product to retail outlets. An independent wholesaler is not integrated forward to the retail level. A chain retailer is an individual or firm which buys gasoline directly from refiners in order to supply its owned and operated retail outlets. An integrated jobber, alternatively referred to as a wholesaler/chain retailer, is an individual or firm which purchases gasoline from refiners in order to supply his owned and operated retail outlets and to resell gasoline to other retail dealers.

V 4 4 / 1 2 J A 1 7 7 9 UMI

affect unit operating costs. However, after making appropriate adjustments, comparisions across alternative channels of distribution can be made for both branded and unbranded product sales.

We have taken the approach of subtracting from the retail price charged by the integrated company those costs which can be directly attributable to its marketing operations and then comparing this adjusted pump price, which represents the effective transfer price, to the wholesale price at which it sells its product. If this adjusted pump price is *above* the commodity price (the price the company can receive if it sold the product to a wholesaler or chain retailer), then we can reject the hypothesis that integrated companies are subsidizing their retail operations. In this case, if the integrated company reduced its volume sold through its retail outlets and instead increased its sales of product to wholesalers or chain retailers *by a similar amount*, its company-wide profits would fall.

On the other hand, if the adjusted pump price of the integrated company is *below* the price at which the company can sell its product to wholesalers or chain retailers, then the hypothesis that integrated companies' subsidize their retail operations cannot be rejected. An integrated comany *may* be able to increase its profits in this situation by withdrawing from the retail market and expanding its sales to such firms. However, other factors which directly relate to the economic efficiency of the company's operations must be taken into account. For example, if the integrated firm is able to move to larger volumes through its retail outlets at a relatively low price and reduce the variability of product flow from crude to gasoline sales, thereby realizing significant reductions in unit cost elsewhere in its operations, then subsidization may not be occurring.

In this case, if the integrated company attempts to take advantage of the higher wholesale commodity price by reducing its direct retail outlet sales and increasing its sales to jobbers, its total company-wide profitability may fall. If a company's vertically integrated operation, including the retailing of motor gasoline, enables it to sell gasoline at a lower price to consumers and simultaneously to take advantage of lower per unit costs in the crude to gasoline production chain, or some part of that chain, then we are not observing subsidization of motor fuel marketing operations, but rather are observing that vertically integrated operations are more efficient than nonintegrated marketers. In such circumstances, a policy of separating retail outlets from the integrated companies, or forcing them to sell gasoline at higher prices, will lead to an increase in their company-wide costs and a reduction in their company-wide profits, with adverse effects to consumers.

While this economic efficiency justification allows for the case where a low marketing pump price leads to increased overall company profits due to operations at another functional level because of reductions in average cost, it does not justify the traditional predatory case of using profits from another functional level to finance a campaign to drive out competitors at the retail/wholesale level (or to reduce their rate of participation or perhaps lower the rate of entry). The goal of such a policy is to increase the supplier's ability to control the market and, thereby, increase profits over the long run. However, those increased profits would not be the result of increased operating efficiency, but, would reflect the effects of increased market power.

This empirical definition of subsidization can be modified so that branded product sales can be compared to unbranded product sales. In order to compare the wholesale (or retail) price of branded product to the unbranded wholesale (or retail) commodity price, one must net out any selling expenses of the branded product that are not also associated with unbranded product sales. For example, branded product retailers are allowed use of the company credit cards. If the costs of operating these cards average approximately one cent per gallon, then this one cent additional cost would have to be netted out of the branded product price if one wanted to make an economically meaningful comparison to the unbranded product price. Other services that may need to be considered in the comparative evaluation of the branded price to the unbranded price are advertising outlays, the use of established trademarks, accounting services, dealer training, or franchise fees. Through use of such adjustments our analysis will be able to examine alleged downstream subsidization between branded and unbranded products, and between various levels of distribution.

In addition to the empirical comparisons discussed above, motivation can be an important factor in distinguishing marketing strategies which represent subsidization. This study will rely partially on motivational considerations.

III. Information Requirements

The Office of Competition will need to combine information from numerous sources to conduct the Title III Study. This section identifies the information required, deficiencies in existing data sources, the plan for a regional approach with hearings and test areas, and new information requirements.

In general, the following information will be required:

(1) Upstream/downstream functional profits;

(2) Operating margins by type of retail outlets or channel of distribution;

(3) Calculation of the effective wholesale commodity transfer price for owned and operated retail outlets;

(4) Market share trends;

(5) Patterns of entry and exit; and

(6) Information relating to the motivation for and economies of vertically integrated petroleum operations.

We plan to supplement publicly available and existing government data sources with the following:

(1) Retail outlet survey;

(2) Refiner/jobber survey;

(3) Functional profitability survey;

(4) Internal documents subpoena; and

(5) Regional hearings.

A. Utilization of Existing Data

In its written statement on the Title III Study, the Continental Oil Company notes that the use of existing forms, the proposed Financial Reporting System, and the Bureau of Labor Statistics and Census surveys will *not* provide sufficient information to conduct the Title III Study.

> We question whether such minimum information can provide any insight into the competitive marketing practices or the impact of government regulations on such data. Without a fairly comprehensive knowledge of the marketing practices of the various types of retail marketers and wholesalers as well as refiners, it is doubtful (that an) adequate assessment can be made of any subsidies which are determined to exist. It is also doubtful that any remedial action could be adequately evaluated in terms of impact on competition and the consumer.[7]

The Office of Competition strongly concurs with Conoco. Existing data will *not* allow the calculation of (1) operating margins by channel of distribution on an outlet basis, (2) nonproduct costs, including rental payments and credit card expenses, (3) market shares by state, since currently collected volume data is restricted to directly supplied refiner stations, or (4) the effective transfer wholesale commodity price for refiner-owned and operated or wholesaler/chain retailer stations on an outlet basis. In addition, existing data does not reveal any information on company decisionmaking or motivation.

[7] Continental Oil Company, Motor Fuel Marketing Under Title III of the Petroleum Marketing Practices Act (October 16, 1978), pp 9-10. Conoco also proposes a retail outlet survey collecting the same type of information proposed to be collected herein.

B. New Information Requirements

1. *Retail Outlet Survey.* A two-stage sampling approach will be utilized. An initial postcard prescreening of retail outlets in each SMSA will be followed by selecting a representative sample from the initial respondents. The prescreening will serve to identify stations by type of ownership, method of supply, and brand. The use of this prescreening will reduce the number of stations required to be surveyed in the second phase. The retail outlet sample will be stratified by channel of distribution and gallonage sold.

This survey will collect volume, revenues, and product purchase costs on an annual basis. In addition, certain non-product costs (e.g., rental payments) will be analyzed. Although monthly operating data may be more relevant, we have been advised that such data are not available, especially on an historical basis. Qualitative information which will enhance the interpretation of the quantitative information will also be collected.

Due to the large number of gasoline outlets in the United States and the statutory deadline for the Title III study, the Office of Competition will confine the retail data collection survey to five Standard Metropolitan Statistical Areas (SMSAs). The regions were selected using several criteria: access to product pipeline, proximity to refineries, regional balance, proximity to crude supplies, preponderance of different channels of distribution, etc. The following list of SMSAs has been developed:

1. Atlanta
2. Boston
3. Fort Wayne
2. Refiner/Jobber Survey
4. Houston
5. Los Angeles

Some of the statements presented at the October 6-7, 1978 hearing focused on issued related to refiners' marketing allocations for those whom they supplied, refiners' manipulation of retail banked costs, and jobber integration into the direct retailing of gasoline.[8]

The Office of Competition believes that these allegations are an essential part of the Title III study. Selected operating data, e.g., volumes and revenues, will comprise the refiner/jobber survey. These data will be collected on a state basis for the years 1972, 1977, and 1978 if available. From this information, trends in market shares across distribution channels can be analyzed. In addition, descriptive information on pricing policies will be evaluated.

3. *Functional profitability survey.* An integral part of the Title III Study will be the computation of upstream-downstream profit comparisons. Many statements at the October 6-7, 1978 hearing focused entirely on functional profitability.[9] Although high production profits and low refining/marketing profits do not *necessarily* imply subsidization, we believe that the calculation of such rates is necessary. More importantly, such calculations have been mandated by the Congress. We also believe that trends in functional profits, when compared to *overall* company profits, can provide useful information regarding interrelationships among segments of the integrated firm and facilitate our understanding of the operations of integrated petroleum companies.

The Office of Competition further believes that forming conclusions or making policy recommendations on a single years' profit data are ill-advised. Profitability can be viewed as an indicator of monopoly power if it remains persistently high over a relatively long time span. Likewise, a differential between upstream and downstream profit rates must be present over a sufficient span of time to indicate the possibility of subsidization. A large differential in the rates of return between upstream and downstream operations in a short time period could be attributed to forces which affect supply and demand for crude oil and petroleum products. Thus, a multi-year sample period is required to insure that observed differentials can be useful proxies or indicators of the existence of subsidization. We believe 10 years is the most reasonable span considering analytical capabilities and burden.

Representatives of integrated oil companies argue that subsidization, if it exists, is due to crude oil and refined petroleum product price and allocation regulations. To analyze this proposition requires data relating to events before the host of regulations were established by the government during the early and mid-1970's. The petroleum industry has had some form of direct government regulation since President Nixon initiated general economy-wide price-controls in 1971. Thus, going back to 1968 will enable us to gather some annual data which are free from the influence of these regulations. (Although company behavior during this earlier period may also have been influenced by such government programs and benefits as the mandatory oil import program and the percentage depletion allowance.)

Form EIA-28 represents the only effort by the Department of Energy or the Federal Government to collect data in order to compute profitability by functions in a consistent and standardized fashion for energy producing companies. Currently, the EIA has authorization to collect and process data for the years 1977 and 1978 in time for use in the Title III study.[10] With the Office of Management and Budget's approval, EIA will be able to collect a limited amount of data for the years 1974 through 1976. For reasons discussed above, data for this time period are woefully inadequate for any meaningful profit analysis. In order to meet our Congressional requirements and to supplement the information from EIA-28, it will be necessary to collect some asset and income data by energy line of business for the years 1968-1973. In order to minimize the costs of collecting these data, we will follow the guidelines (definitions, instructions, format and sample selection) set forth in EIA-28.

4. *Internal planning and financial documents.* At the October 6-7, 1978 hearings, several speakers thought that obtaining internal planning documents was an absolute necessity. For example, Dr. Joseph Byrne, Vice President of Union Oil Company noted that the Title III Study should focus on motivation of the petroleum companies for particular actions. Dr. Byrne said that company internal planning documents would be needed to answer the motivation issue.[11]

Similarly, Mr. C. R. Turvey, Executive Vice President of the Continental Oil Company, suggested that internal documents should be obtained to determine the motivational aspects of the study.[12]

Mr. Jack Blum, General Counsel of the Independent Gasoline Marketers Council, a trade association of nonbranded marketers of motor gasoline, urged that "the strategic planning documents of a number of major oil companies should be selectively subpoenaed."

> It is common knowledge in the industry that several firms have undertaken an economic analysis of their downstream operations in an effort to find out whether they are making or losing money. It seems to me that these analyses as well as internal planning documents would go far in telling you whether subsidization occurs, and if it does, whether it is a deliberate strategy or simple managerial stupidity, and what factors management considers as it decides on a management marketing strategy.[13]

Mr. Robert Amori, President of Barnosky Oil Company of Wyandotte, Michigan, appeared on behalf of the National Oil Jobbers Council. He

[8] For example, see statements of Robert Amori, National Oil Jobbers Council and Jack Houston, National Congress of Petroleum Retailers.

[9] For example, see the oral statements of Messrs. Allvine, Amori, Blum, Dryer, and Huff.

[10] The EIA currently plans to receive EIA-28 data for 1978 by August 1, 1979, and data for 1974-76 by September 15, 1979 if approved by OMB.

[11] See, October 6, 1978 hearing transcript p. 64.

[12] Ibid., p. 78.

V 4 4 / 1 2 J A 1 7 7 9 UMI

urged the DOE to obtain financial reports dating from 1972 which break out marketing profits and costs from other information. He also urged the Department to subpoena the companies' five year marketing strategy plans.[14]

This position was also supported by Mr. Jack W. Houston, Co-chairman, State and Legislative Committee, National Congress of Petroleum Retailers, Inc. Mr. Houston stated:

> As we understand the law, DOE has subpoena powers which it can use to obtain the internal data of integrated firms, including the internal planning records of the various firms we believe the internal planning records, long range and short range, would be of immense value to DOE in its study of the various reasoning for particular marketing practices which result in the forms of subsidizing, particularly in the retail level.
>
> We, therefore, urge DOE to utilize their subpoena power wherever necessary to obtain the internal information about possible motives and actual success of the company's internal plans.[15]

In addition, Senators Kennedy and Haskell submitted written comments stating that, "it will be necessary for you to use subpoena power to obtain the companies' own judgment on the value and usefulness of these assumptions" (underlying transfer prices and accounting data).

Although two speakers were opposed to the use of internal, corporate planning documents for the purposes of the study, the Office of Competition believes that such documents are vital to the successful completion of the study.[16] As Mr. Edwin Jason Dryer of the Independent Refiner's Association of America explained, "you need to know how the companies themselves analyze the data and that is something you can't just get by simply sending a form out."[17]

Thus, the Office of Competition will subpoena nine companies. These companies will likely include the largest marketers, those that conduct operations in the chosen regions, those refiners who have accounted for the increase in the refiner owned and operated retail outlets, and those firms that represent a mix of the types of marketing strategies and public accounting records used in the industry.

C. REGIONAL HEARINGS

Data collection and internal marketing documents can overlook specific instances of subsidization. By their very nature, surveys are subject to design constraints, sampling errors, and verification problems. In some circumstances the data can be consistent with many varied interpretations. On the other hand, internal planning documents do not necessarily represent company policy as it is actually adopted and practiced.

After alluding to these problems, Mr. Jack Blum, representing the Independent Gasoline Marketers Council, suggested that a series of hearings be held around the country.[18] In addition, James W. Heizer of the Virginia Gasoline Retailers Association noted the following:

> Finally, and most importantly, we would recommend that DOE hold hearings in at least ten major metropolitan areas throughout the country so as to afford all interested parties an opportunity to appear and present evidence on this important matter.[19]

The Office of Competition believes that several regional hearings should be held. Testimony presented at the hearings would be evaluated by the staff as well as transmitted to the Congress. Depending on the outcome of these hearings, additional field tests may become necessary.

D. SUMMARY

Because of the importance of the Title III Study and the complex interrelationships in the marketing of motor fuel, the Office of Competition believes that a successful completion of this congressionally mandated study can only be achieved through a multifaceted approach. Each portion of this study plan must be viewed in a complementary fashion. These components include:

(1) Use of existing data where applicable;

(2) A retail outlet survey of five regions;

(3) A refiner/jobber survey by state;

(4) A selected asset and income survey for functional profitability data for 1968 to 1973 that is consistent with the FRS (EIA-28) concepts;

(5) A subpoena of internal financial and planning documents;

(6) A series of regional hearings; and

(7) Additional field work as needed.

Issued this day January 10, 1979 in Washington, D.C.

ALVIN L. ALM,
Assistant Secretary, Policy and Evaluation.

Federal Energy Regulatory Commission

[Docket No. RP79-20]

ALABAMA-TENNESSEE NATURAL GAS CO.

Proposed Changes in FERC Gas Tariff

JANUARY 9, 1979.

Take notice that on December 20, 1978 Alabama-Tennessee Natural Gas Company (Alabama-Tennessee) tendered for filing as part of its FPC Gas Tariff, Third Revised Volume No. 1, following revised tariff sheet:

Thirtieth Revised Sheet No. 3-A
Third Revised Sheet No. 5
Third Revised Sheet No. 6
Third Revised Sheet No. 11
Second Revised Sheet No. 13-B
Third Revised Sheet No. 14
Fourth Revised Sheet No. 36-F

The increase in jurisdictional revenues to be provided by the revised rates would be $2,600,445, based upon the 12-month period ending September 30, 1978.

Alabama-Tennessee states that the increased rates filed herewith are required to provide additional jurisdictional revenues sufficient to permit Alabama-Tennessee to recover its jurisdictional cost of service. Alabama-Tennessee states that the primary reason for this filing is to reflect in its rates, the costs associated with processing and transporting the supplementary gas authorized in Docket No. CP78-352, including the transportation charge of Tennessee Natural Gas Company.

Alabama-Tennessee states that copies of this filing have been served upon its customers and the State Commissions of Alabama, Mississippi, and Tennessee.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C., 20426, in accordance with Section 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 16, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1582 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. RP72-110]

ALGONQUIN GAS TRANSMISSION CO.

Rate Change Pursuant to Purchased Gas Cost Adjustment Provision

JANUARY 8, 1979.

Take notice that Algonquin Gas Transmission Company ("Algonquin Gas") on December 11, 1978 tendered for filing Substitute 45th Revised Sheet No. 10 to its FERC Gas Tariff, First Revised Volume No. 1.

Algonquin Gas states that this sheet is being filed pursuant to Algonquin Gas' Purchased Gas Cost Adjustment Provision set forth in Section 17 of the General Terms and Conditions of its FERC Gas Tariff, First Revised Volume No. 1. Algonquin Gas also indicates that the lower rate proposed to be effective December 1, 1978, is being filed to reflect a lower cost of purchased gas filed by its supplier, Texas Eastern Transmission Corporation.

Algonquin Gas proposes that the revised tariff sheet become effective on December 1, 1978.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, DC 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 16, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-110]

ALGONQUIN GAS TRANSMISSION CO.

Rate Change Pursuant to the Purchased Gas Cost Adjustment Provision and the Gas Research Institute Charge Adjustment Provision

JANUARY 8, 1979.

Take notice that Algonquin Gas Transmission Company (Algonquin Gas) on December 15, 1978, tendered for filing Subsitute 46th Revised Sheet No. 10 to its FERC Gas Tariff, First Revised Volume No. 1.

Algonquin Gas states that this sheet is being filed pursuant to Algonquin Gas' Purchased Gas Cost Adjustment Provision and the Gas Research Institute (GRI) Charge Adjustment Provision set forth in Sections 17 and 28 of the General Terms and Conditions of its FERC Gas Tariff, First Revised Volume No. 1. Algonquin Gas also states the rate change proposed to be effective January 1, 1979, is being filed to reflect a change in the purchased gas costs filed by its supplier, Texas Eastern Transmission Corporation, and the GRI adjustments filed by Algonquin Gas on November 30, 1978, under the approved 1979 GRI research and development program, proposed to be effective January 1, 1979.

Algonquin Gas notes that a copy of this filing is being served upon each affected party and interested state commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 16, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. CP69-78]

CARNEGIE NATURAL GAS CO. AND CONSOLIDATE GAS SUPPLY CORP.

Petition To Amend

JANUARY 11, 1979.

Take notice that on December 18, 1978, Carnegie Natural Gas Company (Carnegie), 3404 Main Street, Munhall, Pennsylvania 15121, and Consolidated Gas Supply Corporation (Consolidated) 445 West Main Street, Clarksburg, West Virginia 26301 (Petitioners) filed in Docket No. CP69-78 a petition to amend the order issued on November 22, 1968, in the instant docket pursuant to Section 7(c) of the Natural Gas Act to authorize Petitioners to exchange more natural gas at additional points of delivery, and to authorize the construction of the facilities necessary to effectuate such exchanges, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.[1]

Petitioners request authority to implement the provisions of a September 13, 1978, amendment to the gas exchange agreement under which Petitioners have been exchanging gas pursuant to the November 22, 1968, order. Specifically, Petitioners propose that

(1) Consolidated would deliver gas to Carnegie at two new points in Lincoln District, Marion County, West Virginia, and in Dekalb District, Gilmer County, West Virginia;

(2) Carnegie would deliver gas to Consolidated at a new point in Center District, Gilmer County, West Virginia; and

(3) Petitioners would construct the necessary appurtenant facilities at the proposed exchange points in addition to extra interconnection facilities in Church District, Wetzel County, West Virginia. Petitioners estimate the total cost of the proposed facilities to be $53,103.

It is stated that these proposals would enable Petitioners to make available to their systems gas that otherwise would not be available, to rectify existing imbalances in exchange volumes and to prevent the recurrence of similar imbalances in the future.

Any person desiring to be heard or to make any protest with reference to said petition to amend should on or before February 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1595 Filed 1-16-79; 8:45 am]

[1] This proceeding was commenced under the FPC. By joint regulation of October 1, 1977 (10 CFR 1000.1), it was transferred to the FERC.

[6450-01-M]

[Docket No. CP73-329]

CHATTANOOGA GAS CO.

Proposed PGA Rate Adjustment

JANUARY 9, 1979.

Take notice that on December 28, 1978, Chattanooga Gas Company A Division of Jupiter Industries, Inc. (Chattanooga) tendered for filing proposed changes to Original Volume No. 1 of its FERC Gas Tariff to be effective or January 1, 1979 consisting of the following revised tariff sheet: Thirty Third Revised Tariff No. 6.

Chattanooga states that the sole purpose of this Revised Tariff Sheet is to ajdust Chattanooga's, LNG rates pursuant to the PGA provision in Section 5 of the General Terms and Conditions of its Gas Tariff to reflect the underlying rate adjustments filed for by Southern Natural Gas Company (Southern) in Docket No. RP73-64 and East Tennessee Natural Gas Company (East Tennessee) in Docket Nos. RP71-15 and RP75-28.

The Thirty Third Revised Tariff Sheet No. 6 reflects a current increase in the LNG rates of 9.5 cents per MMBTU and a cumulative increase of $1.567 pe MMBTU.

Chattanooga requests that the Thirty Third Revised Sheet No. 6 become effective on January 1, 1979, the proposed effective date of the general rate increase by Southern Natural.

Chattanooga states that copies of the filing have been mailed to all of its jurisdictional customers.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 18, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1596 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. CP79-114]

CITIES SERVICE GAS CO. AND EL PASO NATURAL GAS CO.

Application

JANUARY 11, 1979.

Take notice that on December 12, 1978, Cities Service Gas Company (Cities Service), P.O. Box 25128, Oklahoma City, Oklahoma 73125, and El Paso Natural Gas Company (El Paso), P.O. Box 1492, El Paso, Texas 79978 (Applicants), filed an application in Docket No. CP79-114 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicants to exchange up to 100,000 Mcf of gas per day, and to construct the necessary facilities therefor, and further, to authorize El Paso to operate facilities heretofore not subject to the jurisdiction of the Commission, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicants state that they executed a gas exchange agreement on November 30, 1978, pursuant to which El Paso would receive up to 100,000 Mcf of natural gas per day on a firm basis from Northwest Pipeline Corporation (Northwest) for Cities Service's account at an existing point of interconnection between the systems of Northwest and El Paso in La Plata County, Colorado (Ignacio Exchange Point), and would deliver equivalent volumes of gas [1] to Cities Service at a proposed point of interconnection between the systems of El Paso and Cities Service in Hemphill County, Texas (Higgins Exchange Point). Applicants state that there would be no charge by either party for the proposed exchange.

Applicants state that no additional facilities are required at the Ignacio Exchange Point, but the following facilities would be required at the Higgins Exchange Point:

(1) El Paso proposes to constuct and operate, at a total cost of $2,468,855, approximately 9.5 miles of 16-inch O.D. pipeline, approximately 6 miles of 10¾-inch O.D. pipeline, and the necessary measurement and flow control devices.

(2) Cities Service proposes to construct and operate one pipeline tap and appurtenant facilities, at a cost of $44,200.

(3) Further, El Paso requests authorization to transport gas subject to the gas exchange agreement through two segments of pipe in Hemphill County, Texas, which were previously utilized only in a gathering function.

Applicants state that the proposed gas exchange would enable them to receive gas volumes close to their respective market areas.

The application indicates that Cities Service would finance the cost of its proposed facilities from treasury cash and that El Paso's financing for its proposed facilities would be from internally generated funds.

Any person desiring to be heard or to make any protest with reference to said application should on or before Febraury 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1597 Filed 1-16-79; 8:45 am]

[1] This term is stated to mean equal volumes of gas plus thermally balancing up to 50 percent of the difference in Btu's contained in those equal volumes. The gas to be exchanged is stated to have substantially the same heat content.

[6450-01-M]

[Docket No. CP79-124]

COLORADO INTERSTATE GAS CO.

Application

JANUARY 11, 1979.

Take notice that on December 15, 1978, Colorado Interstate Gas Company (Applicant), P.O. Box 1087, Colorado Springs, Colorado 80944, filed an application in Docket No. CP74-124 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to transport natural gas for United Gas Pipe Line Company (United) all as more fully set forth in the application on file with the Commission and open to public inspection.

It is stated that Applicant and United, on November 10, 1978, executed an agreement pursuant to which Applicant would transport, on an interruptable basis, up to 50,000 Mcf of natural gas per day, not to exceed 7,000,000 Mcf per year, from existing points of interconnection between the systemns of Applicant and Mountain Fuel Supply Company (Mountain Fuel) in Sweetwater County, Wyoming, to existing points of interconnection between systems of Applicant and Northern Natural Gas Company in Kearny County, Kansas, and Moore County, Texas. Applicant states that the initial rate for this service would be 20.98 cents per Mcf of gas delivered.

Applicant further states that the proposed transportation service is required to enable United to have access to its supplies of natural gas to be purchased from Mountain Fuel.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1979, file with the February Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it wil be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1598 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. CP79-128]

COLORADO INTERSTATE GAS CO.

Application

JANUARY 11, 1979.

Take notice that on December 18, 1978, Colorado Interstate Gas Company (Applicant), P.O. Box 1087, Colorado Springs, Colorado 80944, filed an application in Docket No. CP79-128 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to construct and operate facilities necessary to establish an underground natural storage reservoir at the Flank Field, Baca County, Colorado (Flank Reservoir), all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that due to the decline in peak day deliverability of its existing primary gas supplies, the Flank Reservoir is required to continue to provide adequate service to its service area. The proposed Flank Reservoir would consist of 33 injection-withdrawal wells, 25 observation wells, two saltwater disposal units, a 9,800 horsepower compressor station, a central dehydration unit, and other appurtenant facilities. It is stated that the Flank Reservoir would have a maximum capacity of 20,000,000 Mcf at a static reservoir pressure of 1,300 psia.

Applicant estimates the project would cost $32,063,800, and states that the financing would be done on a year by year basis through the 5-year construction period; 1979 financing would come from internally generated funds and the remaining proceeds from the 1978 issue of $60 million of long term 9¾% notes. Later financing would consist of internally generated funds, bank borrowings and long-term security issues, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. CP71-290]

CONSOLIDATED SYSTEM LNG CO.

Proposed Changes in FERC Gas Tariff and Petition To Amend Certificate of Public Convenience and Necessity

JANUARY 11, 1979.

Take notice that Consolidated System LNG Company (Consolidated LNG), on June 1, 1978, tendered for filing proposed changes in its FERC Gas Tariff, Original Volume No. 1. By this petition to amend its certificate of public convenience and necessity, issued by the Commission in Opinion

V 4 4 / 1 2 J A 1 7 7 9 UMI

Nos. 622 and 622-A, Consolidated LNG tenders Substitute Original Sheet Nos. 4, 6 and 8 to its FERC Gas Tariff, Original Volume No. 1. The Substitute Original Sheets hereby tendered are intended to clarify several ambiguities and omissions included in the sheets initially approved. Consolidated LNG states that billing difficulties will be encountered if these defects are not remedied, further stating that the net effect of the proposed changes will reduce the charges under Consolidated LNG's approved cost-of-service tariff by approximately $1.2 million during calendar year 1979.

The proposed Substitute Original Sheet No. 4 reflects a clarification following Accounts 408-411.1 to more specifically identify the taxes to be billed to Consolidated Gas Supply Corporation, and the addition of Account 411.4 to the list of billable accounts, which is intended to prevent Consolidated LNG from losing the investment tax credit.

Consolidated LNG also proposes to amend the last paragraph of Section 3.2 of Original Sheet No. 6 to clarify the fact that estimated billings will be corrected to actual amounts as soon as possible after the estimated bill for the month of December is rendered. The proposed Substitute Original Sheet No. 6 also reflects the addition of a new subsection 3.3 of Rate Schedule LNG, which refers to a tax loss credit incurred during the construction of the LNG project. Consolidated LNG states that the tax loss credit balance will be flowed through monthly at the rate of one-two hundred and fortieth (1/240) of such credit balance.

Consolidated LNG states that the proposed amendment to Original Sheet No. 8 is necessary only to change the definition of "Total Heating Value" from a reference to 14.735 psia to 14.73 psia.

Finally, Consolidated LNG requests waiver of the notice requirements of Section 154.22 of the Commission's Regulations to the extent necessary to permit these substitute tariff sheets to be made effective on the date of initial deliveries.

Consolidated LNG states that it has served copies of this petition upon all parties of record to this proceeding in accordance with Section 1.17 of the Commission's Rules of Practice and Procedure.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's rules of practice and procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 31, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Project No. 2599]

CONSUMERS POWER CO.

Application for Approval of Revised Exhibit R

JANUARY 9, 1979.

Public notice is hereby given that on March 31, 1978, Consumers Power Company (Licensee) filed an application for Commission approval of its revised Exhibit R pursuant to Article 40 of its major license issued on February 3, 1976 for the Hodenpyl Project No. 2599. On April 20, 1978 and May 4, 1978, the Licensee supplemented its application for approval of Exhibit R. The project is located on the Manistee River in Manistee and Wexford Counties, Michigan. Correspondence regarding the application should be sent to: Mr. P. A. Perry, Secretary, Consumers Power Company, 212 West Michigan Avenue, Jackson, Michigan 49201.

The Licensee currently leases 229 acres of project lands for recreational purposes, which include three private boat docks, five areas for parks and camping sites, two Boy Scout Camps, a roadside overlook and a picnic area. There is a U.S. Forest Service campground adjacent to the project. The Michigan Department of Natural Resources maintains a Canadian goose sanctuary on the marshy upper reaches of the reservoir.

The Licensee proposes the development of future recreational facilities, which would include: (1) a public fishing site at Woodpecker Creek downstream of the dam, an improved road access to the fishing site, as well as a gravel parking area for 10 to 15 cars; (2) improvement of the existing canoe portage facility; (3) improvements to boat launching facilities within the Mesick Trailer Park, and withdrawal of trailer sites from the water's edge; (4) construction of a new boat launching ramp at "Village Park"; and (5) the reservation of additional project lands for future recreational uses.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before February 20, 1979. The Commission's address is: 825 N. Capitol Street, N.E., Washington, D.C. 20426.

The application is one file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. ER79-120]

IOWA POWER & LIGHT CO.

Filing

JANUARY 11, 1979.

Take notice that Iowa Power and Light Company, (Iowa Power) on December 26, 1978, tendered for filing three Participation Power Agreements with Nebraska Public Power District, Columbus, Nebraska (NPPD).

Iowa Power states that the Agreement relates to NPPD's purchase of 300 MW from May 1, 1978 through September 30, 1978; 150 MW from October 1, 1978 through October 31, 1978; 170 MW from November 1, 1978 through February 3, 1979; and 300 MW from February 4, 1979 through April 30, 1979 of participation power according to Service Schedule A of the Mid-Continent Area Power Pool Agreement dated May 31, 1972. Iowa Power further states that this Participation Power Pool Agreement establishes demand, energy, and transmission charges for such services and is to run from May 1, 1978 through April 30, 1979.

Iowa Power indicates that the purpose of the proposed rates is to recover reflected costs of the facilities to be provided as the scheduling path and for demand and energy power provided.

Iowa Power requests waiver of the Commission's notice requirements and proposes an effective date of May 1, 1978.

According to Iowa Power copies of the filing have been mailed to NPPD and to the Iowa State Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with

the Federal Energy Regulatory Commission 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 22, 1979. Tests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. E-9601]

LAKE OSWEGO CORP.

Petition for Declaratory Order

JANUARY 9, 1979.

Take notice that a petition for declaratory order was filed on August 14, 1977, by the Lake Oswego Corporation. Petitioner seeks a determination that its Oswego Hydroelectric Plant does not require a license from the Commission under the Federal Power Act (16 U.S.C. 791a-825r). The Oswego Plant is located at the foot of Oswego Lake in Clackamas County, Oregon, near the City of Portland. Correspondence should be addressed to: Jack L. Kennedy, Kennedy, King & McClurg, 1402 Standard Plaza, Portland, Oregon 97204.

The project proper consists of a concrete dam at the foot of Oswego Lake, which impounds the waters of the lake originally called "Sucker Lake", and diverts them throughh a 1,200 foot wood stave pipeline to a concrete powerhouse containing a 900 hp double Francis turbine directly connected to a 500 kVa Westinghouse generator. The project was originally owned by the Oregon Iron and Steel Company and sold to the Lake Oswego in 1960. An order of determination was issued by the State Engineer of Oregon on December 9, 1959, granting Oregon Iron and Steel a right to use 57.5 cubic feet per second of water from the Tualatin River for the purpose of generating electric power at its Oswego Plant under date of priority of July 2, 1906.

Petitioner states that the electrical energy produced at the powerhouse is sold at the bus bar to Portland General Electric Company, whose transmission lines are attached directly to the powerhouse. The electricity is then used in the local area of Lake Oswego, Oregon. The total production of the powerplant for 1976 was 2,334,000 kWh.

Anyone desiring to be heard or to make any protest about this petition should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before February 20, 1979. The Commission's address is: 825 North Capitol Street, N.E., Washington, D.C. 20426.

The petition for declaratory order is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. RP73-23 PGA79-2]

LAWRENCEBURG GAS TRANSMISSION CORP.

Proposed Change in FERC Gas Tariff

JANUARY 11, 1979.

Take notice that on January 3, 1979, Lawrenceburg Gas Transmission Corporation (Lawrenceburg) tendered for filing two (2) revised gas tariff sheets to its FERC Gas Tariff, First Revised Volume No. 1, both of which are dated as issued on December 29, 1978, proposed to become effective February 1, 1979, and identified as follows: Seventeenth Revised Sheet No. 4, and Sixteenth Revised Sheet No. 18.

These proposed changes reflect the following rate adjustments:

(1) A PGA rate adjustment, pursuant to Section 2.1 of the General Terms and Conditions of Lawrenceburg's FERC Gas Tariff, First Revised Volume No. 1, to recover increased costs of gas purchased of $1,350,962 annually.

(2) A Commodity Surcharge pursuant to Section 2.9 of the General Terms and Conditions of Lawrenceburg's FERC Gas Tariff, First Revised Volume No. 1, to return the Deferred Purchased Gas Cost Credit Balance of $12,066 over the six month period February 1 through July 31, 1979.

Copies of this filing were served upon Lawrenceburg's jurisdictional customers and interested state commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NW., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rule of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket Nos. E-9469 and ER76-377]

LOCKHART POWER CO.

Compliance Filing

JANUARY 9, 1979.

Take notice that on December 1, 1978, Lockhart Power Company submitted in compliance with Opinion Nos. 29 and 29A the following material for Commission review and approval:

(1) A statement of Lockhart's wholesale regulatory expenses associated with proceedings in these dockets to date;

(2) A calculation of Lockhart's jurisdictional cost of service, including *pro forma* adjustments, based on a 1974 test year, in accordance with the determinations of the Commission in Opinion Nos. 29 and 29A; and

(3) Comparisons of the total jurisdictional revenues actually collected by Lockhart against the cost of providing jurisdictional service, again calculated according to the determinations of the Commission in Opinion Nos. 29 and 29A for calendar years 1975, 1976 and 1977, and for the first eight months of 1978. These cost of service calculations, together with the 1974 cost of service calculation noted above cover the entire four-year period that rates in Dockets E-9469 and ER76-377 were in effect.

Any person desiring to be heard or to protest said compliance filing should file a protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such protests should be filed on or before January 23, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken. Copies of this compliance

filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP74-100 et al.]

NATIONAL FUEL GAS SUPPLY CORP.

Proposed PGA Rate Adjustment

JANUARY 8, 1979.

Take notice that on December 29, 1978, National Fuel Gas Supply Corporation (National) tendered for filing as part of its FERC Gas Tariff, Original Volume No. 1, Twenty-Fifth Revised Sheet No. 4, proposed to be effective February 1, 1979.

National states that the sole purpose of this revised tariff sheet is to adjust National's rates pursuant to the PGA provisions in Section 17 of the General Terms and Conditions. National further states that such tariff sheet reflects an adjustment in National's rates of 3.38¢ per Mcf on Twenty-Fifth Revised Sheet No. 4.

It is stated that copies of the filing have been mailed to all of its jurisdictional customers and affected state regulatory commissions.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before January 17, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants party to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. ER79-116]

NIAGARA MOHAWK POWER CORP.

Cancellation

JANUARY 8, 1979.

Take notice that Niagara Mohawk Power Corporation (Niagara Mohawk) on December 22, 1978, tendered for filing a Notice of Cancellation of Niagara Mohawk's FPC Electric Tariff, Original Volume No. 1.

Niagara Mohawk requests an effective date of January 18, 1979, and therefore requests waiver of the Commission's notice requirements.

According to Niagara Mohawk copies of this filing have been served upon the Village of Green Island and the Public Service Commission of the State of New York.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before January 15, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Project No. 2114 etc.]

PUBLIC UTILITY DISTRICT NO. 2 OF GRANT COUNTY, WASHINGTON ET AL.

Motions for Modification of Project Operations

JANUARY 10, 1979.

In the matter of Public Utility District No. 2 of Grant County, Washington (Project No. 2114); Public Utility District No. 1 of Chelan County, Washington (Project Nos. 943 and 2145); Public Utility District No. 1 of Douglas County, Washington (Project No. 2149).

Public notice is given that on December 4, 1978, the State of Washington Department of Game and Department of Fisheries (Departments) filed four motions for modification of project operation at the Priest Rapids Project No. 2114, Rock Island Project No. 943, Rocky Reach Project No. 2145, and Wells Project No. 2149. The motions were filed pursuant to Article 39, Article 21, Article 31, and Article 41 of the respective licenses. The four projects are located on the Columbia River in the State of Washington. Correspondence concerning these motions should be sent to: James M. Johnson, Sr. Asst. Attorney General, 600 North Capitol Way, Olympia, Washington 98504.

The Departments are requesting certain flows and spills at each project dam for the protection of chinook, sockeye, coho, and steelhead trout juvenile smolts. The Department provided specified minimum flows out of each dam for varying time periods.

The Oregon Department of Fish and Wildlife, National Marine Fisheries Service, and the Yakima Indian Nation jointly filed a petition for modification of project operation also in the above dockets. Their petition requests flows identical to those recommended by the Departments.

Any party that has been granted intervention in Docket No. E-9569 (State of Washington Department of Fisheries v. Public Utility District No. 2 of Grant County, Washington) need not file a petition to intervene to be a party in any proceeding on these motions. If any of those parties do not wish to be a party in any of these proceedings it should so notify the Commission's Secretary, in writing, by February 20, 1979.

Anyone desiring to be heard or to make any protest about these motions should file a petition with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before February 20, 1979. The Commission's address is: 825 N. Capitol Street, N.E., Washington, D.C. 20426.

The motions are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Project No. 2655]

REEVES BROTHERS, INC.

Application for Transfer of License

JANUARY 10, 1979.

Public notice is hereby given that an application for transfer of license was filed on November 9, 1978, under the Federal Power Act (16 U.S.C. §§ 791a-825r), by Reeves Brothers, Inc., licensee for the Eagle and Phenix Mills Projects, FERC Project No. 2655, and Fieldcrest Mills, Inc. (Transferee), the proposed transferee. The Eagle and Phenix Mills Project is located on the Chattahoochee River in Muscogee County, Georgia and Russell County, Alabama. Correspondence should be sent to: William J. Madden, Jr., Debevoise & Liverman, 1200 17th Street NW., Washington, D.C. 20036; and Thomas W. Graves, Jr., Vice President, Secretary and General Counsel, Fieldcrest Mills, Inc., Eden, North Carolina 27288.

The applicants request Commission approval of the transfer of the major license presently held for Eagle and Phenix Mills Project No. 2655 by Reeves Brothers, Inc., to Fieldcrest Mills, Inc. Transferee agrees to accept all the terms and conditions of the license and to be bound thereby as if it were the original licensee. Transferee proposes to continue to operate Project No. 2655 in the same manner and for the same purposes for which it is now operated, namely, as to source of power and energy for the textile mill adjacent to the hydroplant. The project consists essentially of a rubble masonry dam about 900 feet long and 17 feet high, a 50-acre reservoir, a forebay, two water flumes, two powerhouses containing nine generators with a total capacity of 4,260 kilowatts, and associated transmission facilities.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before February 26, 1979. The Commission's address is: 825 N. Capitol Street NE., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. RP78-36]

SOUTHERN NATURAL GAS CO.

Certification of Settlement and Agreement II

JANUARY 8, 1979.

Take notice that on December 14, 1978, Presiding Administrative Law Judge Samuel Kanell certified to the Commission a settlement in this proceeding entitled "Stipulation and Agreement II." The agreement, if approved by the Commission, will resolve issues related to Southern Energy Corporation's cost of service and certain cost classification issues.

Any person desiring to be heard or to protest the proposed settlement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, on or before January 15, 1979. Comments will be considered by the Commission in determining the appropriate action to be taken upon the settlement. Copies of the settlement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1591 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. EL78-41]

SPAULDING FIBER CO., INC.

Petition for Declaratory Order

JANUARY 10, 1979.

Take notice that on September 11, 1978, Spaulding Fiber Company, Inc. ("Spaulding"), filed a petition for declaratory order. Spaulding seeks a determination that two of its hydroelectric power projects do not require a license from the Commission under the Federal Power Act (16 U.S.C. §§ 791(a)-825(r) (1970). The two projects are located on the Salmon Falls River—between river miles 24 and 36—in the towns of Milton and North Rochester, Strafford County, New Hampshire. Correspondence regarding the petition should be addressed to Leo B. Lind, Jr., Esq., Orr and Reno, 95 North Main Street, Box 709, Concord, New Hampshire 03301.

The Milton Dam, with a capacity of 1,400 horsepower, was built in 1910. The North Rochester dam, with a capacity of 400 horsepower, was built in 1900. Spaulding uses the entire electric generating capacity of both projects at its Technical Papers and Boards Division plants in Milton and North Rochester, New Hampshire.

Anyone desiring to be heard or to make any protest about this petition should file a protest or a petition to intervene with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure ("Rules"), 18 CFR § 1.10 or § 1.8 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before March 2, 1979. The Commission's address is: 825 N. Capitol Street, N.E., Washington, D.C. 20426.

The petition is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. CP79-122]

TEXAS EASTERN TRANSMISSION CORP. ET AL.

Application

JANUARY 11, 1979.

In the matter of Texas Eastern Transmission Corporation, Transcontinental Gas Pipe Line Corporation, Northern Natural Gas Company.

Take notice that on December 15, 1978, Texas Eastern Transmission Corporation (Texas Eastern), P.O. Box 2521, Houston, Texas 77001, Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001, and Northern Natural Gas Company (Northern), 2223 Dodge Street, Omaha, Nebraska 68102 (Applicants), filed an application in Docket No. CP79-122 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicants to transport natural gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicants state that they and Columbia Gas Transmission Corporation (Columbia Gas) executed on December 11, 1978, an agreement pursuant to which Applicants would transport up to 6,000 Mcf per day of natural gas for Columbia Gas through their jointly owned pipeline from West Cameron Block 480, offshore Louisiana to a point on Texas Eastern's system in East Cameron Block 245. For their transportation service, Applicants state that they each would charge as follows:

Texas Eastern, 6.40 cents per Mcf.
Transco, 5.00 cents per Mcf.
Northern, 6.40 cents per Mcf.

It is stated that this proposed transportation service would enable Columbia Gas to have access to its reserves in West Cameron Block 479, offshore Louisiana.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1979, file with the Federal

Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[Project No. 2872]

TOWN OF SPRINGFIELD, VT.

Application for Preliminary Permit

JANUARY 10, 1979.

The public should note that an application for preliminary permit was filed on October 2, 1978, under the Federal Power Act (16 U.S.C. §§ 791a-825r) by the Town of Springfield, Vermont (correspondence to: Paul Ruse, Jr., Acting Town Manager, 96 Main Street, Springfield, Vermont 05156 or Frederick D. Palmer, Esq., 1775 Pennsylvania Avenue NW., Washington, D.C. 20006) for the proposed North Springfield Hydroelectric Project, FERC No. 2872. The proposed project would be located on the Black River in Windsor County, Vermont.

Applicant proposes to develop a hydroelectric facility in conjunction with the existing North Springfield Dam, a flood control dam owned by the U.S. Army Corps of Engineers. Applicant estimates that the proposed project would have an installed capacity of 3.0 MW with an average annual generation of 4.5 million kwh.

The power developed by the proposed project would be utilized by the Town of Springfield in meeting its present and future load requirements with any surplus being sold to or exchanged with other utilities in the area.

A preliminary permit does not authorize construction. A permit, if issued, gives the permittee, during the term of the permit, the right of priority of application for a license while the permittee undertakes the necessary studies and examinations to determine the engineering and economic feasibility of the proposed project, the market for the power, and all other necessary information for inclusion in an application for a license.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before March 12, 1979. The Commission's address is: 825 N. Capitol Street NE., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. RP77-107]

UNITED GAS PIPE LINE CO.

Certification of the Volumetric Issue

JANUARY 8, 1979.

Take notice that on December 13, 1978, Presiding Administrative Law Judge Allen C. Lande certified to the Commission in the above referenced docket the volumetric rate issue which was the subject of a hearing on December 12, 1978. This issue was a contested issue of a proposed settlement agreement.

Any person desiring to be heard or to protest this issue should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, on or before January 15, 1979 and should file reply comments on or before January 30, 1979. Comments will be considered by the Commission in determining the appropriate action to be taken.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1594 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. CP79-120]

UNITED GAS PIPE LINE CO. ET AL.

Application

JANUARY 11, 1979.

In the matter of United Gas Pipe Line Company and Columbia Gulf Transmission Company.

Take notice that on December 14, 1978, United Gas Pipe Line Company (United), P.O. Box 1478, Houston, Texas 77001, and Columbia Gulf Transmission Company (Columbia), P.O. Box 683, Houston, Texas 77001 (Applicants), filed an application in Docket No. CP79-120 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicants to exchange natural gas all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicants state that they executed an agreement on October 9, 1978, pursuant to which Columbia would deliver to United up to 50 Mcf of natural gas per day at the outlet side of Shell Oil Company's Lirette Processing Plant, Terrebonne Parish, Louisiana, and concurrently United would redeliver thermally equivalent volumes at Columbia's measuring station in La Fourche Parish, Louisiana. Applicants state there would be no charges for these services, nor would any new facilities be required.

It is stated that the proposed exchange of gas would permit United to take gas supplies into its system immediately without the cost and delay incident to the construction of facilities that would otherwise be necessary.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18

CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Project No. 906]

VIRGINIA ELECTRIC & POWER CO.

Application for New Major License

JANUARY 11, 1979.

Public notice is hereby given that an application for new major license was filed on August 5, 1977, under the Federal Power Act (16 U.S.C. §§ 791a-825r) by Virginia Electric and Power Company (Applicant) for the Cushaw Project, FERC Project No. 906. The project is located on the James River in Amherst County, Virginia and affects U.S. Forest Service lands in the George Washington and Jefferson National Forests. Correspondence should be sent to: Mr. W. L. Proffitt, Senior Vice President, Virginia Electric and Power Company, P.O. Box 26666, Richmond Virginia 23261; and copy to: Arnold H. Quint, Esquire, Hunton & Williams, 1730 Pennsylvania Avenue, N.W., Suite 1060, Washington, D.C. 20006.

The Cushaw Project consists of: (1) a 1,500 foot long and 27 feet high reinforced concrete dam extending diagonally across the river; (2) a 138 acre reservoir with a storage capacity of approximately 380 acre-feet at the normal full pond elevation of 656 feet m.s.l.; (3) a powerhouse containing five generators with an aggregate capacity of 7,500 kW; and (4) all other facilities and interests appurtenant to the operation of the project. The Cushaw Project is part of Virginia Electric and Power Company's generating system supplying electric utility service in Virginia.

According to the application filed, primary recreational use of project lands and waters is by local fishermen. Access to the project waters is provided by a gravel boat ramp. Applicant proposes no future recreational development.

Anyone desiring to be heard or to make any protest about this application should file a petition to intervene or a protest with the Federal Energy Regulatory Commission, in accordance with the requirements of the Commission's Rules of Practice and Procedure, 18 CFR § 1.8 or § 1.10 (1977). In determining the appropriate action to take, the Commission will consider all protests filed, but a person who merely files a protest does not become a party to the proceeding. To become a party, or to participate in any hearing, a person must file a petition to intervene in accordance with the Commission's Rules. Any protest or petition to intervene must be filed on or before March 26, 1979. The Commission's address is: 825 N. Capitol Street, N.E., Washington, D.C. 20426.

The application is on file with the Commission and is available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1606 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. ER79-122]

ALABAMA POWER CO.

Proposed Tariff Change

JANUARY 12, 1979.

Take notice that Alabama Power Company (Alabama) on December 28, 1978, tendered for filing a rate schedule designated Amendment No. 1 to Rate Schedule-Interim Power Supply. Alabama states that the filed rate schedule operates in addition to and in accordance with the provisions of the Interconnection Agreement between Alabama and Alabama Electric Cooperative, Inc. dated February 23, 1972, as amended (FERC Rate Schedule No. 133), and amends the Rate Schedule-Interim Power Supply, filed May 17, 1978 (FERC Docket No. ER78-378).

Alabama further states that the rate schedule is intended to cover and provide for temporary capacity and energy transactions between the Company and the Cooperative on and after January 1, 1979, from month to month, until the Cooperative's new generating capacity is declared available for commercial operation.

Alabama proposes an effective date of January 1, 1979, and therefore requests waiver of the Commission's notice requirements.

According to Alabama copies of this filing were served upon Alabama Electric Cooperative, Inc., the Southeastern Power Administration, and the Alabama Public Service Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C., 20426, in accordance with § 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 29, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1655 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. ER79-127]

ALLEGHENY POWER SERVICE CORP.

Filing

JANUARY 12, 1979.

Take notice that Allegheny Power Service Corporation (APSC) on January 2, 1979, tendered for filing on behalf of Monongahela Power Company (Monongahela), The Potomac Edison Company (PE), and West Penn Power Company (West Penn), the electric utilities which make up the integrated Allegheny Power System, Amendment No. 7 dated December 15, 1978 to the Interconnection Operating Agreement dated February 1, 1973 between Monongahela, PE, and West Penn and Virginia Electric Power Company (VEPCO) designated Monongahela Rate Schedule FPC No. 32, PE Rate Schedule FPC No. 33 and West Penn Rate Schedule FPC No. 31.

APSC indicates that Amendment No. 7 provides for an increase in the

demand charge for short-term power and energy from $0.60 to $0.70 per kilowatt week, an increase in demand charge for limited-term power and energy from $3.25 to $3.75 per kilowatt month and an increase in the charge for short-term and limited-term power obtained by the supplying party from another system from $0.15 to $0.175 and from $0.65 to $0.75, respectively. APSC requests waiver of the Commission's notice requirements to allow these increases to become effective February 1, 1979. APSC states that since short-term power and energy transactions and limited-term power and energy transactions are scheduled from time to time as load capacity conditions on the systems of the parties dictate it is impossible to estimate the increase in revenues which would result from Amendment No. 7.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure. All such petitions or protests should be filed on or before February 5, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. CP79-121]

COLUMBIA GULF TRANSMISSION CO. AND NATURAL GAS PIPELINE CO. OF AMERICA

Application

JANUARY 11, 1979.

Take notice that on December 15, 1978, Columbia Gulf Transmission Company (Columbia), P.O. Box 683, Houston, Texas 77001, and Natural Gas Pipeline Company of America (Natural), 122 South Michigan Ave., Chicago, Illinois 60603, (Applicants), filed an application in Docket No. CP79-121 pursuant to Section 7(c) of the Natural Gas Act for permission and approval to abandon certain facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicants state that a side tape and the pipeline connecting Platform 309C to Columbia's 20-inch pipeline in Block 309, Eugene Island Area, offshore Louisiana, have been damaged in a collision and are no longer needed or used. Consequently, Applicants seek permission and approval to abandon them. Applicants state that if abandonment authority is granted an attempt would be made to salvage the facilities.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. RP72-157]

CONSOLIDATED GAS SUPPLY CORP.

Proposed Changes in FERC Gas Tariff

JANUARY 11, 1979.

Take notice that Consolidated Gas Supply Corporation (Consolidated) on December 22, 1978 tendered for filing proposed changes in its FERC Gas Tariff, Third Revised Volume No. 1 pursuant to the requirements of Section 4 of the Natural Gas Act and Section 154.63 of the Commission's Regulations.

Consolidated has included in the "Base Cost of Gas from Producer Suppliers" pipeline production that qualifies for area, national or statutory rate treatment. No changes in sale's rates are proposed. The "Base Cost of Gas from Producer Suppliers" of 96.24¢ per Dt is shown on Second Substitute Eighth Revised Sheet No. 16 proposed to be effective December 1, 1978 and Second Substitute Ninth Revised Sheet No. 16 proposed to be effective January 1, 1979.

Consolidated requests a waiver of any of the Commission's Rules and Regulations as may be deemed necessary to permit the revised tariff sheets to become effective as proposed.

Copies of this filing were served upon Consolidated's jurisdictional customers as well as interested State Commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 19, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1659 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket Nos. RP78-76 and R-406]

CONSOLIDATED GAS SUPPLY CORP.

Proposed Changes in FERC Gas Tariff

JANUARY 12, 1979.

Take notice that Consolidated Gas Supply Corporation (Consolidated) on January 5, 1979, tendered for filing proposed changes to its FERC Gas Tariff, Third Revised Volume No. 1, pursuant to the FERC letter of December 26, 1978 in the above referenced dockets. The Commission accepted revised tariff sheets to be effective December 1, 1978 and January 1, 1979 but denied Consolidated's request for Account 191 treatment of unrecovered AGA payments. However, the

letter has permitted Consolidated • • • "to refile to recover such amounts through your base rates." Third Substitute Ninth Revised Sheet, No. 16, proposed to be effective January 1, 1979, reflects this change.

While Consolidated believes no waivers are necessary, Consolidated requests a waiver of any of the Commission's Rules and Regulations that may be deemed necessary in order to permit the rates shown on Third Substitute Ninth Revised Sheet No. 16 to become effective as proposed.

Copies of this filing were served upon Consolidated's jurisdictional customers as well as interested State Commissions.

Any persons desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 30, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1660 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. RP79-22]

CONSOLIDATED GAS SUPPLY CORP.

Proposed Changes in Rates and Charges

JANUARY 11, 1979.

Take notice that Consolidated Gas Supply Corporation (Consolidated), pursuant to Section 4 of the Natural Gas Act and Section 154.63 of the Commission's Regulations thereunder, tendered for filing on December 29, 1978, proposed changes to its FERC Gas Tariff, Third Revised Volume No. 1 and Original Volume No. 2 to become effective on February 1, 1979.

The proposed rate changes would increase Consolidated's revenues from jurisdictional sales and services by $27.4 million, or in the alternative $26.9 million, based on the twelve months ended September 30, 1978, adjusted for known changes for a nine-month period through June 30, 1979.

The changed rates reflect costs of liquefied natural gas (LNG) at substantially full contract deliveries. In addition to the costs of LNG, Consolidated states that the increased rates are required to recoup, *inter alia*, increased depreciation expense, increased rate base, and increased operating expenses including but not limited to an increase in the import ceiling price which is pending ERA approval based on a filing in Docket No. CP71-68, *et al.*, to amend FPC Opinion Nos. 622 and 622-A and a July 27, 1977 FPC order. The rates proposed include an overall rate of return of 11.84% and reflect the recently enacted statutory Federal income rate of 46%.

Consolidated states that the test period cost of purchased gas, exclusive of pipeline production from wells commenced prior to January 1, 1973, on leases acquired prior to October 7, 1969, and LNG, was computed at a single unit cost using data supporting Consolidated's rates in effect on December 1, 1978. For pipeline production from wells commenced prior to January 1, 1973, on leases acquired prior to October 7, 1969, rates are based on Consolidated's costs of service for that production derived in Docket No. RP77-7, as adjusted for inflation under Section 104 of the Natural Gas Policy Act of 1978. In the alternative, rates for this production are based on a current test period cost of service.

Finally, Consolidated states that Statement P will be filed within fifteen days of this filing.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 24, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. ER78-414]

DELMARVA POWER AND LIGHT CO.

Certification

JANUARY 11, 1979.

Take notice that on December 11, 1978, Presiding Administrative Law Judge Graham W. McGowan certified proposed revisions and rates for wholesale electric service applicable to sales of electric power and energy to all wholesale customers of Delmarva filed as of May 31, 1978. Delmarva serves eight municipalities and one private company in Delaware and three municipalities in Maryland.

The Judge indicated that the proposed tariff would result in a total revenue increase of $7,891,583 (20.4$) over existing rates of the 12-month period ending December 31, 1978.

The Judge also indicated a proposed settlement Agreement was entered into by Delmarva and the Cooperatives on November 3, 1978. Delmarva, the Cooperatives and Staff expressed their full support for the agreement.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, on or before January 26, 1979. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1662 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. RP79-16]

FLORIDA GAS TRANSMISSION CO.

Proposed Changes in Rates and Charges

JANUARY 11, 1979.

Take notice that on December 11, 1978 Florida Gas Transmission Company (FGT) tendered for filing proposed changes in its F.E.R.C. Gas Tariff, Original Volumes No. 1, 2 and 3.

The proposed rate changes would increase Florida Gas' revenues from resale sales and a transportation service by $18,479,192 based on the twelve months ended September 30, 1978, as adjusted.

Florida Gas states that the increased rates are required to reflect higher levels of all costs of operation, including the cost of labor, materials, and capital, and the termination of two large transportation services in June 1979.

FGT has further proposed a change in the minimum bill provision applicable to Rate Schedule G, changes in the date of payment and interest rate on late payments, and a simplification of rate structure for jurisdictional resale customers. In addition, FGT has proposed a rate change in Rate Schedule X-6 covering a transportation service for Southern Natural Gas Company.

V 4 4 / 1 2 J A 1 7 7 9 UMI

Additionally, FGT states that pursuant to the Commission's Regulations the instant tariff filing has been mailed to each affected customer and the Florida Public Service Commission.

Any person desiring to be heard or to make any protests with reference to said application should on or before January 18, 1979 file with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. EL79-6]

FLORIDA POWER & LIGHT CO.

Application

JANUARY 12, 1979.

Take notice that on December 22, 1978, Florida Power & Light Company (Applicant) filed an application seeking an order pursuant to Section 203 of the Federal Power Act authorizing it to dispose of certain portions of its 69 kV transmission facilities and certain substation facilities located in Lee and Charlotte Counties, Florida by selling same to Lee County Electric Cooperative, Inc.

Applicant is incorporated under the laws of the State of Florida with its principal business offices in Miami, Florida, and is engaged in the electric utility business in parts of 35 of the 67 counties in the State.

Lee County Electric Cooperative, Inc. is a rural electric cooperative incorporated under the laws of the State of Florida with its principal business in North Fort Myers, Florida and owns and operates facilities for the distribution and sale of electric energy within parts of four counties in the southwestern section of peninsular Florida.

The applicant proposes, subject to regulatory approval, to sell approximately 18 miles of 69 kV transmission line facilities and two 138-69 kV autotransformers with associated equipment to the Cooperative for use in its system.

The applicant is to receive a sum of approximately $606,575 in exchange for said property (subject to adjustments at time of closing).

Any person desiring to be heard or to make any protest with references to said application should, on or before January 31, 1979, file with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, petitions or protests in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). Protests file with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Persons wishing to become parties to a proceeding or to participate as a party in any hearing therein must file petitions to intervene in accordance with the Commission's Rules. The application is on file with the Commission and available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. RI79-20]

GRACE PETROLEUM CORP.

Petition

JANUARY 11, 1979.

Take notice that on November 22, 1978, Grace Petroleum Corporation, 6501 North Broadway, Oklahoma City, Oklahoma 73116 (Petitioner), filed a petition for relief from ceiling price in Docket No. RI79-20 pursuant to Sections 104(b)(2), 107(c)(5) and 502(c) of the Natural Gas Policy Act of 1978 (NGPA) and Section 1.7(b) of the Commission's Rules of Practice and Procedure. Petitioner also requests expedited action by the Commission.

The Polumbus Company, a corporate relative of Petitioner, previously filed in Docket No. CS73-545 for waiver of Section 2.56a of the Commission's Regulations Under the Natural Gas Act based on facts as set forth in the instant petition. These facts include the history of Slade 26-1 Well e.g. a severe casing failure and other occurrences beyond applicants' control which eventually required rework of the well instead of carrying out the intended plugging and abandonment of the well which was to be replaced by a well 250 feet away; the costs of the rework were substantially more than would have been incurred in drilling a new well; and that these higher costs were all incurred after January 1, 1975. The instant petition requests the Commission to deem the previous petition to be withdrawn.

Petitioner states it has four wells in the Alkali Gulch Field either producing or capable of producing if reworked: the Slade 26-1 and the Mary Mayers 27-1 (both producing) and the Schmitt 1-35 and the Wright 34-1 well both having ceased production due to water problems.

Petitioner alleges that ceiling prices under Section 104 of the NGPA are inadequate to make further production from the Slade and Mary Myers wells economic or to permit performance of the reworking and recompletion operations necessary for production from the Schmitt and Wright wells to be resumed.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 2, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER79-118]

IOWA-ILLINOIS GAS ELECTRIC CO.

Filing

JANUARY 11, 1979.

Take notice that Iowa-Illinois Gas and Electric Company, Davenport, Iowa (Company) on December 26, 1978, tendered for filing a new and additional Service Schedule K, Participation Power, and a related Participation Power Transaction No. 1, under an Interchange Agreement of November 15, 1971, with the City of Geneseo, Illinois (City). Company indicates that each is dated December 20, 1978, and each is proposed to become effective as of February 1, 1979.

Company states Service Schedule K provides that transactions for participation power may be negotiated by the parties for each transaction and attached to this Schedule. Company further states that the related Participation Transaction No. 1, to commence February 1, 1979, provides for the sale of 2 MW to City from Company's shares of Neal Unit 3 and Council Bluffs Unit 3, for a two year term utilizing weighted cost based rates related to the participation units, and provides for substitute energy, at Company's option, and establishes rates therefore. It is stated that no new or additional facilities are required to effectuate the transaction, or the Service Schedule under which it was negotiated.

Company requests an effective date of February 1, 1979, and therefore requests waiver of the Commission's notice requirements.

According to the Company, copies of the filing have been mailed to the City, to the Iowa State Commerce Commission and to the Illinois Commerce Commission.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions should be filed on or before January 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket Nos. RP78-10 and RP72-32 (PGA77-2)]

KANSAS-NEBRASKA NATURAL GAS CO., INC.

Certification of Proposed Settlement Agreement

JANUARY 11, 1979.

Take notice that on November 24, 1978, Administrative Law Judge Wagner certified to the Commission a Stipulation and Agreement proposed in settlement of the issues in the above-captioned rate proceeding. The certification states that the proposed Stipulation and Agreement, which was tendered by Kansas-Nebraska Natural Gas Company on November 21, 1978, is not opposed by any party. If approved, the proposed Stipulation and Agreement would resolve all but three of the issues in this proceeding. The three issues which have been reserved for hearing are the following: rate of return, the pricing of storage injection volumes, and the treatment of extraction plant revenues.

Any person desiring to be heard or to protest said Stipulation and Agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 26, 1979. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. RP72-149 (PGA79-3)]

MISSISSIPPI RIVER TRANSMISSION CORP.

Proposed Change in Rates

JANUARY 11, 1979.

Take notice that Mississippi River Transmission Corporation ("Mississippi") has submitted for filing Seventy-First Revised Sheet No. 3A to its Federal Energy Regulatory Commission Gas Tariff, First Revised Volume No. 1, which carries a proposed effective date of February 1, 1979.

Mississippi states that Seventy-First Revised Sheet No. 3A is being filed pursuant to the Purchased Gas Cost Adjustment provisions of its currently effective tariff to track a rate change filing of Trunkline Gas Company ("Trunkline") made pursuant to the terms and conditions of Trunkline's PGA provisions and a settlement agreement at Docket No. RP78-11. Trunkline's filing also carries a proposed effective date of February 1, 1979.

Mississippi states that copies of its filing, including computations in support thereof, have been served on its jurisdictional customers and the State Commissions of Arkansas, Illinois and Missouri.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-484]

MONONGAHELA POWER CO.

Certification

JANUARY 12, 1979.

Take notice that on December 11, 1978 Presiding Administrative Law Judge Samuel Kanell certified a proposed settlement involving a proposed rate increase of $314,240 for the 12 month period following proposed effective date of August 9, 1978, for such higher rates, to be applicable to the four wholesale for resale customers of Monongahela Power Company.

The Judge indicated that following prehearing conference and negotiation discussions among the parties, agreement was reached among all parties providing for a test year revenue increase (test year is 12 month period ending December 31, 1977) of 180,000. The proposed higher rate filed by the company would have produced the estimated amount of $290,778 for this test period.

The Judge states further stipulations were reached by the parties with respect to possible tax refunds and restrictions on additional rate increase filings as set forth in the proposed settlement.

The Judge also states that by intervenor motion dated December 7, 1978, it is represented that all parties concur in this settlement and support its certification to the Commission.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 26, 1979. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

[Docket No. ER79-123]

MONTAUP ELECTRIC CO.

Filing

JANUARY 12, 1979.

Take notice that on December 28, 1978, Montaup Electric Company filed a service agreement with the Town of Middleborough, Massachusetts. Montaup states that the service agreement provides for transmission service under Montaup's FERC Electric Tariff, Original Volume No. II.

Montaup further states that Exhibit A to the agreement provides for transmission of Middleborough's purchases from Fitchburg Gas & Electric Company and from Vermont Yankee Nuclear Power Company for various periods beginning November 1, 1978 and ending October 31, 1981.

Montaup requests an effective date of November 1, 1978, and therefore requests waiver of the Commission's notice requirements.

Montaup indicates that the filing has been served on Middleborough and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 29426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 29, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER79-128]

MONTAUP ELECTRIC CO.

Filing

JANUARY 12 1979.

Take notice that on January 2, 1979, Montaup Electric Company (Montaup) tendered for filing a service agreement between itself and the Town of Templeton, Massachusetts under which Montaup agrees to furnish transmission service to Templeton under Montaup's FERC Electric Tariff, Original Volume No. 11. Montaup states that the present filing provides specifically for transmission of 1000 kw of power purchased by Templeton from the Massachusetts Municipal Wholesale Electric Company for the period November 1, 1978 through April 30, 1979. Montaup requests waiver of the Commission's notice requirements in order to allow said agreement to become effective as of November 1, 1978.

According to Montaup copies of this filing were served upon Templeton and the Massachusetts Department of Public Utilities.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before February 5, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket Nos. CP76-372 and CP76-374]

NATURAL GAS PIPELINE CO. OF AMERICA AND TRANSCONTINENTAL GAS PIPE LINE CORP.

Petition To Amend

JANUARY 11, 1979.

Take notice that on December 28, 1978, Natural Gas Pipeline Company of America (Natural), 122 South Michigan Avenue, Chicago, Illinois 60603, and Transcontinental Gas Pipe Line Corporation (Transco), P.O. Box 1396, Houston, Texas 77001 (Petitioners) filed in Docket Nos. CP76-372 and CP76-374 a petition to amend the order issued on October 14, 1978, in the instant docket pursuant to Section 7(c) of the Natural Gas Act to authorize Petitioners to exchange natural gas from a new source, all as more fully set forth in the petition to amend on file with the Commission and open to public inspection.

Petitioners state that Transco has available to it a volume of up to 1000 Mcf of gas per day from the Clayton Field area of Live Oak County, Texas, purchased from the Block 76 unit well production of Atlantic Richfield Company. In order to make this gas available to Transco's system, Petitioners propose for Transco to have this gas delivered to Natural at the outlet of the nearby Clayton Area Facilities of Mobil Oil Corporation (Mobil) and for Natural to continue to deliver thermally equivalent volumes to Transco, free of charge, at Mobil's Cameron Meadow's Plant in Cameron Parish, Louisiana.

Any person desiring to be heard or to make any protest with reference to said petition should on or before February 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules. All persons who have heretofore filed need not file again.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. CP79-125]

NORTHERN NATURAL GAS CO.

Application

JANUARY 11, 1979.

Take notice that on December 15, 1978, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed an application in Docket No. CP79-125 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transfer of service for a certain customer from Cedar Falls Utilities (CFU) to Applicant's Peoples Division, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that CFU no longer wishes to deliver gas to Beaver Hills Country Club, (Beaver Hills), located in Blackhawk County, Iowa, because Beaver Hills is CFU's only rural customer. Accordingly, Applicant seeks authority to transfer such service to its Peoples Division in lieu of CFU's continuing such service. Peoples would serve Beaver Hills from its presently effective contract demand, it is said.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecesary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1674 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. RP71-107 (Phase II) (PGA79-1) (R&D79-1)]

NORTHERN NATURAL GAS CO.

Pipeline Rates: Emergency Purchases; Order Accepting for Filing and Suspending Proposed Rate Increase and Establishing Procedures

JANUARY 10, 1979.

On December 11, 1978, Northern Natural Gas Company (Northern) filed a rate increase of 21.63¢ per Mcf for transportation sales [1] and a rate increase of 26.86¢ per Mcf for field sales.[2] The 21.63¢ per Mcf increase for transmission sales consists of:

(1) A 26.63¢ per Mcf PGA rate increase which reflects:

(a) A 23.55¢ per Mcf increase in the estimated cost of purchased gas, or $153.6 million per year;

(b) A 2.45¢ per Mcf increase in the surcharge (from 0.81¢ to 3.26¢) to recover unrecovered cost of purchased gas of $16,156,688; and

(c) A .63¢ per Mcf increase (from negative .85¢ to negative .22¢) to reflect refund obligations of $1,435,785 pertaining to Docket Nos. RP77-18 and RP76-86.

(2) A .18¢ per Mcf reduction (from .08¢ to negative .10¢) in the base rates to reflect reductions in Research and Development Expenditures.

(3) An initial GRI surcharge of .41¢ per Mcf consisting of:

(a) .35¢ per Mcf for 1979, as approved in Opinion No. 30, and

(b) A .06¢ per Mcf which was deferred by Northern until this filing to avoid a small rate adjustment which would have been effective June, 1978.

(4) A decrease of 5.23¢ per Mcf to eliminate the surcharge for the Northern Illinois Gas Company storage agreement pursuant to Commission Order issued April 26, 1978, in Docket No. RP78-46.

The 26.86¢ per Mcf net rate increase for field sales reflects the identical components of the transmission sales increase (Items 1, 2 and 3 above) except for the elimination of the 5.23¢ surcharge for storage (Item 4) which was not charged to field sales.

The instant filing reflects the impact on purchased gas costs of the Natural Gas Policy Act of 1978. The instant filing replaces Northern's similar filing of October 26, 1978,[3] which did not reflect the impact of costs associated with the NGPA.

The Commission orders: (A) Northern's proposed Substitute Seventeenth Revised Sheet No. 4a to FERC Gas Tariff Third Revised Volume No. 1, Substitute Seventeenth Revised Sheet No. 1 to FERC Gas Tariff Original Volume No. 2, are accepted for filing, suspended and waiver of notice requirements is granted such that the filing shall become effective on December 27, subject to refund.

(B) Pursuant to the authority of the Natural Gas Act, Sections 4, 5, 8 and 15, and the Commission's rules and regulations, a public hearing shall be held concerning the prudency of the emergency purchases made by Northern.

(C) Northern shall serve its case-in-chief in support of the prudency of the questioned emergency purchases on or before February 12, 1979.

(D) The Commission Staff shall prepare and serve its statement of position in the emergency purchase proceeding on all parties on or before April 11, 1979.

(E) A Presiding Administrative Law Judge, to be designated by the Chief Administrative Law Judge for that purpose (18 CFR 3.5(d)), shall convene a settlement conference in this proceeding to be held within 10 days after the service of top sheets by the Staff in the emergency purchase proceeding in a hearing or conference room of the Federal Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426. The Presiding Administrative Law Judge is authorized to establish such further procedural dates as may be necessary, and to rule upon all motions (except motions to consolidate, sever, or dismiss), as provided for in the rules of practice and procedure.

By the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1625 Filed 1-16-79; 8:45 am]

[6450-01-M]

[Docket No. CP79-115]

NORTHWEST PIPELINE CORP.

Application

JANUARY 11, 1979.

Take notice that on December 12, 1978, Northwest Pipeline Corporation (Applicant), P.O. Box 1526, Salt Lake City, Utah 84110, filed an application in Docket No. CP79-115 pursuant to Section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to transport up to 100,000 Mcf of natural gas for Cities Service Gas Company (Cities Service), and to construct and operate the facilities necessary therefor, all as more fully set forth in the application on file with the Commission and open to public inspection.

It is stated that Applicant and Cities Service entered into two agreements, both dated September 20, 1978, involving the gathering of natural gas in Lincoln, Uinta and Sweetwater Counties, Wyoming, (gathering area) and the subsequent transportation of this gas (gathering and transportation agreements). Applicant seeks authority to implement the terms of these agreements as they now stand, as well as blanket authority to gather and transport gas from additional wells that may in the future be made subject to the agreements. Applicant states that the gathering agreement presently encompasses 15 wells, but it proposes in the instant application to attach 27 more wells in the gathering

[1] Substitute Seventeenth Revised Sheet No. 4a to FERC Gas Tariff, Third Revised Volume No. 1.

[2] Substitute Seventeenth Revised Sheet No. 1c to FERC Gas Tariff, Original Volume No. 2.

[3] Seventeenth Revised Sheet No. 4a to FERC Gas Tariff, Third Revised Volume No. 1 and Seventeenth Revised Sheet No. 1c to FERC Gas Tariff, Original Volume No. 2.

JAN 17 79 UMI

V 4 4 / 1 2

area. Applicant further proposes to gather gas from any other wells that may be hereafter developed in the gathering area. The facilities specifically proposed to the construction are:

(1) Approximately 7 miles of 12¾-inch O.D. pipeline
(2) Approximately 14 miles of 8⅝-inch O.D. pipeline
(3) Approximately 25 miles of 6⅝-inch O.D. pipeline
(4) Approximately 36 miles of 9½-inch O.D. pipeline
(5) 41 wellhead setting,[1] and
(6) Necessary appurtenant facilities.

Applicants projects these facilities to cost, excluding filing fees, approximately $7,631,000,[2] which would be initially financed from funds on hand or from short term borrowing. The facilities necessary to connect any additional wells would be constructed pursuant to the appropriate budget-type certificate authorization, it is stated.

Applicant states that pursuant to the transportation agreement it would receive for Cities Service's account up to 100,000 Mcf of gathering area gas at a delivery point on Applicant's mainline in Lincoln County, Wyoming, and redeliver equivalent volumes for Cities Service's account, less fuel and line loss, to El Paso Natural Gas Company (El Paso) at an existing point of interconnection between the systems of Applicant and El Paso in La Plata County, Colorado.[3] Although the initial volumes to be transported are estimated to be 32,000 Mcf per day, by 1981 Applicant estimates the transported volumes would be 98,000 Mcf per day.

It is stated the initial gathering rate would be 16.81 cents per Mcf of gas, while the initial transportation rate would be 20.69 cents per Mcf for direct delivery, and 2.0 cents per million Btu for displacement delivery.

It is stated that the authorization requested would enable Cities Service to make additional volumes of natural gas available to its market area, which it could use to reduce its projected curtailments.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

[FR Doc. 79-1676 Filed 1-16-79; 8:45 am]

[1] One of the 15 wells presently covered by the agreements is already attached.

[2] This figure includes line pack and an allowance for funds used during construction based on a rate of return presently the subject of a pending proceeding in Docket No. RP78-50.

[3] It is stated that El Paso and Cities Service have executed an exchange agreement covering this gas.

[6450-01-M]

[Docket No. EL79-5]

PENNSYLVANIA POWER & LIGHT CO.

Application for the Sale and the Purchase of a 2.3 Mile Portion of one of Pennsylvania Electric Co.'s 230 kV Transmission Lines

JANUARY 11, 1979.

Take notice that Pennsylvania Power & Light Company on December 4, 1978, tendered for filing, two Agreements between Pennsylvania Electric Company and Pennsylvania Power & Light Company, for the sale of Pennsylvania Electric Company to Pennsylvania Power & Light Company of 2.3 mile section of one of Pennsylvania Electric Company's 230 kV transmission lines and a 15-mile portion of a 115 transmission line.

One Agreement provides for the acquisition by Pennsylvania Power & Light Company of the 2.3 mile section of a 230 kV electric transmission facility, currently owned by Pennsylvania Electric Company. The acquisition of the aforementioned facility is in connection with the operation by Pennsylvania Power & Light Company of its Lackawanna Switching Station in Blakely Borough, Lackawanna County, Commonwealth of Pennsylvania. The said 230 kV transmission line currently is used as an interconnection link in accordance with an Interconnection Agreement between Pennsylvania Power & Light Company and Pennsylvania Electric Company, dated May 31, 1968, and as a tie-line between Pennsylvania Power & Light Company's Lackawanna Switching Station and its Peckville Substation. Upon transfer of the said transmission line section, Pennsylvania Power & Light Company will then own, operate and maintain the tie-line between its Lackawanna Switching Station and its Peckville Substation. The 2.3 mile section of the 230 kV transmission line will then be a source of supply if Pennsylvania Power & Light Company expands its Lackawanna Switching Station.

The other Agreement provides for the sale of Pennsylvania Electric Company and the purchase by Pennsylvania Power & Light Company of the 15-mile Lenox-Peckville Line, which line is for the most part in Pennsylvania Power & Light Company's service territory. Pennsylvania Power & Light Company if able to use a 10-mile portion of said Lenox-Peckville Line for its electric transmission business to supply the Edella Substation, which is a new Pennsylvania Power & Light Company Substation currently under construction in Scott Township, Lackawanna County, Commonwealth of Pennsylvania. Because of changing demand requirements, Pennsylvania Electric Company no longer has significant use for the said Lenox-Peckville Line.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 29, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. ER79-115]

PORTLAND GENERAL ELECTRIC CO.

Filing

JANUARY 11, 1979.

Take notice that on December 26, 1978, Portland General Electric Company (Portland) tendered for filing an Agreement with the Montana Power Company, dated September 8, 1978, and a Supplement to this Agreement dated November 22, 1978. Portland states that under the terms of this Agreement and the Supplement thereto, the Montana Power Company will make available to Portland 100 MW of firm capacity and associated energy monthly during the months of September, October, and November, 1978. Portland further states that it will return the power and energy so received from the Montana Power Company commencing in August, 1979. Portland indicates that such power and energy is to be returned in varying amounts through February, 1983. Portland further indicates that if not fully repaid by March 1, 1984, then Portland is to pay the Montana Power Company the reasonable value of the unreturned power and energy furnished. Portland states that the Montana Power Company is to be compensated for the time differential between the time of the delivery of capacity and energy and its return by an interest charge payable in power and enrgy calculated to yield 10% per annum when compounded monthly.

Portland requests an effective date of September 11, 1978, and therefore requests waiver of the Commission's notice requirements.

Copies of this filing were served on the Montana Power Company according to Portland.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER78-511]

PUBLIC SERVICE CO. OF OKLAHOMA

Proposed Settlement

JANUARY 11, 1979.

Take notice that on December 6, 1978, Public Service Company of Oklahoma and its wholesale customers, including Southwestern Power Administration, filed for approval by the Commission an executed Settlement Agreement purporting to resolve all issues present in this docket.

Any person desiring to be heard or to protest said settlement proposal should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before February 5, 1979. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this proposal are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

R. C. SOMERS

Filing

JANUARY 12, 1979.

Take notice that on December 19, 1978, R. C. Somers, (Applicant) filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

Vice President, Louisville Gas and Electric Company, Public Utility.
Vice President, Ohio Valley Transmission Corporation, Public Utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with § § 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 26, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

R. L. ROYER

Filing

JANUARY 12, 1979.

Take notice that on December 19, 1978, R. L. Royer, (Applicant) filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

President and Director, Louisville Gas and Electric Company, Public Utility.
President and Director, Ohio Valley Transmission Corporation, Public Utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 26, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6450-01-M]

[Docket No. ER79-114]

Southern California Edison Co.

Filing

JANUARY 11, 1979.

Take notice that Southern California Edison Company (Edison), on December 26, 1978, tendered for filing an Amended Edison-San Diego Interruptible Transmission Service Agreement (the Agreement) with the San Diego Gas and Electric Company (San Diego) providing for the transmission by Edison, on an interruptible basis, of energy purchased by San Diego from various sources. Edison states that this Agreement dated December 7, 1976, provides for the transmission of energy in addition to the purchased energy contemplated under the original agreement. Edison further states

A 1 7 7 9 UMI

V 4 4 / 1 2 J A 1 7 7 9 UMI

that the Agreement provides that Edison will charge San Diego for transmission, dispatching, and scheduling services. Edison indicates that San Diego will reimburse Edison in kind for transmission losses. Edison further indicates that the Agreement is proposed to become effective, and service under the Agreement to commence, when accepted for filing by the FERC and will continue until May 31, 1986, or until terminated on 30 days notice.

Edison states that San Diego requests that service be initiated at the earliest possible date under this Agreement, and for that reason Edison requests that the prior notice requirements of the Commission's regulations be waived and the filing be permitted to become effective as soon as possible.

Copies of this filing were served upon San Diego and Electric Company and the Public Utilities Commission of the State of California, according to Edison.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with § 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. ER79-125]

SOUTH CAROLINA ELECTRIC & GAS CO.

Filing

JANUARY 12, 1979.

Take notice that on December 29, 1978, South Carolina Electric & Gas Company (SCE&G) tendered for filing a Second Amendment to the Interchange Agreement between SCE&G and Duke Power Company, dated August 28, 1956. SCE&G states that the Second Amendment deletes service schedules providing for Spinning Reserve, Coordination of Scheduled Maintenance, Interchange Power, Limited Term Power and Energy, and Short Term Power and Energy and substitutes therefore the following service schedules: Spinning Reserve, Short-term Power, Limited-term Power, Economy Interchange, and Other Energy.

SCE&G requests an effective date of January 22, 1979, and therefore requests waiver of the Commission's notice requirements.

According to SCE&G copies of this filing have been sent to the South Carolina Public Service Commission and the Duke Power Company.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10). All such petitions or protests should be filed on or before January 29, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. RP79-21]

TENNESSEE NATURAL GAS LINES, INC.

Proposed Changes in FERC Gas Tariff

JANUARY 11, 1979.

Take notice that on December 28, 1978, Tennessee Natural Gas Lines, Inc. ("TNGL") tendered for filing proposed changes in its FERC Gas Tariff, First Revised Volume No. 1, consisting of the following listed tariff sheets:

Thirtieth Revised Sheet No. PGA-1
Fifth Revised Sheet No. 4-A
Fifth Revised Sheet No. 4-B
Third Revised Sheet No. 8
First Revised Sheet No. 8-I
First Revised Sheet No. 14
First Revised Sheet No. 30-A

The proposed changes would increase revenues from jurisdictional sales and service by $1,125,525, or approximately 2.97%, based on the twelve consecutive months of actual experience as adjusted for known and measurable changes through May 31, 1979. TNGL states that, in addition to such general rate increase, its tariff filing makes clarifying, conforming, and updating changes in certain provisions of its tariff.

TNGL states that its general rate increase is necessary so as to provide it with the minimum return necessary to enable it to maintain its credit and financial integrity and to attract the capital which it will require and to recover increased taxes and increasing operating and maintenance expenses. It states that its tariff filing proposes no increase in depreciation rates and is based on a slightly reduced rate base (because of depreciation accruals) and slightly reduced sales volumes.

TNGL states that its tariff filing was served upon its jurisdictional customer, Nashville Gas Company, and the affected state Commission, the Tennessee Public Service Commission.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure on or before January 24, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. ER79-121]

UTAH POWER & LIGHT CO.

Proposed Tariff Change

JANUARY 12, 1979.

Take notice that Utah Power & Light Company (Utah) on December 28, 1978, tendered for filing proposed changes in its FERC Electric Service Tariff, Original Volume No. 1. Utah states that the proposed changes would increase revenues by $12,422,180 from jurisdictional sales and service based on the twelve-month period ending December 31, 1979.

Utah further states that the increases are necessary because of inflationary increases in all categories of costs, and to attain a reasonable rate of return on the sales for resale. Utah proposes an effective date of March 1, 1979.

Copies of the filing were served upon the Company's jurisdictional customers, and regulatory commissions for the states of Utah, Idaho and Wyoming, according to Utah.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before February 5, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[6450-01-M]

[Docket No. ER79-119]

VIRGINIA ELECTRIC & POWER CO.

Filing

JANUARY 11, 1979.

Take notice that on December 26, 1978, Virginia Electric and Power Company (VEPCO) tendered for filing a revised supplement to the contract between VEPCO and Tri-County Electric Cooperative. VEPCO states that the revised contract supplement reflects changes due to a change in transformer capacity from 2500 kVA to 3750/4687 kVA as set forth below:

Delivery point	Present FERC No.	Proposed FERC No.	Item corrected
Sycoline	86-25	86-30	5(1), (3), 10, 11

VEPCO states that the revised contract supplement is intended to supersede the listed FERC Rate Schedule and requests that the revised supplement be allowed to become effective on September 22, 1978, and therefore requests waiver of the Commission's notice requirements.

Any person desiring to be heard or to protest this application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR § 1.8, 1.10). All such petitions or protests should be filed on or before January 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER79-104]

WEST PENN POWER CO.

Filing

JANUARY 11, 1979.

Take notice that West Penn Power Company on November 30, 1978, tendered for filing a fully executed Electric Service Agreement entered into with the Borough of Mont Alto. Also enclosed for filing is an agreement between West Penn and the Borough of Chambersburg.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426, in accordance with § § 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8 and 1.10). All such petitions or protests should be filed on or before January 22, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[6450-01-M]

[Docket No. ER78-63]

WESTERN POWER DIVISION AND CENTRAL TELEPHONE & UTILITIES CORPORATION

Certification

JANUARY 11, 1979.

Take notice that Administrative Law Judge Jon G. Lotis certified on November 9, 1978, the settlement agreement and accompanying documents which resolve all issues in this proceeding.

The Judge indicated that analysis of the settlement document discloses that the settlement rates will result in increased revenues for Central Telephone & Utilities Corporation of $1,156,211 based on data for the twelve months ending December 31, 1978, as contrasted with the $2,471,469 originally sought.

The Judge stated that at the November 8, 1978 prehearing conference, the parties expressed unanimous consent to the settlement and requested that it be approved without further proceedings.

Any person desiring to be heard or to protest said settlement agreement should file comments with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before January 26, 1979. Comments will be considered by the Commission in determining the appropriate action to be taken. Copies of this agreement are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ID-1620]

WILLIAM B. BECHANAN

Application

JANUARY 12, 1979.

Take notice that on October 23, 1978, William B. Bechanan, (Applicant) filed an application pursuant to Section 305(b) of the Federal Power Act to hold the following positions:

President and Director, Kentucky Utilities Company, Public Utility.
President and Director, Old Dominion Power Company, Public Utility.
Director, Electric Energy, Inc., Public Utility.
Director, Ohio Valley Electric Corporation, Public Utility.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with §§ 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before January 26, 1979. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

FEDERAL MARITIME COMMISSION

AGREEMENT FILED

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10423; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orelans, Louisiana, San Francisco, California and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C. 20573, on or before January 29, 1979. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Agreement No.: T-3760.

Filing Party: Neal M. Mayer, Esquire, Coles and Goertner, 1000 Connecticut Avenue, N.W., Washington, D.C. 20036.

SUMMARY: Agreement No. T-3760, between the City of Los Angeles (City) and Seatrain Pacific Services, Inc. (Seatrain) is a permit whereby Seatrain is granted the right to utilize certain terminal facilities located at Berth 131 of the Port of Los Angeles. Seatrain will use the premises for the docking, mooring, berthing and undocking of vessels for receiving, handling, loading, unloading, storing, transporting and delivering containerized cargo; and for all other purposes involved in or related to the operation of a marine terminal facility. The term of this permit will be for a period of five years. As compensation, Seatrain shall pay City 100 percent of all charges collected pursuant to the Port of Los Angeles Tariff No. 3, up to an annual guaranteed amount of $646,265. Tariff charges accruing above $646,265 annually will be shared equally by Seatrain and City.

By Order of the Federal Maritime Commission.

Dated: January 11, 1979.

FRANCIS C. HURNEY,
Secretary.

[6325-01-M]

FEDERAL PREVAILING RATE ADVISORY COMMITTEE

OPEN COMMITTEE MEETINGS

Pursuant to the provisions of section 10 of the Federal Advisory Committee Act (Pub. L. 92-463), notice is hereby given that meetings of the Federal Prevailing Rate Advisory Committee will be held on: Thursday, February 1, 1979; Thursday, February 8, 1979; Thursday, February 15, 1979; Thursday, February 22, 1979.

The meetings will convene at 10 a.m., and will be held in Room 5A06A, Office of Personnel Management Building, 1900 E Street, NW., Washington, D.C.

The Federal Prevailing Rate Advisory Committee is composed of a Chairman, representatives of five labor unions holding exclusive bargaining rights for Federal blue-collar employees, and representatives of five Federal agencies. Entitlement to membership on the Committee is provided for in 5 U.S.C. 5347.

The Committee's primary responsibility is to review the prevailing rate system and other matters pertinent to the establishment of prevailing rates under subchapter IV, chapter 53, 5 U.S.C., as amended, and from time to time advise the Office of Personnel Management thereon.

These scheduled meetings will convene in open session with both labor and management representatives attending. During the meeting either the labor members or the management members may caucus separately with the Chairman to devise strategy and formulate positions. Premature disclosure of the matters discussed in these caucuses would impair to an unacceptable degree the ability of the Committee to reach a consensus on the matters being considered and disrupt substantially the disposition of its business. Therefore, these caucuses will be closed to the public on the basis of a determination made by the Director of the Office of Personnel Management under the provisions of Section 10(d) of the Federal Advisory Committee Act (Pub. L. 92-463) and 5 U.S.C. section 552b(c)(9)(B). These caucuses may, depending on the issues involved, constitute a substantial portion of the meeting.

Annually, the Committee publishes for the Office of personnel Management, the President, and Congress a comprehensive report of pay issues discussed, concluded recommendations thereon, and related activities. These reports are also available to the public, upon written request to the Committee Secretary.

Members of the public are invited to submit material in writing to the Chairman concerning Federal Wage System pay matters felt to be deserving of the Committee's attention. Additional information concerning these meetings may be obtained by contacting the Secretary, Federal Prevailing Rate Advisory Committee, Room 1340, 1900 E Street, NW., Washington, D.C. 20415 (202-632-9710).

JEROME H. ROSS,
Chairman, Federal Prevailing Rate Advisory Committee.

JANUARY 11, 1979.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

NATIONAL ADVISORY COUNCIL ON BILINGUAL EDUCATION

Meeting

AGENCY: National Advisory Council on Bilingual Education.

ACTION: Notice.

SUMMARY: This notice sets forth the schedule and proposed agenda of forthcoming meetings of the National Advisory Council on Bilingual Education. Notice of these meetings is required under the Federal Advisory Committee Act (5 U.S.C. Appendix 1, 10(a)(2)). This document is intended to notify the general public of their opportunity to attend.

DATES: Committee meetings: February 11, 1979, 3:00 p.m. Full Council

V 4 4 - 1 2

Meeting: February 12 and 13, 1979, 8:30 a.m. to 5:00 p.m.

ADDRESS: District Office, Maricopa County Community College, 3910 East Washington, Phoenix, Arizona 85034.

FOR FURTHER INFORMATION CONTACT:

Willie Alire, Office of Bilingual Education, Reporter's Building, Room 421, Office of Education, 400 Maryland Avenue SW., Washington, D.C. 20202 (202-245-2600).

The National Advisory Council on Bilingual Education is established under Section 732(a) of the Bilingual Education Act (20 U.S.C. 880b-11) to advise the Secretary of Health, Education, and Welfare and the Commissioner of Education concerning matters arising in the administration of the Bilingual Education Act.

The meetings on February 11, 12, and 13, 1979 will be open to the public beginning at 3:00 p.m. on February 11 and from 8:30 a.m. to 5:00 p.m. on February 12 and 13, 1979.

February 11, 1979: Orientation of New Members and Committee meetings.

February 12, 1979: A meeting of the Full Council on the following subjects is scheduled from 8:30 a.m. until 5:00 p.m. The proposed agenda includes the following:

(1) New business:

(a) Reading, amendments and approval of November meeting minutes.

(b) Review of the minutes of the December meeting.

(c) Discussion of draft of Rules and Regulations, Hearings schedules, etc.

(d) Review and discussion of Dr. de los Santos' Paper.

(e) Other.

(2) Unfinished business:

(a) Items discussed during December meeting.

(1) Letter to Secretary Califano regarding quorum.

(2) Report on Califano's reaction to interim final regs.

(3) Requested Commission on Bilingual Education.

(4) Employment of Hispanics and Asians in OE.

(5) Recruitment of individuals to respond to European and Native American Languages Paper.

(6) Letter on Foreign Travel.

(7) Annual Report.

(8) Co-ordination paper requested in December meeting.

(9) Other.

February 13, 1979: The proposed agenda includes the following:

(1) Other business:

(a) Discussion with Clearinghouse Personnel.

(1) Public Service Announcements.

(2) IAPS duplications with Council papers.

(3) Plan for joint meeting between Clearinghouse Council and Bilingual Education Council.

(4) Plan for next Council meeting.

(2) Old business:

(a) At the pleasure of the membership.

Records will be kept of all Council proceedings and shall be available for public inspection after approval, by the full Council, of said records has been obtained. These records will be available in room 421, Reporter's Building, 300 7th Street SW., Washington, D.C. Written requests for such records should be sent to 400 Maryland Avenue SW., Reporter's Building, Room 421, Washington, D.C. 20202.

In the event that the proposed agenda is completed prior to the projected date or time, the council will adjourn the meeting.

Signed at Washington, D.C. on January 11, 1979.

DEAN BISTLINE,
Acting Director,
Office of Bilingual Education.

Office of the Secretary

ETHICS ADVISORY BOARD

Meeting

Notice is hereby given that the Ethics Advisory Board will hold a meeting on February 2-3, 1979, in the Auditorium of the HEW Building (North), 330 Independence Avenue, S.W., Washington, D.C. 20201. The meeting will begin at 9 a.m. on both days, and will be open to the public subject to limitations of available space.

The agenda for the meeting will include deliberations on whether the Department of Health, Education, and Welfare should support research involving human in vitro fertilization and discussion of an application for HEW support of research involving fetoscopy.

Requests for information should be directed to Ms. Roberta Garfinkle, Westwood Building, Room 125, 5333 Westbard Avenue, Bethesda, Maryland, 20016, telephone, 301-496-7776.

Dated: January 11, 1979.

PETER D. BELL,
Deputy Under Secretary.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

ARIZONA; CROSSMAN PEAK RADAR FACILITY PROPOSAL

Intent To Prepare an Environmental Statement and Scoping Meeting

The Department of the Interior, Bureau of Land Management, Yuma District Office will be preparing an Environmental Impact Statement in connection with a Federal Aviation Administration proposal to construct an Air Route Surveillance Radar Facility on the top of Crossman Peak, about 10 miles northeast of Lake Havasu City, Arizona. The statement will also consider a three-site alternative which involves Cherum Peak, about 3½ miles east of Chloride, Arizona; Harquahala Peak, about 10½ miles east of Wenden, Arizona; and Tucker Mesa, about 8 miles west of Winslow, Arizona.

Two public meetings will be held for the purpose of scoping (determining the scope of issues to be addressed, and for identifying the significant issues related to a proposed action) the environmental statement.

The meetings will be held on February 22, 1979, at the Ramada Inn in Lake Havasu City, Arizona, at 1:00 p.m. and 7:00 p.m. Interested parties may attend either meeting or submit comments in writing to the address shown below.

These meetings will be workshop structured, for the purpose of gathering information, using the "Nominal Group Process."

For information concerning the proposed action or the environmental impact statement, contact the following individual: Karl L. Kipping, Project Manager, Bureau of Land Management, USDI, Post Office Box 5680, Yuma, Arizona 85364, Area Code 602-726-2681, FTS: 261-2681.

Dated: January 10, 1979.

HAROLD H. RAMSBACHER,
Acting State Director, Arizona.

[7020-02-M]

[Investigation No. 337-TA-63]

CERTAIN PRECISION RESISTOR CHIPS

Investigation

Notice is hereby given that a complaint was filed with the United States International Trade Commission on December 15, 1978, under section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), on behalf of Vishay Intertechnology, Incorporated, 63 Lincoln Highway, Malvern, Penssylvania 19355. The complaint alleges that unfair methods of competition and unfair acts exist in the importation of certain precision resistors, precision resistor chips and products utilizing such precision resistor chips into the United States, or in their sale by the owner, importer, consignee, or agent of either, by reason of the alleged (1) misappropriation by respondents of certain proprietary technological know-how and trade secrets, and (2) incorporation by respondents of the misappropriated proprietary technological know-how and trade secrets in the design and manufacture of the articles.

The complaint alleges that the effect or tendency of these unfair methods of competiton and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

Complainant requests a permanent exclusion of said imports from entry into the United States. Complainant further requests a cease and desist order.

Having considered the complaint, the United States International Trade Coommission on January 11, 1979, ORDERED THAT—

(1) Pursuant to subsection (b) section 337 of the Tariff Act of 1930, as amended (19 U.S.C. 1337), an investigation be instituted to determine, under subsection (c) whether there is a violation of subsection (a) of this section in the unauthorized importation of certain precision resistors, precision resistor chips and products utilizing such presision resistor chips into the United States, or in their sale by the owner, importer, consignee, or agent of either, by reason of the alleged (1) misappropriation by respondents of certain proprietary technological know-how and trade secrets and (2) incorporation by respondents of the misappropriated proprietary technological know-how and trade secrets in the design and manufacture of these articles, the effect or tendency of which is to detroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) For the purpose of this investigation so instituted, the following are hereby named as parties:

(a) The complainant is—

Vishay Intertechnology, Incorporated, 63 Lincoln Highway, Malvern, Pennsylvania 19355.

(b) The respondents are the following companies alleged to be involved in the unauthorized importation of such articles into the United States, or in their sale, and are parties upon which the complaint and this notice are to be served:

Societe Francaise De L'Electro-Resistance, 115-121, Boulevard de la Madeleine, C6—Nice, France.

Resistor Research Corporation, Suite 895, National Press Building, 529-14th Street, N.W., Washington, D.C. 20045.

Suite 906, 1828 L Street, N.W., Washington, D.C. 20036.

Suite 110, 400 North Washington Street, Falls Church, Virginia 22046.

(c) Robert D. Bannerman, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436, is hereby named Commission investigative attorney, a party to this investigation; and

(3) For the investigation so instituted, Chief Administrative Law Judge, Donald K. Duvall, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436, shall designate the presiding officer.

Responses must be submitted by the named respondents in accordance with § 210.21 of the Commission's Rules of Practice and Procedure, as amended (19 CFR 210.21). Pursuant to §§ 201.16)d) and 210.21(a) of the Rules, such responses will be considered by the United States International Trade Commission if received no later than 20 days after the date of service of the complaint. Extensions of time for submitting a response wil not be granted unless good and dufficient cause therefor is shown.

Failure of a respondent to file a timely response to each allegation in the complaint and in this notice may be deemed to constitute a waiver of the right to appear and contest the allegations of the complaint and this notice, and will authorize the presiding officer and the United States International Trade Commission, without further notice to the respondent, to find the facts to be as alleged in the complaint and in this notice and to enter both a recommended determination and a final determination containing such findings.

The complaint is available for inspection by interested persons at the Office of the Secretary, United States International Trade Commission, 701 E Street, N.W., Washington, D.C. 20436, and in the Commission's New York City Office, 6 World Trade Center, New York, New York 10048.

By order of the Commission.

Issued: January 12, 1979.

KENNETH R. MASON,
Secretary.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (79-13)]

NASA ADVISORY COUNCIL

Meeting

The NASA Advisory Council will meet on February 6 and 7, 1979, in room 7002, Federal Office Building 6, 400 Maryland Avenue, SW, Washington, DC 20546. The meeting will be open to the public up to the seating capacity of the room (about 60 persons, including Council members and other participants). Visitors will be requested to sign a visitor's register.

The NASA Advisory Council was established as an interdisciplinary group to advise NASA senior management on NASA's aeronautics and space programs. The Council is concerned with providing advice in the substantive areas of aeronautics, life sciences, space and terrestrial applications, space sciences, space systems and technology and history as they relate to aeronautics and space programs. The Chairperson of the Council is Dr. William A. Nierenberg. There are currently fifteen members on the Council and additional members on standing committees which report to the Council. The following list sets forth the approved schedule for the meeting. For further information contact the Executive Secretary, Mr. Nathaniel B. Cohen, Area Code 202 755-8383, NASA Headquarters, Washington, DC 20546.

AGENDA

FEBRUARY 6, 1979

8:30 a.m.—Chairperson's Opening Remarks
8:45 a.m.—Review of Space Policy
10:00 a.m.—Summary of NASA FY 1980 Budget Proposal
11:00 a.m.—Summary of NASA FY 1980-1984 Five Year Plan
1:00 p.m.—NASA FY 1981-1985 Five Year Planning
2:45 p.m.—Balance Between Science/Technology Activities and Hardward Projects
3:15 p.m.—Discussion of Post-2000 Goals
4:00 p.m.—Innovation Group
4:45 p.m.—Adjourn

FEBRUARY 7, 1979

8:30 a.m.—Comparative National Space Programs
10:15 a.m.—NASA's International Cooperative Space Programs
11:00 a.m.—NAC Committee and Subcommittee Reports
2:15 p.m.—Examination of Peer Review Process, A Status Report
2:45 p.m.—New Business
3:30 p.m.—Adjourn

ARNOLD W. FRUTKIN,
Associate Administrator for External Relations.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50-331]

IOWA ELECTRIC LIGHT & POWER CO., ET AL.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 47 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of its date of issuance.

The amendment authorizes Iowa Electric Light and Power Company (the licensee) to operate the Duane Arnold Energy Center with safe-ends of a modified design installed on the eight primary recirculation system inlet lines. The safe-ends are a transition piece between the recirculation system piping and the inlet nozzles on the reactor vessel.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR Section 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 31, 1978 as supplemented by letter dated December 8, 1978, (2) Amendment No. 47 to License No. DPR-49, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Cedar Rapids Public Library, 426 Third Avenue, S.E., Cedar Rapids, Iowa 52401. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland this 8th day of January 1979

For the Nuclear Regulatory Commission.

THOMAS A. IPPOLITO,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

[FR Doc. 79-1273 Filed 1-16-79; 8:45 am]

[7590-01-M]

[Docket No. 50-331]

IOWA ELECTRIC LIGHT & POWER CO., CENTRAL IOWA POWER COOPERATIVE, AND CORN BELT POWER COOPERATIVE

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 48 to Facility Operating License No. DPR-49 issued to Iowa Electric Light and Power Company, Central Iowa Power Cooperative, and Corn Belt Power Cooperative, which revised Technical Specifications for operation of the Duane Arnold Energy Center, located in Linn County, Iowa. The amendment is effective as of the date of issuance.

The amendment consists of changes to the Technical Specifications to: (1) revise the operating limit-minimum critical power ratio restrictions as a result of reanalysis of the postulated fuel loading error and loss of feedwater heating, (2) reduce the set point on one of the six safety relief valves from 1090 psig to 1080 psig to reduce potential stresses on the torus support system, (3) delete the requirement to change the names on the plant staffing organization chart with a change in one of the incumbents, (4) delete reference to a hydraulic snubber that has been removed from the plant and (5) delete the section on respiratory protection since these requirements have been superseded by 10 CFR 20.103.

The applications for the amendment comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR Section 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the applications for amendments dated July 7, 1977, June 21, 1978 and July 25, 1978 and the Commission's generic letter to Iowa

V 4 4 / 1 2 J A 1 7 7 9 UMI

Electric Light and Power Company of July 29, 1977 on respiratory protective equipment (2) Amendment No. 48 to License No. DPR-49, and (3) the Commission's related Safety Evaluation. [7590-01-M]

[Docket Nos. 50-443A and 50-444A]

PUBLIC SERVICE CO. OF NEW HAMPSHIRE, ET AL.

Receipt of Correction to the Attorney General's Advice

The Commission has received, pursuant to section 105c of the Atomic Energy Act of 1954, as amended, the following letter from the Attorney General of the United States dated December 29, 1978, which corrects the letter of additional advice from the Attorney General of the United States, dated December 19, 1978, and published in the FEDERAL REGISTER on December 27, 1978 (43 FR 60355) with respect to a construction permit application for Seabrook Nuclear Power Station, Units No. 1 and No. 2:

In my letter to you of December 19, 1978, pertaining to Seabrook Nuclear Power Station, Units 1 and 2, NRC Docket Nos. 50-443A and 50-444A, I referred to my previous advice letter of August 27, 1977, relating to Millstone Nuclear Power Station, Unit No. 3, NRC Docket No. 50-423A, indicating the Maine Public Service Company had undergone affirmative antitrust review. In fact, it was Central Maine Power Company which had received antitrust clearance from the Department. In all other respects my letter of December 19 was accurate and our advice that an antitrust hearing would not be necessary is unaffected.

For the Nuclear Regulatory Commission.

JEROME SALTZMAN,
Chief, Antitrust and Indemnity Group, Office of Nuclear Reactor Regulation.

[FR Doc. 79-1553 Filed 1-16-79; 8:45 am]

[7590-01-M]

REGULATORY GUIDES

Changes in Procedures for Developing and Issuing Regulatory Guides

The Nuclear Regulatory Commission, in its continuing effort to provide for increased public participation in the regulatory process, is making a change in the procedures for developing and issuing its regulatory guides. This change is intended to involve the public early in guide development, before a proposed guide has received complete staff review and an official NRC staff position has been established.

New regulatory guides and substantive changes to existing guides will be mailed in draft form directly to the regulatory guide distribution list, which includes professional societies, industry, public interest groups, unions, and government agencies. Each draft guide will be accompanied by a draft of an associated value/impact statement. Public comments will be requested on both the draft guide and the draft of its value/impact statement in a FEDERAL REGISTER notice and in the direct mailing. The comment period will normally be 60 days. The Division Director in the Office of Standards Development responsible for developing the draft guide will, without higher-level management review, authorize its issuance and will sign the FEDERAL REGISTER notice.

In the case of regulatory guides related to nuclear power plants, an additional change will be made. Previously, these guides were reviewed by the Regulatory Requirements Review Committee (RRRC), a committee representing top NRC management, before they were issued for comment. Under the new procedure, the RRRC will not review the guide until public comments have been received. Thus the RRRC will have the public comments on both the guide and its value/impact statement to consider in developing its recommendations. A summary of the results of the RRRC meeting, the Committee's recommendations, and all of the associated documents and comments considered by the RRRC in reaching its recommendations will be made publicly available shortly after each Committee meeting. Except in those instances in which public health and safety considerations require more expeditious implementation, no action will be taken to implement the Committee's recommendations until after they have been made publicly available.

As in the past, the advice of the Regulatory Activities Subcommittee of the Advisory Committee on Reactor Safeguards will be requested on drafts of regulatory guides related to nuclear power plants before public comment is solicited. After public comments have been resolved, the Subcommittee will review the revised draft, and the full Committee will be asked to concur in the guide's regulatory position.

The primary purposes of regulatory guides are (1) to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and in some cases to delineate techniques used by the staff in evaluating specific problems or postulated accidents and (2) to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses. Regulatory guides are not intended as substitutes for regulations, and therefore compliance with these guides is not required. Methods and solutions different from those set out in the guides will be acceptable if they provide a basis for the findings requisite to the issuance or continuance of a permit or license by the Commission.

Nothing in the foregoing should be construed to imply that comments and suggestions are encouraged only on the draft version of a regulatory guide. Comments and suggestions in connection with improvements in all published guides are encouraged at any time, and the guides will be revised periodically, as appropriate, to accommodate comments and to reflect new information or experience in areas covered by the guides.

Comments and suggestions for improvements in all guides, including draft guides and their value/impact statements, should be sent to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

Regulatory guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. Requests for single copies of draft guides and the latest revision of issued guides or for placement on an automatic distribution list for single copies of future guides should be made in writing to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Technical Information and Document Control. Telephone requests cannot be accommodated. Regulatory guides are not copyrighted and Commission approval is not required to reproduce them.

(5 U.S.C. 552(a))

Dated at Rockville, Maryland, this 9th day of January 1979.

For the Nuclear Regulatory Commission.

ROBERT B. MINOGUE,
Director, Office of Standards Development.

OFFICE OF MANAGEMENT AND BUDGET

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on January 10, 1979 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes:

The name of the agency sponsoring the proposed collection of information;

The title of each request received;

The agency form number(s), if applicable;

The frequency with which the information is proposed to be collected;

An indication of who will be the respondents to the proposed collection;

The estimated number of responses;

The estimated burden in reporting hours; and

The name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

CLEARANCE OF REPORTS

List of Requests

The following is a list of requests for clearance of reports intended for use in collecting information from the public received by the Office of Management and Budget on January 9, 1979 (44 U.S.C. 3509). The purpose of publishing this list in the FEDERAL REGISTER is to inform the public.

The list includes:

The name of the agency sponsoring the proposed collection of information;

The title of each request received;

The agency form number(s), if applicable;

The frequency with which the information is proposed to be collected;

An indication of who will be the respondents to the proposed collection;

The estimated number of responses;

The estimated burden in reporting hours; and

The name of the reviewer or reviewing division or office.

Requests for extension which appear to raise no significant issues are to be approved after brief notice thru this release.

Further information about the items on this daily list may be obtained from the Clearance Office, Office of Management and Budget, Washington, D.C. 20503, 202-395-4529, or from the reviewer listed.

OFFICE OF THE SPECIAL REPRESENTATIVE FOR TRADE NEGOTIATIONS

[Docket No. 301-13]

TANNER'S COUNCIL OF AMERICA SECTION 301 COMMITTEE

Hearing on Proposed Action

Pursuant to Section 301(e)(1) of the Trade Act of 1974, regulations of the Office of the Special Representative for Trade Negotiations (STR) (Title 15 CFR 2006.5), and Executive Order No. 11846, the Section 301 Committee is by this notice requesting the submission of views of interested persons on proposed action in the form of quotas and or increased duties against certain products from Japan (see Annex). The hearing will also cover views with respect to other actions affecting the exportation of raw hides to Japan which have been proposed by interested persons in the private sector. A public hearing will be held on February 27, 1979 and will continue on February 28 if necessary, at which time interested parties may submit oral or written views.

This proposed action is a result of the maintenance by the Government of Japan of quantitative restrictions and administrative obstacles which

have virtually precluded selling of U.S. leather in the Japanese market. These quantitative restrictions and administrative obstacles were imposted at a time when Japan was facing a serious balance of payments situation and apparently were justified as a way to help alleviate the balance of payment problem. Despite the resolution of the balance of payment situation, however, the Government of Japan has nevertheless retained its quantitative restrictions on leather and has exacerbated the restrictive effects of these quotas by administrative obstacles which make it almost impossible for U.S. leather producers to fill even the small quota they have reportedly been granted. The size of the quota has not been disclosed by the Government of Japan but the best information of the U.S. Government is that this quota is *de minimis.*

In August of 1977 the Tanner's Council of America filed a complaint pursuant to Section 301 charging that these Japanese quantitative restrictions, high tariffs and administrative obstacles are unjustifiable and unreasonable import restrictions within the meaning of Section 301 of the Trade Act (See FEDERAL REGISTER of August 23, 1977, 42 FR page 42413). A hearing on the Tanner's complaint was held on October 11, 1977 and the U.S. Government initiated discussions with the Government of Japan pursuant to the recommendations of the Section 301 Committee. After numerous meetings with the Government of Japan on this subject, there has been no successful resolution of this dispute and the Japanese restrictions continue. The United States has also filed a formal complaint with the General Agreement on Tariffs and Trade, requesting that international body to determine that these restrictions violate Japan's international obligations. A panel of experts has been formed to hear the U.S. complaint and to report its findings to the Contracting Parties to the GATT.

Under Section 301(a) of the Trade Act, the President shall take all the appropriate and feasible steps to obtain the elimination of unjustified restrictions against U.S. Commerce.

It is proposed that should the Japanese restrictions not be removed or significantly liberalized the U.S., pursuant to Section 301(a) of the Trade Act, impose import restrictions in the form of quotas, or increase duties on, imports from Japan of the products listed in the annex to this notice.

Since the filing of this complaint and the hearing on this issue, interested parties have also recommended that the U.S. take some type of action limiting or otherwise affecting the exportation of raw hides to Japan as a response to the actions by Japan in the leather sector.

Interested persons are invited to submit their written views or oral testimony on both the proposed action with respect to import restrictions and the recommendations made by interested persons in the private sector with respect to possible actions affecting exports to Japan.

HEARINGS

I. Hearings on the above mentioned matters will be held on Tuesday, February 27, 1979, and if necessary February 28, 1979. Hearings will be held at the Office of the Special Representative for Trade Negotiations, 1800 G Street NW., Washington, D.C.—Room 730, beginning at 10:00 a.m.

II. Requests to present oral testimony and accompanying briefs must be received on or before February 20, 1979. Written briefs from those persons not wishing to present oral testimony should be received in the Office of the Special Representative for Trade Negotiations on or before the date of the hearing, February 27, 1979, in order to be considered by the Section 301 Committee.

Interested persons are advised to refer to the regulations promulgated by the Office of the Special Representative for Trade Negotiations covering procedures to be followed in all Section 301 proceedings (15 CFR Part 2006 as amended by FEDERAL REGISTER notice of Tuesday, October 18, 1977 page 55611). Please note that all communications to the Chairman of the Section 301 Committee should be addressed to the Office of Special Representative for Trade Negotiations—Room 715, 1800 G Street NW., Washington, D.C. 20506.

a. Submission of Briefs and Requests to Present Oral Testimony. Requests for oral testimony and submission of written briefs should conform to the procedures set forth in 15 CFR 2006.6 and 2006.7 (found in the FEDERAL REGISTER of August 28, 1975, page 39497).

b. Rebuttal Briefs. In order to assure parties an opportunity to contest information provided by other interested parties in written briefs and oral testimony, rebuttal briefs may be filed by any party within 15 days after the transcript of the hearing becomes available.

c. Attendance at Hearings. The hearing will be open to the public.

SHIRLEY A. COFFIELD,
Chairman 301 Committee, Office of the Special Representative for Trade Negotiations.

	Articles chiefly used for preparing, serving, or storing food or beverages, or food or beverage ingredients:
	Of fine-grained earthenware, whether or not decorated, having a reddish-colored body and a lustrous glaze which, on teapots, may be any color, but which, on other articles, must be mottled, streaked, or solidly colored brown to black with metallic oxide or salt:
533.14	Valued not over $1.50 per dozen articles
533.16	Valued over $1.50 per dozen articles
	Of fine-grained earthenware (except articles provided for in items 533.14 and 533.16) or of fine-grained stoneware:
	Available in specified sets:
533.28 ¢/pt.	In any pattern for which the aggregate value of the articles listed in headnote 2(b) of schedule 5, subpart 2-C of the Tariff Schedules of the United States is over $38
	Not available in specified sets:
	[Steins, mugs, candy boxes, decanters, punch bowls, pretzel dishes, tidbit dishes, tiered servers, and bonbon dishes]
	Other articles:
533.38	Cups valued over $1.70 per dozen, saucers valued over $0.95 per dozen, plates not over 9 inches in maximum diameter and valued over $1.55 per dozen, plates over 9 but not over 11 inches in maximum diameter and valued over $2.65 per dozen, and other articles valued over $3.40 per dozen

TSUS item	Article
	Articles chiefly used for preparing serving, or storing food or beverages, or food or beverage ingredients (con):
	Of nonbone chinaware or of subporcelain:
533.51	Hotel or restaurant ware and other ware not household ware
	Household ware available in specified sets:
533.66	In any pattern for which the aggregate value of the articles listed in headnote 2(b) of schedule 5, subpart 2-C of the Tariff Schedules of the United States is over $24 but not over $56
533.68	In any pattern for which the aggregate value of the articles listed in headnote 2(b) of schedule 5, subpart 2-C of the Tariff Schedules of the United States is over $56
	Household ware not covered by item 533.63, 533.65, 533.66, 533.68, or 633.69:
533.71	Steins, mugs, candy boxes, decanters, punch bowls, pretzel dishes, tidbit dishes, tiered servers, and bonbon dishes
	Other articles:
533.77	Cups valued over $4 per dozen, saucers valued over $1.90 per dozen, plates not over 9 inches in maximum diameter and valued over $3.40 per dozen, plates over 9 but not over 11 inches in maximum diameter and valued over $6 per dozen, and other articles valued over $11.50 per dozen
	Ferroalloys:
	Ferromanganese:
607.36	Containing over 1 percent but not over 4 percent by weight of carbon
607.37	Containing over 4 percent by weight of carbon
	Angles, shapes, and sections, all the foregoing, of iron or steel, hot rolled, forged, extruded, or drawn, or cold formed or cold finished, whether or not drilled, punched, or otherwise advanced; sheet piling of iron or steel:
	Angles, shapes, and sections:
	Hot rolled; or, cold formed and weighing over 0.29 pound per linear foot:
	Drilled, punched, or otherwise advanced:
609.84	Other than alloy iron or steel
609.86	Alloy iron or steel

TSUS item	Article
	Wood screws (including lag screws or bolts) of base metal:
	Of iron or steel:
646.4920	Lag screws or bolts
	Pliers, nippers, and pincers, and hinged tools for holding and splicing wire; tin snips, bolt and chain clippers, and other metal cutting shears; pipe cutters and other pipe tools; spanners and wrenches; files (except nail files), and rasps; all the foregoing which are hand tools, and metal parts thereof:
	Pliers, nippers, and pincers, and hinged tools for holding and splicing wire, and parts of the foregoing:
648.81	Slip-joint pliers
648.97	Pipe tools (except cutters), wrenches, and spanners, and parts thereof
649.37	Vises and clamps (except parts of, or accessories for, machine tools)
	Scissors and shears (except machines and except shears provided for in any of the foregoing provisions), and blades therefor:
650.91	Valued over $1.75 per dozen
	Hangars and other buildings, bridges, bridge sections, lock-gates, towers, lattice masts, roofs, roofing frameworks, door and window frames, shutters, balustrades, columns, pillars, and posts, and other structures and parts of structures, all the foregoing of base metal:
	Of iron or steel:
	Columns, pillars, posts, beams, girders, and similar structural units:
	Not in part of alloy iron or steel:
	[Cast-iron (except malleable cast-iron) articles, rough or advanced]
652.94	Other
	In part of alloy iron or steel:
652.96	[In part of stainless steel]
652.98	Other
	Other

POSTAL RATE COMMISSION

[Docket No. MC79-2; Order No. 232]

EXPRESS MAIL METRO SERVICE, 1978

Order Granting Petitions for Intervention, Allowing Participation, Designating Presiding Officer and Officer of the Commission, Fixing Date for a Prehearing Conference, and Establishing Procedures

JANUARY 10, 1979.

The United States Postal Service filed with the Postal Rate Commission, on December 7, 1978, a request for a recommended decision on establishing an express mail metro service. The Commission issued a notice to that effect on December 12, 1978. The notice was published in the FEDERAL REGISTER on December 15, 1978 (43 FR 58664). The notice announced the docketing of the Postal Service's request as MC79-2 and directed persons who wished to participate in Docket No. MC79-2 to file, on or before December 29, 1978, petitions for leave to intervene or requests for leave to be heard as a limited participator. The notice also invited persons who wished to express their views, but did not wish to become a party or limited participator, to file comments (39 CFR §§ 3001.19-.20).

I. INTERVENTION

Seventeen persons have petitioned to intervene in Docket No. MC79-2 and five persons have requested to be heard as limited participators. These persons are listed in Attachment A.

The persons listed in Attachment A either are users of the mails or have otherwise demonstrated an interest in Docket MC79-2. Accordingly, the requests for participation will be granted. The Service's opposition as to the intervention of the Office of Advocacy, U.S. Small Business Administration, will be denied and the petition granted. The Commission has concluded that the U.S. Small Business Administration's general statutorily derived duty to represent the interests of small businesses before Federal agencies gives it standing to intervene in Docket MC79-2.[1] We distinguish the derivative interests of a Federal agency from the interests of a private firm which we discussed in Order No. 226 (December 15, 1978), cited by the Postal Service in its pleading.

Pursuant to § 65 of the rules of practice (39 CFR § 3001.65) the Service will be required to serve copies of its Request and its prepared direct evidence upon the persons identified in Attachment A and upon the Officer of the Commission. Where service upon more than one representative has been requested in the petition to intervene or request to be heard as a limited participator, the Service will be required to serve only the first two named representatives in the petition. *See* §§ 12(c) and (d) of the rules of practice [39 CFR §§ 3001.12(c)-(d)].

II. APPOINTMENT OF PRESIDING OFFICER AND DATE OF INITIAL PREHEARING CONFERENCE

In furtherance of the Commission's desire for expeditious consideration and pursuant to § 30(b) of the Commission's rules of practice [39 CFR § 3001.30(b)], the Commission will conduct all prehearing conferences and hearings en banc. Clyde S. DuPont, Chairman, will be the presiding officer in such proceedings [39 CFR §§ 3001.5(e), 3001.23]. An initial prehearing conference will be held on January 31, 1979 at 9:30 a.m. and, thereafter, on such further dates as may be designated by the presiding officer. Subsequent conferences and hearings will commence each day at 9:30 a.m. at the Postal Rate Commission's hearing room, suite 500, 2000 L Street, N.W., Washington, D.C. 20268, and shall be on the record and a transcript made except where the presiding officer determines otherwise.

III. APPOINTMENT OF THE OFFICER OF THE COMMISSION

The Officer of the Commission (OOC) designated to represent the general public [*see* 39 U.S.C. § 3624(a)] in this proceeding will be Stephen L. Sharfman[2] as was noted in the FEDERAL REGISTER on December 15, 1978 (43 FR 58664). During this proceeding, the OOC will direct the activities of Commission personnel assigned to assist him, and neither he nor any such personnel will participate in nor advise as to any Commission decision in the case. *See* 39 CFR § 3001.8. The OOC will supply for the record, at the appropriate time, the names of all Commission personnel assigned to assist him in this case. In this proceeding the OOC shall be separately served three copies of all findings in addition to and simultaneously with, service on the Commission of the 25 copies required by § 10(c) of the rules of practice [39 CFR § 3001. 10(c)].

IV. PROCEDURES FOR EXPEDITION

To the degree consistency with procedural fairness permits, it is our intention to expedite the proceedings in this docket.[3] Accordingly, we are issuing a proposed schedule of procedural stages (including dates for the first three stages) which all participants should review and be prepared to comment upon at the initial prehearing conference. *See* Attachment B. We also alert the parties that our intention to expedite this proceeding applies with equal force to the briefing stage following the close of the record. Parties should therefore be prepared to adhere to a briefing schedule consonant with this policy.

V. PREHEARING CONFERENCE STATEMENTS

In preparation for the initial prehearing conference, each participant should serve a document captioned "Prehearing Conference Statement" on or before January 24, 1979, containing the following:

1. A suggested list which states with particularity the issues the party believes should be addressed in this case. (Asterisks, denoting those issues on which the party intends to present evidence, should precede the stated issue.)

2. A statement of the participant's tentative position on each of the proposed issues.

3. A brief statement describing for each issue the evidence, if any, the participant proposes to introduce.

4. A legal memorandum, where appropriate, in support of the issues proposed, the positions taken, the evidence to be presented and other legal matters which should be considered.

5. Any other matter the participant believes should be pursued at the prehearing conference.

Prior to the initial prehearing conference, all participants are encouraged formally and promptly to inform the Postal Service of desired preliminary clarification in the Service's presentation which each participant believes necessary in order to expedite this proceeding.

The Commission orders: (A) Each of the petitioners identified in Attach-

[1] *Cf.* Public Service Commission of the State of New York v. Federal Power Commission, 295 F.2d 140 (D.C. Cir. 1961), and In the Matter of National Association of Securities Dealers, Inc., 15 SEC 577 (1944), (holding that intervention of Federal agencies in administrative proceedings upon filing of notice to intervene pursuant to rules of practice is sufficient to establish standing).

[2] Mr. Sharfman is the Commission's Acting Assistant General Counsel (Litigation).

[3] The Postal Reorganization Act requires us to consider requests for changes in the classification schedule "promptly" and to conduct proceedings "with utmost expedition consistent with procedural fairness" [29 U.S.C. § 3624]. While the statute does not specify a particular time frame for classification cases, we are inclined to adopt the 10-Month schedule to which we must adhere in rate cases [*see* 39 U.S.C. § 3624(c)] as a general guideline. Of course, some cases can, and will, be completed in considerably less time, and we recognize that others which involve particularly complex or novel issues may require somewhat lengthier proceedings.

V 4 4 / 1 2 J A 1 7 7 9 UMI

V 4 / 12 J A 17 79 UMI

ment A to this Order is hereby permitted to intervene or to become a limited participator in this proceeding, subject to the provisions of paragraph (C), below.

(B) The Postal Service's motion opposing the intervention of the Office of Advocacy, U.S. Small Business Administration is denied.

(C) The participation of the intervenors and limited participators permitted by paragraph (A), above, is subject to the rules and regulations of the Commission: *Provided, however,* that their participation shall be limited to matters affecting rights and interests specifically set forth in their respective petitions to intervene and requests to become limited participators, and *Provided, further* that the admission of such intervenors and limited participators shall not be construed as recognition by the Commission that they, or any of them, might be aggrieved because of any order or orders issued by the Commission in this proceeding.

(D) The Postal Service shall serve copies of its Request and its prepared direct evidence upon representatives of petitioners permitted to intervene and the representatives of the limited participators. For purposes of such service, where service upon more than one representative has been requested in the petition to intervene or in a request for leave to be heard as a limited participator, including those petitions and requests filed jointly and severally by two or more persons, only the first two named representatives in the petition need be served.

(E) The Commission will sit en banc, with Clyde S. DuPont, Chairman, as presiding officer, in the above-captioned proceeding.

(F) A prehearing conference in this proceeding will be held on January 31, 1979, commencing at 9:30 a.m. in the Postal Rate Commission hearing room, suite 500, 2000 L Street NW., Washington, D.C. 20268. The conference will be held for the purposes specified in § 24 of the Commission's rules of practice (39 CFR § 3001.24) and in this Order, and to afford all participants in the proceeding an opportunity to be heard with respect to the procedures to be followed in expeditiously determining the issues to be resolved in Docket No. MC79-2. The conference proceedings shall be recorded by an official reporter except where otherwise directed by the presiding officer.

(G) Stephen L. Sharfman, Acting Assistant General Counsel (Litigation), has been designated as the Officer of the Commission to represent the general public in this proceeding. Service of documents on the Commission shall not constitute service on the OOC, who shall separately be served three copies of all documents.

By the Commission.

DAVID F. HARRIS,
Secretary.

SECURITIES AND EXCHANGE COMMISSION

ADVISORY COMMITTEE ON OIL AND GAS ACCOUNTING

ACTION: Notice of Meeting of the Securities and Exchange Commission Advisory Committee on Oil and Gas Accounting.

SUMMARY: The initial meeting of the Securities and Exchange Commission Advisory Committee on Oil and Gas Accounting will be held on Tuesday, January 30, 1979, at the Commission's headquarters in Washington, D.C. beginning at 9:30 a.m. The meeting will be open to the public.

FOR FURTHER INFORMATION CONTACT:

James L. Russell, Securities and Exchange Commission, 500 North Capitol Street, Washington, D.C. 20549 (202-755-0222).

SUPPLEMENTARY INFORMATION: The Commission has established an Advisory Committee on Oil and Gas Accounting to advise the Chief Accountant of the Commission on various matters relating to the development of reserve recognition accounting for oil and gas producers. Formation of the Advisory Committee was announced on January 4, 1979 (Securities Act Release No. 6011, 44 FR 3112).

The Commission expects to announce the names of the members of the Advisory Committee within the next few days. An open meeting of the committee will be held in Room 776 of the Commission's headquarters office at 500 North Capitol Street, Washington, D.C. 20549, on Tuesday, January 30, 1979, beginning at 9:30 A.M. The summarized agenda for the meeting is as follows:

1. Discussion of issues relating to disclosure of reserve information in 10-K filings for 1978.
2. Discussion of the proposed supplemental earnings summary for oil and gas producing activities.
3. Consideration of cost-effective standards for reserve valuations.

Although unanticipated delays in the formation of the Committee have prevented prior public notice of this meeting, it has been determined that it is necessary for the Advisory Committee to hold its initial meeting January 30 to insure that matters relating to reserve recognition accounting can be addressed in a timely manner, particularly with regard to possible additional guidance on disclosure of reserve information for 1978.

By the Commission.

GEORGE A. FITZSIMMONS,
Secretary.

[Administrative Proceeding File No. 3-5617; File No. 81-446]

BASIC FOOD INDUSTRIES, INC.

Application and Opportunity for Hearing

JANUARY 4, 1979.

Notice is hereby given that Basic Food Industries, Inc. ("Applicant") has filed an application pursuant to Section 12(h) of the Securities Exchange Act of 1934, as amended (the "1934 Act"), for an order granting Applicant an exemption from the provisions of Sections 13 and 15(d) of the 1934 Act.

The Applicant states in part:

1. On November 1, 1978, Applicant merged with and became a wholly-owned subsidiary of Eastern Shores Food Corporation of Delaware, Inc. As a result of this merger, Applicant no longer has any publicly owned common stock.

2. No eligible shareholders remain dissenting from the merger.

3. The merger transaction was reported in detail in the Applicant's merger proxy statement dated September 22, 1978.

Applicant argues that the granting of the exemption would not be inconsistant with the public interest or the protection of investors.

For a more detailed statement of the information presented, interested persons are referred to said application which is on file in the office of the Commission at 500 North Capitol Street, Washington, D.C. 20549.

Notice is further given that not later than January 29, 1979, any interested person may submit to the Commission in writing his views on any substantial facts bearing on this application or the desirability of a hearing thereon. Any such communication or request should be addressed: Secretary, Securities and Exchange Commission, 500 North Capitol Street, N.W., Washington, D.C. 20549, and should state briefly the nature of the interest of the person submitting such information or requesting the hearing, the reason for such request, and the issues of fact and law raised by the application which he desires to controvert. At any time after said date, an order granting the application may be issued upon request or upon the Commission's own motion.

For the Commission, by the Division of Corporation Finance, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

SMALL BUSINESS ADMINISTRATION

[License No. 02/02-5286]

EQUICO CAPITAL CORP.

Filing of Application for Approval of Conflict of Interest Transaction

Notice is hereby given that Equico Capital Corporation (Equico), 1270 Avenue of the Americas, New York New York 10020, a Federal licensee under Section 301(d) of the Small Business Investment Act of 1958, as amended (Act), has filed an application pursuant to 13 CFR 107.1004 (1979) for approval of a conflict of interest transaction.

It is proposed that Equico invest $500,000 in Prepac Inc., a company owned by Mr. Howard H. Mackey, III, 5900 Arlington Avenue, Apartment 12-F, Riverdale, New York 10471 as follows:

(1) $200,000 in 10 percent ten year subordinated debentures. These debentures will also carry warrants enabling Equico to purchase 3,324 shares (8 percent) of the corporation's common stock.

(2) Purchase of $300,000 of the company's 8 percent preferred stock.

Mr. Howard H. Mackey III is the former President of Equico who resigned August 25, 1978 and, therefore, pursuant to § 107.3(a) of the regulations, he is considered to be an associate of the licensee at this time.

Accordingly, the transaction falls within the purview of 13 CFR 107.1004 (1979) requiring prior written approval of the Small Business Administration (SBA).

Notice is further given that any person may, not later than February 1, 1979, submit to SBA, in writing, relevant comments on the proposed transaction. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, NW., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Detroit, Michigan.

(Catalog of Federal Domestic Assistance Program No. 59.011, Small Business Investment Companies.)

Dated: January 10, 1979.

PETER F. MCNEISH,
Deputy Associate Administrator for Investment.

INTERCAPCO, INC.

Filing of an Application for Approval of a Conflict of Interest Transaction

Notice is hereby given that the Small Business Administration is considering what actions it may appropriately take with respect to a transaction consummated in violation of § 107.1004 of the regulations governing small business investment companies (13 CFR 107.1004 (1978)). Matters involved in SBA's consideration of the request include the substantive or non- substantive nature of the violation.

Intercapco, Inc. (Intercapco), One Erieview Plaza, Cleveland, Ohio 44114, is a Federal Licensee under the Small Business Investment Act of 1958, as amended (the Act).

On February 15, 1978, Intercapco invested $298,800 in the Cleveland Magazine Company (CMC). At the time of the Licensee's financing, Mr. Glen Golenberg, Chairman of the Board, Treasurer and Director of the Licensee, was a director of CMC. Mr. Golenberg is an associate of the Licensee as defined in § 107.3(a) of the regulations. CMC is an associate of the Licensee as defined in § 107.3(f) of the regulations. As a result, the Licensee's financing of CMC fell within the purview of § 107.1004(b)(1) of the regulations which provides that, except where a written exemption may be granted in special circumstances in furtherance of the purposes of the Act, a licensee shall not provide financing to any of its associates. The Licensee did not request nor was a written exemption granted prior to the consummation of the financing.

Notice is hereby given that any person may, no later than February 16, 1979, submit to the Small Business Administration, in writing, relevant comments on this transaction. Any such communications should be addressed to: Deputy Associate Administrator for Investment, Small Business Administration, 1441 "L" Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Cleveland, Ohio.

MAXIMUM INTEREST RATES

Notice is given that the Small Business Administration ("SBA") has established the maximum rates of interest that lending institutions participating with SBA may charge on loans approved by SBA on and after January 8, 1979, under Section 7 of the Small Business Act, as amended, and Section 502 of the Small Business Investment Act, as amended.

Effectively January 8, 1979, the maximum rate of interest acceptable to SBA on a guaranteed loan or a guaranteed revolving line of credit shall be twelve percent (12%) per year, and the maximum rate on an immediate participation loan shall be eleven percent (11%) per year. These maximum interest rates are three-fourths percent higher than the rates published in the FEDERAL REGISTER on October 12, 1979, and shall remain in effect until notification of a change is issued by SBA.

In recognition of the substantially different characteristics of the economy of Alaska, including a substantially higher level of loan interest rates as compared with the "lower 49 states", an interest rate differential of three fourths percent (¾%) above the maximum allowable interest rate otherwise applicable for SBA loans remains in effect for SBA loans made to borrowers in Alaska by lenders located in Alaska. This action is taken in light of the relatively limited availability of loan funds and the higher costs experienced by lenders in Alaska. The action is consistent with the fact that SBA has published a size standard differential for Alaskan small businesses and has recognized differentials to wage scales and cost of living allowances as applicable to Alaska.

This Notice is issued under 13 CFR 120.3(b)(2)(iv). Catalog of Federal Domestic Assistance Programs:

[Application No. 04/04-5158]

SAFECO CAPITAL, INC.

Notice of Application for a License To Operate as a Small Business Investment Company

An application for a license to operate as a small business investment company under the provisions of the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 *et. seq.*) has been filed by Safeco Capital, Inc. (applicant) with the Small Business Administration pursuant to 13 C.F.R. 107.102 (1978).

The officers and directors are as follows:

Rene J. Leonard, President & Director, 309 N.W. 27th Avenue, Miami, Florida 33125.
Martha P. Leonard, Secretary/Treasurer, 309 N.W. 27th Avenue, Miami, Florida 33125.
Manual P. Ramos, Vice President & Director, 4810 S.W. 87th Avenue, Miami, Florida 33165.

The applicant will maintain its principal place of business at 309 N.W. 27th Avenue, Miami, Florida 33125. It will begin operations with $500,000 of private capital derived from the sale of 1,000 shares to Rene J. Leonard.

The applicant will conduct its operations in Dade, Broward, Monroe and Palm Beach Counties of Florida, which are going through great stress.

As a small business investment company under Section 301(d) of the Act, the applicant has been organized and chartered solely for the purpose of performing the functions and conducting the activities contemplated under the Small Business Investment Act of 1958, as amended from time to time, and will provide assistance solely to small business concerns which will contribute to a well-balanced national economy by facilitating ownership in such concerns by persons whose participation in the free enterprise system is hampered because of social or economic disadvantages.

Matters involved in SBA's consideration of the applicant include the general business reputation and character of the proposed owners and management and the probability of successful operation of the applicant under their management, including adequate profitability and financial soundness, in accordance with the Small Business Investment Act and the SBA Rules and Regulations.

Notice is hereby given that any person may, not later than February 1, 1979, submit to SBA written comments on the proposed applicant. Any such communication should be addressed to the Deputy Associate Administrator for Investment, Small Business Administration, 1441 L Street, N.W., Washington, D.C. 20416.

A copy of this notice shall be published in a newspaper of general circulation in Miami, Florida.

DEPARTMENT OF THE TREASURY

Customs Service

LEATHER WEARING APPAREL FROM ARGENTINA

Final Countervailing Duty Determination

AGENCY: Customs Service, Treasury.

ACTION: Final countervailing duty determination

SUMMARY: This notice is to inform the public that a countervailing duty investigation has resulted in a final determination that the Government of Argentina has not given benefits which are considered to be bounties or grants on the manufacture or exportation of leather wearing apparel.

EFFECTIVE DATE: January 17, 1979.

FOR FURTHER INFORMATION CONTACT:

James Lyons, Office of Tariff Affairs, U.S. Treasury Department, 15th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20220 (202-566-8256).

SUPPLEMENTARY INFORMATION: On July 27, 1977, a "Preliminary Countervailing Duty Determination" was published in the FEDERAL REGISTER (42 FR 38251). The notice stated that it preliminarily had been determined that benefits had been received by the Argentine manufacturer/exporters of leather wearing apparel which might constitute bounties or grants within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (referred to in this notice as "the Act"). The benefits preliminarily determined to be bounties or grants were:

1. Income tax exemptions on certain export related income;
2. Preferential financing for exports;
3. Export rebates or reembolsos;
4. Certain economic development incentives;
5. Drawback of duty on industrial equipment; and
6. Export risk insurance at low rates.

The non-excessive rebate of value added taxes upon the export of goods and the rebate of import duties paid on raw materials used in the production of leather wearing apparel for export were determined not to constitute bounties or grants within the meaning of the Act.

Programs found not to have been utilized by the leather wearing apparel industry included the use of multiple exchange rates favoring exporters and the issuance of tax rebate certificates.

The notice stated further that before a final determination would be made in the proceeding, consideration would be given to any relevant data, views or arguments.

It has now been determined that several of the programs preliminarily determined to be bounties or grants have not been utilized by the leather wearing apparel manufacturer/exporters. These include the economic development incentives, the drawback of duty on industrial equipment, and export risk insurance at low rates. It has also been determined that leather wearing apparel manufacturers and exporters have not utilitzed benefits given to firms located within certain free ports and zones.

Further investigation has disclosed that other practices which were con-

V 4 4 / 1 2

sidered to be bounties in the preliminary determination, in fact, are not. The preferential financing which previously had been available to manufacturer/exporters was discontinued on January 1, 1978. The current interest rates reflect those prevalent commercially. Moreover, a survey, conducted by the Government of Argentina, (which examined the cost structure of a preponderance of the leather apparel manufacturers who export) indicates that indirect taxes assessed on the exported product or physically incorporated components which could be, but which have not been previously, rebated offset the 20 percent reembolso paid to exporters of leather apparel. The amount eligible for rebate did not include offsets based on certain labor related taxes, calculated as a percentage of wages, and other taxes on real estate, credit to industrial corporations, and bank credits, since none of them are physically incorporated in the export and therefore are not directly related to either the manufacture or export of the products concerned. The total incidence of direct taxes eligible for rebate thus calculated, is 21.12 percent of the value of the exported product, more than sufficient to offset the entire reembolso (calculated to provide a 20 percent benefit). Consequently, the grant of the reembolso on leather apparel exports has been determined not to constitute a bounty or a grant within the meaning of the countervailing duty law.

The benefit derived from the income tax exemption on export-related income has been calculated at 1.32 percent of f.o.b. value. However, the indirect tax offset, available after full allowance for the reembolso, is 1.12 percent. Thus, when all benefits received and offsets available are considered, a net benefit of only 0.2 percent remains. This total benefit is considered to be *de minimis*.

On the basis of all information received, it is hereby determined that benefits have been paid or bestowed by the Government of Argentina on the manufacture/exportation of leather wearing apparel in the form of the income tax exemption on export-related income. It has further been determined that these benefits involve an amount which is *de minimis* in size, and that therefore no bounty or grant is being paid or bestowed, directly or indirectly, within the meaning of section 303, Tariff Act of 1930, as amended (19 U.S.C. 1303), upon the manufacture, production or exportation of leather wearing apparel from Argentina.

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Order 190 (Revision 15) March 16, 1978, the provisions of Treasury Department Order 165, Revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to issuance of a final countervailing duty determination by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

DECEMBER 21, 1978.

[4810-22-M]

CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM COLOMBIA

Amendment of Final Countervailing Duty Determination and Modification of Estimated Duty

AGENCY: Customs Service, Treasury.

ACTION: Amendment of final countervailing duty determination and modification of estimated duty.

SUMMARY: This notice is to inform the public that based upon certain revisions in the policies of the Treasury Department as set out in a notice published contemporaneously with this one, a review has been conducted of the "Final Countervailing Duty Determination" issued with respect to certain textiles and textile products from Colombia. No change has been determined necessary with respect to those products which were found not to have benefitted from the payment of bounties or grants.

In the case of certain leather wearing apparel from Columbia, in which bounties or grants were found to exist, changes have been made in the size of the estimated duty to reflect the revision in Treasury policy:

FOR FURTHER INFORMATION CONTACT:

Donald W. Eiss, Office of Tariff Affairs, Department of the Treasury, 15th and Pennsylvania Avenue, N.W., Washington, D.C. 20220 (202-566-8256).

SUPPLEMENTARY INFORMATION: On November 16, 1978, a "Final Countervailing Duty Determination" was published in the FEDERAL REGISTER with respect to Certain Textiles and Textile Products from Colombia (43 FR 53525-53527). In that determination, certain offsets were granted in calculating the size of the net "bounty or grant" consistent with the position established by the Treasury Department in its determination published in the FEDERAL REGISTER of June 15, 1978 (43 FR 25812-25814) with respect to countervailing duties being imposed on unwrought zinc, bottled green olives and nonrubber footwear from Spain. It was also noted that on August 29, 1978 the Treasury Department published in the FEDERAL REGISTER (43 FR 38658) its intention to review the bases upon which the countervailing duties in the Spanish cases were revised, and that if any changes in the policies established on June 15, 1978 were made, the determination being issued with respect to Colombian textiles would also be reviewed.

In a notice published contemporaneous with this action, the Treasury Department has modified the position announced on June 15 and determined that:

> "the net amount of the bounty or grant shall be determined by subtracting from the aggregate amounts of the rebates paid to exporters of a particular product, only those amounts which the government providing such rebates has, to the satisfaction of the Secretary, estimates are paid by the producers of those products, or any prior stage producers, in indirect taxes on any components physically incorporated in the exported product or its packing (making normal allowances for waste). The rebate or export of taxes paid at prior stages of the production process which are not physically incorporated in the exported product shall be considered bounties or grants, as was the case prior to the June decision."

In the case of Colombia, the offset in question involved the non-rebate of the National Sales Tax assessed on machinery used in export production and was found to equal 0.219 percent with respect to those products on which a 5 percent negotiable tax certificate (CAT) is paid, 0.264 percent with respect to those products on which a 9 percent CAT is paid, and 0.228 percent with respect to those products on which a 12 percent CAT is paid.

In the Final Determination, no bounties or grants were found to exist with respect to the products under investigation with the exception of certain leather wearing apparel receiving 12 percent CAT's. With respect to those products receiving a 5 percent CAT, the negative determination was based on the fact that the allowable offsets exceeded the CAT rebate. Despite the change in allowable offsets, offsets still exceed the CAT rebate and therefore no adjustment to our negative Final Determination is necessary.

With respect to products receiving 9 and 12 percent CAT's (except leather apparel), a negative determination was issued upon receipt of certification by Colombian manufacturers of those products that they would voluntarily renounce CAT certificates valued in the amounts found to be "net" bounties or grants. The Colombian manufacturers of products (except leather apparel) receiving 9 and 12 percent CAT's have now agreed to renounce the addition to the "net" bounty stemming from Treasury's revised policy, and therefore there is still no "net" bounty or grant and a negative determination is appropriate.

Regarding certain leather wearing apparel from Colombia, a "net" bounty or grant of 5.94 percent was estimated to exist. Based upon the change in allowable offsets, the "net" bounty or grant is now estimated to be 6.18 percent. Accordingly, a deposit of 6.18 percent will be required upon the entry, or withdrawal from warehouse, for consumption of leather wearing apparel from Colombia entering the U.S. under item number 791.76 of the Tariff Schedules of the United States pending a determination by the U.S. International Trade Commission whether an industry in the United States is being, or is likely to be, injured, or is prevented from being established, by reason of the importation of such article or merchandise into the United States. Until further notice following such determination by the International Trade Commission, liquidation will continue to be suspended upon the entry, or withdrawal from warehouse, for consumption of this merchandise.

In accordance with section 303 of the Act and until further notice, the net amount of such bounties or grants has been estimated to be 6.18 percent of the value of the merchandise.

This amended determination is published pursuant to section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 (Revision 15), March 16, 1978, the provision of Treasury Department Order 165, Revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the issuance of a final countervailing duty determination by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

DECEMBER 21, 1978.

[4810-22-M]

CERTAIN TEXTILES AND TEXTILE PRODUCTS FROM INDIA

Amendment of Final Countervailing Duty Determination

AGENCY: Customs Service, Treasury.

ACTION: Amendment of final countervailing duty determination.

SUMMARY: This notice is to inform the public that based upon certain revisions in the policies of the Treasury Department as set out in a notice published contemporaneously with this one, a review has been conducted of the negative "Final Countervailing Duty Determination" issued with respect to certain textiles and textile products from India. Although certain amendments have been made in the method of calculation, it has been determined that no change in our original negative determination is necessary.

FOR FURTHER INFORMATION CONTACT:

Donald W. Eiss, Office of Tariff Affairs, Department of the Treasury, 15th and Pennsylvania Avenue, N.W., Washington, D.C. 20220 (202-566-8256).

SUPPLEMENTARY INFORMATION: On November 16, 1978, a "Final Countervailing Duty Determination" was published in the FEDERAL REGISTER with respect to Certain Textiles and Textile products from India (43 FR 53525-53527). In that determination, certain offsets were granted in calculating the size of the net "bounty or grant" consistent with the position established by the Treasury Department in its determination published in the FEDERAL REGISTER of June 15, 1978 (43 FR 25812-25814) with respect to countervailing duties being imposed on unwrought zinc, bottled green olives and non-rubber footwear from Spain. It was also noted that on August 29, 1978 the Treasury Department published in the FEDERAL REGISTER (43 FR 38658) its intention to review the bases upon which the countervailing duties in the Spanish cases were revised, and that if any changes in the policies established on June 15, 1978 were made, the determination being issued with respect to Indian textiles would also be reviewed.

In a notice published contemporaneous with this action, the Treasury Department has modified the position announced on June 15 and determined that:

> "the net amount of the bounty or grant shall be determined by subtracting from the aggregate amounts of the rebates paid to exporters of a particular product, only those amounts which the government providing such rebates has, to the satisfaction of the Secretary, estimates are paid by the producers of those products, or any prior stage producers, in indirect taxes on any components physically incorporated in the exported product or its packing (making normal allowances for waste). The rebate on export of taxes paid at prior stages of the production process which are not physically incorporated in the exported product shall be considered bounties or grants, as was the case prior to the June decision."

In the case of India, the program affected involved certain cash rebates which are paid to exporters as a fixed percentage of the f.o.b. value of the exported item. The Indians alleged that no "net" bounty or grant existed as a result of this program since there were allowable offsets which exceeded the benefits bestowed. The offsets in question involved certain taxes paid by Indian manufacturers during the manufacture of the products under investigation but which are not otherwise rebated upon export. In the original investigation the average allowable offsets for all of the products covered by the investigation exceeded the cash rebate received on export for each product and no bounty or grant was determined to exist as a result of this program. Certain of the tax offsets granted, specifically for taxes on consumable stores (spools, reeds, and similar devices that are a part of the machinery and require replacement on a regular basis), fuel and electricity, do not meet the standard cited above and can no longer be considered offsets. Appropriate adjustments having been made, it has been determined that with respect to all of the products included in this investigation, the benefits which have been determined to be bestowed are still *de minimis* in size, and that therefore no bounty or grant is being paid or bestowed, directly or indirectly within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) on the manufacture, production or exportation of the subject merchandise from India.

This amended determination is published pursuant to section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303).

Pursuant to Reorganization Plan No. 26 of 1950 and Treasury Department Order 190 (Revision 15), March 16, 1978, the provision of Treasury Department Order 165, Revised, November 2, 1954, and § 159.47 of the Customs Regulations (19 CFR 159.47), insofar as they pertain to the issuance of an amended final countervailing duty determination by the Commissioner of Customs, are hereby waived.

ROBERT H. MUNDHEIM,
General Counsel of the Treasury.

Office of the Secretary

INCOME TAX TREATY

Announcement of United States and Nigeria Discussion

Representatives of the United States and Nigeria will meet in Washington in late January to begin discussions on a new income tax treaty between the two countries, the Treasury Department announced today.

The current treaty between the United States and Nigeria (as a result of the 1959 extension of the United States/United Kingdom income tax treaty of 1945 to Nigeria) is being terminated by Nigeria, effective January 1, 1979, for United States tax purposes and April 1, 1979 for Nigerian tax purposes.

The proposed treaty is intended to prevent double taxation and to facilitate trade and investment between the two countries. It will be concerned with the taxation of income from business, investment and personal services, and with procedures for administering the provisions of the treaty.

The new treaty is expected to take into account the 1977 Model Income Tax Convention of the Organization for Economic Cooperation and Development, the May 17, 1977, United States model income tax convention, and recent treaties entered into by the United States.

The Treasury Department invited comments or suggestions concerning the forthcoming discussions. They should be in writing and be submitted, as soon as possible, to H. David Rosenbloom, International Tax Counsel, Room 3064, Treasury Department, Washington, D.C. 20220. Since the negotiations are likely to take some time, even those comments received after the late January meetings will be able to be considered.

Dated: January 11, 1979.

DONALD C. LUBICK,
Assistant Secretary for Tax Policy.

INTERSTATE COMMERCE COMMISSION

[Notice No. 8]

ASSIGNMENT OF HEARINGS

JANUARY 12, 1979.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

CORRECTION:

No. MC 66746 (Sub-No. 21F), Shippers Express, Inc. now assigned for hearing on January 16, 1979, at Tupelo, Mississippi is postponed to February 20, 1979 (9 days), at Tupelo, Mississippi, in a hearing room to be later designated instead of being postponed indefinitely.

H. G. HOMME, Jr.,
Secretary.

[No. MC-C-10147]

DEFINITION OF CASH LETTERS

Interpretation

AGENCY: Interstate Commerce Commission.

ACTION: Final Commodity Interpretation.

SUMMARY: The commodity description "such commercial papers, documents, and written instruments (except currency and negotiable securities) as are used in the business of banks and banking institutions", commonly referred to as "cash letters," interpreted to include any data, item, article or material, irrespective of form or nature, which (1) falls within the ambit of a paper, document, or written instrument and (2) is intended for use in the banking industry. This action will clarify the authority of carriers servicing the banking industry.

EFFECTIVE DATE: March 19, 1979.

ADDRESS: For copies of this notice contact: Office of the Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Michael Erenberg (202) 275-7292.

SUPPLEMENTARY INFORMATION: The Commission, on its own motion, instituted this proceeding and published in the FEDERAL REGISTER 43 FR 28602, June 30, 1978 notice of its intent to interpret the commodity description "such commercial papers, documents, and written instruments (except currency and negotiable securities) as are used in the business of banks and banking institutions". The Commission has used "cash letters" as the shorthand expression for these commodities. Representations from the general public and other interested parties were solicited concerning banking and transportation industry custom, usage, and practice as to the nature of the materials transported under this commodity description and whether technological advances within the banking industry such as the use of computers, microfilm, plastic cards, and data processing services have affected the complete transportation service being provided under the commodity description. Comments were submitted by a number of motor carriers and representatives of the banking industry. Almost all favored a broad interpretation of the commodity description to accommodate the new and expanding forms of data and other materials brought about by technological innovations and improvements in banking systems as well as changes in banking laws and regulations.

The decision traces the background of cash letters authority and the evolution of automated banking systems for check clearing and accounting. It notes the changing role and patterns for handling various bank documents and the changing forms of the indicia of money transfers. It concludes that although the functions of banks have not materially changed, the manner in which they perform those functions has undergone a substantial transformation; an interpretation of the cash letters authority is necessary to eliminate any ambiguities or uncertainties as to the scope of the authority and to enable the carriers to provide banks with a complete service.

After exploring some alternative methods of interpretation the Commission chose a flexible and open-ended approach leaving room for the inclusion of current and future commodities within the bounds of (1) the language parameters of the present description and (2) an intended use test. This was found to be consistent with Commission policy. The interpretation would clarify the meaning of the description and result in positive environmental effects and significant cost savings.

One carrier pointed out that while a liberal interpretation would enhance service for existing carriers and the banking industry, it would restrict the service of carriers whose authority is specifically restricted against the transportation of cash letters. The Commission established a procedure to redress the grievances of any carriers in such a position.

Adopted under authority of 5 U.S.C. 554 and 49 U.S.C. 10321 (formerly section 204 of the Interstate Commerce Act).

Dated: December 19, 1978.

By the Commission. Chairman O'Neal, Vice Chairman Christian, Commissioners Brown, Stafford, Gresham and Clapp. Commissioner Brown absent and not participating.

H. G. HOMME, Jr.,
Secretary.

IRREGULAR-ROUTE MOTOR COMMON CARRIERS OF PROPERTY—ELIMINATION OF GATEWAY LETTER NOTICES

JANUARY 13, 1979.

The following letter-notices of proposals to eliminate gateways for the purpose of reducing highway congestion, alleviating air and noise pollution, minimizing safety hazards, and conserving fuel have been filed with the Interstate Commerce under the Commission's *Gateway Elimination Rules* (49 CFR Part 1065), and notice thereof to all interested persons is hereby given as provided in such rules.

An original and two copies of protests against the proposed elimination of any gateway herein described may be filed with the Interstate Commerce Commission on or before January 27, 1979. A copy must also be served upon applicant or its representative. Protests against the elimination of a gateway will *not* operate to stay commencement of the proposed operation.

Successively filed letter-notices of the same carrier under these rules will be numbered consecutively for convenience in identification. Protests, if any, must refer to such letter-notices by number.

The following applicants seek to operate as a *common carrier*, by motor vehicles, over irregular routes.

MC 106497 (Sub-E18), filed September 15, 1978. Applicant: PARKHILL TRUCK COMPANY, P.O. Box 912, Joplin, MO 64801. Representative: T. M. Tallon (same as above). (1) *Commodities* which by reason of size or weight, require special handling or the use of special equipment and *commodities* which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which, by reason of size or weight, require special handling or the use of special equipment, (2) *self-propelled articles*, weighing 15,000 pounds or more, transported on trailers, and *related machinery, tools, parts and supplies* moving in connection therewith, (3) *iron and steel and iron and steel articles*, and (4) *pipe and pipe fittings* (except iron and steel), as embraced in (A) machinery, equipment, materials and supplies used in, or in connection with, the discovery, development, production, refining, manufacture, processing, storage, transmission, and distribution of natural gas and petroleum and their products and by-products, or (B) earth drilling machinery and equipment and machinery, equipment, materials, supplies and pipe incidental to, used in or in connection with (a) the transportation, installation, removal, operation, repair, servicing, maintenance, and dismantling of drilling machinery and equipment, (b) the completion of holes or wells drilled, (c) the production, storage, and transmission of commodities resulting from drilling operations at well or hole sites, and (d) the injection or removal of commodities into or from holes or wells, between points in UT, on the one hand, and, on the other, points in NE, restricted against the transportation of commodities in bulk. (Gateway eliminated: points in CO.)

MC 106497 (Sub-E19), filed September 15, 1978. Applicant: PARKHILL TRUCK COMPANY, P.O. Box 912, Joplin, MO 64801. Representative: T. M. Tallon (same as above). (1) *Commodities* which by reason of size or weight, require special handling or the use of special equipment and *commodities* which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which by reason of size or weight require special handling or the use of special equipment; (2) *self-propelled articles*, weighing 15,000 pounds or more, transported on trailers, and *related machinery, tools, parts and supplies* moving in connection therewith, (3) *iron and steel and iron and steel articles* which are parts of commodities the transportation of which, because of their size or weight, require the use of special equipment or special handling, and (4) *pipe and pipe fittings* (except iron and steel), which are parts of commodities the transportation of which, because of size or weight, require the use of special equipment or handling, between points in UT, on the one hand, and, on the other, points in AR, IL, IN, IA, KS, LA, MO, NM, OK, TX, WI, and points in WY on and east of a line beginning at the WY-MT State line extending along US HWY 87 to Casper; then along WY Hwy 220 to junction I Hwy 80, then along I Hwy 80 to Criston, then along WY Hwy 789 to the WY-CO State line, restricted against the transportation of commodities in bulk. RESTRICTED: The operations authorized herein are restricted to commodities which are transported on trailers. (Gateway eliminated: points in CO.)

MC 106497 (Sub-E20), filed September 15, 1978. Applicant: PARKHILL TRUCK COMPANY, P.O. Box 912, Joplin, MO 64801. Representative: T. M. Tallon (same as above). (1) *Commodities* which by reason of size or weight, require special handling or the use of special equipment and *commodities* which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as commodities which by reason of size or weight require special handling or the use of special equipment, (2) *self-propelled articles*, weighing 15,000 pounds or more, transported on trailers, and *related machinery, tools, parts and supplies* moving in connection therewith, (3) *iron and steel and iron and steel articles* which are parts of commodities the transportation of which, because of their size or weight, require the use of special equipment or special handling, and (4) *pipe and pipe fittings*, (except iron and steel), which are parts of commodities the transportation of which, because of size or weight, require the use of special equipment, or handling, between points in UT, on the one hand, and, on the other, points in KY, restricted against the transportation of commodities in bulk. (Gateway eliminated: points in CO and IN.)

MC 106497 (Sub-E21), filed September 15, 1978. Applicant: PARKHILL TRUCK COMPANY, P.O. Box 912, Joplin, MO 64801. Representative: T. M. Tallon (same as above). (1) *Building panels* which by reason of size or weight, require special handling or the use of special equipment and *building panels* which do not require special handling or the use of special equipment when moving in the same shipment on the same bill of lading as building panels which by reason of size or weight require special handling or the use of special equipment, and (2) *iron or steel building panels* which are parts of commodities, the transportation of which, because of size or weight, require special equipment or handling, between points in UT, on the one hand, and, on the other, points in AL, CT, DE, FL, GA, KY, ME, MD, MA, Lower Peninsula of MI, MS, NH, NJ, NY, NC, OH, PA, RI, SC, TN VT, VA, and WV, restricted against the transportation of commodities in bulk. (Gateway eliminated: points in CO, and the facilities of Star Manufacturing Co, at Oklahoma City, OH.)

MC 106497 (Sub-E22), filed September 15, 1978. Applicant: PARKHILL TRUCK COMPANY, P.O. Box 912, Joplin, MO 64801. Representative: T. M. Tallon (same as above). (1) *Electrical substations, circuit breakers, and switches, and related parts, attachments, and accessories* used in the assembly and construction thereof, which by reason of size or weight require special handling or the use of special equipment, and *such commodities* which are iron or steel and iron or steel articles and are also parts of size and weight commodities, and (2) *equipment, materials and supplies* used in the manufacture and assembly of the above-named articles, which by reason of size or weight require special handling or the use of special equipment, and parts moving therewith, and *such commodities* which are iron or steel and iron or steel articles and are also parts of size and weight commodities, (except commodities in bulk), from points in UT to points in AL, CT, DE, FL, GA, KY, ME, MD, MA, Lower Peninsula of MI, MS, NH, NJ, NY, NC, OH, PA, RI, SC, TN, VT, VA, and WV. (Gateway eliminated: points in CO and Springdale, AR.)

MC 106497 (Sub-E23), filed September 15, 1978. Applicant: PARKHILL TRUCK COMPANY, P.O. Box 912, Joplin, MO. 64801. Representative: T. M. Tallon (same as above. *Transformers*, which because of their size or weight require the use of special equipment (except commodities in bulk), from points in UTA to points in AL, FL, GA, MS, NC, TN, SC, and VA. (Gateway eliminated points in CO and the facilities of General Electric at Shreveport, LA.)

MC 113651 (Sub-E16), filed February 4, 1977. Applicant: INDIANA REFRIGERATED LINES, INC., 2404 North Broadway, Muncie, IN 47303. Representative: H. Barney Firestone, 327 South La Salle St., Chicago, IL 60604. *Meats, meat products and meat by-products* as described in Section a of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles), from New York, NY, and from points in Bergen, Essex, Judson, Passaic and Union Counties, NJ, to points in LA; MI; TX; MO (except St. Louis); Bloomington, IL; OK; KS; points in AL on and west of a line beginning at the FL-AL State line extending along AL Hwy 55 to Andalusia, then along AL Hwy 55 to McKenzie, then along U.S. Hwy 31 to Montgomery, then along U.S. Hwy 231 to the AL-TN State line; points in FL on and west of FL Hwy 85; points in TN on and west of a line beginning at the TN-GA State line extending along TN Hwy extending along TN Hwy 97 to Winchester, then along TN Hwy 127 to Hillsboro, then along TN Hwy 41 to junction TN Hwy 53, then along TN Hwy 53 to junction TN Hwy 52, then along TN Hwy 52 to junction TN Hwy 56, then along TN Hwy 56 to the TN-KY State line. CONDITION: This authority shall be subject to the same 3-year term limitation and other conditions imposed in Certificate No. MC 113651 (Sub-No. 198) issued December 21, 1976. [No. 37074]

UPWARD FARE FLEXIBILITY IN THE INTERCITY PASSENGER MARKET (PETITION OF TRAILWAYS, INC., FOR THE INSTITUTION OF RULEMAKING PROCEEDINGS)

JANUARY 9, 1979.

AGENCY: Interstate Commerce Commission.

ACTION: Notice of request for rulemaking.

SUMMARY: Public comment is invited upon the request by Trailways, Inc., that the Commission institute a rulemaking to accord the bus industry upward fare flexibility in the intercity passenger market.

DATES: Comments should be filed with the Commission on or before February 16, 1979.

ADDRESSES: An original and 10 copies, if possible, of each submission should be forwarded to: Secretary, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:

Janice M. Rosenak, or Harvey Gobetz. Telephone: (202) 275-7693.

SUPPLEMENTARY INFORMATION: Trailways requests a rulemaking proceeding for the establishment of regulations allowing motor carriers of passengers to increase all fares on scheduled, intercity passenger service at the end of a consecutive 12-month period during which no other interstate increase has been received. Fares could be increased by an amount up to but not exceeding 5.75 percent over the rates prevailing for the 12 immediately preceding months, or 90 percent of the Consumer Price Index (whichever is less). Increases within this range would not be subject to suspension or investigation by the Commission. They would be published upon 30 days' notice, and the Commission would retain the power to suspend any proposed increase determined to be in excess of the "no-suspend" zone.

Trailways believes its proposal is non-inflationary because the degree of the proposed increases is within the price guidelines adopted by the Administration, which are intended to produce an economy-wide rate of price increase of 5.75 percent. The proposal would also help give the bus industry the freedom to price its services in response to competitive forces. For these reasons, Trailways believes its proposal will further critical national economic goals.

Trailways argues that the proposed fare flexibility is necessary to enable buses to compete with other modes of transportation. It points out that airlines now may arise fares 5 or 10 percent without prior authorization from the Civil Aeronautics Board and that Amtrak not only may raise or lower its fares at will on short notice but is also subsidized by the Federal Government. Trailways provides comparisons of air and rail fares with bus fares between various cities to demonstrate that the bus industry is at a rate disadvantage. It contends that the market is capable of regulating increases within the no-suspend zone, and that pricing flexibility is necessary for it to continue serving many communities.

Upward rate flexibility, it is argued, would help carriers:

(1) Offset rapid changes in operational costs, such as fuel;

(2) Support sufficient peak-hour capacity through insuring coverage of the added costs such service entails;

(3) Offset any losses sustained in innovative pricing and service experiments that fail or are slow to develop;

(4) Provide premium services as demand warrants;

(5) Respond quickly to rate adjustments by competitive modes;

(6) Maintain adequate levels of profitability in order to insure the long-run viability of the system (for example, through upward adjustments in less competitive markets to compensate for the reduced but significant contribution of other traffic);

(7) Respond quickly to the entry or exit of competing modes.

Trailways believes upward flexibility would enable it to maximize revenues through selective, rational fare increases in those markets whose operating costs and demand characteristics indicate that increases are justified. It cites 49 U.S.C. Section 10762 (formerly section 217(c) of the Interstate Commerce Act) as authority for the Commission to adopt the proposal.

Those submitting comments are requested, where applicable, to indicate clearly any organization they may be representing, with emphasis on the type of organization (e.g. carrier, broker, agent) and the manner in which they believe their organization would affected by the proposal.

H. G. HOMME, Jr.,
Secretary.

[M-190, Jan. 11, 1979]

CIVIL AERONAUTICS BOARD.

TIME AND DATE: 10 a.m., January 18, 1979.

PLACE: Room 1027, 1825 Connecticut Avenue NW., Washington, D.C. 20428.

SUBJECT:

1. Ratification of items adopted by notations.

2. Dockets 30670 and 33173—Applications of Western and Northwest for Anchorage-London nonstop authority (Memo 8422, BIA, OGC, BALJ).

3. Docket 34196—Emergency Waiver of Permit Restrictions Japan Air Lines Company, Ltd. (Memo 8430, BIA, OGC).

4. Amendment of Board's *Ex Parte* Rules, 14 CFR 300.2, 300.3 (OGC).

5. Docket 32774—Norfolk's petition for an Investigation of United's Service Cuts in the Norfolk-Washington Market (Memo 8290-A, BPDA, OCCR, OGC).

6. Dockets 31128, 31213, 31244, 31529, and 32791—Service to Fort Myers (Memo 8233-A, BPDA, OCCR, BALJ, OGC).

7. Dockets 33196, 33350, 32720, 32964, 33438, 33351 and 32891—Applications of various carriers for competitive, nonstop authority between Atlanta and the San Francisco area (Memo 8437, BPDA, OGC, BALJ).

8. Dockets 33826, 34086, 34145, 34174, 33894, 34102 and 34143—Petitions of Continental, Delta, Ozark, and Trans World Airlines for Amendment of Certificate of Public Convenience and Necessity and Applications of Continental Airlines and Delta Airlines for Exemption Authority (Memo 8432, BPDA, OGC).

9. Dockets 33580, 33629, 33672, 33821, 33863, 33878 and 33997—Applications for certificate amendments nonstop Denver-Detroit authority in the following: Frontier, Braniff, Northwest, Allegheny, Continental, American, and Ozark (Memo 8423, BPDA, OGC).

10. Dockets 31447 and 33734—Piedmont's application for Dallas/Ft. Worth extension from Greensboro/High Point and Raleigh/Durham and Braniff's application for DFW-Greensboro/Raleigh service (Memo 8159-C, BPDA, OGC, BCP).

11. Dockets 29774, 25897, 26183, 31141, 31259, 32908, 33036 and 30076—Delta Air Lines Route Realignment and related matters (Memo 7905-A, BPDA).

12. Dockets 31808, 31886, 31930, 31943 and 31944—*Chicago-Albany / Syracuse-Boston Competitive Service Investigation* (OGC).

13. Docket 34238—Southern's notice of intent to suspend its single-plane service between Dothan, Alabama and New Orleans, La., in 60 days (Memo 8438, BPDA, OGCR).

14. Docket 33171—Dismissal of an application for an approval of interlocking directors. Hawaiian Airlines, Inc., *et al.* (Memo 8425, BPDA, OGC).

15. Docket 33201—Application of Hughes Airwest for a general long-haul restriction to replace the existing restriction on Los Angeles-San Francisco service, (Memo 8243-A, BPDA).

16. Dockets 34197 and 34224—Increased international excess baggage charges proposed by American and Pan American. DHL, air courier, complains that the proposed charges are variously not cost justified as required by the Board and are discriminatory (Memo 8408-A, BPDA, BIA).

17. Dockets 33276, 33622, and 33720—Vacation of Orders 78-9-38, 78-10-61, and 78-10-143 insofar as they suspended increases in normal economy fares between the United States and the Netherlands, Belgium and Germany (Memo 8433, BPDA, BIA).

18. Docket 30777—IATA agreement proposing a four percent currency-related surcharge on fares from the United States to Japan, and a four percent discount on fares from Japan to the United States. The Embassy of Japan has submitted comments, through the Department of State, arguing that the surcharge is justified to reduce the present directional differential in U.S./Japan fares (Memo 8071-B, BPDA, BIA, OGC).

19. Docket 32660—IATA composite traffic conference agreement on passenger matters ancillary to price (Memo 8426, BPDA, BIA, OGC).

STATUS: Open.

[USITC SE-79-3]

INTERNATIONAL TRADE COMMISSION.

TIME AND DATE: 10 a.m., Thursday, January 25, 1979.

PLACE: Room 117, 701 E Street NW., Washington, D.C. 20436.

STATUS: Parts of this meeting will be open to the public. The rest of the meeting will be closed to the public.

MATTERS TO BE CONSIDERED:

PORTIONS OPEN TO THE PUBLIC

1. Agenda.
2. Minutes.
3. Ratifications.
4. Petitions and complaints (if necessary).
5. Certain machine needles (Inv. TA-201-38)—Vote on remedy, if necessary.
6. Steel wire nails from Canada (Inv. AA1921-189)—Briefing and vote.
8. Any items left over from previous agenda.

PORTIONS CLOSED TO THE PUBLIC

7. Status report on Investigation 332-101 (MTN Study), if necessary.

CONTACT PERSON FOR MORE INFORMATION:

Kenneth R. Mason, Secretary, 202-523-0161.

[S-95-79 Filed 1-15-79; 11:04 am]

[7545-01-M]

7

NATIONAL LABOR RELATIONS BOARD.

TIME AND DATE: 10 a.m., Tuesday, January 23, 1979.

PLACE: Board Conference Room, sixth floor, 1717 Pennsylvania Avenue NW., Washington, D.C. 20570.

STATUS: Closed to public observation.

MATTER TO BE CONSIDERED: Selection of Solicitor.

CONTACT PERSON FOR MORE INFORMATION:

William A. Lubbers, Executive Secretary, Washington, D.C. 20570, telephone 202-254-9430.

Dated, Washington, D.C., January 15, 1979.

By direction of the Board:

GEORGE A. LEET
Associate Executive Secretary,
National Labor Relations Board.

PART II

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

LIST OF ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Republication

[4310-55-M]

Title 50—Wildlife and Fisheries

CHAPTER I—UNITED STATES FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 17—ENDANGERED AND THREATENED WILDLIFE AND PLANTS

Republication of the List of Species

(NOTE: This document is reprinted from the issue of Monday, December 11, 1978 (43 FR 58030).)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Republication of the U.S. List of Endangered and Threatened Wildlife and Plants.

SUMMARY: The Service hereby issues a republication of the list of Endangered and Threatened Wildlife and Plants. An annual publication of this list is required under the Endangered Species Act of 1973 (16 U.S.C. 1531-1543; 87 Stat. 884).

DATE: This list is inclusive of September 30, 1978.

ADDRESSES: Comments concerning this republication should be sent to the Director (OES), U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:

Mr. Keith M. Schreiner, Associate Director—Federal Assistance, Washington, D.C. 20240, telephone 202-343-4646.

SUPPLEMENTARY INFORMATION: The list incorporates species officially listed as Endangered or Threatened since the republication of the list in the FEDERAL REGISTER, July 14, 1977 (42 FR 36420). These new species are African elephant, San Clemente longerhead shrike, San Clemente sage sparrow, giant anole, Mona boa, Mona ground iguana, island night lizard, New Mexican ridge-nosed rattlesnake, Atlantic salt marsh snake, eastern indigo snake, green sea turtle, loggerhead turtle, Olive (Pacific) Ridley sea turtle, pine barrens tree frog, golden coqui, Alabama cavefish, slender chub, spotfin chub, leopard darter, slackwater darter, yellowfin madtom, little kern golden trout, greenback cutthroat trout, Chittenango ovate amber snail, flat-spired three-toothed snail, Iowa Pleistocene snail, noonday snail, painted snake coiled forest snail, Stock Island tree snail, Virginia fringed mountain snail, tan riffle shell, Socorro isopod, Virginia round-leaf birch, Contra Costa wallflower, McDonald's rock cress, Santa Barbara Island live forever, Rydberg milkvetch, hairy rattleweed, San Clemente broom, Hawaiian wild broadbean, unnamed *Phacelia*, San Diego pogogyne, persistent trillium, San Clemente Island bushmallow, Eureka evening-primrose, Antioch Dunes evening primrose, Crampton's orcutt grass, Eureka dune grass, Texas wild-rice, northern wild monkshood, San Clemente Island Larkspur, salt marsh bird's-beak, San Clemente Island Indian paintbrush, and Furbish lousewart. Populations of both the gray wolf and the bald eagle have been reclassified. The Mexican duck has been removed from the list as directed by the rulemaking published in the July 25, 1978, FEDERAL REGISTER (43 FR 32258-32261). Errors detected in the FEDERAL REGISTER, July 14, 1977 (42 FR 36420) list have been corrected, and some scientific names have been changed to reflect current usage.

Dated: November 20, 1978.

LYNN A. GREENWALT,
Director, Fish and Wildlife Service.

1. The table in 50 CFR 17.11 is revised to read as follows:

[4310-55-C]

17.11 - Endangered and Threatened Wildlife

SPECIES			RANGE

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 15]

[General Docket No. 78-391; FCC 78-864]

IMPROVEMENTS TO UHF TELEVISION RECEPTION

Inquiry

AGENCY: Federal Communications Commission.

ACTION: Notice of Inquiry.

SUMMARY: The FCC is soliciting the public for comments on Improvements to UHF Television Reception in both the technical and consumer areas. This information is needed to form the basis upon which action may be taken to improve UHF reception.

DATES: Comments must be received on or before April 2, 1979. A date for reply comments will be set after the initial comments have been summarized.

ADDRESSES: Federal Communications Commission, 1919 M St., NW., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Philip Gieseler or Virginia Armstrong, Office of Plans and Policy, (202) 634-7651.

In the matter of improvements to UHF television reception, GEN Docket No. 78-391.

Adopted: December 20, 1978.

Released: December 29, 1978.

INTRODUCTION

1. The Federal Communications Commission (FCC) is instituting this Inquiry as part of a process to determine how UHF (ultra-high frequency—channels 14-83) television reception can be improved relative to VHF (very high frequency—channels 2-13) television reception. Prompted at this time by a recent Congressional mandate, we are initiating this Inquiry and convening a UHF Comparability Task Force to analyze the many possibilities for improved UHF service.[1] In this Notice, we reaffirm our commitment to a fully viable and competitive UHF service; we ask questions of the public and interested parties that will aid in our deliberations; and we present an initial plan for the work of the UHF Comparability Task Force.

2. We view parity not as an end in itself, but as a means for accomplishing other goals such as increasing the number of UHF station viewers and their level of satisfaction. Larger UHF audiences should cause revenues and profits of existing UHF stations to increase, encouraging the establishment of additional new UHF stations. Higher profits and more stations on the air should ultimately increase the number, quality and diversity of television programs available to viewers, while encouraging other goals such as local programming, and minority ownership and operation of television stations. At the same time, we are aware that any requirements to improve the technical quality of UHF reception may increase the cost of manufacturing antennas and receivers, a cost which will ultimately be borne by the consumers who purchase those items.

3. The process, in which this Inquiry is the first step, will determine which of several approaches for improving UHF television will best serve the consumer and the overall public interest, by analyzing the costs and benefits of particular improvements. Initially, we are concentrating on gathering together in one Docket all existing information on UHF reception. This information will be updated and analyzed for any gaps. Solutions require accurately knowng the components of a problem, so our emphasis will first be on compiling data that define the problem, and then seeking solutions.

4. To encourage wide participation and debate in this proceeding, and to produce a detailed record for Commission review, the Task Force will issue periodic reports. Interested persons will then have the opportunity to submit relevant comments. All comments will be analyzed for a final report to the Commission. The final report of the UHF Comparability Task Force will take into account all comments received, consistent with a timetable for Task Force recommendations within the next two years.

HISTORICAL BACKGROUND

5. Allocations for television spectrum space were first made in 1941 in the VHF frequency band (channels 2-13).[2] By 1945, however, it became apparent that those 12 channels could not adequately meet the demand. Thus, in order to achieve a competitive nationwide television system, the FCC sought to create additional channels on the readily available frequencies of the UHF band.

6. With the publication of its *Sixth Report and Order on Television Allocation* in 1952, the Federal Communications Commission fully committed itself to UHF television.[3] It believed that allocating channels 14-83 for television broadcasting would help maximize the television audience.[4] It expected UHF to prosper because the 12 VHF channels were too few to meet the public's needs; VHF was not thought to be sufficiently mature to put UHF at a great disadvantage; and differences in wave propagation were not thought to be serious enough to affect competition. Scientific advances, when coupled with these market incentives, were expected to create a technologically improved UHF system. The FCC at that time believed television would eventually shift to the higher frequency band (channels 14-83).[5]

7. When the UHF television band became available for commercial use in 1952, VHF was already well-established with 108 stations reaching two-thirds of the nation's population.[6] Stations broadcasting on UHF thus faced widespread competition from intrinsically superior VHF facilities. Furthermore, few television sets were equipped to receive the UHF signals.

8. Due to the physical characteristics of wave propagation as a function of frequency, UHF signal strength declines more rapidly with distance than does VHF signal strength. In addition, terrain variations and high buildings are more likely to affect the higher frequency UHF signals. These competitive and technical disadvantages, collectively known as the "UHF Handicap," substantially hindered further development of UHF television, and this hindrance was circular. With smaller audiences being reached through UHF, advertisers and networks preferred VHF. And without sources of major network programming and advertising revenues for improving transmission facilities, UHF stations could not induce a large segment of the population to purchase receivers equipped for channels 14-83. The UHF disadvantage is still evident today when rating comparisons are made between UHF and VHF stations—even between UHF and VHF network affiliates where the programming differences are minimal.[7]

9. The number of UHF stations increased from 45 in 1953 to 137 in 1954, but decreased to only 108 in 1955.[8] In 1955, the FCC acknowledged that UHF still lacked a substantial audience and was concerned about UHF's no-growth situation. In response to these problems, the FCC proposed a policy of deintermixture (FCC allocation of only UHF or only VHF channels in a given market).[9] This policy was expected to eventually shift the country to primary use of the UHF band. However, the Commission never established a deadline for conversion of some markets to UHF-only markets. As a result, the public was left with no incentive to purchase all-channel receivers, and industry with no incentive to manufacture them. When Congress began formulating the *All-Channel Television Receiver Act of 1962* (the Act), the Commission issued a *Report and Order Terminating the Eight Captioned Deintermixture Proceedings.* The FCC decided that deintermixture was not in keeping with either the Act, or the Commission's policy of seeking "a system of using both UHF and VHF channels" as the best way to reach a "general or long-range solution for the television allocations problem."[10] By 1962 there were only 104 UHF stations nationwide and it was estimated that only 8.35% of the 3.3 million receivers produced in the first half of that year were equipped to receive all channels.[11]

10. The *All-Channel Television Receiver Act of 1962* stipulated that all television sets shipped in interstate commerce after April, 1964, had to be adequately equipped to receive channels 14-83.[12] It permitted the FCC to regulate television receivers with respect to UHF reception: the Commission subsequently set a maximum 18 dB noise figure for the UHF portion of a set.[13] In 1978, the Commission again voted to reduce this maximum noise figure to 14 dB, effective by October 1979, and to 12 dB by 1982.[14]

11. In implementing the *All-Channel Television Receiver Act*, the Commission called for adequate but not necessarily comparable UHF reception, believing that adequacy was sufficient to solve the "root problem" behind the UHF disadvantage: inability of consumers to receive UHF stations.[15] It also believed implementation of the Act would

> lead to research efforts by the manufacturers, which it is hoped, will greatly improve the UHF portion of the receiver. Our conferences with industry representatives have indicated that such research and improvement will be undertaken without delay and in a vigorous fashion.

As in the past, the Commission felt that

> With increased use of UHF, and increased incentive for both equipment manufacturers and station operators to exploit its maximum potential, there is reason to believe that several of the problems which presently restrict coverage of UHF stations would be overcome.[16]

12. By August 1965, an estimated 33% of the nation's households owned all-channel receivers, and the figure increased to 42.1% in 1967.[17] The next year, the Commission mandated that all sets have comparable ease of tuning for both UHF and VHF portions of the receiver. This regulation would eliminate the "built-in UHF deterrent in the form of separate, different and more complicated UHF tuning system."[18] It would apply to all sets measuring at least 9" diagonally manufactured after April, 1971, and to all television sets after April, 1975. The Commission considered a six-position UHF click-stop tuner sufficient to meet this requirement, although in 1976 it required a 70-detent ("click-stop") tuner equipped with automatic frequency control (AFC) on all sets manufactured after June, 1977.[19]

13. In 1976, the Commission further acted to improve the allowable tuner accuracy to +2 MHz.[20] It also required that all sets with a manufacturer-supplied VHF antenna must have a similarly supplied UHF antenna, and if one was permanently affixed to the set, the other must also be affixed.[21] In 1976, 92% of the nation's households with television owned all-channel receivers.[22]

14. In 1978, Congress found that "the intent of the *All-Channel Receiver Act of 1962* has not been realized. UHF television broadcasting remains sorely disadvantaged within the national television system. The [Senate] Committee [on Appropriations] directs that the Commission devise a plan for UHF to reach comparability with VHF in as short a time as practicable. * * * This plan should address all the technical and regulatory aspects of achieving parity and should set a schedule for dealing with each, including dates for achieving specific goals, such as noise level reductions. It should also include indications of the probable need for any legislation necessary to fulfill the plan."[23] Accordingly, we are issuing this Inquiry and have formed the UHF Comparability Task Force to address the fundamental technical differences between UHF and VHF reception and to propose and consider methods for minimizing those differences.

CONSUMER ISSUES

15. A fundamental assumption in this Inquiry is that viewers consider the technical aspects of UHF reception to be inferior to VHF reception. A second assumption is that UHF viewer satisfaction would rise and the audience for UHF programs would increase if UHF picture quality were judged equal to VHF quality.[24]

16. Thus, the first set of questions to which we seek answers are these:

A. Do consumers perceive UHF picture and sound quality to be significantly lower than VHF quality?

B. Assuming that viewers do perceive a difference in the technical quality of UHF and VHF signals, what differences are the most bothersome:

(1) Multiple images or ghosts?

(2) Snow or other indications of a weak signal?

(3) Pictures which do not stay locked in position but roll or slide?

(4) Color pictures with unnatural colors or bleeding of colors?

(5) Poor quality sound?

(6) Interference which causes lines or blanks out the picture?

---

[1] Congress approved a $750,000 appropriation and created five staff positions to examine comparability for UHF and VHF television. Public Law No. 95-431 92 Stat 1040 (October 10, 1978), *Appropriations for Departments of State, Justice, Commerce, Judiciary and related agencies.* See also Senate Report 95-1043, 95th Cong. 2nd Sess. (July 28, 1978). (Paragraph 14 of this *Notice* includes specific language contained in the Senate Report.)

[2] Channel 1 was reallocated to land mobile radio in 1944. See FCC *Allocations of Frequencies to Non-governmental Services*, 9 FR 10270 (1944).

[3] Docket Nos. 8736, 8975-6 and 9175, 1 Radio Regulation (RR) 601, 607, 660 ff (1952).

[4] Channels 70-83 were reallocated to land mobile radio in 1970, although some television translator stations (low-power rebroadcast devices) still operate in this band on a secondary basis. See *Report and Order* in Docket 18262, 23 FCC 2d 325, 19 RR 1663 (1970).

[24] Some studies indicate a cultural bias against UHF. See for example K. White, "Television Market Shares, Station Characteristics and Viewer Choice," *Communication Research*, Vol. 4, No. 4, October 1977. Such a "psychological" handicap, if it exists, could be inhibiting the development of UHF even if performance is equal to that of VHF.

V 4 4 - 1 2 J A 1 7 7 9 UMI

(7) Other problems?

C. How much would consumers be willing to pay to improve the picture and sound quality of UHF?

D. Do consumers have the knowledge to install and adjust their sets correctly?

E. Do consumers finds it more difficult to adjust their sets for UHF programs than for VHF programs?

F. Is informational material on installation and adjustment of sets available to the public, and written in such a way that it is understandable?

G. Does the existence of the two-dial (rotary) tuning system affect viewer choice of UHF or VHF signals? For push-button tuning, do full random access (digital) tuners afford more comparability in channel selection than preset memory tuners?

H. Has cable TV affected viewers choice of UHF or VHF programs? How?

I. What information about improving UHF reception would consumers find most useful, and in what form (brochures, public service announcements, etc.)?

J. Would consumers prefer:

(1) More information made easily available on how to compare, select, install and adjust equipment for UHF reception?

(2) Mandated labels on TV receivers, UHF antennas and lead in which would make it easier to compare reception capability?

(3) Higher technical standards required of manufacturers of TV receivers, UHF antennas and antenna lead-in?

K. As none of these changes will be costless, at what price would consumers choose one alternative over another? As an example, if it would cost $5 to provide more information to consumers, $10 to implement mandatory labeling, and $20 to institute mandatory standards, which alternative would consumers prefer?

L. What is the relative contribution of picture quality and ease of tuning to the UHF Handicap?

M. If UHF picture and sound quality were equal to that of VHF, by how much would the audience for UHF television increase?

N. What uses and services, other than over the air reception, do viewers expect of UHF TV in the future? How will this affect our study?

17. The second aspect of consumer participation involves providing information that will help implement better receiving systems. The purchase and proper installation of television receiving equipment—TV sets, antennas, and lead-in (such as coaxial cable and twin lead)—is largely the consumer's responsibility. Yet it appears that the receiving components, particularly antennas and lead-in, are major determinants of UHF/VHF reception problems. We hope to ascertain whether and to what degree UHF reception would benefit if various improvements were made and to pass this information on to the public in the most effective manner. Possibilities for disseminating this data include a consumer information program, and grading or labeling of receiving equipment for adequate UHF reception. The UHF Comparability Task Force will develop information concerned with providing useful information to the consumer.[25]

Technical Issues

18. TV reception is a function of both the transmitting and receiving equipment. Therefore, improvements in reception may be achieved by changing many different components. The following technical areas will be examined on the basis of the costs of improvements versus the benefits obtained. We are interested in costs to viewers, stations, manufacturers and the Commission. Similarly, we are interested in measuring and comparing the benefits to each of these groups. Therefore, the UHF Comparability Task Force will be evaluating improvements in the following areas:

A. Increased transmitter power [26]

B. Improved transmitting antennas (increased gain and better coverage)

C. Increased transmitter antenna height

D. Circular polarization [27]

E. Better outdoor receiving antennas

F. Better indoor receiving antennas

G. Better built-in receiving antennas

H. Lower-loss lead-in

I. External low-noise UHF amplifiers

J. Receiving antenna coaxial connector on TV sets

K. Better installation of receiving equipment

L. More usable UHF channel selection mechanism [28]

M. Other technical improvement to UHF television reception and transmission [29]

19. At this time we particularly seek the following information concerning the above improvements:

A. When a commercial UHF station increases its service coverage by increasing transmitter power, improving transmitting antenna gain and/or increasing transmitting antenna height, do sufficient increased advertising revenues result such that the upgraded facilities are economically worthwhile?

B. Could UHF reception be improved by changes in the transmitting antenna location? Do reception problems exist when a UHF station in a market transmits from a different location than VHF stations? What, if any, improvement is available from locating transmitters in the same vicinity?

C. What, if any, technical or economic impediments are inhibiting the introduction of higher efficiency transmitting equipment (e.g. klystron tubes) into the marketplace?

D. Do the benefits of circular polarization adequately compensate for the requirement (assuming the same service area) for additional transmitter power that results because both a horizontally and vertically polarized transmitting component are required?

E. Under what circumstances would a viewer receive adequate VHF reception using an indoor receiving antenna, but would require an outdoor UHF antenna for comparable reception on UHF?

F. What is the difference in antenna gain for the UHF and VHF antennas that come with television sets when purchased?

G. As distance from the transmitter increases, what is the relative proportion of built-in antennas, indoor antennas, outdoor antennas, antennas with preamplifiers, and master antenna systems?

H. What receiver gain or other guidelines could be formulated for adequate UHF reception for various environments? How do these guidelines compare with VHF?

I. What improvements exist for the antenna lead-in? Could losses due to impedance mismatching of antenna, lead-in and receivers, or the losses that may exist in impedance-matching transformers (baluns) be economically eliminated if all components were of the same impedance?

J. What improvement is obtainable from use of a coaxial connector rather than screw terminals for attaching the receiving antenna onto the set, and at what cost? What is the present availability of receivers specifically intended to accommodate coaxial cable?

K. What economical designs exist for external low-noise, linear UHF amplifiers? How much would use of such amplifiers improve UHF reception? What, if any, undesirable effects could result?

L. What improvement is obtainable if receiving equipment is simply installed more carefully?

20. The propagation of UHF and VHF signals through space are based on fixed laws of physics, but understanding the difference between UHF and VFF propagation will enable a fuller understanding of the degree of the UHF Handicap. We seek the following information:

A. For the limited purpose of differentiating between UHF and VHF coverage, is there a propagation model or set of assumptions that would produce an accurate comparision of signal strength:

(i) In highly reflective environments?

(ii) Within buildings?

(iii) Due to hilly or mountains terrain?

(iv) Due to foliage?

B. Present FCC planning factors have a differential value of 17 dB between the field strength of lower VHF signals and UHF signals.[30] This differential is assumed to produce a statistically acceptable picture at the Grade B contour.[31] That is, the planning factors indicate that the UHF signal must be 17 dB stronger than the VHF signal to produce the same quality picture. At the Grade A contour the similar differential is 6 dB. Are these differentials valid for current receiving equipment?

21. The Commission will gather materials for this proceeding through its UHF Comparability Task Force, which will evaluate comments submitted by the public, study existing literature, conduct analyses, and initiate research contracts. In evaluating the cost versus benefit of improvements to UHF reception, the Task Force will develop information for a wide range of criteria, such as:

A. Technical feasibility of the improvement.

B. Increased viewer satisfaction.

C. Effect on immediate and long term licensee viability.

D. Cost to the manufacturer and consumer.

E. Impact on the ability to efficiently utilize the radio spectrum.

F. Impact on rate of innovation.

G. Cost of administering an improvement to the FCC or to other government agencies.

Related Commission Actions

22. Additionally, the FCC has underway other Inquiries that could directly or indirectly address UHF television service. For instance:

A. The Commission, in a companion Inquiry, is determining whether the use of new receiver designs could improve the spectral utilization and overall performance of television. See *Notice of Inquiry*, in General Docket 78-392 *Technical Improvements to Television Receivers and Certain Transmission Standards*, FCC 78-866, elsewhere in Part III of this issue.

B. The Commission is reducing the maximum UHF noise figure to 14 dB by 1979, 12 dB by 1982, and will be evaluating whether further reductions in noise figure should be made. See *Report and Order* in Docket 21010, *UHF Television Receiver Noise Figures*, FCC 78-582, 43 FR 36095 (August 15, 1978).

C. The public could be provided with more information that would assist in the choice of television receiving equipment through a program of grading and labeling television reception equipment. See *Notice of Inquiry* in General Docket 78-307, *Television Receiver Equipment Grading*, FCC 78-665, 43 FR 49550 (October 24, 1978).

D. The study of networks might point to regulatory changes that in turn might lead to new networks that would include many UHF stations. (See paragraph 46 of the *Further Notice of Inquiry* in Docket 21049, *Commercial Television Network Practices*, FCC 78-736, 43 FR 50126 (October 26, 1978).

E. Fees for use of the spectrum could be based on the value of the particular spectrum used. (See *Notice of Inquiry* in General Docket 78-316, adopted September 27, 1978 released October 6, 1978, FCC 78-695, and HR 13015, 95th Cong. 2d Sess. (1978), the proposed Communications Act of 1978, 43 FR 46658 (October 10, 1978).) Should such a fee system ever be passed by Congress, the fee difference between UHF and VHF could eliminate the cost handicap facing UHF.[32]

23. The Task Force will maintain close contact with the proceedings listed above and any others that are instituted during its work. For instance, some evidence indicates that a tradeoff may exist between a receiver's interference rejection and its adequate reception of weak signals.[33] Coordination among proceedings will enable a better determination of whether benefits in fact tend to oppose one another due to technological limits, and, if so, the most appropriate reconciliation.

Task Force Plan of Action

24. The Task Force will initially seek to isolate the degree and causes of the UHF Handicap. Though opinions are strong concerning UHF Television, they do not agree on what the problems are and how to correct them. In determining the true problems with the UHF service, we hope to lay a foundation that will guide implementation of the most beneficial improvements.

25. The Task Force will work to identify the scope of particular problems. Is a snowy picture experienced in rural, suburban and urban areas, or just in rural areas well removed from the transmitter? Should we focus our attention on improved outdoor receiving antennas, or will most viewers rely on indoor antennas? Wide ranging solutions are required for broad-based problems; but such solutions could be counterproductive if applied to localized problems, since they would administer a cure to everyone for a problem experienced only by a few. Thus determining the nature and degree of the problem is of utmost importance. Assuming we know what the problem is before studying it may not produce cost-effective solutions.

26. The ultimate goal of an improved UHF service is increased public satis-

---

[25] Consumer information will also be developed for use in a separate FCC proceeding concerning labeling and grading. See *Notice of Inquiry* in Docket 78-307, *Television Receiver Equipment Grading*, 43 FR 49550 (October 24, 1978).

[26] Most UHF stations operate well below the maximum power allowed in § 73.614 of the FCC rules. 47 U.S.C. 73.614.

[27] We plan in part to evaluate information contained in a previous FCC proceeding concerning circular polarization. (See *Report and Order* Docket No. 20802, *Amendment of Subpart E, Part 73 of the Commission Rules and Regulations to permit television broadcast stations to employ circular or elliptical polarization*, adopted April 6, 1977, released April 14, 1977, FCC 77-259.)

[28] A narrower version of this question was previously addressed in Docket 21179 (*UHF Channel Readout on Television Receivers*). The comments received in that Docket have convinced us that this issue should be pursued in the broader, more comprehensive framework provided by this Inquiry and the concurrent proceeding *Technical Improvements to Television Receivers and Certain Transmission Standards*, General Docket 78-392; FCC 78-866, elsewhere in Part III of this issue. Consequently, we have today terminated the Channel Readout Docket (Order adopted December 20, 1978, released December 29, 1978, FCC 78-865) and have incorporated the record of that Docket into the record of this Docket.

[29] In this Inquiry we will evaluate components from the transmitting system up to the television receiver. In a related proceeding being adopted today, changes internal to TV receivers will be considered (including consideration of UHF interference susceptibility and receiver noise figure). See *Notice of Inquiry* in General Docket 78-392, *Technical Improvements to Television Receivers and Certain Transmission Standards*, FCC 78-866, elsewhere in Part III of this issue.

[30] See, for example, *A Review of the Technical Planning Factors for VHF Television Service*, Gary S. Kalagian, FCC/OCE RS 77-01 (1977), NTIS PB 266341. A similar report for UHF planning factors is in preparation. See also § 73.683 of the FCC Rules. 47 U.S.C. 73.683.

[31] The Grade B and Grade A contours are used in determining the approximate service area of a television station, by employing an engineering model of how radio waves propagate through the atmosphere. Due to a myriad of natural factors such as weather, terrain and foliage, actual service may be quite different from that predicted by the FCC model.

[32] Additional inquiries that could aid the implementation of television improvements are: *Notice of Inquiry* in General Docket 78-348, *Measurement Techniques of Television Receiver Noise Figures*, FCC 78-737, 43 FR 51560 (November 6, 1978). This Inquiry will explore the definition of Noise Figure, methods for its measurements, and other related technical issues. *Notice of Inquiry, Television Receiver Performance Standards*, adopted December 20, 1978, FCC 78-866, elsewhere in Part III of this issue. This Inquiry will explore performance standards to use in conjunction with noise figure to insure overall television adequacy, and new measures of weak signal performance to supersede noise figure.

[33] *Relationship Between Noise Figures and Other Performance Characteristics of Contemporary UHF-TV Receivers*, L. C. Middlekamp et al, FCC/OCE LAB 78-02 (May 1978).

V 4 4 - 1 2

faction. But how can television viewers best be served? Are they in fact satisfied with present UHF television? If not, what are their specific complaints? How large are particular problems? The Task Force will undertake a consumer survey to determine the major problems with UHF reception, from the consumer's point of view. Concurrently, a technical study will be initiated to analytically evaluate UHF performance relative to VHF.

27. In determining the relative contribution of each component of the transmission/reception system, existing information will be compiled and analyzed, and, where appropriate, additional research will be undertaken. The following areas will be evaluated:

Receiver performance. Using a cross section of modern television receivers, the additional UHF signal strength needed to produce the same quality signal displayed on VHF channels will be determined. This should show the state of the existing television receivers concerning UHF/VHF performance.

Receiving antenna gain. A cross section of indoor and outdoor receiving antennas will be evaluated under laboratory conditions to determine gain and directivity. The uniformity of antenna gain across the UHF band will be evaluated. It is hoped that this analysis will reveal optimum receiving antenna designs, develop figures of merit to describe antenna performance, and help specify what antennas are desirable at varied distances from the transmitter.

Transmission line. The performance and uniformity of performance of twin-lead, coaxial cable, and matching transformers will be evaluated. Problems due to the need to match the impedances of the receiving antenna, transmission line and receiver will be determined.

Receiving system. A sample of actual receiving antenna/transmission line systems will be evaluated to determine the system gain or loss. This will reveal actual rather than laboratory performance, and will indicate the effects of aging, damaged components, and antenna/transmission line connections.

Propagation. Understanding the differences in radio propagation between UHF and VHF is needed in order to precisely define the UHF Handicap. We would like to formulate a limited purpose propagation model that will predict statistical differences in UHF/VHF picture quality, including effect within buildings, in dense urban areas, and due to mountainous terrain.

Transmission systems. Statistics will be compiled on the effective radiated power (ERP) of commercial and noncommercial UHF stations, and trends toward increased ERP.

Channel selection systems. We wish to determine the effect that present tuning systems have on viewer selection of VHF or UHF channels. A study will show the effect, if any, of the separate dial UHF/VHF tuning system on UHF viewership, and compare this result with other channel selection systems such as electronic tuning. Marketing trends toward new channel selection systems will be determined.

28. Understanding the components of the UHF Handicap will require several months of staff effort, and will yield important benefits.[34] It will enable subsequent work to be based on concrete data rather than assumption or opinion. The importance of the problem, and therefore the needed solution, will be determined. The most logical improvements will be known, and initial ideas about how best to implement the various improvements will become clear.

29. Completion of this work will represent the conclusion of the first part of the following three part program:

1. *Determination* of the nature and components of the UHF Handicap;
2. *Evaluation* of specific improvments and methods for implementation; and
3. *Formulation* of alternatives for correcting the deficiencies with UHF.

30. The possibilities for improvement to be considered in the second (evaluation) phase of the program are given in Paragraph 18 of this Notice. In keeping with a desire to avoid predisposition towards any solution or set of solutions, particular improvements to receive major consideration will not be specified until full information is obtained from phase one. It is the Task Force's intention to issue an interim report at a later date that will present conclusions resulting from this phase of its work, and it will present an outline of further work to be undertaken at that time.

INFORMATION ON COMMENTS

31. *Who should file comments?* We urge the viewing public, television equipment manufacturers, broadcasters, and all other interested parties to participate in this Inquiry. You may participate by sending information and opinions that are relevant to the questions listed in this Inquiry.

32. *How will this information be used?* The comments we receive will be used to evaluate the issues we have discussed above. Comments may result in FCC action to improve UHF television service. For example, we might change the FCC rules to specify additional requirements for television receiver certification. The FCC will make rule changes only after all interested parties are given an adequate opportunity to comment.

33. *How comments should be prepared.* Your comments must clearly show this docket number "Gen Docket No. 78-391, at the top of the first page. Please label your responses so that it will be clear which number paragraph and question is being answered. If your comments are general, and not related to a specific question, please state the issue being addressed.

34. *How many copies should be sent?* Sec. 1.419 of the rules requires that you file the original and five copies of your comments. If you want each Commissioner to receive a personal copy of your comments, you should include 6 additional copies. The FCC will fully consider all comments, even if only the original is filed.

35. *Where to send comments.* Send your comments to: Secretary, Federal Communications Commission, Washington, D.C. 20554.

36. *How to see the comments of other parties.* All comments will be available for public inspection in the FCC Dockets Reference Room, Room, 239, 1919 M St., N.W., Washington, D.C. The FCC is open weekdays between 8:00 am and 5:30 pm. You can reply to comments submitted by another party by following the same procedure as you do for commenting.

37. *Deadline for filing Comments.* Comments must be received by April 2, 1979. You are encouraged to submit a one-page summary of your comments at the time you file. A date for replies to comments will be set after the initial comments have been summarized.

38. The source of our legal authority. Section 4(i), 302, 303(f), (g), (r), and (s), 330, and 403 of the Communications Act gives the FCC the authority to conduct this Inquiry. Accordingly, the FCC orders that this Inquiry is instituted.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

[FR Doc. 79-1503; Filed 1-16-79; 8:45 am]

[34] Initial estimates are that from 4 to 6 months will be required to undertake the first phase of the UHF improvement program.

[47 CFR Part 15]

[Docket No. 21179; FCC 78-865]

UHF CHANNEL READOUT ON TELEVISION RECEIVERS

Termination of Proceeding

AGENCY: Federal Communications Commission.

ACTION: Termination of proceeding without action and merger of the record into a general inquiry into UHF television reception.

SUMMARY: This proceeding has been concerned with the improvement of the UHF channel display on television receivers. Because a new, broader inquiry into UHF television reception includes the possibility of requiring electronic tuning and because electronic tuning would eliminate any and all UHF channel display problems, this proceeding is being terminated. Channel display issues will be considered with other broader questions concerning UHF television reception in a new proceeding.

EFFECTIVE DATE: Non-Applicable.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Upton Guthery, Office of General Counsel, (202) 632-6444.

Adopted: December 20, 1978.

Released: December 29, 1978.

Order. In the matter of UHF Channel Readout On Television Receivers, Docket No. 21179.[1]

1. A *Notice of Inquiry* in this proceeding was released on March 25, 1977 (FCC 77-221, 42 FR 18643, April 8, 1877). In the *Notice*, we explained that comments in an earlier proceeding (Docket No. 20719) had raised a number of legitimate questions concerning the UHF channel readout on television receivers. Those comments were addressed to receivers equipped with a 70-position electromechanical UHF tuning system in which the channel numbers are displayed on the face of the tuning knob. The substance of the comments was summarized as follows:

> First the complaint is that our rules permit only every other channel number to be displayed with marks between numbers to indicate the channels not displayed numerically (*see* § 15.68(d)(1)). Secondly, it is complained that the numbers are small in size and closely spaced, so that it is difficult to determine what channel has been tuned. Third, it is said that superior on-the-knob channel displays are available for minimal additional cost.

Comments and reply comments in this proceeding were filed in August 1977. On the basis of these comments, we have been able to conclude that the channel displays in question are significantly inferior to VHF displays, that UHF tuning is therefore somewhat more difficult, and that some percentage of the viewing public will, in all likelihood, be disinclined to tune UHF stations. However, we have not been able to determine the numbers of UHF viewers lost because of tuning difficulty or whether the number is significant. Nor have we been able to determine that the alternative device is (or is not) mechanically sound or, if mechanicallly sound, and considering its disadvantages as well as advantages, whether its use would contribute to UHF TV viewing. The comments pro and con are, in this respect, irreconcilable.

2. We are today issuing two *Notices of Inquiry* that, together, will provide a more comprehensive framework for investigation of the question of UHF channel readout. In *Improvements to UHF Television Reception*, (Gen. Docket No. 78-391, FCC 78-864), we will study the effect of UHF channel readout on UHF viewing. In *Technical Improvements to Television Receivers and Certain Transmission Standards* (Gen. Docket No. 78-392, FCC 78-866), we will explore the possibility of requiring electronic tuning. If such a requirement were imposed, it would eliminate any and all present differences between UHF and VHF channel readout and would moot the issues under consideration in this proceeding.

3. We are therefore terminating this proceeding. The record herein will be made a part of the record in General Docket Nos. 78-391 and 78-392. Further comment concerning the display of UHF channels and tuning difficulty may be submitted in either or both of these proceedings. If they are not otherwise resolved (e.g., by requiring electronic tuning), the issues in this proceeding will be addressed in greater detail in those proceedings.

4. *Accordingly, it is ordered,* Effective February 12, 1979, that the instant proceeding is hereby terminated as a separate inquiry, and the comments and reply comments of the instant proceeding are made part of the inquiries in Gen. Docket No. 78-391 and Gen. Docket No. 78-392.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

[Gen. Docket No. 78-393; FCC 78-868]

TELEVISION RECEIVER PERFORMANCE STANDARDS

Inquiry

AGENCY: Federal Communications Commission.

ACTION: Notice of Inquiry Initiated.

SUMMARY: Inquiry into the need for television receiver performance standards. The objective of this proceeding is to determine what, if any, additional performance standards the Commission should impose on television receivers to insure that the overall quality of television reception is not degraded by the F.C.C.'s actions in Docket No. 21010. This Notice solicits public comment on various performance characteristics that describe the quality of picture and sound produced by television receivers.

DATES: Comments must be received by June 1, 1979 and Reply Comments must be received by September 1, 1979.

ADDRESSES: Secretary, Federal Communications Commission, Washington, D.C. 20554

FOR FURTHER INFORMATION CONTACT:

Hector Davis, FCC Laboratory Division, Laurel, MD 20145, (301) 725-1585.

Adopted: December 20, 1978.

Released: December 29, 1978.

In the matter of Television Receiver Performance Standards, GEN Docket No. 78-393.

INTRODUCTION

1. The Federal Communications Commission (FCC) is initiating this Inquiry to investigate the need for television receiver performance standards in our rules.[1] UHF noise figure and peak picture sensitivity are the only requirements now in our rules that give some measure of the picture quality produced by the receiver. Noise figure is only one of many parameters that describe receiver performance. In this proceeding[2] we intend to examine

[1] Television receivers are now required to comply with Part 15 of the rules (47 CFR 15.61 *et seq.*) limiting the amount of spurious radiation from the local oscillators. In addition, the performance of the UHF portion of the receiver must meet several performance levels aimed at providing satisfactory UHF performance. Failure to meet these requirements would result in the denial of FCC certification, a prerequisite for sale of the receivers in this country.

[2] The FCC is taking several interrelated actions which we anticipate will improve television reception by the general public, and possibly have other benefits as well. Briefly, these actions are:

Report and Order in Docket No. 21010, UHF Television Noise Figure, FCC 78-582, 43 FR 36096 (August 15, 1978). This Order will change the Noise Figure standard to 12 dB by 1982.

Notice of Inquiry in General Docket No. 78-307, Television Receiver Equipment Grading, FCC 78-665, 43 FR 49550, (October 24, 1978). This Inquiry will explore ways to improve reception by increasing the amount of information available to consumers.

Notice of Inquiry in General Docket No. 78-348, Measurement Techniques of Television Receiver Noise Figures, FCC 78-737, 43 FR 51650 (November 6, 1978). This Docket

Footnotes continued on next page

1 7 7 9 UMI

it and other measures of evaluating weak signal performance. In addition, because optimizing weak signal performance may degrade other aspects of receiver performance, we intend to examine other receiver performance measures that complement noise figure when describing the overall performance of television receivers.

2. The use of noise figure as a measure of weak signal sensitivity was recently examined by the FCC's Laboratory Division.[3] The noise figures and apparent weak signal sensitivities of several different television receivers were measured. The data produced by this study suggested that noise figure did not consistently predict the apparent sensitivity of the receivers tested. This called into question the usefulness of noise figure as a measure of weak signal performance. As a result we intend to examined other available or technically feasible measures of television receiver weak signal performance with the objective of identifying alternative measures that could supersede the requirements now in our Rules.

3. In addition we wish to examine what performance standards might be adopted as complements to noise figure measurement as an indication of receiver sensitivity. The FCC recently decided in Docket No. 21010, to reduce the UHF noise figure standard in our Rules to 14 dB by 1979 and 12 dB by 1982.[4] During the panel discussion in this proceeding [5] concern was expressed by several parties, including the FCC's Chief Engineer, that achieving the mandated reduction in noise figure might lead to certain receiver design changes which would degrade other receiver performance characteristics (e.g. selectivity; front end dynamic range; etc.) It was feared that, as a result of competitive pressures, manufacturers might feel compelled to elect this solution. The new stricter noise figure standards might thus, inadvertantly, result in some television sets providing an overall poorer picture under some receiving conditions albeit with a better noise figure. To avoid this possibility the Commission will also consider additional performance standards complementary to noise figure.[6]

Subjects To Be Addressed in This Inquiry

4. Comments are requested on the subjects listed below. When describing the usefulness of a particular performance measure, please include as much information as possible on the costs, benefits, and trade-offs involved in adopting the proposed measure. The effect of technology presently available, and anticipated on the basis of recognized trends, should be taken into account when analyzing the practicality of a proposal. Parameters which cannot be measured, or cannot be measured economically today, but that may become practical in the near future, should be considered. In addition, parameters of special importance to the performance of a receiver fed by a cable television system should be identified as such, and a supporting explanation should be given for its special relevance.

5. Subject 1. *Parameters to use in indicating weak signal performance.* When estimating specifications, please consider costs, benefits, trade-offs and present and probable technological trends. Information is requested regarding:

1-A. Noise figure (12 dB or less) modified to include other receiver characteristics such as bandwith, and impedance match.

1-B. Relative and/or absolute picture sensitivity.

1-C. Objective and/or subjective use of a signal to noise ratio (e.g., 30 dB, TASO 3 or other measures); and,

1-D. Other measures of weak signal performance.

6. Subject 2. *Receiver performance standards that describe the adequacy of reception.* (Please describe the interrelations of parameters as appropriate.)

2-A. Receiver selectivity, overall and interstage (e.g., effects on noise figure and interference rejection, changes with desired signal level to reduce receiver noise, in weak signals).

2-B. Dynamic range considerations (receiver overload protection, changes in interference rejection with desired signal level).

2-C. Interference rejection (e.g., specifications and measurements of rejection of out-of-band signals such as CB transmissions, adjacent TV channels, intermodulation, image, etc.).

2-D. Television receiver picture resolution standards (e.g. frequency response, "sharpness" control, focus, interlace, display linearity).

2-E. Color rendition by a receiver (e.g., an objective measure of color quality related to subjective observations, use of VIR signal circuitry, full bandwidth demodulation).

2-F. Receiver transient performance, that is, the ability of the receiver to handle abrupt picture transitions without smear, overshoot, or ringing.

2-G. Effect of circuit design on apparent noise (e.g. synchronous detector versus envelope detector, d.c. restorer, color or monochrome).

2-H. Receiver audio performance (e.g. frequency reponse, distortion, freedom from "buzz", etc.).

2-I. Receiver stability (e.g. change of performance parameters with such variables as vibration and movement, input supply voltage, length of time in service, and ambient temperature.

2-J. Cable television service characteristics (e.g., channel selection flexibility, protection from ambient non-cable signals, receiver input terminals).

2-K. Receiver performance indices (e.g. a number or numbers between 1 and 100 where 100 means "perfect" performance) based on each of the specific parameters previously discussed, and, in addition, the overall comparability of the UHF and VHF performance, the effectiveness of compensation for ghosts, the amount of overscan, vertical interval blanking, etc.

Inquiry Procedures

7. *Who should file comments?* We urge television and test equipment manufacturers, engineering groups and all other interested parties to participate in this investigation. You may participate by sending information and opinions that are relevant to the subjects of this Inquiry.

8. *How will this information be used?* These comments will be used to evaluate the issues we have discussed above. We expect that the comments received will result in a refinement of the areas commented on leading to further notices of inquiry or proposals to adopt amendments to our Rules. For example, we might change the Rules to reflect the need for additional certification requirements in conjunction with the 1982 implementation of the 12 dB noise figure.

9. *How should comments be prepared?* Your comments must clearly show this docket number "GEN No. 78-393" on the first page. Please label your responses so that it will be clear which subject is being addressed. If you have general comments which are not on a specific technical subject listed above, simply label these comments with the Docket number. Please state the issue being addressed. We encourage you to submit a one page summary of your comments at the time you file.

10. *How many copies should be sent?* Section 1.419 of the Rules requires that you file the original and five copies of your comments. If you want each Commissioner to receive a personal copy of your comments, you should include 6 additional copies. The FCC will consider all comments, even if only the original is filed.

11. *Where to send comments.* Send your comments to: Secretary, Federal Communications Commission, Washington, D.C. 20554. Comments must be received by June 1, 1979.

12. *How to see the comments of other parties.* All comments will be available for public inspection in the FCC Dockets Reference Room, Room 239, 1919 M Street, NW., Washington, D.C. The FCC is open weekdays between 8:00 am and 5:30 pm. You can reply to these comments by following the same procedure for preparing and sending comments. Replies to comments must be received by September 1, 1979.

13. Regarding questions on matters covered by this document, contact Hector Davis (301) 725-1585.

14. *The source of our legal authority.* Sections 4(i), 302, 303 (f), (g), (r), and (s), 330, and 403 of the Communications Act of 1934 as amended gives the FCC the authority to conduct this Inquiry. Accordingly, the FCC Orders that this Inquiry is instituted.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

[FR Doc. 79-1506 Filed 1-16-79; 8:45 am]

Footnotes continued from last page
will explore the definition of noise figure, methods for its measurement, and other related technical issues.

[6] What we propose here is related to, but does not overlap with, our *Notice of Inquiry* on *Measurement Techniques of Television Receiver noise Figures,* in which we are examining improvements to the existing noise figure measurement technique. There we are examining short-term improvements: how can what we now require to be measured (the noise figure of the UHF tuner) be updated to reflect changes in circuit configuration—e.g. the change from hot filament vacuum tubes to solid state devices—and the availability of more sophisticated test equipment? Here we are looking beyond the existing noise figure characteristics, to a new definition of noise figure or a new weak signal performance standard altogether.

[General Docket No. 78-392; FCC 78-866]

TECHNICAL IMPROVEMENTS TO TELEVISION RECEIVERS AND CERTAIN TRANSMITTER STANDARDS

Inquiry

AGENCY: Federal Communications Commission.

ACTION: Notice of Inquiry.

SUMMARY: The FCC is soliciting the public for comments on the Texas Instruments TV receiver, other receiver improvements, and certain related transmitter characteristics. This information is needed to form the technical basis from which action may be taken to improve television reception.

DATES: Comments must be received on or before July 1, 1979, Reply Comments must be received on or before October 1, 1979.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Will McGibbon, Office of Chief Engineer, Federal Communications Commission, Washington, D.C. 20554 (202-632-7060)

Adopted: December 20, 1978.

Released: December 29, 1978.

In the matter of technical improvements to television receivers and certain transmitter standards, Gen. Docket No. 78-392.

Introduction

1. The Federal Communications Commission (FCC) is initiating this Inquiry to pursue the most economical way to improve television reception and to increase the utilization of the radio spectrum. We have taken several actions in the past to upgrade UHF television service to achieve eventual comparability with VHF television. We recently lowered the maximum receiver noise figure on UHF channels from 18 dB to 12dB—an action that will improve most receivers manufactured in the future.[1] Looking further ahead, we have attempted to stimulate the development of the next generation of television receivers. We believe that technological advances will allow dramatic improvements in receiver design. In this Inquiry, the Commission will investigate improvements in receiver design, and other related technical issues, with the aim of continuing the process of improving television reception.

2. On March 2, 1978, Texas Instruments, Inc. (T.I.), presented to the Commission a summary of their final report on FCC Contract No. 0206-6TQ, High Performance Television Receiver.[2] An FCC Laboratory Division report [3] evaluating the T.I. prototype receiver was also presented. Both reports are available from the National Technical Information Service (NTIS), Springfield, Virginia 22161 (Telephone 703/557-4650). The genesis of the T.I. contract was the Commission's belief that many or all of the UHF "taboos", adopted in 1952, could be eliminated by improved receiver design. The "taboos" arise from several different UHF television receiver technical limitations. A UHF TV receiver tuned to a specific UHF TV channel can receive interference from other nearby TV transmitters on certain channels, or from other receivers tuned to a different TV channel. The "taboo" channels have certain known frequency relationships to each desired channel.

3. In May 1975, we began Docket No. 20485, *UHF Taboos,*[4] to get public comments on the issue of taboo reduction or elimination. Less than a year later, in April 1976, the FCC formally solicited bids for the development of a television receiver having improved technical performance which might eliminate a majority of the taboos. No responsive proposals were received to this offer. In August 1976, we received an unsolicited proposal from Texas Instruments that addressed most of the improvements in our original solicitation. We then awarded a contract to T.I. which resulted in the development of a "high performance" television receiver (hereinafter the "T.I. receiver").

4. The proceeding we initiate today is the next step of this continuing and important effort. Because this broader inquiry into receiver characteristics incorporates Docket No. 20485, we are closing that Docket but will consider all comments filed therein as part of the record here. Since many of the issues addressed in Docket No. 21010

[1] The FCC is taking several interrelated actions, which we anticipate will result in improved television reception by the general public, and possibly other benefits. Briefly, these actions are:

Report and Order in Docket No. 21010, UHF Television Noise Figure, FCC 78-582, 43 FR 36096 (August 15, 1978). This order will change the Noise Figure standard to 12 dB by 1982.

Notice of Inquiry in General Docket No. 78-307, Television Equipment Grading, FCC 78-665, 43 FR 49550 (October 24, 1978). This Inquiry will explore ways to improve reception by increasing the amount of information available to consumers.

Notice of Inquiry in General Docket No. 78-348, Measurement Techniques of Television Receiver Noise Figures, FCC 78-737, 43 FR 51650 (August 15, 1978). This Inquiry will explore the definition of Noise Figure, methods for its measurement, and other technical related issues.

Notice of Inquiry in General Docket No. 78-391, Improvements to UHF Television Reception, FCC 78-864, elsewhere in Part III of this issue (December 20, 1978). This Inquiry will explore ways of bringing about better UHF reception and achieving UHF television parity.

Notice of Inquiry in General Docket No. 78-393, Television Receiver Performance Standards, FCC 78-868, elsewhere in Part III of this issue (December 20, 1978). This Inquiry will explore performance standards to use in conjunction with noise figures to insure overall television adequacy, and new measure of weak signal performance to supersede noise figure.

V 4 4 / 1 2

are also pertinent to this Inquiry, we are incorporating herein all comments filed in that proceeding.

5. The improvements we are considering in this proceeding have the potential for providing better reception of existing UHF television signals and may permit the reduction of the UHF taboos. We believe that the reduction of the UHF taboos is of significant importance. Such a reduction can be expected to result in more efficient use of the spectrum. If there are spectrum savings, there are a variety of ways that spectrum thus saved may be used. For example, there may be the opportunity to create new TV stations, or we could put all or a portion in a "spectrum bank" to be drawn upon as needed rather than expended immediately. We also note that while reduction of the UHF taboos was the prime reason for our seeking a high performance receiver, the TI receiver may have improved performance at VHF as well. A new receiver may benefit the public by also increasing the flexibility of VHF channel assignments.

6. The work performed by Texas Instruments only addressed some of the changes that could be made in TV receiver design. Yet, the implementation of these changes would require a major redesign of future television receivers. When contemplating such a change, it is important that other possible improvements in receiver performance characteristics also be considered. Other possibilities include: improvements to audio quality, improvements to UHF picture quality, better receiver antenna performance, less picture ghosting, stereo TV sound, alternate sound channels with foreign language translations, and other technological advances so new, their potential has not yet been brought to the FCC's attention. Several desirable improvements, perhaps each by itself too costly to implement, might, when considered together, be the most appropriate option to elect. Failure to examine a valid possibility now might require a second, sequential change in any new receiver performance standards—a prospect costly to manufacturers and consumers. Case-by-case consideration of major technical receiver modifications may prevent or delay introduction of desirable improvements in receiver performance that would prove cost effective if incorporated in a redesign mandated for other reasons. Thus, it is appropriate to consider as many of those technical changes as possible at this time.

7. We have identified below a number of specific issues upon which the views of interested parties are solicited. We find it necessary to ask these questions in order to thoroughly consider all possible actions, but we stress that we have not prejudged any of the issues. In this particular Notice we are focusing on three areas:

(A) An evaluation of the technical design, potential benefits, and cost efficiency of the T.I. receiver;

(B) An evaluation of other possible changes in television receiver design; and

(C) An evaluation of possible changes in certain transmitter standards, and coverage protection criteria.[5] We recognize that, were we to adopt rules, many of the issues raised here could have a major impact on the manufacturers of television receivers, the television broadcast industry, and on the consumer.[6] We want to make it clear at the outset that we will not begin the rule amendment process until we have given all interested parties sufficient opportunity to contribute to our deliberations.

8. Although possible changes to the UHF television taboos are being addressed in this Notice, the Commission does not intend to address spectrum reallocation issues or the existing nationwide table of television assignments at this time. Allocation issues such as these are being reserved for future consideration since it is our intent in this Notice to focus upon specific technical and economic issues related to receiver design and transmission standards. The information developed in this Notice will form the foundation for consideration of broader issues in the future. Whether this inquiry is a step toward adoption of additional standards for TV receivers, a realignment of our table of television assignments, creation of a completely new television service based on a new generation of television receivers, or a combination of these measures, remains to be decided in a future proceeding.

9. We are also not addressing in this Notice more fundamental changes in the configuration of the television broadcast service (e.g., digital transmission, different picture aspect ratio, higher resolution pictures gained by increasing the number of lines in each frame and the scan time, or the use of new frequency compression techniques to save spectrum).[7] In limiting the scope of our Notice, we have assumed the continuation of the existing form of television service, and focus here on changes within the existing television service. While we recognize the existence and importance of these other matters, and intend to address them in a subsequent Notice, responses directed to these issues will be deemed unresponsive to this particular Notice.

Summary of the TI Study

10. Texas Instruments, Inc., concluded that it is feasible to redesign television receivers to generally meet the performance standards set forth in the Commission's original Request for Proposals (RFP). T.I. demonstrated this by providing the Commission with the T.I. receiver, which appears to meet many of the the Commission's target performance standards. With respect to these standards, this receiver appears to be generally superior to conventional receivers, and may reduce the need for some of the UHF and VHF taboos.[8]

11. The T.I. study addressed the radio frequency (RF) system (including the VHF and UHF tuners) the intermediate frequency (IF) amplifier circuits, the demodulator, and the controller. The FCC supplied a "1976" model, electronically tuned, color TV set in which T.I. replaced the IF modules and the tuners. T.I. developed a new system architecture and several new RF components. T.I. indicated that the improved system performance depends on the new devices and new circuits used in the converted TV receiver. T.I. referred to the RF system as a "pure IF" tuning system. The key devices in it are the steep selectivity, low loss, 346 MHz IF surface-acoustic wave (SAW) filters and the low noise, wide dynamic range silicon MESFET (metal Schottky field effect transistor) devices. T.I. claimed one advantage of the high (346 MHz) first IF is that some of the UHF spurious responses, such as picture image, sound image, half-IF, and IF-beat, are greatly reduced. T.I. discussed several other potential benefits of their redesign.

12. T.I. felt that the key cost elements of the new system would be the silicon MESFETs, the low-loss UHF SAW IF filters, and the SAW frequency control resonators. None of these parts are currently mass produced. A significant imvestment of effort and money would be necessary to develop

[5] There are important trade-offs between these possible changes and improvements in receiver design. We hope that some of these questions can be resolved quickly, because these changes could be implemented prior to a major receiver redesign.

[6] This Inquiry covers many technical issues which may greatly affect the public. It may become necessary to issue a subsequent NOI to determine opinion and interest from the consumer's point of view.

[7] Many alternatives to the present transmission standards and receiver designs were considered by the National Television Systems Committee (NTSC) (*See Report and Order in Docket No. 10637, Amendment to the Commission's Rules Governing Color Television Transmission*, (41 F.C.C. 658, 10 R.R. 150 (1953)) and the Television Allocations Study Organization (*See Engineering Aspects of Television Allocations*, (March 16, 1959), Wallace Homestead Books, 1912 Grand Ave., Des Moines, IA. 50309). These alternatives may be of interest because of the numerous technological advances that have been made since they were last considered by the Commission.

[8] *See* the Table in Paragraph 15 below.

the production process for these items. Receiver cost may also increase because the T.I. prototype uses about 10% more electronic component parts than a conventional tuner would. This increase in the number of component parts may not be significant, they note, because much of the circuitry could be replaced or reduced by special integrated circuits and more careful production design.

13. With the new devices and a higher number of electronic components, T.I. projected a semiconductor parts cost for the new receiver of approximately $13.00 as compared to $4.90 for a conventional receiver. They also projected a slight increased in other material costs and a decrease in labor and overhead costs. T.I.'s estimates assumed that 1.5 million units had already been produced, and that manufacturers would therefore be out of the production startup phase. T.I. concluded that at this point the increased cost of manufacturing the tuner would be about $9.00, and the increased cost to the consumer would be about $30.00 for an average color television.

14. The FCC Laboratory evaluated the performance of the prototype receiver using video and audio program material from three television channels. These signals were converted to various combinations of UHF channels to test the T.I. receiver (and a control receiver) for susceptibility to various types of interference. Three FCC engineers were used to make subjective observations of interference at the "barely perceptible level." According to the FCC Laboratory, the T.I. receiver appears to perform generally better than the stock receiver used as a control. For some types of interference, however, the FCC Laboratory found that the T.I. receiver did not meet all of the specifications set forth in the Commission's original RFP. The Laboratory report notes that some of the interference subsceptibility of the T.I. receiver may have resulted from the use of electronic (varactor) tuning.

15. The following summary of the T.I. receiver performance was prepared by the Commission's Laboratory Division, and is quoted directly from the Laboratory Division Report referred to above in note 3, paragraph 2:

Prototype Receiver's Performance

UHF "Taboos"	re FCC RFP	re TI Projections	re Stock Rcvr	re Mean Conv Rcvr
Adjacent Channel:				
n, n+1	Slightly better	Worse	Much better	Much better
n, n−1	Better	Slight better	Much better	Much better
Picture Image:				
n, n+15*	Much better	Much better	Much better	Much better
Sound Image:				
n, n+14*	Much better	Much better	Much better	Much better
Cross Modulation:				
n, n+2	Worse	Worse	Much better	Better
n, n−2	Worse	Worse	Much better	Better
n, n+4**	Much better	Better	Much better	Much better
n, n−4	Much better	Better	Much better	Better
Intermodulation:				
n, n+2, n+4	Worse	Much worse	Much better	Equal
n, n−2, n−4	Worse	Much worse	Better	Worse
IF Beat:				
n+8*	Much worse	Worse	Much better	Much worse
n−8*	Much worse	Equal	Much better	Worse
n+7*	Equal	Better	Much better	Better
n−7*	Worse	Slightly better	Much better	Better
Input for Noise-Equivalent: "TASO Grade 3"***	Worse		Better	Equal
Noise Figure****	Worse	Worse	Worse	
		Slightly better	Much better	Better

Notes: * The prototype receiver has a much higher IF than a conventional receiver, therefore, these "taboo" combinations apply only to conventional receivers. Effects of the new IF are under study.

** For a conventional receiver, n+4 gives rise to a "half-IF" beat phenomenom. The different IF of the prototype translates this condition to higher channel separations and is under study.

*** This is not a UHF "taboo."

**** Although not a UHF "taboo," a performance specification was made. However, doubt exists as to the applicability of noise figure measurements to complete TV receivers.

Questions To Be Addressed in This Inquiry

16. Technical Issues Raised by the T.I. receiver.

QUESTION 1: If receiver performance standards based on the results of the T.I. study were adopted:

(1a) Are there reasons why the additional cost to the consumer would not average approximately $30.00 as projected by T.I? Would this estimate apply to black and white sets?

(1b) If the cost of a TV receiver increased or reception improved, what would be the effect on the demand for TV receivers?

(1c) What would be the effect on receiver manufacturers and on the structure of the receiver manufacturing industry?

(1d) To what extent would these standards be achieved in production television receivers?

(1e) To what extent could the taboo distances be reduced, for:

(1e-1) Intermodulation?

(1e-2) IF Beat?

(1e-3) Sound Image?

(1e-4) Picture Image?

(1e-5) Local Oscillator Radiation?

(1e-6) Adjacent Channel (VHF and UHF)?

(1f) If the adjacent channel taboo were essentially eliminated, under what conditions could co-location or near co-location of transmitters then be used to reduce the intermodulation problems? What problems would be generated in co-locating or near co-locating transmitters?

(1g) Would there be a better choice of local oscillators and intermediate frequencies than T.I.'s, some of which are in a portion of the spectrum allocated to Government use?

(1g-1) What new taboos would a receiver using the T.I. intermediate and local oscillator frequencies require?

(1g-2) How could any problems created by TI's local oscillators and intermediate frequencies be alleviated (e.g. by requiring stricter chassis radiation standards)?

A 1 7 7 9 UMI

(1g-3) What problems would other recommended local oscillators and intermediate frequencies cause?

(1h) What impact would the mandated changes have on a receiver designed to utilize the mid- and superband frequencies between 108-136 MHz and 225-400 MHz (i.e. a "cable compatable" receiver) for viewing of cable television service according to the specifications in Docket No. 21006? [9]

QUESTION 2: Are there alternatives to the T.I. receiver design which would achieve the Commission's goals, as outlined in paragraph 1? If so:

(2a) Would these receiver design changes require different receiver performance standards than the T.I. receiver? If so, describe the standards required.

(2b) What would be the benefits of these changes?

(2c) How much would these design changes add to the purchase price of television receivers?

(2d) How would these design changes affect the cable compatibility of future television receivers?

17. Other Improvements to Television Reception

QUESTION 3: What potential improvements in current receiver performance or design are foreclosed by current transmitter performance (e.g. would reduced incidental phase modulation allow greater use of synchronous detectors)?

(3a) What would be the costs, benefits and trade-offs of implementing these improvements?

(3b) How would these improvements impact on cable television systems and receivers connected to cable systems?

QUESTION 4: Should the Commission require minimum audio performance standards for receivers?

(4a) What audio bandwidth should be specified?

(4b) What distortion standards should be specified?

(4c) What other audio standards should be specified?

(4d) What provisions if any, should the Commission require for the reception of alternate aural channels (e.g. Spanish translations of popular programs, reception of stereo broadcasts, augmented audio for the blind, or educational uses) [10]

(4e) What would be the affect on cost if these standards were adopted?

QUESTION 5: In the context of a complete TV receiver design, would it be in the public interest to allow manufacturers to make receivers which did not receive channels 70 through 83? [11]

(5a) What opportunities would such action offer for improving receiver performance?

(5b) How would the cost of receivers be affected?

(5c) What would be the impact on UHF TV translator operators and their viewing public?

QUESTION 6: Describe the impact of electronic tuning [12] in the following areas:

(6a) To what extent will electronic tuning affect the noise figure and interference susceptibility of the receiver?

(6b) How much would the cost of receivers change if the Commission required electronic tuning?

(6c) Would the demand for television receivers be affected if the Commission required electronic tuning?

(6d) What tuner specifications would best promote comparability of VHF and UHF reception?

(6e) On receivers with automatic tuning systems that include automatic channel loading mechanisms [13] what manner of loading and minimum number of channel positions should be made a precondition for certification.[14]

(6f) What problem would be encountered by cable systems and cable subscribers if the Commission were to require TV receivers to be electronically tuned?

QUESTION 7: In the context of a total receiver redesign, mandated for other reason, what would be the incremental cost and the additional changes necessary to make such a receiver "off-air cable compatible"? [15]

(7a) What would be the incremental cost of requiring such newly redesigned receivers to be easily convertable to off-air cable compatability?

(7b) How do these incremental costs compare to the cost of a converter to:

(7b-1) the individual cable viewer;

(7b-2) the Nation as a whole, considering all cable viewers and all television purchasers.

QUESTION 8: Should accessible (but not necessarily exterior) test terminals be required as part of the receiver for any certification or grading program? If so, what performance characteristics should be measurable through the test terminals? [16]

QUESTION 9: Concerning Vertical Interval Reference (VIR): [17]

(9a) Should the Commission require the transmission of the VIR signal by all televisions stations?

(9b) Should the Commission require receivers to have the capability of using the VIR signal for automatic receiver color adjustments?

QUESTION 10: Can the present 1.25 MHz bandwidth provided for the vestigial sideband of the visual portion of the television signal be reduced in view of recent filter and phase equalization developments? If so:

(10a) What new circuitry would be required in television receivers?

(10b) What would be the impact on the performance and cost of television receivers?

QUESTION 11: Current television transmission standards prohibit use of lines 1-16 in the vertical blanking interval for purposes other than receiver synchronization because of reciever limitations. Lines 17-21 may be used for other specified purposes, (such as test signals, VIR, etc).

(11a) To what extent will current technology permit reduction in the number of lines needed for synchronization?

(11b) What would be the added cost, if any, in receivers?

QUESTION 12: Present day television transmissions in accordance with FCC Standards [18] contain 4.2 MHz of luminance information and 1.5 and 0.5 Mhz of color information (in-phase and quadrature color signals respectively). A number of the current receivers do not use all of this information, some of them using as little as 3 MHz of bandwith for liminance information and 1 Mhz for color information.

Given the state of the art:

(12a) What improvements in picture fidelity, acuity and color clarity could be achieved with existing transmission bandwidths?

(12b) What changes in receiver design would be necessary to achieve these improvements?

(12c) Would these changes result in any change in cost to the consumer? I so, how much?

(12d) In what ways would these changes affect the demand for television receivers?

(12e) To what degree would improved quality in television receivers require different practices by the broadcaster (e.g. better aperture correction in cameras or different luminance bandwidth roll-off in color cameras)?

QUESTION 13: The lack of accessible input and output jacks to the video and audio amplifiers of television receivers necessitates utilization of RF devices in video games, video tape recorders, and other equipment that use the home TV as a video display unit. This increases the cost of such items, and increases the probability of electromagnetic interference to other electronic equipment. Should such video and audio jacks be required for certification of TV receivers? If so, what associated technical standards should be established? What would be the cost of these changes?

QUESTION 14: What improvements to receiver design are possible to alleviate picture ghosting? How much would these improvements cost?

QUESTION 15: To what degree should the FCC specify the dynamic range for TV receivers to reduce front end overloading? How much cost would be added to receivers if the FCC adopted these standards?

QUESTION 16: If the FCC finds that some of the changes in receiver design described above would be in the public interest:

(16a) Would any or all of these improvements be likely to occur in the next five years if no Commission rule making action is taken in this regard?

(16b) What courses of actions should the Commission consider taking to promote implementation of these changes?

(16c) Are there particular courses of action which would be harmful or most beneficial?

QUESTION 17: What should the Commission's performance standards be for the transmission line between the antenna terminals and the tuner (e.g. should shielded co-axial cable be required)?

18. Possible changes in transmitter standards and coverage protection criteria.

QUESTION 18: Should the FCC consider requiring minimum antenna heights and coverages, or increases in the minimum effective radiated power (ERP) requirements?[19] If so, what values would be appropriate?

QUESTION 19: In what way should protection criteria for assignments reflect actual ERP, antenna heights, and coverage areas? (e.g. creating classes of lower power TV stations such as those that exist in the FM radio broadcast service)?

QUESTION 20: How can the FCC's protection criteria for assignments reflect the use of directional antennas?

QUESTION 21: Should television stations be required to use precise frequency control,[20] and how should the FCC's protection criteria for assignments reflect such use?

(21a) How would this affect the cost of TV transmitter equipment?

(21b) What would be the potential benefits of such a requirement?

QUESTION 22: The FCC's rules require that the aural transmitter power be 10-20% (7-10 dB) of the visual carrier transmitter power.[21] If the FCC required an even lower aural transmitter power level:

(22a) What would be the effect on reception with current receivers? [22]

(22b) What would be the effect on reception if new performance standards (e.g. based on the TI study) were adopted?

(22c) What would be the effect on television broadcast costs?

(22d) What changes in television protection criteria should be made to reflect the changes in reception?

(22e) Would there be any improvements in adjacent channel reception if the aural carrier power was reduced?

Information on Comments

19. *Who should file comments?* We urge television equipment manufacturers, broadcasters, the viewing public, and all other interested parties to participate in this Inquiry. You may participate by sending information and opinions that are relevant to the questions listed in this Inquiry.

20. *How will this information be used?* These comments will be used to evaluate the issues we have discussed above. We expect that some comments will lead us to propose specific rule changes, and that some comments may lead to further Notice of Inquiry. For example, a second Notices of Inquiry may be necessary to determine the opinions and equipment preferences of the viewing public. The FCC will make rule changes only after all interested parties are given an adequate opportunity to comment.

21. *How comments should be prepared.* Your comments must clearly show this docket number "General Docket No. 78-392" on the first page. Please lable your responses so that it will be clear which number question is being answered. If your comments are general and do not address a specific question, please state the issue being addressed. We encourage you to submit a one page summary of your comments at the time you file.

---

[9] *See Notice of Proposed Rule Making in Docket 21006*, 61 FCC 2d, 1022 (released December 8, 1976) and *Report and Order in Docket 21006*, 65 FCC 2d 813 (released August 8, 1977).

[10] We note that the question of specifying transmission standards for these possible additions to the television broadcast service is being considered in Docket No. 21323. *See, Use of Subcarrier Frequencies in Aural Base Band*, FCC 77-477, 42 F.R. 38606 (July 15, 1977).

[11] *First Report and Order, in Docket No. 18262*, 19 R.R. 2d 1663 (1970), the FCC reallocated UHF channels 70-83 to the land mobile radio services, but allowed existing translators to operate on a secondary basis. *See also Memorandum, Opinion and Order*, 25, F.C.C. 2d 764, 20 R.R. 2d 1512 (1970).

[12] In a companion order, to be issued today we are terminating Docket No. 21179, *UHF Channel Readout on Television Receivers (Notice of Inquiry*, FCC 77-221, 42 FR 18643 (April 8, 1977)). The extensive changes we are considering in this and several related proceedings (*see supra* note 1) supersede the issues raised by Docket No. 21179, making it inappropriate to pursue this line of inquiry further.

[13] The FCC has recently received requests to grant certification of a TV receiver system which has a number of electronically preset positions (similar to the selectors in push button car radios) which can be programmed to automatically tune to particular stations. In addition, this system can automatically scan the TV frequencies in an area, and assign each selector position a station. If there are a greater number of stations in the area than preset positions, some stations will be excluded. The total number of preset positions (and the preference for automatic systems to load from the top down or bottom up) therefore potentially puts stations at one end of the televison band or the other at a significant disadvantage, even though the viewer can change the preset channels. The FCC could require, for example, that a particular ratio of UHF and VHF stations be selected, or that the positions be loaded with UHF stations first.

[14] The current minimum number of preset positions required for certification is eleven. 47 C.F.R. 15.68 (b)(1) (1976).

NOTE: cable systems serving 3500 or more subscribers are required to have at least 120 MHz of bandwith (the equivalent of 20 television channels) for immediate or potential use. 47 C.F.R. 76.252(a)(1).

[15] For a detailed description of a cable-compatible receiver, *see* (1) EIA-Cable Television System Committee (CTSC) (Draft of) Engineering Bulletin of Cable-TV Receiver and System Standards (November 8, 1973) and (2) Panel #-3, C-TAC Report available from the U.S. Department of Commerce, National Technical Information Service, PB-247, 810, Springfield, Va., 22151.

[16] *See, Notice of Inquiry General Docket No. 78-307, Television Equipment Grading*, FCC 78-665, 43 F.R. 49550 (October 24, 1978). *See also, Notice of Inquiry in General Docket* No. 78-393, *Television Receiver Performance Standards*, FCC 78-868, elsewhere in Part III of this issue (December 20, 1978).

[17] The FCC Rules allow the VIR signal to be added to the program signal at the point where its color characteristics are established, and to accompany the program signal as it traverses all circuits to the output of the transmitter. The VIR signal is constructed so that circuit distortions responsible for color deterioration will ordinarily cause measureable changes in the standardized VIR signal. Measurement of the distortion in the VIR signal allows corrections to be made to the signal. This is primarily used to correct distortions before transmission. Presently, some home TV receivers are capable of using this same information to automatically adjust color. Docket 19907, FCC 74-1234, 49 F.C.C. 2d 884, 31 R.R. 2d 1505 (1974).

[18] The FCC adopted the NTSC Standards as part of its Rules in Docket No. 10637, 41 F.C.C. 658, 10 R.R. 1501 (1953). A summary of the NTSC standards appears in Appendix A of this Docket. 41 F.C.C. 675, at 10 R.R. at 1518.

[19] The present Rules allow UHF television stations to use maximum radiated powers of 5000 kW (37 dBk) at antenna heights above average terrain of 2000 feet. A survey made by the FCC Office of Chief Engineer in 1974 showed that relatively few UHF stations operated near the limits, *Antenna and Power Statistics of TV Stations in the U.S.*, J. C. H. Wang, FCC/OCE RS 76-02 (1976).

[20] Present television transmitter frequency tolerance is 1kHz. If television stations were required to control the transmit frequency more precisely, to within a few Hertz, interference could be decreased, and service area increased. Precise Frequency Control (PFC) is now used voluntarily by some VHF stations to reduce average co-channel interference by about 6dB. It is not used at UHF, as it is not now needed (since there is little if any co-channel interference on UHF). UHF television stations are generally noise limited rather than interference limited. If UHF assignments were to be made on an interference-limited basis, which took into account actual power and antenna heights PFC for UHF might be useful.

[21] 47 C.F.R. 73.682 (a)(15).

[22] *See*, Dean, Charles E. "Measurements of the Subjective Efforts of Interference in Television Reception," *Proceedings of the IRE* (June 1960) at 1040.

V 4 4 / 1 2

22. *How many copies should be sent?* Sec. 1.419 of the rules requires that you file the original and five copies of your comments. If you want each Commissioner to receive a personal copy of your comments, you should include 6 additional copies. The FCC will fully consider all comments, even if only the original is filed.

23. *Where to send comments:* Send your comments to: Secretary, Federal Communications Commission, Washington, D.C. 20554.

24. *How to see the comments of other parties.* All comments will be available for public inspection in the FCC Dockets Reference Room, Room 239, 1919 M St., NW. Washington, D.C. The FCC is open weekdays between 8:00 am and 5:30 pm on weekdays. You can reply to these comments by following the same procedure as you would for commenting.

25. Regarding questions on matters covered by this document, contact Will McGibbon (202) 632-7060.

26. *Deadline for filing Comments.* Comments must be received by July 1, 1979. Replies to comments must be received by October 1, 1979.

27. *The source of our legal authority.* Sections 4(i), 302, 303(f), (g), (r) and (s), 330, and 403 of the Communications Act of 1934, as amended gives the FCC the authority to conduct this Inquiry. Accordingly, the FCC orders that this Inquiry is instituted. The FCC further orders that the records from Docket Nos. 20485 and 21010 be included in this proceeding, and that Docket No. 20485 is terminated.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

highlights

IMPORTANT NOTICE TO FEDERAL AGENCIES

For information on billing codes required on all documents submitted for publication in the Federal Register, see back cover of this issue.

LOW INCOME HOUSING

HUD issues interim and final rules amending contract rent annual adjustment factors; effective 11-8-78; comments by 2-20-79 (Parts IV and V of this issue) 3908, 3912

LAW-RELATED EDUCATION

HEW/OE announces availability of draft of proposed regulations implementing act of 1978 3732

MAIL

PS makes temporary change in classification schedule establishing third-class carrier route presort subclass 3797

FEDERAL CREDIT UNIONS

NCUA proposes to amend nondiscrimination in lending regulation; comments by 2-28-79 3722

SMALL BUSINESS CONCERNS

OMB/FPPO issues proposed policy letter requiring that procurement solicitations resulting in a contract of $10,000 or more indicate Federal law or agency rule citation on which each provision is based; comments by 2-15-79 3796

AIR POLLUTION CONTROL

EPA issues proposed policy statement on alternative emission reduction options within State implementation plans; comments by 3-19-79 3740

NATURAL GAS POLICY ACT OF 1978

DOE/FERC proposes regulation implementing requirement that interstate pipeline curtailment plans protect essential agricultural uses; comments by 2-26-79 3725

NUCLEAR POWER PLANTS

NRC considers amending codes and standards providing for improved, updated methods for inservice inspection; comments by 3-5-79 3719

POWERPLANT AND INDUSTRIAL FUEL USE ACT OF 1978

DOE/ERA announces public hearings on proposed rules concerning new facilities; hearings on 2-7, 2-8, 2-14, 2-15, 2-21, 2-22, 3-1 and 3-2-79; comments by 3-2-79 3721

REFINED PETROLEUM PRODUCTS

DOE/ERA adopts special rules in a standby status governing allocation and pricing during a supply shortage; effective immediately; comments by 3-16-79 (Part VI of this issue) 3928

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The following agencies have agreed to publish all documents on two assigned days of the week (Monday/Thursday or Tuesday/Friday). This is a voluntary program. (See OFR notice 41 FR 32914, August 6, 1976.)

Monday	Tuesday	Wednesday	Thursday	Friday
DOT/COAST GUARD	USDA/ASCS		DOT/COAST GUARD	USDA/ASCS
DOT/NHTSA	USDA/APHIS		DOT/NHTSA	USDA/APHIS
DOT/FAA	USDA/FNS		DOT/FAA	USDA/FNS
DOT/OHMO	USDA//FSQS		DOT/OHMO	USDA/FSQS
DOT/OPSO	USDA/REA		DOT/OPSO	USDA/REA
CSA	MSPB*/OPM*		CSA	MSPB*/OPM*
	LABOR			LABOR
	HEW/FDA			HEW/FDA

Documents normally scheduled for publication on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

***NOTE: As of January 1, 1979, the Merit Systems Protection Board (MSPB) and the Office of Personnel Management (OPM) will publish on the Tuesday/Friday schedule. (MSPB and OPM are successor agencies to the Civil Service Commission.)**

federal register

Area Code 202 Phone 523-5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Service Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 7—Agriculture

CHAPTER IX—AGRICULTURAL MARKETING SERVICE (MARKETING AGREEMENTS AND ORDERS; FRUITS, VEGETABLES, NUTS), DEPARTMENT OF AGRICULTURE

[Navel Orange Reg. 449; Navel Orange Reg. 448, Amdt. 1]

PART 907—NAVEL ORANGES GROWN IN ARIZONA AND DESIGNATED PART OF CALIFORNIA

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This action establishes the quantity of fresh California-Arizona navel oranges that may be shipped to market during the period January 19-25, 1979, and increases the quantity of such oranges that may be so shipped during the period January 12-18, 1979. Such action is needed to provide for orderly marketing of fresh navel oranges for the periods specified due to the marketing situation confronting the orange industry.

DATES: The regulation becomes effective January 19, 1979, and the amendment is effective for the period January 12-18, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, (202) 447-6393.

SUPPLEMENTARY INFORMATION: *Findings.* Pursuant to the marketing agreement, as amended, and Order No. 907, as amended (7 CFR Part 907), regulating the handling of navel oranges grown in Arizona and designated part of California, effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Navel Orange Administrative Committee, established under this marketing order, and upon other information, it is found that the limitation of handling of navel oranges, as hereafter provided, will tend to effectuate the declared policy of the act by tending to establish and maintain such orderly marketing conditions for such oranges as will provide, in the interests of producers and consumers, an orderly flow of the supply thereof to market throughout the normal marketing season to avoid unreasonable fluctuations in supplies and prices, and is not for the purpose of maintaining prices to farmers above the level which it is declared to be the policy of Congress to establish under the act. This regulation has not been determined significant under the USDA criteria for implementing Executive Order 12044.

The committee met on January 12, 15, and 16, 1979, to consider supply and market conditions and other factors affecting the need for regulation, and recommended quantities of navel oranges deemed advisable to be handled during the specified weeks. The committee reports the demand for navel oranges is expected to continue active.

It is further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553), because of insufficient time between the date when information became available upon which this regulation and amendment are based and the effective date necessary to effectuate the declared policy of the act. Interested persons were given an opportunity to submit information and views on the regulation at an open meeting, and the amendment relieves restrictions on the handling of navel oranges. It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

1. Navel Orange Regulation 449 is set forth below:

§ 907.749 Navel Orange Regulation 449.

Order. (a) The quantities of navel oranges grown in Arizona and California which may be handled during the period January 19, 1979, through January 25, 1979, are established as follows:

(1) District 1: 650,000 cartons;
(2) District 2: 89,754 cartons;
(3) District 3: unlimited movement.

(b) As used in this section, "handled", "District 1", "District 2", "District 3", and "carton" mean the same as defined in the marketing order.

2. Paragraph (a) (1) and (2) in § 907.748 Navel Orange Regulation 448 (44 FR 2353), is hereby amended to read:

§ 907.748 Navel Orange Regulation 448.

(a) • • •

(1) District 1: 765,000 cartons;
(2) District 2: 135,000 cartons.

• • • • •

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated: January 17, 1979.

CHARLES R. BRADER,
Acting Director, Fruit and Vegetable Division, Agricultural Marketing Service.

[FR Doc. 79-2117 Filed 1-17-79; 11:34 am]

[3410-02-M]

[Papaya Regulation 9, Amendment 1]

PART 928—PAPAYAS GROWN IN HAWAII

Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Amendment to final rule.

SUMMARY: This amendment relaxes the quality requirement applicable to export shipments of Hawaiian papayas during the period January 15 through April 30, 1979. Such action recognizes the current and prospective marketing situation for Hawaiian papayas and is consistent with the composition of the crop.

EFFECTIVE DATE: January 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles R. Brader, 202-447-6393.

V 4 4 / 1 3 J A 1 8 7 9 UMI

SUPPLEMENTARY INFORMATION: Pursuant to the marketing agreement and Order No. 928 (7 CFR Part 928) regulating the handling of papayas grown in Hawaii, effective under the applicable provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601-674), and upon the basis of the recommendations and information submitted by the Papaya Administrative Committee, established under this marketing order, and upon other information, it is found that this amendment will tend to effectuate the declared policy of the act. This amendment has not been determined significant under the USDA criteria for implementing Executive Order 12044.

The Papaya Administrative Committee reports that supply of papayas is less than anticipated due to wet weather and loss of fruit due to anthracnose. Demand is good and additional supplies are needed. The recommended amendment is consistent with the quality of much of the potential supply in the period specified. The amendment is designed to permit movement of available supplies of papayas consistent with the interests of producers and consumers.

It is hereby further found that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date of this amendment until 30 days after publication in the FEDERAL REGISTER (5 U.S.C. 553) in that the time intervening between the date when information upon which this amendment is based became available and the time when this amendment must become effective in order to effectuate the declared policy of the act is insufficient; and this amendment relieves restrictions on the handling of papayas grown in Hawaii.

In § 928.309 (Papaya Regulation 9; 44 FR 30) paragraph (b) is redesignated as paragraph (c) and a new paragraph (b) inserted reading as follows:

§ 928.309 Papaya Regulation 9.

(a) • • •
(1) • • •
(2) • • •

(b) Notwithstanding the provisions of paragraph (a)(2) of this section, any handler may during the period January 15 through April 30, 1979, handle papayas to any export destination which meet the requirements of the Hawaii No. 1 grade, except that allowable tolerances for defects may total 5 percent: *Provided*, That not more than 3 percent shall be for serious damage, not more than 1 percent for immature fruit, and not more than 1 percent for decay: *Provided further*, That such papayas shall individually weigh not less than 11 ounces each.

• • • • •

(Secs. 1-10, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Dated January 15, 1979, to become effective January 15, 1979.

CHARLES R. BRADER,
Deputy Director, Fruit and Vegetable Division, Agricultural Marketing Service.

CHAPTER XIV—COMMODITY CREDIT CORPORATION, DEPARTMENT OF AGRICULTURE

SUBCHAPTER B—LOANS, PURCHASES, AND OTHER OPERATIONS

[CCC Grain Price Support Regulations, 1978 Crop Barley Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 Crop Barley Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to set forth the: (1) Final loan and purchase availability dates, (2) maturity dates, and (3) loan and purchase rates and premiums and discounts under which Commodity Credit Corporation (CCC) will extend price support on 1978 crop barley. This rule is needed in order to provide a price support program for barley. This rule will enable eligible barley producers to obtain loans and purchases on their eligible 1978 crop barley.

EFFECTIVE DATE: January 18, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3732 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Merle Strawderman, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 56751 stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for the 1978 crop of barley. Such determinations included determining loan and purchase rates and other related program provisions. Nineteen responses were received: 5 recommendations pertained to loan rates, and 14 dealt with target prices. It has been determined that the loan and purchase rates for 1978 crop barley on a national average will be $1.63 per bushel. The final availability date for purchases will be changed to March 31, 1979, the same as for loans

Producers who wish to secure loans can do so by contacting their local Agricultural Stabilization and Conservation Service Office or Agricultural Service Center.

FINAL RULE

Since storage can now be deducted, the General Regulations Governing Price Support for 1980 and Subsequent Crops, and any amendments thereto and the 1978 and Subsequent Crops Barley Loan and Purchase Regulations, and any amendments thereto in this Part 1421 are further supplemented for the 1978 crop of barley. Accordingly, the regulations in 7 CFR § 1421.72 through § 1421.76 and the title of the subpart are revised to read as provided below effective as to the 1978 crop of barley. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1978 Crop Barley Loan and Purchase Program

Sec.
1421.72 Purpose.
1421.73 Availability.
1421.74 Maturity of loans.
1421.75 Warehouse charges.
1421.76 Loans and purchase rates and discounts.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); secs. 105A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1444c, 1421).

§ 1421.72 Purpose.

This supplement contains additional program provisions which together with the provisions of the General Regulations Governing Price Support for the 1978 and Subsequent Crops, the 1978 and Subsequent Crops Barley Loan and Purchase Program regulations, and any amendments thereto, apply to loans on and purchase of the 1978 crop of barley.

§ 1421.73 Availability.

(a) *Loans.* Producers desiring to participate in the program through loans must request a loan on their 1978 crop of eligible barley on or before March 31, 1979.

(b) *Purchases.* A producer desiring to offer eligible 1978 crop barley not under loan for purchase must execute and deliver to the county ASCS office on or before March 31, 1979, a Purchase Agreement (Form CCC-614) indicating the approximate quantity of 1978-crop barley they will sell to CCC.

§ 1421.74 Maturity of loans.

Loans mature on demand but not later than the last day of the ninth calendar month following the month the loan is disbursed.

§ 1421.75 Warehouse charges.

If storage is not provided for through loan maturity the county office shall deduct storage charges at the daily storage rate for the storing warehouse times the number of days from the date the commodity was received or date through which storage has been provided for to the maturity date.

§ 1421.76 Loan and purchase rates and discounts.

(a) *Basic loan and purchase rates.* Basic rates per bushel for loan and settlement purposes for barley grading U.S. No. 2 or better are as follows:

(b) *Schedule of Discounts for 1978—Crop Barley*

DISCOUNTS

(a) Grade discounts:

U.S. No. 3	−4
U.S. No. 4	−8
U.S. Grade No. 5	−20

(b) Special discounts:

Garlicky	−10
Weed control discount (where required by § 1421.24)	−10

(c) *Other.* Barley with quality factors exceeding limits shown in foregoing schedule or barley that (1) contains in excess of 14.5 percent moisture, (2) is weevily, (3) is musty, (4) sour, shall not be eligible for loan. In the event quantities of barley exceeding limits shown are delivered in satisfaction of loan obligations, such quantities will be discounted on the basis of the schedule of discounts as provided by the Kansas City Commodity Office for settlement purposes. Such discounts will be established not later than the time delivery of barley to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

NOTE.—Discounts are cumulative except only one grade discount shall be applied.

Signed at Washington, D.C., on January 9, 1979.

STEWART N. SMITH,
Acting Executive Vice President, Commodity Credit Corporation.

[CCC Grain Price Support Regulations, 1978 Crop Wheat Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 Crop Wheat Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to set forth the: (1) Final loan and purchase availability dates, (2) maturity dates, and (3) loan and purchase rates and premiums and discounts under which Commodity Credit Corporation (CCC) will extend price support on 1978 crop wheat. This rule is needed in order to provide a price support program for wheat. This rule will enable eligible wheat producers to obtain loans and purchases on their eligible 1978 crop wheat.

EFFECTIVE DATE: January 18, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3732 South Building, P.O. Box 2415, Washington, D. C. 20013.

FOR FURTHER INFORMATION CONTACT:

Merle Strawderman, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 56751 stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for the 1978 crop of wheat. Such determinations included determining loan and purchase rates and other related program provisions. Twelve recommendations were reviewed: six dealing with loan rates, and six pertaining to target prices. After considering applicable factors, it has been determined that the loan and purchase rates for 1978 crop wheat on a national average will be $2.35 per bushel.

Producers who wish to secure loans can do so by contacting their local Agricultural Stabilization and Conservation Service Office or Agricultural Service Center.

FINAL RULE

Since storage can now be deducted, the General Regulations Governing Price Support for 1978 and Subsequent Crops, and any amendments thereto and the 1978 and Subsequent Crops Wheat Loan and Purchase Regulations, and any amendments thereto in this Part 1421 are further supplemented for the 1978 crop of wheat. Accordingly, the regulations in 7 CFR § 1421.485 through § 1421.488 and the title of the subpart are revised to read as provided below effective as to the 1978 crop of wheat. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1978 Crop Wheat Loan and Purchase Program

Sec.
1421.485 Availability.
1421.486 Maturity of loans.
1421.487 Ineligible classes.
1421.488 Warehouse charges.
1421.489 Loan and purchase rates premiums and discounts.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714 and c); Secs. 107A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1445b, 1421).

V 4 4 / 1 3 1 8 7 9 JAN UMI

§ 1421.485 Availability.

(a) *Loans.* Producers desiring to participate in the program through loans must request a loan on their 1978 crop of eligible wheat on or before March 31, 1979.

(b) *Purchases.* A producer desiring to offer eligible 1978 crop wheat not under loan for purchase must execute and deliver to the county ASCS office on or before March 31, 1979, a Purchase Agreement (Form CCC-614) indicating the approximate quantity of 1978 crop wheat he will sell to CCC.

§ 1421.486 Maturity of loans.

Loans mature on demand but not later than the last day of the ninth calendar month following the month the loan is disbursed.

§ 1421.487 Ineligible classes.

Unclassed wheat shall not be eligible for loan or purchase.

§ 1421.488 Warehouse charges.

If storage is not provided through loan maturity, the county office shall deduct storage charges at the daily storage rate for the storing warehouse times the number of days from the date the commodity was received or date through which storage has been provided for to maturity.

§ 1421.489 Loan and purchase rates premiums and discounts.

(a) *Basic loan and purchase rates.* Basic rates per bushel for loan and settlement purposes for wheat grading U.S. No. 1 and are as follows:

(b) Schedule of Premiums and Discounts for 1978—Crop Wheat

	Cents per Bushel
1. *Class Premiums and Discounts:*	
(i) Premiums: Hard Amber Durum, No. 3 or better	+7½
(ii) Discounts:	
Durum	−10
Mixed wheat (mixes of classes other than contrasting classes	−3
Mixed wheat (mixtures of contrasting classes)	−10
(iii) Unclassed wheat which includes Red Durum	(1)
2. *Grade Discounts:*	
(i) Grade Discounts:	
No. 2	−2
No. 3	−4
No. 4	−6
No. 5	−9
(ii) Special Grade Discounts:	
Smut:	
Light Smutty	−3
Smutty	−9
Garlic:	
Light Garlicky	−10
Garlicky	−20
3. Weed Control discount (where required by § 1421.24	−15

[1]Unclassed wheat which includes Red Durum is ineligible for loan.

4. *Grade Discounts Sample—on factors of test weight and total damage.*

SAMPLE ON ACCOUNT OF TEST WEIGHT

Hard Red Spring		All other classes	
Test weight	Cents per bushel	Weight	Cents per bushel
49	−13	50	−13
48	−17	49	−17
47	−21	48	−21
46	−25	47	−25

14.00-14.49	8
14.50-14.99	10
15.00 & over	12
Hard Red Spring:	
11.50-11.99	0
12.00-12.49	1
12.50-12.99	2
13.00-13.49	4
13.50-13.99	6
14.00-14.49	9
14.50-14.99	12
15.00-15.49	16
15.50-15.99	20
16.00-16.49	25
16.50-16.99	30
17.00 & over	36

(c) *Other.* Wheat with quality factors exceeding limits shown in foregoing schedule on wheat that (1) contains in excess of 13.5 percent moisture, (2) is weevily, (3) is musty, (4) sour, and heating shall not be eligible for loan. In the event quantities of wheat exceeding limits shown are delivered in satisfaction of loan obligations, such quantities will be discounted on the basis of the schedule of premiums and discounts as provided by the Kansas City Commodity Office for settlement purposes. Such discounts will be established not later than the time delivery of wheat to CCC begin and will thereafter be adjusted from time to time as COC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS office approximately one month prior to the loan maturity date.

NOTE:—Premiums and discounts are cumulative except only one grade discount shall be applied.

Signed at Washington, D.C. on January 9, 1979.

STEWART N. SMITH,
Acting Executive Vice President,
Commodity Credit Corporation.

[CCC Grain Price Support Regulations, 1977 Crop Oat Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 Crop Oats Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to set forth the: (1) Final loan and purchase availability dates, (2) maturity dates, and (3) loan and purchase rates and premiums and discounts under which Commodity Credit Corporation (CCC) will extend price support on 1978 crop oats. This rule is needed in order to provide a price support program for oats. This rule will enable eligible oat producers to obtain loans and purchases on their eligible 1978 crop oats.

EFFECTIVE DATE: January 18, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3732 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Merle Strawderman, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 56751 stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for the 1978 crop of feed grains including oats. Such determinations included determining loan and purchase rates and other related program provisions. No recommendations were received concerning the loan and purchase program for oats. After considering applicable factors, it has been determined that the loan and purchase rates for 1978 crop oats on a national average will be $1.03 per bushel.

Producers who wish to secure loans can do so by contacting their local Agricultural Stabilization and Conservation Service Office or Agricultural Service Center.

FINAL RULE

Since warehouse storage charges can now be deducted. The General Regulations Governing Price Support for 1978 and Subsequent Crops, and any amendments thereto and the 1978 and Subsequent Crops Oats Loan and Purchase Regulations, and any amendments thereto in this Part 1421 are further supplemented for the 1978 crop of oats. Accordingly, the regulations in 7 CFR § 1421.270 through § 1421.273 and the title of the subpart are revised to read as provided below effective as to the 1978 crop of oats. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1978 Crop Oats Loan and Purchase Program

Sec.
1421.270 Purpose.
1421.271 Availability.
1421.272 Maturity of loans.
1421.273 Warehouse charges.
1421.274 Loans and purchase rates and premiums and discounts.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); Secs. 105A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1444c, 1421).

§ 1421.270 Purpose.

This supplement contains additional program provisions which together with the provisions of the General Regulations Governing Price Support for the 1976 and Subsequent Crops, the 1970 and Subsequent Crops Oats Loan and Purchase Program regulations, and any amendments thereto, apply to loans on and purchase of the 1978 crop of oats.

§ 1421.271 Availability.

(a) *Loans.* Producers desiring to participate in the program through loans must request a loan on their 1978 crop of eligible oats on or before March 31, 1979.

(b) *Purchases.* A producer desiring to offer eligible 1978 crop oats not under loan for purchase must execute and deliver to the county ASCS office on or before March 31, 1979, a Purchase Agreement (Form CCC-614) indicating the approximate quantity of 1978-crop oats they will sell to CCC.

§ 1421.272 Maturity of loans.

Loans mature on demand but not later than the last day of the ninth calendar month following the month the loan is disbursed.

§ 1421.273 Warehouse charges.

If storage is not provided for through loan maturity the county office shall deduct storage charges at the daily storage rate for the storing warehouse times the number of days from the date the commodity was received or date through which storage has been provided for to the maturity date.

§ 1421.274 Loan and puchase rates and premiums and discounts.

(a) *Basic loan and purchase rates (counties).* Basic county rates (marketing area in the case of Alaska) for loan and settlement purposes for oats grading U.S. No. 3, containing moisture not in excess of 14 percent moisture are as follows:

(b) *Premiums and discounts:* The basic loan and purchase rates shall be adjusted as applicable by premiums and discounts as follows:

	Cents per bushel
Premiums:[1]	
Grade U.S. No. 1	+2
Grade U.S. No. 2	+1
Test weight:	
Heavy	+1
Extra heavy	+2
Discounts:	
Grade U.S. No. 4 on the factor of test weight only but otherwise U.S. No. 3 or better	−3
Grade U.S. No. 4 because of being "badly stained or materially weathered"	−7
Garlicky	−3
Weed control discount (where required by § 1421.24)	−10

[1]Premiums shall not be applicable to badly stained or materially weathered oats.

(c) *Other.* Oats with quality factors exceeding limits shown in forgoing schedule or oats that (1) contain in excess of 14 percent moisture, (2) is weevily, (3) is musty, (4) sour, shall not be eligible for loan. In the event quantities of oats exceeding limits shown are delivered in satisfaction of loan obligations, such quantities will be discounted on the basis of the schedule of discounts as provided by the Kansas City Commodity Office for settlement purposes. Such discounts will be established not later than the time delivery of oats to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions.

Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

Signed at Washington, D.C., on January 9, 1979.

STEWART N. SMITH
Acting Executive Vice President, Commodity Credit Corporation.

[CCC Grain Price Support Regulations, 1978 Crop Corn Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 Crop Corn Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to set forth the: (1) Final loan and purchase availability dates, (2) maturity dates, and (3) loan and purchase rates and premiums and discounts under which Commodity Credit Corporation (CCC) will extend price support on 1978 crop corn. This rule is needed in order to provide a price support program for corn. This rule will enable eligible corn producers to obtain loans and purchases on their eligible 1978 crop corn.

EFFECTIVE DATE: January 18, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3732 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Merle Strawderman, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 56751 stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for the 1978 crop of feed grains including corn. Such determinations included determining loan and purchase rates and other related program provisions. Forty-one responses were received: 23 recommendations pertained to loan rates, and 18 dealt with target prices. It has been determined that loan and purchase rates for 1978-crop corn on a national average will be $2.00 per bushel. The final availability date for purchases will be changed to May 31, 1979, the same as for loans.

Producers who wish to secure loans can do so by contacting their local Agricultural Stabilization and Conservation Service Office or Agricultural Service Center.

FINAL RULE

Since storage can now be deducted, The General Regulations Governing Price Support for 1978 and Subsequent Crops, and any amendments thereto and the 1978 and Subsequent Crops Corn Loan and Purchase Regulations, and any amendments thereto in this Part 1421 are further supple-

V 4 4 / 1 3 J A 1 8 7 9 UMI

mented for the 1978 crop of corn. Accordingly, the regulations in 7 CFR § 1421.111 through § 1421.113 and the title of the subpart are revised to read as provided below, effective as to the 1978 crop of corn. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1978 Crop Corn Loan and Purchase Program

Sec.
1421.111 Availability.
1421.112 Maturity of loans.
1421.113 Warehouse charges.
1421.114 Loans and purchase rates, premiums and discounts.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); secs. 105A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1444 c, 1421).

§ 1421.111 Availability.

(a) *Loans.* Producers desiring to participate in the program through loans must request a loan on their 1978 crop of eligible corn on or before May 31, 1979.

(b) *Purchase.* A producer desiring to offer eligible 1978 crop corn not under loan for purchase must execute and deliver to the county ASCS office on or before May 31, 1979, a Purchase Agreement (Form CCC-614) indicating the approximate quantity of 1978 crop corn they will sell to CCC.

§ 1421.112 Maturity of loans.

Loans mature on demand but not later than the last day of the ninth calendar month following the month the loan is disbursed.

§ 1421.113 Warehouse charges.

If storage is not provided for through loan maturity the county office shall deduct storage charges at the daily storage rate for the storing warehouse times the number of days from the date the commodity was received or date through which storage has been provided for to the maturity date.

§ 1421.114 Loans and purchase rates, premiums and discounts.

County basic loan and purchase rates for corn and the schedule of premiums and discounts are contained in this section. Farm stored loans will be made at the basic rate for the county where the corn is stored, adjusted only for the weed control discount where applicable. The rate for warehouse stored loans shall be the basic rate for the county where the corn is stored, adjusted by the premiums and discounts prescribed in paragraph (b) of this section. Notwithstanding § 1421.22(c), settlement for corn delivered from other than approved warehouse storage, shall be based (1) on the basic rate for the county in which the producer's customary delivery point is located, and (2) on the quality and quantity of the corn delivered as shown on the warehouse receipts and accompanying documents issued by an approved warehouse to which delivery is made, or if applicable, the quality and quantity delivered as shown on a form prescribed by CCC for this purpose.

(a) *Basic county rates.* Basic county rates for corn grading No. 2 and containing from 15.1 through 15.5 percent moisture are as follows:

(b) *Premiums and discounts.* The basic loan and purchase rates shall be adjusted as applicable by premiums and discounts as follows:

Premiums	Cents per bushel
(i) Moisture (percent):	
14.6 through 15.0	+1
14.5 or less	+2
(ii) Broken corn and foreign material (percent):	
2.0 or less	+2

Premiums do not apply to sample grade corn.

Discounts	Cents per bushel
(i) Class—mixed corn	−2
(ii) Test weight per bushel, pounds:	
53.0 through 53.9	−1
52.0 through 52.9	−2
51.0 through 51.9	−4
50.0 through 50.9	−6
49.0 through 49.9	−9
(iii) Total damage (percent):	
5.1 through 6.0	−1
6.1 through 7.0	−2
(iv) Heat damage (percent):	
.21 through .50	−1
(v) Broken corn and foreign material (percent):	
3.1 through 4.0	−2
(vi) Weed control laws:	
Where required by § 1421.15	−10

(c) *Other.* Corn with quality factors exceeding limits shown in foregoing schedule or corn that (1) contains in excess of 15.5 percent moisture, (2) is weevily, (3) is musty, (4) is sour, shall not be eligible for loan. In the event quantities of corn exceeding limits shown are delivered in satisfaction of loan obligations, such quantities will be discounted on the basis of the schedule of discounts as provided by the Kansas City Commodity Office for settlement purposes. Such discounts will be established not later than the time delivery of corn to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

Signed at Washington, D.C., on January 9, 1979.

STEWART N. SMITH,
Acting Executive Vice President, Commodity Credit Corporation.

[CCC Grain Price Support Regulations, 1978 Crop Rye Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 Crop Rye Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to set forth the: (1) Final loan and purchase availability dates, (2) maturity dates, and (3) loan and purchase rates and premiums and discounts under which the Commodity Credit Corporation (CCC) will extend price support on 1978-crop rye. This rule is needed in order to provide a price support program for rye. This rule will enable eligible rye producers to obtain loans and purchases on their eligible 1978-crop rye.

EFFECTIVE DATE: January 18, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3732 South Building, P.O. Box 2415, Washington, D. C. 20013.

FOR FURTHER INFORMATION CONTACT:

Merle Strawderman, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 56751 stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for the 1978 crop of feed grains including rye. Such determinations included determining loan and purchase rates and other related program provisions. No recommendations were received concerning the loan and purchase program for rye. After considering applicable factors, it has been determined that the loan and purchase rates for 1978 crop rye on a national average will be $1.70 per bushel.

Producers who wish to secure loans can do so by contacting their local Agricultural Stabilization and Conservation Service Office or Agricultural Service Center.

FINAL RULE

Since storage can now be deducted, the General Regulations Governing Price Support for 1978 and Subsequent Crops, and any amendments thereto and the 1978 and Subsequent Crops Rye Loan and Purchase Regulations, and any amendments thereto in this Part 1421 are further supplemented for the 1978 crop of rye. Accordingly, the regulations in 7 CFR's 1421.350 and the title of the subpart are revised to read as provided below effective as the 1978 crop of rye. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1978 Crop Rye Loan and Purchase Program

Sec.
1421.350 Purpose.
1421.351 Availability.
1421.352 Maturity of loans.
1421.353 Warehouse charges.
1421.354 Loans and purchase rates, premiums and discounts.

AUTHORITY: Secs. 4 and 5, 62 Stat. 100, as amended (15 U.S.C. 714b and c); Secs. 105 A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1444 c, 1421).

§ 1421.350 Purpose.

This supplement contains additional program provisions which together with the provisions of the General Regulations Governing Price Support for the 1978 and Subsequent Crops, the 1978 and Subsequent Crops Rye Loan and Purchase Program regulations, and any amendments thereto, apply to loans on and purchase of the 1978 crop of rye.

§ 1421.351 Availability.

(a) *Loans.* Producers desiring to participate in the program through loans must request a loan on their 1978 crop of eligible rye on or before March 31, 1979.

(b) *Purchases.* A producer desiring to offer eligible 1978 crop rye not under loan for purchase must execute and deliver to the county ASCS office on or before March 31, 1979, a Purchase Agreement (Form CCC-614) indicating the approximate quantity of 1978 crop rye they will sell to CCC.

§ 1421.352 Maturity of loans.

Loans mature on demand but not later than the last day of the ninth calendar month following the month the loan is disbursed.

§ 1421.353 Warehouse charges.

If storage is not provided for through loan maturity the county office shall deduct storage charges at the daily storage rate for the storage warehouse times the number of days from the date the commodity was received or date through which storage has been provided for to the maturity date.

§ 1421.354 Loan and purchase rates, premiums, and discounts.

(a) *Basic loan and purchase rates.* Basic county rates per bushel for loan and settlement purposes for rye are established for rye grading U.S. No. 2 or better, or U.S. No. 3 on the factor of test weight only and are as follows:

(b) Schedule of Premiums and Discounts for 1978—Crop Rye:

1. *Premiums:* Rye, grading U.S. No. 1, +2

2. *Discounts:*

a. Rye, grading U.S. No. 3 on account of test weight, −2.

b. Rye, grading U.S. No. 3 on account of "thin" rye: 15.1-17.0% thins, −3; 17.1-19.0% thins, −5; 19.1-21.0% thins, −7; 21.1-23.0% thins, −9; 23.1-25.0% thins, −11.

c. Rye, grading U.S. No. 3 for factors other than test weight or % of thins, −5.

d. Weed control discount (where required by § 1421.24), −10.

(c) *Other.* Rye with quality factors exceeding limits shown in foregoing schedule or rye that (1) contains in excess of 14 percent moisture, (2) is weevily, (3) is musty, (4) sour, shall not be eligible for loan. In the event quantities of rye exceeding limits shown are delivered in satisfaction of loan obligations, such quantities will be discounted on the basis of the schedule of discounts as provided by the Kansas City Commodity Office for settlement purposes. Such discounts will be established not later than the time delivery of rye to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

Signed at Washington, D.C., on January 9, 1979.

[CCC Grain Price Support Regulations, 1978 Crop Sorghum Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 Crop Sorghum Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to set forth the: (1) Final loan and purchase availability dates, (2) maturity dates, and (3) loan and purchase rates and premiums and discounts under which Commodity Credit Corporation (CCC) will extend price support on 1978 crop sorghum. This rule is needed in order to provide a price support program for sorghum. This rule will enable eligible sorghum producers to obtain loans and purchases on their eligible 1978 crop sorghum.

EFFECTIVE DATE: January 18, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3732 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Merle Strawderman, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 56751 stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for the 1978 crop of feed grains including sorghum. Such determinations included determining loan and purchase rates and other related program provisions. Twelve recommendations were received: 6 dealing with loan rates, and 6 pertaining to target prices. After considering applicable factors, it has been determined that the loan and purchase rates for 1978 crop sorghum a national average will be $3.39 per hundredweight.

Producers who wish to secure loans can do so by contacting their local Agricultural Stabilization and Conservation Service Office or Agricultural Service Center.

FINAL RULE

The General Regulations Governing Price Support for 1978 and Subsequent Crops, and any amendments thereto and the 1978 and Subsequent Crops Sorghum Loan and Purchase Regulations, and any amendments thereto in this Part 1421 are further supplemented for the 1978 and subsequent crops of sorghum. Accordingly, the regulations in 7 CFR § 1421.235 through 1421.237 and the title of the subpart are revised to read as provided below, effective as to the 1978 crop of sorghum. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1978 Crop Sorghum Loan and Purchase Program

Sec.
1421.235 Availability.
1421.236 Maturity of loans.
1421.237 Warehouse charges.
1421.238 Loans and purchase rates and discounts.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); Secs. 105A, 401, 63 Stat. 1051, as amended (7 U.S.C. 1444c, 1421).

§ 1421.235 Availability.

(a) *Loans.* Producers desiring to participate in the program through loans must request a loan on their 1978 crop of eligible sorghum on or before May 31, 1979.

(b) *Purchases.* A producer desiring to offer eligible 1978 crop sorghum not under loan for purchase must execute and deliver to the county ASCS office on or before May 31, 1979, a Purchase Agreement (Form CCC-614) indicating the approximate quantity of 1978 crop sorghum he will sell to CCC.

§ 1421.236 Maturity of loans.

Loans mature on demand but not later than the last day of the ninth calendar month following the month the loan is disbursed.

§ 1421.237 Warehouse charges.

If storage is not provided for through loan maturity, the county office shall deduct storage charges at the daily storage rate for the storing warehouse times the number of days from the date the commodity was received or date through which storage has been provided for to the maturity date.

§ 1421.238 Loans and purchase rates and discounts.

(a) *Basic rates (counties).* Basic county rates for loan and settlement purposes for sorghum grading U.S. No. 2 or better are established as follows:

(b) *Discounts.* The basic loan and purchase rates shall be adjusted as applicable by discounts as follows:

	Cents per bushel
1. Discounts apply per hundredweight-test, weight, in pounds:	
(i) 52.9 to 52.0	−1
(ii) 51.9 to 51.0	−2
2. Total damaged kernels, percent:	
(i) 5.1 to 6.0	−2
(ii) 6.1 to 7.0	−4
(iii) 7.1 to 8.0	−6
(iv) 8.1 to 9.0	−8
(v) 9.1 to 10.0	−10
(vi) 10.1 to 11.0	−12
(vii) 11.1 to 12.0	−14
(viii) 12.1 to 13.0	−16
(ix) 13.1 to 14.0	−18
(x) 14.1 to 15.0	−20
3. Heat damaged kernels, percent:	
(i) 0.51 to 1.00	−2
(ii) 1.01 to 2.00	−6
(iii) 2.01 to 3.00	−10
4. Broken kernels, foreign material and other grains, percent:	
(i) 8.1 to 9.0	−2
(ii) 9.1 to 10.0	−4
(iii) 10.1 to 11.0	−6
(iv) 11.1 to 12.0	−8
(v) 12.1 to 13.0	−10
(vi) 13.1 to 14.0	−12
(vii) 14.1 to 15.0	−14
5. Weed control law (where required by law § 421.24)	−15

(c) *Other.* Sorghum with quality factors exceeding limits shown in foregoing schedule or sorghum that (1) contains in excess of 14 percent moisture, (2) is weevily, (3) is musty, (4) sour, shall not be eligible for loan. In the event quantities of sorghum exceeding limits shown are delivered in satisfaction of loan obligations, such quantities will be discounted on the basis of the schedule of discounts as provided by the Kansas City Commodity Office for settlement purposes. Such discounts will be established not later than the time delivery of sorghum to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Producers may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

Signed at Washington, D.C., on January 9, 1979.

STEWART N. SMITH,
Acting Executive Vice President, Commodity Credit Corporation.

[CCC Grain Price Support Regulations, 1978 Crop Soybean Supplement]

PART 1421—GRAINS AND SIMILARLY HANDLED COMMODITIES

Subpart—1978 Crop Soybean Loan and Purchase Program

AGENCY: Commodity Credit Corporation, Department of Agriculture.

ACTION: Final rule.

SUMMARY: The purpose of this rule is to set forth the: (1) Final loan and purchase availability dates, (2) maturity dates, and (3) loan and purchase rates and premiums and discounts under which Commodity Credit Corporation (CCC) will extend price support on 1978-crop soybeans. This rule is needed in order to provide a price support program for soybeans. This rule will enable eligible soybean producers to obtain loans and purchases on their eligible 1978-crop soybeans.

EFFECTIVE DATE: January 18, 1979.

ADDRESS: Price Support and Loan Division, ASCS, U.S. Department of Agriculture, 3732 South Building, P.O. Box 2415, Washington, D.C. 20013.

FOR FURTHER INFORMATION CONTACT:

Merle Strawderman, ASCS, (202) 447-7973.

SUPPLEMENTARY INFORMATION: A notice of proposed rulemaking was published in the FEDERAL REGISTER on December 21, 1977, 42 FR 56751, stating that the Department of Agriculture proposed to make determinations and issue regulations relative to a loan and purchase program for the 1978 crop of feed grains including soybeans. Such determinations included determining loan and purchase rates and other related program provisions. Forty-one responses were received: 23 recommendations pertained to loan rates, and 18 dealt with target prices. It has been determined that loan and purchase rates for 1978 crop soybeans on a national average will be $4.50 per bushel. The final availability date for purchases will be changed to May 31, 1979, the same as for loans.

Producers who wish to secure loans can do so by contacting their local Agricultural Stabilization and Conservation Service Office or Agricultural Service Center.

FINAL RULE

The General Regulations Governing Price Support for 1978 and Subsequent Crops, and any amendments thereto and the 1978 and Subsequent Crops Soybean Loan and Purchase Regulations, and any amendments thereto in this Part 1421 are further supplemented for the 1978 crop of soybeans. Accordingly, the regulations in 7 CFR § 1421.390 through § 1421.392 and the title of the subpart are revised to read as provided below, effective as to the 1978 crop of soybeans. The material previously appearing in these sections shall remain in full force and effect as to the crops to which it is applicable.

Subpart—1978 Crop Soybean Loan and Purchase Program

Sec.
1421.390 Availability.
1421.391 Maturity of loans.
1421.392 Warehouse charges.
1421.393 Loans and purchase rates, premiums and discounts.

AUTHORITY: Secs. 4 and 5, 62 Stat. 1070, as amended (15 U.S.C. 714b and c); secs. 201, 401, 63 Stat. 1051, as amended (7 U.S.C. 1446, 1421).

§ 1421.390 Availability.

(a) *Loans.* Producers desiring to participate in the program through loans must request a loan on their 1978 crop of eligible soybeans on or before May 31, 1979.

(b) *Purchasers.* A producer desiring to offer eligible 1978 crop soybeans not under loan for purchase must execute and deliver to the county ASCS office on or before May 31, 1979, a Purchase Agreement (Form CCC-614) indicating the approximate quantity of 1978 crop soybeans he will sell to CCC.

§ 1421.391 Maturity of loans.

Loans mature on demand but not later than the last day of the ninth calendar month following the month the loan is disbursed.

§ 1421.392 Warehouse charges.

If storage is not provided for through loan maturity, the county office shall deduct storage charges at the daily storage rate for the storing warehouse times the number of days from the date the commodity was received or date through which storage has been provided for to the maturity date.

§ 1421.393 Loans and purchase rates, premiums and discounts.

County basic loan and purchase rates for soybeans and the schedule of premiums and discounts are contained in this section. Farm stored loans will be made at the basic rate for the county where the soybeans are stored, adjusted only for the weed control discount where applicable. The rate for warehouse stored loans shall be the basic rate for the county where the soybeans are stored, adjusted by the premiums and discounts prescribed in paragraph (b) and (c) of this section. Notwithstanding § 1421.22(c), settlement for soybeans delivered from other than approved warehouse storage, shall be based (1) on the basic rate for the county in which the producer's customary delivery point is located, and (2) on the quality and quantity of the soybeans delivered as shown on the warehouse receipts and accompanying documents issued by an approved warehouse to which delivery is made, or if applicable, the quality and quantity delivered as shown on a form prescribed by CCC for this purpose.

(a) *Basic county rates.* Basic county rates for the classes Green or Yellow Soybeans containing 12.8 to 13 percent moisture and grading not lower than U.S. No. 2 on the factors of test weight, splits, and heat damage and U.S. No.1 on all other factors are as follows:

(c) *Other.* Soybeans with quality factors exceeding limits shown in foregoing schedules or soybeans that (1) contain in excess of 14 percent moisture, (2) is weevily, (3) is musty, (4) sour, shall not be eligible for loan. In the event quantities of soybeans exceeding limits shown are delivered in satisfaction of loan obligations, such quantities will be discounted on the basis of the schedule of discounts as provided by the Kansas City Commodity Office for settlement purposes. Such discounts will be established not later than the time delivery of soybeans to CCC begins and will thereafter be adjusted from time to time as CCC determines appropriate to reflect changes in market conditions. Procedures may obtain schedules of such factors and discounts at county ASCS offices approximately one month prior to the loan maturity date.

Signed at Washington, D.C., on January 9, 1979.

STEWART N. SMITH,
Acting Executive Vice President, Commodity Credit Corporation.

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 17939; Amdt. 39-3396]

PART 39—AIRWORTHINESS DIRECTIVES

Agusta Model A109 and A109A Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that would require inspections and replacement of the tail rotor drive shaft hanger bearing support bracket on Costruzioni Aeronautiche Giovanni Agusta Model A109 and A109A helicopters. The AD is needed because the affected bracket is subject to cracking which could result in the failure of the tail rotor.

DATES: Effective February 19, 1979. Compliance schedule—As prescribed in body of AD.

ADDRESSES: The applicable service bulletin may be obtained from: Costruzioni Aeronautiche Giovanni Agusta, Cascina Costa (Gallarate), Italy. A copy of the service bulletin is contained in the Rules Docket, Rm. 916, 800 Independence Avenue, S.W., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa, and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium, telephone 513.38.30. Chris Christie, AFS-110, Engineering & Mfg. Div., FAA, telephone 202-426-8374.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring inspections and replacement of the tail rotor drive shaft hanger bearing support bracket on certain Costruzioni Aeronautiche Giovanni Agusta Model A109 and A109A helicopters was published in the FEDERAL REGISTER at 43 FR 24850; June 8, 1978.

The proposal was prompted by an FAA determination that the tail rotor drive shaft hanger bearing support bracket, P/N 109-0370-02-1, on Agusta Models A-109 and A-109A helicopters is subject to cracking which could result in failure of the tail rotor.

Interested persons have been afforded an opportunity to participate in the making of the amendment. One comment was received, and disagreed with the necessity for issuing an airworthiness directive on the basis that none of the affected helicopters was on the U.S. Registry, and that voluntary compliance would be shown for all other affected helicopters. However, voluntary compliance with a manufacturer's service bulletin does not relieve the FAA from taking Airworthiness Directive action as appropriate.

The amendment therefore is adopted as proposed with the exception of minor clarifying changes.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

COSTRUZIONI AERONAUTICHE GIOVANNI AGUSTA. Applies to Model A109 and A109A helicopters, serial numbers 7109 and below, certificated in all categories, incorporating tail rotor drive shaft hanger bearing support bracket P/N 109-0370-02-1.

Compliance is required as indicated, unless already accomplished.

To prevent a possible tail rotor failure, accomplish the following:

(a) Within the next 10 hours time in service after the effective date of this AD, and thereafter following the last flight of each day in which the helicopter is operated, inspect the tail rotor drive shaft hanger bearing support bracket, P/N 109-0370-02-1, for cracks in accordance with Part I of the "Accomplishment" paragraph of Agusta Bollettino Tecnico No. 109-2, dated April 14, 1976, including Rev. A dated May 11, 1976, or an FAA-approved equivalent. (Hereinafter referred to as Service Bulletin.)

(b) If a crack is found during an inspection required by this AD, before further flight, except as provided in paragraph (d) of this AD, replace the affected bracket with—

(1) A serviceable bracket of the same part number, and continue to inspect in accordance with paragraph (a) of this AD after the last flight of each day in which the helicopter is operated; or,

(2) A new support bracket, P/N 109-0370-12-1, in accordance with Part II of the "Accomplishment" paragraph of the Service Bulletin.

(c) Within the next 100 hours time in service after the effective date of this AD, replace support bracket, P/N 109-0370-02-1 with a new bracket, P/N 109-0370-12-1, in accordance with Part II of the "Accomplishment" paragraph of the Service Bulletin. The repetitive inspections required by paragraphs (a) and (b)(1) of this AD may be discontinued upon the installation of a support bracket, P/N 109-0370-12-1, in accordance with this AD.

(d) Helicopters may be flown in accordance with FAR's 21.197 and 21.199 to a base where the required work can be performed.

This amendment becomes effective February 19, 1979.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89.)

Issued in Washington, D.C., on January 8, 1979.

J. A. FERRARESE,
Acting Director, Flight Standards Service.

[FR Doc. 79-1729 Filed 1-17-79; 8:45 am]

[4910-13-M]

[Docket No. 17526; Amdt. 39-3399]

PART 39—AIRWORTHINESS DIRECTIVES

Hawker Siddeley Aviation, Ltd. (British Aerospace) Model DH-104 Dove Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

V 4 4 / 1 3 J A 1 8 7 9 UMI

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires repetitive inspections of the center section main spar top boom and replacement of the boom as necessary on Hawker Siddeley Aviation, Limited Model DH-104 "Dove" airplanes. The AD is needed to detect cracks in the lugs at each end of the boom which could result in separation of the wing in flight.

DATES: Effective February 19, 1979. Compliance schedule—as prescribed in body of AD.

ADDRESSES: The applicable technical news sheet may be obtained from: Hawker Siddeley Aviation, Limited, Hatfield Hertfordshire, England, Product Support Department. Telephone: Hatfield 62345. A copy of the technical news sheet is contained in the Rules Docket, Room 916, 800 Independence Avenue, S.W., Washington, D.C. 20591.

FOR FURTHER INFORMATION CONTACT:

D. C. Jacobsen, Chief, Aircraft Certification Staff, AEU-100, Europe, Africa and Middle East Region, Federal Aviation Administration, c/o American Embassy, Brussels, Belgium. Telephone: 513.38.30. Chris Christie, FAA, Eng. & Mfg. Div., AFS-110, Washington, D.C. Telephone: 202-426-8374.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring repetitive inspection and replacement as necessary of the center lug of the three lugs located at each end of the center section main spar top boom on Hawker Siddeley Aviation, Limited Model DH-104 Dove airplanes was published in the FEDERAL REGISTER at 43 FR 974. The proposal was prompted by reports of cracks in the center section main spar boom which affect the structural integrity of the wing to fuselage attachment and could result in separation of the wing in flight on Hawker Siddeley Limited Model DH-114 Heron airplanes. The cracks are believed to be caused by stress corrosion and an airworthiness directive (AD 76-16-03), Amendment 39-2689, has been issued to correct this problem. Since the corresponding lug arrangement on the DH-104 Dove airplane is almost identical in configuration and of the same material as the Heron, it is likely that similar cracking exists or will develop on these airplanes.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No objections were received. However, upon further review the FAA has determined that certain clarifications are needed (1) to define more explicitly the meaning of a serviceable used boom that can be used as a replacement; (2) to point out that in paragraph (b) the inspection in accordance with Appendix 2 requires use of the dye penetrant method as well as the ultrasonic method; (3) to eliminate an ambiguity in the repetitive inspection schedule set forth in paragraph (b)(1); and (4) to define more accurately the cracking covered by paragraph (d) to make clear that that paragraph applies to cracking which is other than literally horizontal. In addition, the applicability statement has been corrected to show that this AD does not apply to those airplanes which have been modified in accordance with STC SA1747WE. Other minor editorial changes have also been made.

In addition, the FAA has determined that it is necessary to revise the repetitive inspection schedule for replacement booms to be more consistent with the inspection schedules for those booms which are currently in service and to point out that replacement of the boom is required when cracking is found which runs from the bolt hole in an inboard direction only.

Accordingly, with the exception of paragraph (e), the amendment is adopted as proposed with the clarifications noted above. Revised paragraph (e) is also adopted and since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure thereon are impracticable.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

HAWKER SIDDELEY AVIATION, LIMITED (British Aerospace). Applies to DH-104 "Dove" airplanes, all series, certificated in all categories, except those airplanes modified in accordance with STC SA1747WE.

Compliance required as indicated.

To prevent possible failure of the wing to fuselage attachment and loss of wing in flight, accomplish the following:

(a) Within the next 100 hours time in service after the effective date of this AD, unless already accomplished, remove the port and starboard wing root fairings and inspect the upper three lugs at each end of the center section main spar top boom, P/N 4FS.135 A/1, for cracks using an ultrasonic method of inspection in accordance with Appendix 1 of Hawker Siddeley Aviation, Ltd., Technical New Sheet TNS 237, dated September 9, 1976, (hereinafter referred to as the Technical News Sheet) or an FAA-approved equivalent.

NOTE.—This inspection can be conducted with the wing installed.

(b) If no cracks are found during the inspection required by paragraph (a) of this AD, repeat the inspection at intervals not to exceed 1200 flight hours or 2 calendar years, whichever occurs sooner, until the wings are removed for compliance with AD 72-16-07 at which time the area must be further inspected using the ultrasonic and dye penetrant methods in accordance with appendix 2 of the Technical News Sheet or an FAA-approved equivalent. Thereafter, if no cracking is found, continue to inspect the area as follows:

(1) In accordance with the method specified in paragraph (a) of this AD at an interval not to exceed 3 calendar years from each time the area is inspected in conjunction with the wing removal required by AD 72-16-07; and

(2) In accordance with the ultrasonic and dye penetrant methods specified in appendix 2 of the Technical News Sheet or an FAA-approved equivalent at each time the wings are removed for compliance with AD 72-16-07.

(c) If any cracks are found during any inspection required by this AD to be performed in accordance with the method specified in paragraph (a) of this AD, further inspect by ultrasonic and dye penetrant methods in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent with the wing removed.

(d) If, during any inspection required by this AD, cracking of the lugs is found which is confined to only one of the lugs per side of the aircraft and exists only from the bolt hole towards the outboard end of the lug, the center section carry through boom may remain on the aircraft and continued flight is permitted provided the wing is removed at intervals not to exceed 300 flight hours, or 3 months, whichever is sooner, and the cracked lug is inspected for crack propagation and the remaining two lugs are inspected for cracking, all in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent, until the boom is replaced with a new boom of the same part number or a used boom of the same part number determined after inspection in accordance with Appendix 2 of the Technical News Sheet to be crack-free.

(e) If, during any inspection required by this AD, cracking is found in more than one lug per side of the aircraft or the cracking of any one lug extends to both sides (inboard and outboard) of the bolt hole or runs from the bolt hole in an inboard direction only, before further flight, replace the carry through boom with a new boom of the same part number or a used boom of the same part number determined after inspection in accordance with Appendix 2 of the Technical News Sheet to be crack-free. Replacement booms must continue to be inspected in accordance with the following schedule:

(1) For used replacement booms, within 3 years from replacement, inspect the lug area in accordance with Appendix 1 of the Technical News Sheet or an FAA-approved equivalent except if any wing removal is required by AD-72-16-07 during that period, inspect in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent concurrently with that wing removal. Thereafter inspect in accordance with the schedule and inspection methods specified in paragraphs (b)(1) and (b)(2) of this AD.

(2) For new replacement booms, inspect the lug area in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent with the wing removed prior to accumulating 6 years in service and thereafter in accordance with the schedule and inspection methods specified in paragraphs (b)(1) and (b)(2) of this AD. However, if the first inspection required after replacement is not performed in conjunction with a wing removal required by AD 72-16-07, within the next 3 years after that inspection, inspect in accordance with Appendix 1 of the Technical News Sheet or an FAA-approved equivalent except if any wing removal is required by AD 72-16-07 during that period inspect in accordance with Appendix 2 of the Technical News Sheet or an FAA-approved equivalent concurrently with that wing removal and thereafter inspect in accordance with the schedule and inspection methods specified in paragraphs (b)(1) and (b)(2) of this AD.

This amendment becomes effective February 19, 1979.

(Secs. 313(a), 601, and 603 Federal Aviation Act of 1958, as amended. (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89).

Issued in Washington, D.C. on January 10, 1979.

J. A. FERRARESE,
Acting Director,
Flight Standards Service.

[4910-13-M]

[Docket No. 79-SO-2; Amendment 39-3394]

PART 39—AIRWORTHINESS DIRECTIVES

Piper Models PA-28-161, PA-28R-201, and PA-28R-201T Series Airplanes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts an airworthiness directive which requires checking the fuel gascolator for proper installation on certain Piper PA-28-161, PA-28R-201, and PA-28R-201T airplanes. This amendment requires corrective action if a gascolator is found installed with the ports reversed. This amendment is necessary to insure that the fuel system is not contaminated and that the proper fuel flow is maintained to the engine.

DATES: Effective date: January 29, 1979. Compliance is required within the next 25 hours time in service after the effective date of this AD.

ADDRESSES: Piper Service Bulletin 612 may be obtained from Piper Aircraft Corporation, 820 East Bald Eagle Street, Lockhaven, Pennsylvania 17745. Copies of Piper Service Bulletin 612 are maintained in the AD Docket File and may be examined in Room 275, Federal Aviation Administration, Southern Region, 3400 Whipple Street, East Point, Georgia.

FOR FURTHER INFORMATION CONTACT:

Gil Carter, ASO-214, Propulsion Section, Engineering and Manufacturing Branch, Southern Region, P.O. Box 20636, Atlanta, Georgia 30320, telephone (404) 763-7435.

SUPPLEMENTARY INFORMATION: There have been reports of improperly installed fuel gascolators which could result in fuel contamination, interrupted fuel flow, and engine power loss. Since this condition is likely to exist or develop in other airplanes of the same type design, this amendment is issued to insure that the fuel gascolator is installed properly.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

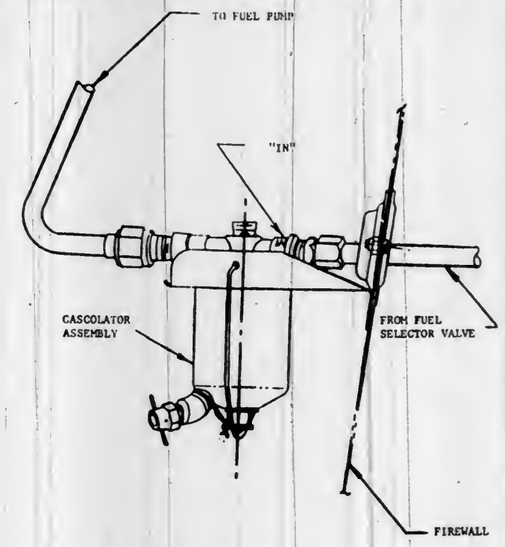
ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive:

PIPER AIRCRAFT CORPORATION: Applies to Model PA-28-161, serial numbers 28-7816002 through 28-7816553, 28-7816554, 28-7816556 through 28-7816564, 28-7816566 through 28-7816597, 28-7816599 through 28-7816607, 28-7816609 through 28-7816634, 28-7816636 through 28-7816643; Model PA-28R-201T, serial numbers 28R-7803002 through 28R-7803294, 28R-7803296 through 28R-7803308, 28R-7803310, 28R-7803311, 28R-7803315, 28R-7803317 through 28R-7803321, 28R-7803323 through 28R-7803325; and Model PA-28R-201, serial numbers 28R-7837002 through 28R-7837232, 28R-7837234, 28R-7837236, 28R-7837238 through 28R-7837241, 28R-7837243 through 28R-7837245, 28R-7837248 through 28R-7837250, 28R-7837253 through 28R-7837257, 28R-7837260, 28R-7837262 through 28R-7837264, 28R-7837266 through 28R-7837270, 28R-7837272 through 28R-7837275, airplanes certificated in all categories.

Compliance is required within the next 25 hours time in service after the effective date of this AD unless already accomplished.

To prevent possible fuel flow interruption, accomplish the following:



(a) Remove the top cowl or open the top left cowl as appropriate.

(b) Remove the lower cowl attaching hardware on left side only and pull lower cowl outward to gain visual access to the fuel gascolator assembly.

(c) Check the gascolator installation to determine if the gascolator is installed with the ports oriented as shown in the accompanying figure.

(d) If the gascolator is installed in accordance with the accompanying figure, secure the cowling and make the appropriate maintenance record entry.

(e) If the gascolator is not installed in accordance with the accompanying figure, have the following accomplished by a person authoized by FAR 43.3:

V 4 4 / 1 3 J A 1 8 7 9 UMI

(1) Remove lower cowling.
(2) Place the fuel selector valve in the "OFF" position.
(3) Cut safety wire on the gascolator bowl bail. Remove the filter bowl, gasket and screen from the gascolator. Clean any deposits that may be on the screen and/or the bowl.
(4) Carefully spread the bail wire where it enters the housing until the bail can be removed.
(5) Supporting the fittings in the gascolator housing with an open end wrench, remove the inlet and outlet "B" nuts. It will facilitate the removal and re-installation of the gascolator assembly if the fuel line is loosened at the electric fuel pump inlet.
(6) On the PA-28-161 only, disconnect the primer line directly on top of the gascolator housing.
(7) Remove the gascolator assembly from the attaching bracket and turn 180°, positioning as shown in the accompanying figure.
(8) If the line assembly does not reach the inlet fitting, remove the forward left hand upholstery panel and inspect for, and correct, improper bends.

Caution: Pulling the line into position with the "B" nut may cause damage to the flare.

(9) Re-assemble the gascolator assembly and tighten all fuel line connections.
(10) Turn on the aircraft power and the fuel boost pump and check for any fuel leaks. Correct any discrepancies found.
(11) Reinstall the cowling.
(12) Make the appropriate maintenance record entry.
(f) An alternate method of compliance may be approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Southern Region.

The checks in this AD may be accomplished by the pilot and appropriate maintenance record entries made in accordance with FAR 91.173. Installation correction must be accomplished by a person authorized by FAR 43.3.

NOTE.—Piper Service Bulletin 612 dated October 25, 1978, also pertains to this subject.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423; Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89).)

Issued in East Point, Georgia, on January 8, 1979.

GEORGE R. LA CAILLE,
Acting Director,
Southern Region.

[Airspace Docket No. 77-EA-90]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Designation of Transition Area: Suffolk, Va.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule will designate a Suffolk, Va., Transition Area, over Suffolk Municipal Airport, Suffolk, Va. This designation will provide protection to aircraft executing the new instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

EFFECTIVE DATE: 0901 G.M.T. March 22, 1979.

FOR FURTHER INFORMATION CONTACT:

Frank Trent, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: On page 64130 of the FEDERAL REGISTER for December 22, 1977, the FAA published an NPRM giving interested parties time in which to submit comments. No objections have been received.

ADOPTION OF THE AMENDMENT

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 G.M.T. March 22, 1979, as published.

(Section 307(a), and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69.)

Issued in Jamaica, New York, on December 28, 1978.

L. J. CARDINALI,
Acting Director,
Eastern Region.

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to designate a Suffolk, Va. 700-foot Floor transition area as follows:

SUFFOLK, VA.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center, (36° 40' 53" N., 76° 36' 11" W.,) of Suffolk Municipal Airport, Suffolk, Va.; within 3 miles each side of a 249° bearing from the Suffolk RBN (36° 40' 49" N., 76° 36' 28" W.) extending from the 6.5-mile radius area to 8.5 miles west of the RBN.

Title 15—Commerce and Foreign Trade

CHAPTER IX—NATIONAL OCEANIC AND ATMOSPHERIC ADMINISTRATION, DEPARTMENT OF COMMERCE

PART 930—FEDERAL CONSISTENCY WITH APPROVED COASTAL ZONE MANAGEMENT PROGRAMS

Consistency for Outer Continental Shelf (OCS) Exploration, Development and Production Activities

AGENCY: National Oceanic and Atmospheric Administration.

ACTION: Amendments to rules.

SUMMARY: This rule amends existing regulations on consistency for Outer Continental Shelf (OCS) exploration, development, and production activities with approved State coastal management programs. These amendments are necessary to make these regulations conform with subsequently enacted law (Section 504 of the Outer Continental Shelf Lands Act Amendments of 1978—Pub. L. 95-372), and to resolve a procedural difference between these regulations and Department of the Interior regulations pertaining to the same general subject matter.

EFFECTIVE DATE: January 18, 1979.

FOR FURTHER INFORMATION CONTACT:

James P. Lawless, Assistant General Counsel, (202) 634-4239, or John O'Donnell, Office of Coastal Zone Management, (202) 634-4243, NOAA, Page Building 1, 2001 Wisconsin Avenue, N.W., Washington, D.C. 20235.

SUPPLEMENTARY INFORMATION: In volume 43 of the FEDERAL REGISTER of Monday, March 13, 1978, beginning at page 10510, the National Oceanic and Atmospheric Administration (NOAA) published final regulations for the Office of Coastal Zone Management (OCZM) pertaining to the Federal consistency provisions of the Coastal Zone Management Act of 1972, as amended (CZMA, sections 307(c)(1), 307(c)(2, 307(c)(3) (A) and (B) and 307(d)). Subpart E of these regulations, beginning at page 10526, addresses section 307(c)(3)(B) of the CZMA. This provision requires each activity described in detail in any plan submitted to the Secretary of the Interior for the exploration or development of, or production from, any area leased under the Outer Continental Shelf Lands Act to be conducted in a manner consistent with approved state coastal zone management programs.

In more detail—and prior to amendment—section 307(c)(3)(B) required that any person submitting such a plan must attach to it a certification that each activity described in detail in the plan complied with the state program and would be conducted in a manner consistent with it. The section went on to say, among other things, that the state coastal zone management agency had to decide at the earliest practicable time, whether it concurred with or objected to the certification and so notify the Secretaries of Interior and Commerce. Subsection (ii) of the provision said, in effect, that unless the state agency gave this notification within six months of that agency's receipt of copy of the certification, its concurrence was "conclusively presumed." These matters are treated in 15 CFR 930.70 and 930.78 of the March 13, 1978, regulations.

Section 504 of the 1978 amendments to the Outer Continental Shelf Lands Act amended subsection (ii) of section 307(c)(3)(B). Section 504 added the requirement that any state agency in receipt of the required consistency certification that had not submitted the required notification of concurrence or objection to the Secretary of Commerce, the appropriate federal agency and the person submitting the OCS plan within three months following receipt of the certification must submit to them a written statement "describing the status of review and the basis for further delay in issuing a final decision." Section 504 went on to provide that, if the state agency did not submit such a written statement, then its concurrence with the certification would be "conclusively presumed." Accordingly, it becomes necessary to amend the implementing regulations to reflect these amendments of the law.

On another subject, conflict has been found in terminology between the Department of the Interior regulations pertaining to the submission of OCS plans and the NOAA consistency regulations pertaining to this same subject. The DOI regulations (30 CFR 250.34) require the submission of such plans to the "USGS Area Supervisor." The NOAA regulations require any person submitting any OCS plan to the Secretary of the Interior to furnish the state agency a copy of the OCS plan. The procedural conflict is eliminated by directing any person submitting an OCS plan to furnish the necessary number of copies of a plan to the USGS Area Supervisor who in turn will distribute them to the appropriate parties. This change will provide one contact for the submission of OCS plans.

Also, to clarify the DOI contact for submission of plans, it has been agreed between DOI and NOAA that the NOAA regulations will be amended to substitute "USGS Area Supervisor" for "Secretary of the Interior" wherever the latter appears in the NOAA regulations.

Since the first amendment to the regulations described above is required by law, and since the second is not of a substantive nature, NOAA hereby finds for good cause, in accordance with 5 U.S.C. 553 (b) and (d), that notice of public procedures on such regulatory amendments is unnecessary and that a 30-day delay prior to the effective date of the amendments is unnecessary.

In consideration of the foregoing:

1. Delete so much of subparagraph (ii) under *Comment* as begins with "Concurrence" and ends with "subparagraph (A)" and substitute the following:

§ 930.70 Objectives [Amended]

. . . . . .

(ii) Concurrence by such state with such certification is conclusively presumed as provided for in subparagraph (A), except if such state fails to concur with or object to such certification within three months after receipt of its copy of such certification and supporting information, such state shall provide the Secretary, the appropriate federal agency, and such person with a written statement describing the status of review and the basis for further delay in issuing a final decision, and if such statement is not so provided, concurrence by such state with such certification shall be conclusively presumed: . . .

. . . . . .

2. *15 CFR 930.79 (Amended).* Delete the entire section and substitute the following:

§ 930.79 State agency concurrence or objection.

(a) At the earliest practicable time, the State agency shall notify the person, the USGS Area Supervisor, and the Assistant Administrator of its

V 4 4 / 1 3 J A 1 8 7 9 UMI

concurrence with or objection to the consistency certification. State agencies should restrict the period of public notice, receipt of comments, hearing proceedings and final decision-making to the minimum time necessary to inform the public, obtain sufficient comment, and develop a reasonable decision on the matter. If the State agency has not issued a decision within three months following commencement of State agency review, it shall notify the person, the USGS Area Supervisor, and the Assistant Administrator of the status of review and the basis for further delay in issuing a final decision. Notice shall be in written form and postmarked no later than three months following the State agency's receipt of the certification and supporting information. Concurrence by the State agency shall be conclusively presumed if the notification required by this subparagraph is not provided.

(b) Concurrence by the State agency shall be conclusively presumed in the absence of a State agency objection to the consistency certification within six months following commencement of State agency review.

(c) If the State agency objects to one or more of the Federal license or permit activities described in detail in the OCS plan, it must provide a separate discussion for each objection in accordance with the directives within § 930.64 (b) and (d). The objection shall also include a statement informing the person of a right of appeal to the Secretary on the grounds described in Subpart H.

(*Comment:* Except for the requirements for State agencies to take certain actions within three months and to inform the USGS Area Supervisor of consistency decisions, the provisions in this section are comparable to those described in §§ 930.63-930.64).

3. The following sections in Subpart E of 15 CFR Part 930 are amended by the deletion of the phrase "Secretary of the Interior" wherever it appears and the substitution of the phrase "USGS Area Supervisor":

a. 930.71
b. 930.72
c. 930.73
d. 930.76
e. 930.79(a), as amended
f. 930.83
g. 930.86(c)
h. 930.86(d)

4. 15 CFR 930.76(b) is revised to read as follows:

§ 930.76 Submission of an OCS plan and consistency certification [Amended]

* * * * *

When satisfied that the proposed activities meet the Federal consistency requirements of this Subpart, provide the USGS Area Supervisor with a consistency certification, attached to the OCS plan, and the USGS Area Supervisor shall furnish the State agency a copy of the OCS plan (excluding proprietary information) and consistency certification.

* * * * *

Dated: January 10, 1979.

ROBERT L. CARNAHAN,
Acting Assistant Administrator for Administration.

Title 17—Commodity and Securities Exchanges

CHAPTER I—COMMODITY FUTURES TRADING COMMISSION

PART 1—GENERAL REGULATIONS UNDER THE COMMODITY EXCHANGE ACT

PART 4—COMMODITY POOL OPERATORS AND COMMODITY TRADING ADVISORS

Commodity Pool Operators and Commodity Trading Advisors; Final Rules

Correction

In FR Doc. 79-638, appearing at page 1918, in the issue for Monday, January 8, 1978, make the following changes:

1. On page 1925, second column, in § 4.21 (a), third line, the comma following the word "Act" should be removed.

2. On page 1925, third column, in § 4.21 (a)(4)(i)(C), fifth line, "hundreth" should be corrected to read "hundredth".

3. On page 1926, first column, in § 4.21 (a)(4)(ii), fourteenth and seventeenth lines, the dashes between "of" and "percent" and "only" and "months" are intended to represent blanks.

4. On page 1926, third column, in § 4.22 (a) in the fifth line, "operate" should be corrected to read "operates".

5. On page 1927, in the second column, in § 4.22 (d) sixth line, "advisor(s)" should be corrected to read "advisor(s))".

6. On page 1928, third column, in § 4.31 (c) sixth line, "amended" should be corrected to read "amendment".

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT: DEPARTMENT OF THE INTERIOR

APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5656; CA-1560]

CALIFORNIA

Partial Revocation of Public Land Order No. 5043

AGENCY: Bureau of Land Management (Interior).

ACTION: Final rule.

SUMMARY: This order partially revokes a public land order which withdrew and reserved lands for use of the Department of the Navy as a parachute test facility. The lands remain withdrawn by Executive Order of March 10, 1924, establishing Public Water Reserve No. 90; E.O. No. 5498 of November 25, 1930, reserving lands for the Salton Sea National Wildlife Refuge; and the order of October 19, 1920, of the Secretary of the Interior, withdrawing lands for reclamation purposes, so far as such order affects any of the lands described below.

EFFECTIVE DATE: January 18, 1979.

FOR FURTHER INFORMATION CONTACT:

Louis B. Bellesi, 202-343-8731.

By virtue of the authority contained in section 204 of the Act of October 21, 1976, 90 Stat. 2751; 43 U.S.C. 1714, it is ordered as follows:

1. Public Land Order No. 5043 of April 14, 1971, which withdrew and reserved public lands for the Department of the Navy as a parachute test facility is hereby revoked so far as it affects the following described lands:

SAN BERNARDINO MERIDIAN

T. 10 S., R. 11 E.,
Secs. 14, 18, 20, 22, 24, 26, 28, 32, 34, 36.
T. 10 S., R. 12 E.,
Secs. 18, 20, 30, and 32.
T. 11 S., R. 12 E.,
Secs. 6, 8, 18, 19, 20, 29, and 30;
Sec. 32, N½.

The area described aggregates approximately 13,810 acres in Imperial County.

2. All the lands described remain in existing withdrawals and under water.

GUY R. MARTIN,
Assistant Secretary of the Interior, Land and Water Resources.

JANUARY 12, 1979.

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[Docket No. 21291; RM-2711]

PART 73—RADIO BROADCAST SERVICES

FM Broadcast Station in St. Ignace, Mich., Changes Made in Table of Assignments

AGENCY: Federal Communications Commission.

ACTION: Report and order.

SUMMARY: Action taken herein substitutes a Class C FM channel for a Class A channel at St. Ignace, Michigan, in response to a petition filed by Mighty-Mac Broadcasting Company. The Class C channel could permit establishment of a station which would provide a first and second FM as well as a first and second nighttime aural service to the area.

EFFECTIVE DATE: February 19, 1979.

ADDRESS: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Mildred B. Nesterak, Broadcast Bureau (202) 632-7792.

SUPPLEMENTARY INFORMATION:

Adopted: January 4, 1979.

Released: January 12, 1979.

In the Matter of Amendment of § 73.202(b), Table of Assignments, FM Broadcast Stations. (St. Ignace, Michigan.)

By the Chief, Broadcast Bureau:

1. The Commission has under consideration its Notice of Proposed Rule Making, adopted June 16, 1977, 42 FR 32813, inviting comments on a proposal to substitute Class C FM Channel 275 for Channel 272A at St. Ignace, Michigan. The proceeding was instituted on the basis of a petition filed by Mighty-Mac Broadcasting Company ("petitioner"), licensee of daytime-only AM Station WIDG, St. Ignace, Michigan. There were no oppositions to the proposal.

2. St. Ignace (pop. 2,892), seat of Mackinac County (pop. 9,600),[1] is located at the southeastern tip of Michigan's "Upper Peninsula," between Lakes Michigan and Huron, and is approximately 64 kilometers (40 miles) southwest of the Canadian border. It is served locally by daytime-only AM Station WIDG, licensed to petitioner. Channel 272A is assigned to St. Ignace, but is presently unoccupied and unapplied for.

3. Petitioner asserts that the area's principal business is tourism, with a heavy influx of tourists into the county during the summer and fall, increasing the population well beyond that estimated by the Census. The area around St. Ignace is classified as rural by the Census Bureau.

4. Channel 275 could be assigned to St. Ignace, Michigan, in conformity with the minimum distance separation requirements. One community, Onaway (pop. 1,262), would be precluded as a result of the proposed assignment. However, petitioner has indicated that an alternative Class A channel is available for assignment should the need arise.

5. Petitioner's engineering analysis, using Roanoke Rapids 9 F.C.C. 2d 672 (1967), and Anamosa and Iowa City, Iowa, 46 F.C.C. 2d 520 (1974), criteria indicates that, if Channel 275 were assigned and Channel 272A were deleted, an FM station operating with 39 kilowatts and antenna height of 70 meters (230 feet), as contemplated by petitioner, would provide a first and second FM and aural nighttime service to 83 persons in a 67 square kilometer (26 square miles) area and 373 persons in a 215 square kilometer (83 square miles) area, respectively.

6. In the Notice we pointed out that in 1966, Channel 272A was assigned to St. Ignace at the request of the petitioner. Although petitioner at that time stated its intent to apply for the channel, it later realized construction of a Class A facility could not be cost-justified. In this proceeding petitioner claims that a wide coverage Class C assignment would be able to obtain enough revenue to make it financially viable. Because of our concern as to whether petitioner would be financially able to construct a station with the proposed facilities, and whether funds exist to sustain construction costs, we requested petitioner to provide a realistic and convincing showing of its commitment, indicating both intent and ability to promptly provide FM service, if authorized. Petitioner has furnished adequate information which persuades us that it is financially able to construct and operate a station if it is ultimately authorized to do so.

7. The proposed Channel 275 assignment would provide for an FM station which could render first and second FM service as well as first and second nighttime aural service to the area. In this light, and since it has been shown that there is an alternate channel available for assignment to the community of Onaway, which is located in the precluded area, we believe the public interest would be served by the proposed assignment.

8. The Canadian Government has given its concurrence to the proposed assignment of Channel 275 to St. Ignace, Michigan.

9. Authority for the action taken herein is contained in Sections 4(i), 5(d)(1), 303 (g) and (r) and 307(b) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

10. In view of the foregoing, IT IS ORDERED, That effective February 19, 1979, § 73.202(b) of the Commission's Rules, the FM Table of Assignments, as regards St. Ignace, Michigan, IS AMENDED as follows:

City	Channel No.
St. Ignace, Michigan	275

11. *It is further ordered,* That this proceeding is terminated.

(Secs. 4, 303, 307, 48 Stat., as amended, 1066, 1082, 1083; 47 U.S.C. 154, 303, 307.)

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

Title 49—Transportation

CHAPTER I—RESEARCH AND SPECIAL PROGRAMS ADMINISTRATION MATERIALS TRANSPORTATION BUREAU, DEPARTMENT OF TRANSPORTATION

PART 171—GENERAL INFORMATION, REGULATIONS, AND DEFINITIONS

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

[Docket No. HM-22; Amdt. Nos. 171-43, 173-126]

Matter Incorporated by Reference

AGENCY: Materials Transportation Bureau, Research and Special Programs Administration, DOT.

ACTION: Final rule.

SUMMARY: The purpose of these amendments to §§ 171.7(d)(3)(ii) and 173.34(e)(10) of the Hazardous Materials Regulations is to permit the use of the updated edition of the Compressed Gas Association's (CGA) Pamphlet C-6 for visual inspection of compressed gas cylinders. In addition, these amendments correct an inconsistency existing between §§ 173.34(e)(5) and 173.34(e)(10). The intended effect of these amendments is to improve proce-

V 4 4 / 1 3 JAN 18 79 UMI

dures in the visual inspection of compressed gas cylinders and to clarify the time requirements for retention of cylinder reinspection and retest records.

EFFECTIVE DATE: Upon publication in the FEDERAL REGISTER.

FOR FURTHER INFORMATION CONTACT:

Douglas A. Crockett, Standards Division, Office of Hazardous Materials Regulation, Materials Transportation Bureau, 2100 Second Street S.W., Washington, D.C. 20590; 202/426-2075.

SUPPLEMENTARY INFORMATION: On January 9, 1978, the Materials Transportation Bureau (MTB) published a notice of proposed rulemaking, Docket HM-22, Notice 78-1 (43 FR 1369). The proposals contained in Notice 78-1 were based on petitions for rulemaking submitted by the CGA. One petition requested an update to § 171.7(d)(3)(ii), which incorporates by reference CGA Pamphlet C-6 setting out the standards for visual inspection of compressed gas cylinders, from the referenced 1968 edition to the 1975 edition. The CGA periodically reviews its standards and publishes revisions when clarification, improvement, or additions are necessary. The revisions made by CGA in the 1975 pamphlet were coordinated with the MTB and it was mutually agreed that each of the changes was necessary. The notice proposed to update the reference from the 1968 edition of the pamphlet to the 1975 edition.

The CGA also petitioned to amend § 173.34(e)(10) to eliminate an inconsistency between that paragraph and paragraph (e)(5) with respect to the length of time cylinder reinspection and retest records are to be retained. Currently, § 173.34(e)(10) requires inspection results to be kept as a permanent record, while paragraph (e)(5) requires the owner or his authorized agent to keep the records until expiration of the retest period or until the cylinder is reinspected or retested, whichever occurs first. The notice proposed to amend § 173.34(e)(10) to refer to the retesting requirements of paragraph (e)(5).

One commenter objected to the proposed amendment to § 171.7(d)(3)(ii) on the grounds that paragraph 5.3.9.2 of CGA Pamphlet C-6 contains a visual inspection procedure for high pressure cylinders which the commenter considers inadequate and unsafe. The commenter was advised that the objectionable paragraph in Pamphlet C-6 is not applicable to § 173.24(e)(10), the paragraph in which the pamphlet is referenced and, therefore, the objection is not germane to the proposed rulemaking. The commenter subsequently withdrew his objection. Other comments submitted were in support of the proposals.

In consideration of the foregoing, Parts 171 and 173 of Title 49, Code of Federal Regulations, are amended as follows:

1. In § 171.7 paragraph (d)(3)(ii) is amended by changing "1968" to read "1975."

2. In § 173.34 paragraph (e)(10) is amended by revising the fourth sentence to read as follows:

§ 173.31 Qualification, maintenance and use of cylinders.

* * * * *

(e) * * *

(10) * * * Inspections shall be made only by competent persons and the results shall be recorded on a suitable data sheet, the completed copies which shall be kept in accordance with the requirements of paragraph (e)(5) of this section. * * *

(AUTHORITY: (49 U.S.C. 1803, 1804, 1806, 1808; 49 CFR 1.53(e).)

NOTE.—The Materials Transportation Bureau has determined that this final amendment will not have a major economic impact under the terms of Executive Order 12044 and DOT implementing procedures (43 FR 9582). A regulatory evaluation is available for review in the docket.

Issued in Washington, D.C. on January 5, 1979.

L. D. SANTMAN,
Director, Materials, Transportation Bureau.

CHAPTER V—NATIONAL HIGHWAY TRAFFIC SAFETY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. LVM 77-05; Notice 3]

PART 531—PASSENGER AUTOMOBILE AVERAGE FUEL ECONOMY STANDARDS

Exemption From Average Fuel Economy Standards

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Final decision to grant exemption from average fuel economy standards.

SUMMARY: This notice exempting Excalibur Automobile Corp. (Excalibur) from the generally applicable average fuel economy standard of 18.0 miles per gallon (mpg) for 1978 model year passenger automobiles and establishing an alternative standard is issued in response to a petition by Excalibur. The alternative standard is 11.5 mpg.

DATE: The exemption and alternative standard apply in the 1978 model year.

FOR FURTHER INFORMATION CONTACT:

Douglas Pritchard, Office of Automotive Fuel Economy Standards, National Highway Traffic Safety Administration, Washington, D.C. 20590 (202-755-9384).

SUPPLEMENTARY INFORMATION: The National Highway Traffic Safety Administration (NHTSA) is exempting Excalibur from the generally applicable passenger automobile average fuel economy standard for the 1978 model year and establishing an alternative standard.

This exemption is issued under the authority of section 502(c) of Title V of the Act. Section 502(c) provides that a manufacturer of passenger automobiles that manufactures fewer than 10,000 vehicles annually may be exempted from the generally applicable average fuel economy standard if that generally applicable standard is greater than the low volume manufacturer's maximum feasible average fuel economy and if the NHTSA establishes an alternative standard applicable to that manufacturer at the manufacturer's maximum feasible average fuel economy. In determining the manufacturer's maximum feasible average fuel economy, section 502(e) of the Act requires the NHTSA to consider:

(1) Technological feasibility;
(2) Economic practicability;
(3) The effect of other Federal motor vehicle standards on fuel economy; and
(4) The need of the Nation to conserve energy.

This final rule was preceded by a notice announcing the receipt of a petition for exemption from the 1978 standard (43 FR 19311; May 4, 1978) and a proposed decision to grant an exemption to Excalibur for the 1978 model year (43 FR 33268; July 31, 1978).

No comments were submitted in response to the notice of receipt of the petition.

Three comments were submitted in response to the proposed decision. One of these comments was submitted by a private citizen, who supported the proposed exemption, because he believed that Excalibur produced an excellent product. The other two comments, both of which opposed the proposed exemption, were submitted by public interest groups. The objections centered primarily on the suggestion that the proposed exemption for Excalibur was contrary to the Congressional

intent, that the agency had erroneously determined Excalibur's maximum feasible average fuel economy level, and that even if Excalibur's maximum feasible average fuel economy level had correctly been determined, the agency should use its discretion to deny the requested exemption.

With regard to the first point, both commenters stated that granting an exemption to Excalibur would be contrary to the general Congressional intent to improving fuel economy. Congress, however, specifically included a provision whereby low volume manufacturers could be exempted from the generally applicable standard if that generally applicable standard were greater than the low volume manufacturer's maximum feasible average fuel economy and the agency establishes an alternative standard for the low volume manufacturer at its maximum feasible average fuel economy level. The inclusion of this provision strongly suggests that Congress intended that, in some circumstances, low volume manufacturers would be exempted from the generally applicable standard.

One commenter went on to argue that Congress had intended that the low volume exemptions only be available to manufacturers of moderately priced cars, and not to manufacturers of very expensive cars. In this commenter's view, the manufacturer of very expensive cars can pass on any civil penalties to its customers in the form of a price increase, and both manufacturer and customer could consider this as "conscience money".

No legislative history supporting this contention regarding Congressional intent is cited by the commenter or known to this agency. Congress did give the agency discretionary authority to grant or deny petitions. However, Congress did not direct the agency to use the discretion to deny exemption petitions by manufacturers of high-priced automobiles or to use it in any other particular manner.

This commenter went on to urge that there is no incentive for these low volume manufacturers to improve fuel economy, because an exemption can be expected. However, any exemption is required to be accompanied by an alternative standard set at that manufacturer's maximum feasible average fuel economy level. This will ensure that these manufacturers must improve their fuel economy, or pay a civil penalty.

Both public interest groups asserted that NHTSA had incorrectly determined Excalibur's maximum feasible average fuel economy. One commenter pointed out that had Excalibur adopted the Corvette engine in 1975, its automobiles would have better fuel economy for the 1978 model year. This point is true, but, as the notice of receipt of Excalibur's petition pointed out, the decision not to use the Corvette engine was made because of technical problems relating to the placement of the catalyst and the costs of certifying that vehicle. This decision was not clearly unreasonable when made, and was made before the passage of any fuel economy standards by Congress. Accordingly, the determination of maximum feasible average fuel economy for Excalibur was made assuming that Excalibur was using the engine currently in its vehicles, instead of another engine it might have installed in those vehicles. It should be emphasized that the time for selecting a different engine and improving the fuel economy of 1978 Excaliburs has passed.

Both of these commenters asserted that the agency erred in suggesting that the Nation's need to conserve energy would be negligibly affected by granting this exemption. However, neither of these commenters questioned the agency estimate that Excalibur's 1978 automobiles achieving an average fuel economy of 11.5 mpg rather than 18.0 mpg would result in the consumption of an additional 2.5 barrels of fuel per day. Since the United States currently consumes about 5 million barrels of fuel in passenger automobiles each day, the additional fuel consumed by Excalibur achieving an average fuel economy of 11.5 mpg represents .00005 percent of daily passenger car fuel consumption. The agency again concludes that this amount is insignificant. In any event, NHTSA again points out that no excess fuel is used if Excalibur's standard is set at its maximum feasible level instead of some higher level.

Both commenters urged that even if Excalibur's excess use of fuel is minor, the excess use by all low volume manufacturers would not be minor. The additional fuel consumption by all low volume manufacturers who have petitioned for exemption the 1978 model year achieving their maximum feasible average fuel economy levels rather than the generally applicable standard of 18.0 mpg will amount to about 64 barrels of fuel per day. This total represents about .0013 percent of daily passenger car fuel use, and is still small enough for this agency to conclude that it is an insignificant amount. More important, setting standards above these manufacturer's maximum feasible levels would not result in additional fuel savings.

The final reason suggested by the commenters for denying Excalibur's petition for exemption was that the agency should exercise its discretion to deny the petition on the grounds that it is contrary to the general goal of energy conservation and that an exemption would erode public support for the fuel economy program. This agency believes that the language in section 502(c) specifying that the agency may exempt low volume manufacturers indicates that Congress intended this agency to apply a test of whether granting an exemption would be generally consistent with the purposes of the Act. The main purpose of the Act is conserving energy. Establishing standards above the maximum feasible average fuel economy for Excalibur would not conserve any energy, since the alternative standard is based on the premise that it is not possible for Excalibur to achieve better fuel economy than its maximum feasible level.

As to the comments stating that an exemption for Excalibur would endanger public support for the program, this agency does not agree that requiring very small manufacturers like Excalibur to comply with standards set at their maximum feasible level instead of the maximum feasible level for larger manufacturers will necessarily erode public support for the program. Instead, the agency believes that the process of exempting the very small manufacturers will be viewed as equitably adjusting the generally applicable fuel economy standards to the lesser capabilities of these manufacturers.

For these reasons the agency had determined that the maximum feasible average fuel economy for Excalibur in the 1978 model year is 11.5 mpg. Therefore, this agency is exempting Excalibur from the generally applicable standard of 18.0 mpg for the 1978 model year and is establishing an alternative standard for Excalibur at 11.5 mpg for the 1978 model year.

Accordingly, 49 CFR Part 531 is amended by adding § 531.5(b)(5), to read as set forth below.

§ 531.5 Fuel economy standards.

* * * * * *

(b) The following manufacturers shall comply with the standards indicated below for the specified model years:

(1) * * *
(2) * * *
(3) * * *
(4) [Reserved]
(5) Excalibur Automobile Corp.

AVERAGE FUEL ECONOMY STANDARD

Model year 1978. *Miles per gallon* 11.5.

The program official and attorney principally responsible for the development of this decision are Douglas Pritchard and Stephen Kratzke, respectively.

[Docket No. LVM 77-02; Notice 3]

PART 531—PASSENGER AUTOMOBILE AVERAGE FUEL ECONOMY STANDARDS

Exemption from Average Fuel Economy Standards

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Final decision to grant exemption from average fuel economy standards.

SUMMARY: This notice exempting Rolls-Royce Motors Inc. (Rolls-Royce) from the generally applicable average fuel economy standard of 18.0 miles per gallon (mpg) for 1978 model year passenger automobiles and establishing an alternative standard is issued in response to a petition by Rolls-Royce. The alternative standard is 10.7 mpg.

DATE: The exemption and alternative standard apply in the 1978 model year.

FOR FURTHER INFORMATION CONTACT:

Douglas Pritchard, Office of Automotive Fuel Economy Standards, National Highway Traffic Safety Administration, Washington, D.C. 20590 (202-755-9384).

SUPPLEMENTARY INFORMATION: The National Traffic Safety Administration (NHTSA) is exempting Rolls-Royce from the generally applicable passenger automobile average fuel economy standard for the 1978 model year and establishing an alternative standard.

This exemption is issued under the authority of section 502(c) of Title V of the Act. Section 502(c) provides that a manufacturer of passenger automobiles that manufactures fewer than 10,000 vehicles annually may be exempted from the generally applicable average fuel economy standard if that generally applicable standard is greater than the low volume manufacturer's maximum feasible average fuel economy and if the NHTSA establishes an alternative standard applicable to that manufacturer at the manufacturer's maximum feasible average fuel economy. In determining the manufacturer's maximum feasible average fuel economy, section 502(e) of the Act requires the NHTSA to consider:

(1) Technological feasibility;
(2) Economic practicability;
(3) The effect of other Federal motor vehicle standards on fuel economy; and
(4) The need of the Nation to conserve energy.

This final rule was preceded by a notice announcing the receipt of a petition for exemption from the 1978 standard (42 FR 64171; December 22, 1977) and a proposed decision to grant an exemption to Rolls-Royce for the 1978 model year (43 FR 30081; July 13, 1978). Only one comment on the notice of receipt was submitted. That commenter urged that Rolls-Royce be exempted "in the name of common sense".

Eleven comments were received in response to the proposed decision, all of which opposed the proposed exemption. These comments raised three main points: Congress never intended that Rolls-Royce receive an exemption; the agency had incorrectly determined the maximum feasible average fuel economy for Rolls-Royce; and even if Rolls-Royce were eligible and had a maximum feasible average fuel economy of less than the generally applicable standard of 18.0 miles per gallon (mpg), NHTSA should use its discretion to deny the Rolls-Royce petition.

With respect to the first point, several commenters stated that it was unfair for some manufacturers to be forced to comply with a standard of 18 mpg, while others were exempted from that requirement. Congress determined, however, through section 502(c) of the Act, to authorize this agency to exempt low volume manufacturers from the generally applicable standard and establish a standard for those manufacturers at the level of their maximum feasible average fuel economy. Congress took this action in recognition of a variety of factors, including the limited engineering staff and financial resources of these manufacturers. Low volume manufacturers can be exempted from the generally applicable standards only if they cannot comply with those standards, and if alternative standards are set.

Other commenters said that the agency should require fuel economy improvements by all manufacturers, not permit certain manufacturers to ignore the generally applicable fuel economy standards. The agency is requiring all exempted manufacturers to comply with an alternative standard set at their maximum feasible average fuel economy. A requirement that these manufacturers achieve some higher fuel economy level would not save any additional fuel, since the alternative standard is based on the premise that it is not possible for a manufacturer to achieve a higher fuel economy level. Hence, exempting low volume manufacturers from the generally applicable standards and establishing an alternative standard at their maximum feasible level does not result in any additional use of fuel.

In this vein, one other commenter suggested that Congress had intended that the low volume exemptions only be available to manufacturers of moderately priced cars, and not to manufacturers of very expensive cars. In this commenter's view, the manufacturer of very expensive cars can pass on any civil penalties to its customers in the form of a price increase. Given the price of these cars, this commenter concluded that the increase would not cause any noticeable decrease in sales, while an exemption would only serve to keep prices down for the purchasers of these expensive vehicles.

No legislative history supporting this contention regarding Congressional intent is cited by the commenter or known to this agency. Congress did give the agency discretionary authority to grant or deny petitions. However, Congress did not direct the agency to use that discretion to deny exemption petitions by manufacturers of high-priced automobiles or to use it in any other particular manner.

Other comments suggested that it was unfair to grant exemptions only to foreign companies, while requiring all domestic companies to comply with the generally applicable standard. Both domestic and foreign low volume manufacturers are eligible for exemptions. Indeed, the first two low volume manufacturers to receive exemptions were domestic manufacturers, Avanti and Checker.

The second major objection raised by the commenters concerned this agency's determination of the maximum feasible average fuel economy for Rolls-Royce. No commenters suggested that the consideration of technological feasibility or the effect of other Federal motor vehicle standards on fuel economy had been in error. In this connection, it should be emphasized that the time for improving the fuel economy of 1978 Rolls-Royces has passed. However, several commenters stated that this agency had not properly considered the economic practicability or the need of the Nation to conserve energy.

One commenter argued that this agency had not considered the ability of Rolls-Royce to pay the civil penalty which would be assessed if Rolls-Royce failed to comply with the higher generally applicable standard. The agency agrees that it has confined itself under section 502(c) to an analysis of the financial capabilities of the petitioner to improve fuel economy by using smaller engines, lighter components, and the like, and does not consider the ability to absorb any potential civil penalties.

The reason for so limiting the analysis of economic practicability in setting alternative standards for individual manufacturers is that the agency believes that Congress intended the maximum feasible concept to result in an alternative set at the highest average fuel economy level a manufacturer could reasonably be expected to achieve in a given model year. If the ability to pay any civil penalty is considered as a part of economic practicability for an individual manufacturer, the resulting standard would be higher than the highest fuel economy level the manufacturer could achieve in that model year, and thus would impose an unavoidable civil penalty. This would not conserve any additional fuel since it would not cause that manufacturer to achieve higher fuel economy and would not apply to other manufacturers whose fuel economy could exceed the fuel economy of that manufacturer. Accordingly, the agency does not believe that Congress intended the ability to pay a civil penalty to be a part of economic practicability under these circumstances.

Other commenters suggested that NHTSA's determination that the need of the Nation to conserve energy would be negligibly affected by granting this exemption was erroneous. For instance, one commenter stated that it was unfair to consider exempting Rolls-Royce because of the insignificant amount of fuel involved, and compared this to a proposal allowing Cadillac drivers to drive at whatever speed they chose while requiring drivers of all other cars to observe posted speed limits, because of the small number of Cadillacs on the road. Congress has already decided the issue of fairness by authorizing the exemptions of low volume manufacturers. Further, the Act specifically directs the agency to consider the need of the nation to conserve energy, and when that need is negligibly affected by a given fuel economy, the agency must give weight to that fact.

None of these comments questioned the agency estimate that Rolls-Royce 1978 automobiles achieving an average fuel economy level of 10.7 mpg rather than 18.0 mpg would result in the consumption of an additional 30.4 barrels of fuel per day. Since the United States currently uses about 5 million barrels of fuel in passenger automobiles each day, the additional fuel consumed by Rolls-Royce represents .00061 percent of daily fuel consumption. The agency concludes that an amount this small is insignificant.

The final reason suggested by the commenters for denying an exemption for Rolls-Royce was that the agency should exercise its discretion to deny the exemption request on the grounds that it is contrary to the goal of energy conservation and will erode public support for the fuel economy program. This agency believes that the language in section 502(c) specifying that this agency may exempt low volume manufacturers indicates that Congress intended this agency to apply a test of whether granting an exemption would be generally consistent with the purposes of the Act. The main purpose of the Act is conserving energy. Establishing standards above the maximum feasible average fuel economy levels for Rolls-Royce would not conserve any additional energy, since the alternative standard is based on the premise that it is not possible for the company to achieve better fuel economy than the maximum feasible level.

As to the comments stating that exemptions would endanger public support for the fuel economy program, this agency does not agree that requiring very small manufacturers like Rolls-Royce to comply with standards set at their maximum feasible level instead of the maximum feasible level for larger manufacturers will necessarily erode public support for the program. Instead, the agency believes that the processs of exempting the very small manufacturers will be viewed as equitably adjusting the generally applicable fuel economy standards to the lesser capabilities of these manufacturers.

For the above reasons, the agency has determined that the maximum feasible average fuel economy for Rolls-Royce in the 1978 model year is 10.7 mpg. Therefore, the agency is exempting Rolls-Royce from the generally applicable standard of 18.0 mpg for the 1978 model year and establishing an alternative standard for Rolls-Royce at 10.7 mpg for the 1978 model year.

Accordingly, 49 CFR Part 531 is amended by § 531.5(b)(2) to read as set forth below.

§ 531.5 **Fuel economy standards.**

* * * * *

(b) The following manufacturers shall comply with the standards indicated below for the specified model years:

* * * * *

(2) Rolls-Royce Motors Inc.

CHAPTER X—INTERSTATE COMMERCE COMMISSION

SUBCHAPTER A—GENERAL RULES AND REGULATIONS

[Service Order No. 1327, Amdt. No. 1]

PART 1033—CAR SERVICE

Brillion & Forest Junction Railroad Co. Authorized To Operate Over Tracks Abandoned by Chicago & North Western Transportation Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 1 to Service Order No. 1327.

SUMMARY: The Chicago & North Western Transportation Co. (CNW), in Docket AB-1 Sub. No. 52, has been authorized to abandon its line between Rosemer, Wisconsin, and Forest Junction, Wisconsin. A new railroad, the Brillion and Forest Junction, has been formed by a group of shippers located in Brillion, Wisconsin, to acquire and operate that portion of the line abandoned by the CNW between Brillion and Forest Junction. Service Order No. 1327 authorizes the Brillion and Forest Junction to operate that portion of the line in order to provide uninterrupted rail service to shippers located at Brillion. Service Order No. 1327 is printed in full in Volume 43 of the FEDERAL REGISTER at page 22212. Amendment No. 1 extends the order for six months.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., July 15, 1979.

PART 1033—CAR SERVICE

Chicago, Milwaukee, St. Paul & Pacific Railroad Co. Authorized To Operate Over Tracks of Union Pacific Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 1 to Service Order No. 1339.

SUMMARY: Due to deteriorated track conditions between Maytown, Washington, and Helsing Junction, Washington, the Chicago, Milwaukee, St. Paul and Pacific Railroad Company is unable to continue service over that line. Service Order No. 1339 authorizes that railroad to operate over tracks of the Union Pacific Railroad Company between Blakeslee Junction Interlocker, Washington, and Helsing Junction, Washington. The Order is printed in full in Volume 43 of the FEDERAL REGISTER at page 43719. Amendment No. 1 extends the order until July 15, 1979.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., July 15, 1979.

FOR FURTHER INFORMATION CONTACT:

[Service Order No. 1331, Amdt. No. 1]

PART 1033—CAR SERVICE

South Central Tennessee Railroad Co. Authorized To Operate Over Tracks Abandoned by Louisville & Nashville Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 1 to Service Order No. 1331.

SUMMARY: The Louisville and Nashville Railroad Company (LN), in Docket AB-2 (Sub-No. 5), has been authorized to abandon its line between Colesburg, Tennessee, and Hohenwald, Tennessee. A new railroad, the South Central Tennessee Railroad Company, has been formed to acquire and operate this line. Service Order No. 1331 authorizes the South Central Tennessee Railroad Company to operate that portion of the line in order to provide uninterrupted rail service to shippers located on this line. The order is printed in full in Volume 43 of the FEDERAL REGISTER at page 29126. Amendment No. 1 extends the order for six months.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., July 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423, Telephone (202) 275-7840, Telex 89-2742.

Decided: January 10 1979.

Upon further consideration of Service Order No. 1331 (43 FR 29126), and good cause appearing therefor:

It is ordered, That § 1033.1331 *South Central Tennessee Railroad Company authorized to operate over tracks abandoned by Louisville and Nashville Railroad Company*

Service order No. 1331 is amended by substituting the following paragraph (f) for paragraph (f) thereof:

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., July 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., January 15, 1979.

(49 U.S.C. (10304-10305 and 11121-11126).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. PART 1033—CAR SERVICE

The Atchison, Topeka and Santa Fe Railway Co. Authorized To Operate Unit-Grain Train Comprised of 60 Cars

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 2 to Service Order No. 1325).

SUMMARY: There is a severe shortage of both covered hopper cars and locomotives on the Atchison, Topeka and Santa Fe Railroad (ATSF) for transporting shipments of grain and related commodities. Service Order No. 1325 authorizes the ATSF to waive certain tariff requirements requiring the shipment of 75 carloads of grain in a single train and to apply in lieu thereof a minimum weight of 5,700 net tons per shipment in not to exceed 60 cars from ATSF origins in rate zone F and west to California destinations. The reduced train size will enable the ATSF to make a more equitable distribution of its covered hopper cars and to secure more efficient utilization of its locomotives. Service Order No. 1325 is published in full in volume 43 of the FEDERAL REGISTER at page 19396. Amendment No. 2 extends the order until May 15, 1979.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., May 15, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423. Telephone (202) 275-7840. Telex 89-2742.

Decided: January 10, 1979.

Upon further consideration of Service Order No. 1325 (43 FR 19396 and 39103), and good cause appearing therefor:

It is ordered, That § 1033.1325 *The Atchison, Topeka and Santa Fe Railway Company authorized to operate unit-grain train comprised of 60 cars*, Service Order No. 1325 is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., May 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., January 15, 1979.

[Second Revised Service Order No. 1323]

PART 1033—CAR SERVICE

DISTRIBUTION OF FREIGHT CARS

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order Second Revised Order No. 1323.

SUMMARY: There is a shortage of tri-level auto rack flat cars on the Union Pacific Railroad (UP) for the shipment of automobiles. Bi-level auto rack cars are available to this railroad but cannot be used because of tariff provisions requiring the use of tri-level cars. Second Revised Service Order No. 1323 authorizes the UP to substitute three bi-level cars for each two tri-level cars ordered by shippers for transporting automobiles.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., May 31, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C. 20423. Telephone (202) 275-7840. Telex 89-2742.

Decided: January 10, 1979.

There are shortages of tri-level multi-level auto rack flat cars on the Union Pacific Railroad Company (UP) required to transport automobiles subject to tariff restrictions requiring the use of such tri-level cars. This railroad has available supplies of bi-level cars of similar types which could be used for transporting these automobiles if tariff provisions permitted. The economic loss suffered by shippers dependent upon the UP for their car supplies can be alleviated by the substitution of bi-level cars for tri-level cars at the ratio of three bi-level cars for each two tri-level cars ordered.

In the opinion of the Commission, present regulations and practices with respect to the use of supply of auto rack flat cars are ineffective to overcome these shortages of auto rack flat cars and an emergency exists requiring immediate action. Accordingly, the Commission finds that notice and public procedure are impracticable and contrary to the public interest, and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered,

§ 1033.1323 Distribution of frieght cars.

•(a) Subject to the concurrence of the shipper the Union Pacific Railroad Company (UP) may substitute three bi-level auto rack flat cars, listed in the Official Railway Equipment Register, I.C.C.-R.E.R. No. 409, issued by W. J. Trezise, or successive issues thereof, as having mechanical designation "FA" for each two tri-level auto rack flat cars ordered by the shipper for transporting automobiles.

(b) The provisions of this order shall apply to intrastate, interstate and foreign commerce.

(c) *Rates and Minimum Weights Applicable.* The rates to be applied to shipments for which three bi-level cars have been substituted for two tri-level cars ordered as authorized by Section (a) of this order shall be the rates applicable to the larger cars ordered. The minimum weight to be applied to each group of three bi-level cars substituted for two tri-level cars shall be the combined minimum weights applicable to the two tri-level cars ordered.

(d) *Billing to be Endorsed.* The carrier substituting smaller cars for larger cars as authorized by Section (a) of this order shall place the following endorsement on the bill of lading and on the waybills authorizing movement of the car:

Two tri-level cars ordered. Three bi-level cars furnished authority I.C.C. Second Revised Service Order No. 1323.

(e) *Exception.* This order shall not apply to shipments subject to tariff provisions which require that cars be furnished by the shipper.

(f) *Exceptions.* Exceptions to this order may be authorized to railroads by the Railroad Service Board, Washington, D. C. 20423. Requests for such exception must be submitted in writing, or confirmed in writing, and must clearly state the points at which such exceptions are requested and the reason therefor.

(g) *Rules and Regulations Suspended.* The operation of all rules, regulations, or tariff provisions is suspended insofar as they conflict with the provisions of this order.

(h) *Effective date.* This order shall become effective at 11:59 p.m., January 15, 1979.

(i) *Expiration date.* This order shall expire at 11:59 p.m., May 31, 1979, unless otherwise modified, changed or suspended by order of this Commission.

(49 U.S.C. (10304-10305 and 11121-11126).)

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of the railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Association. Notice of this order shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

PART 1033—CAR SERVICE

CHICAGO AND NORTH WESTERN TRANSPORTATION CO. AUTHORIZED TO OPERATE OVER TRACKS OF CHICAGO, MILWAUKEE, ST. PAUL AND PACIFIC RAILROAD CO. AT APPLETON, WIS.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order (Amendment No. 4 to Service Order No. 1316).

SUMMARY: The tracks of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) between Menasha, Wisconsin, and Appleton, Wisconsin, have deteriorated and can no longer be used forcing the termination of rail service to shippers in Appleton served by the MILW. The Chicago and North Western Transportation Company (CNW) connects with the MILW in Appleton and is able to provide service to those shippers by operations over the tracks of the MILW in Appleton. Service Order No. 1316 authorizes the CNW to operate over tracks of the MILW in Appleton, Wisconsin for the purpose of providing continued railroad service to shippers served by those tracks. Service Order No. 1316 is published in full in Volume 43 of the FEDERAL REGISTER at page 14668. Amendment No. 4 extends this order until July 15, 1979.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., July 15, 1979.

FOR FURTHER INFORMATION CONTACT:

[Service Order No. 1352]

PART 1033—CAR SERVICE

CHICAGO & NORTH WESTERN TRANSPORTATION CO. AUTHORIZED TO OPERATE OVER TRACKS OF CHICAGO, MILWAUKEE, ST. PAUL & PACIFIC RAILROAD CO. AT FOND DU LAC, WIS.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order Service Order No. 1352.

SUMMARY: The lines of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) serving Fond du Lac, Wisconsin, are inoperable because of heavy snow at this location, which is depriving industries located adjacent to the MILW tracks at this location of railroad service. Service Order No. 1352 authorizes the Chicago and North Western Transportation Company to operate over tracks of the MILW in Fond du Lac in order to restore railroad service to these shippers.

DATES: Effective 3:00 p.m., January 12, 1979. Expires 11:59 p.m., January 19, 1979.

FOR FURTHER INFORMATION CONTACT:

C. C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423. Telephone (202) 275-7840. Telex 89-2742.

SUPPLEMENTARY INFORMATION: The Order is printed in full below.

Decided: January 12, 1979.

The lines of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) serving Fond du Lac, Wisconsin, have become inoperable because of heavy snow. Numerous shippers located adjacent to the tracks of the MILW have been deprived of essential railroad service because of the inability of the MILW to switch the industries at Fond du Lac. The Chicago and North Western Transportation Company (CNW) has agreed to operate over the tracks of the MILW at Fond du Lac in order to restore essential railroad service to these shippers. The MILW has consented to such use of its tracks by the CNW.

It is the opinion of the Commission that an emergency exists requiring the operation of CNW trains over these tracks of the MILW in the interest of the public; that notice and public procedure are impracticable and contrary to the public interest; and that good cause exists for making this order effective upon less than thirty days' notice.

It is ordered, that § *1033.1352 Chicago and North Western Transportation Company authorized to operate over tracks of Chicago, Milwaukee, St. Paul and Pacific Railroad Company at Fond du Lac, Wisconsin.*

(a) The Chicago and North Western Transportation Company (CNW) is authorized to operate over tracks of the Chicago, Milwaukee, St. Paul and Pacific Railroad Company (MILW) at Fond du Lac, Wisconsin, for the purpose of serving industries located adjacent to such tracks.

(b) *Application.* The provisions of this order shall apply to intrastate, interstate and foreign traffic.

(c) *Rates applicable.* Inasmuch as this operation by the CNW over tracks of the MILW is deemed to be due to carrier's disability, the rates applicable to traffic moved by the CNW over the tracks of the MILW shall be the rates which were applicable on the shipments at the time of shipment as originally routed.

(d) *Effective date.* This order shall become effective at 3:00 p.m., January 12, 1979.

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 19, 1979, unless otherwise modified, changed or suspended by order of this Commission.

(49 U.S.C. (10304-10305 and 11121-11126).)

This order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement and upon the American Short Line Railroad Associ-

[Amdt. No. 2 to Revised Service Order No. 1318]

PART 1033—CAR SERVICE

REGULATIONS FOR RETURN OF HOPPER CARS

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order. Amendment No. 2 to Revised Service Order No. 1318.

SUMMARY: There is a severe shortage of hopper cars on twelve railroads named in Revised Service Order No. 1318. These carriers own large fleets of these cars. Because of traffic flow patterns, substantial numbers of these cars are shipped to points located on the lines of other railroads and must be returned promptly to the car owners for reloading. Amendment No. extends this order for six months. e order is printed in full in Volume 43 of the FEDERAL REGISTER at page 17360.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., July 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423, Telephone (202) 275-7840, Telex 89-2742.

Decided January 10, 1979.

Upon further consideration of Revised Service Order No. 1318 (43 FR 17360 and 29008), and good cause appearing therefore:

It is ordered, that § *1033.1318 Regulations for return of hopper cars,* Revised Service Order No. 1318 is amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., July 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., January 15, 1979.

(49 U.S.C. (10304-10305 and 11121-11126).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Secretary.

[Amdt. No. 3 to Service Order No. 1270]

PART 1033—CAR SERVICE

CHESAPEAKE AND OHIO RAILWAY COMPANY AUTHORIZED TO OPERATE OVER TRACKS ABANDONED BY GRAND TRUNK WESTERN RAILROAD COMPANY

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order. Amendment No. 3 to Service Order No. 1270.

SUMMARY: Service Order No. 1270 authorizes The Chesapeake and Ohio Railway Company to operate over approximately 0.6 miles of track authorized to be abandoned by the Grand Trunk Western Railroad, between Ferrysburg, Michigan, and Grand Haven, Michigan. The trackage involved is owned by the Grand Trunk Western but is used as an integral part of The Chesapeake and Ohio's line between Holland, Michigan, and Muskegon, Michigan. The order also authorizes The Chesapeake and Ohio to operate over an additional 0.2 miles of track abandoned by the Grand Trunk Western in order to provide continued rail service to a shipper located adjacent to those tracks. The amendment extends the order for six months. The order is printed in full in Volume 42 of the FEDERAL REGISTER at page 38379.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., July 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423, Telephone (202) 275-7840, Telex 89-2742.

Decided January 10, 1979.

Upon further consideration of Service Order No. 1270 (42 FR 38379, 43 FR 2725 and 36639), and good cause appearing therefor:

It is ordered, that § *1033.1270 The Chesapeake and Ohio Railway Company authorized to operate over tracks abandoned by Grand Trunk Western Railroad Company,* Service Order No. 1270 is amended by substituting the following paragraph (c) for paragraph (c) thereof:

(c) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., July 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., January 15, 1979.

(49 U.S.C. (10304-10305 and 11121-11126).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Secretary.

[Amdt. No. 3 to Service Order No. 1275]

PART 1033—CAR SERVICE

ERIE WESTERN RAILWAY COMPANY AUTHORIZED TO OPERATE OVER TRACKS ABANDONED BY CONSOLIDATED RAIL CORPORATION

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order. Amendment No. 3 to Service Order No. 1275.

SUMMARY: Service Order No. 1275 authorizes Erie Western Railway Company (EW) to operate over the former Erie Lackawanna (EL) line between Hammond and Decatur, Indiana, via North Judson, Indiana. Operation by the EW over these tracks of the former EL is necessary to provide rail service to shippers located adjacent to the line. Amendment No. 3 extends the order until July 15, 1979. Service Order No. 1275 is published in full in Volume 42 of the FEDERAL REGISTER at page 48882.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., July 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Section of Rail and Pipeline Operations, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423, Telephone (202) 275-7840, Telex 89-2742.

Decided January 10, 1979.

Upon further consideration of Service Order No. 1275 (42 FR 48882, 43 FR 2395 and 31014), and good cause appearing therefor:

It is ordered, that § *1033.1275 The Erie Western Railway Company authorized to operate over tracks abandoned by Consolidated Rail Corporation,* Service Order No. 1275 is amended by substituting the following paragraph (f) for paragraph (f) thereof:

(f) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., July 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., January 15, 1979.

(49 U.S.C. (10304-10305 and 11121-11126).)

A copy of this amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael. Member John R. Michael not participating.

H. G. HOMME, Jr.,
Secretary.

[Amdt No. 2 to Service Order No. 1333]

PART 1033—CAR SERVICE

ILLINOIS TERMINAL RAILROAD CO. AUTHORIZED TO OPERATE OVER TRACKS OF ILLINOIS CENTRAL GULF RAILROAD CO.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 2 to Service Order No. 1333.

SUMMARY: The Illinois Terminal Railroad Company is unable to operate over its line between Lincoln, Illinois, and Allentown, Illinois, because of damage to a bridge at Mackinaw, Illinois. Service Order No. 1333 authorizes the Illinois Terminal to operate over parallel trackage of the Illinois Central Gulf Railroad Company between Lincoln and Pekin, Illinois, in order to provide continued rail service for shipments routed via its line. The order is published in full in Volume 43 of the FEDERAL REGISTER at page 35317. Amendment No. 2 to Service Order No. 1333 extends the order for two months.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., March 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Section of Rail and Pipeline Operations, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423, Telephone (202) 275-7840, Telex 89-2742.

Decided January 10, 1979.

Upon further consideration of Service Order No. 1333 (43 F.R. 35317 and 56902), and good cause appearing therefor:

It is ordered, that § *1033.1333 Illinois Terminal Railroad Company Authorized To Operate Over Tracks of Illinois Central Gulf Railroad Company,* Service Order No. 1333 is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., March 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., January 15, 1979.

(49 U.S.C. (10304-10305 and 11121-11126.)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission, at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Secretary.

[7035-01-M]

[Amdt. No. 1 to Service Order No. 1340]

PART 1033—CAR SERVICE

REGULATIONS FOR THE USE OF LOCOMOTIVES

Atlanta and West Point Rail Road Co., Clinchfield Railroad Co., Georgia Railroad, Seaboard Coast Line Railroad Co. and Western Railway of Alabama to Deliver Locomotives to Louisville and Nashville Railroad Co.

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 1 to Service Order No. 1340.

SUMMARY: Service Order No. 1340 requires the Seaboard Coast Line Railroad and other members of the Family Lines system to furnish 100 additional locomotives to the Louisville and Nashville Railroad. The order is printed in full in Volume 43 of the FEDERAL REGISTER at page 44536. Amendment No. 1 extends the order until January 31, 1979.

DATES: Effective 11:59 p.m., January 15, 1979. Expires 11:59 p.m., January 31, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Section of Rail and Pipeline Operations, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423, Telephone (202) 275-7840, Telex 89-2742.

Service date January 15, 1979. Decided January 12, 1979.

Upon further consideration of Service Order No. 1340 (43 FR 44536), and good cause appearing therefor:

As invited, in our order served December 27, 1978, several parties interested in the service order have filed comments relating to the extension, modification, or expiration of the serv-

ice order. The Commission believes that a short extension should be ordered to preserve the status quo while these comments and suggestions are considered.

It is ordered, that § *1033.1340 Atlanta and West Point Rail Road Company, Clinchfield Railroad Company, Georgia Railroad, Seaboard Coast Line Railroad Company and Western Railway of Alabama to Deliver Locomotives to Louisville and Nashville Railroad Company*, Service Order No. 1340 is amended by substituting the following paragraph (j) for paragraph (j) thereof:

(j) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., January 31, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., January 15, 1979.

(49 U.S.C. (10304-10305 and 11121-11126).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission, at Washington, D.C., and by filing with the Director, Office of the Federal Register.

By the Commission, Chairman O'Neal, Vice Chairman Brown, and Commissioners Stafford, Gresham, Clapp and Christian.

H. G. HOMME, Jr.,
Secretary.

[7035-01-M]

[Amdt. No. 1 to Second Revised Service Order No. 1308]

PART 1033—CAR SERVICE

DISTRIBUTION OF COVERED HOPPER CARS

AGENCY: Interstate Commerce Commission.

ACTION: Emergency Order, Amendment No. 1 to Second Revised Service Order No. 1308.

SUMMARY: The Union Pacific Railroad Company and the Illinois Central Gulf Railroad Company are unable to furnish individual shippers with jumbo covered hopper cars for consecutive shipments of grain as required by the applicable tariffs. Second Revised Service Order No. 1308 waives the consecutive-trip provisions of the applicable tariffs, enabling these railroads to make a more equitable distribution of its supply of covered hopper cars among all potential users of these cars. Second Revised Service Order No. 1308 is printed in full in Volume 43 of the FEDERAL REGISTER at page 47730. Amendment No. 1 extends the order for three months.

DATES: Effective 11:59 p.m, January 15, 1979. Expires: 11:59 p.m., April 15, 1979.

FOR FURTHER INFORMATION CONTACT:

Charles C. Robinson, Chief, Utilization and Distribution Branch, Interstate Commerce Commission, Washington, D.C., 20423, Telephone (202) 275-7840, Telex 89-2742.

Decided: January 10, 1979.

Upon further consideration of Second Revised Service Order No. 1308 (43 FR 47730), and good cause appearing therefor:

It is ordered, that § *1033.1308 Distribution of covered hopper cars*, Second Revised Service Order No. 1308 is amended by substituting the following paragraph (e) for paragraph (e) thereof:

(e) *Expiration date.* The provisions of this order shall expire at 11:59 p.m., April 15, 1979, unless otherwise modified, changed or suspended by order of this Commission.

Effective date. This amendment shall become effective at 11:59 p.m., January 15, 1979.

(49 U.S.C. (10304-10305 and 11121-11126).)

This amendment shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and car hire agreement under the terms of that agreement, and upon the American Short Line Railroad Association. Notice of this amendment shall be given to the general public by depositing a copy in the Office of the Secretary of the Commission at Washington, D.C., and by filing a copy with the Director, Office of the Federal Register.

By the Commission, Railroad Service Board, members Joel E. Burns, Robert S. Turkington and John R. Michael.

H. G. HOMME, Jr.,
Secretary.

[9 CFR Parts 445 and 447]

NATIONAL POULTRY IMPROVEMENT PLAN AND AUXILIARY PROVISIONS

Extension of Comment Period

AGENCY: Science and Education Administration, USDA.

ACTION: Notice to Extend Period to Receive Comments on Proposed Rule.

SUMMARY: The purpose of this notice is to extend the period during which the Department will receive comments on the Proposed Rules pertaining to amendments to the National Poultry Improvement Plan which were published in the FEDERAL REGISTER on December 1, 1978 (43 FR 56245).

DATE: Comments will be received through February 2, 1979.

ADDRESS: Send comments to Dr. Lewis W. Smith, Animal Physiology and Genetics Institute, Building 173, BARC-East, Beltsville, Maryland 20705. All written submissions made pursuant to this notice will be made available for public inspection at the above office during regular business hours.

FOR FURTHER INFORMATION CONTACT:

Raymond D. Schar at 301/344-2227.

SUPPLEMENTARY INFORMATION: This extension of time during which the Department will receive comments on proposed amendments to the National Poultry Improvement Plan is being made available in order to permit interested organizations and individuals to meet, study the proposals, and submit comments.

Done at Washington, D.C., this 15th day of January, 1979.

[7590-01-M]

NUCLEAR REGULATORY COMMISSION

[10 CFR Part 50]

DOMESTIC LICENSING OF PRODUCTION AND UTILIZATION FACILITIES

Codes and Standards for Nuclear Powerplants

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Proposed rule.

SUMMARY: The Nuclear Regulatory Commission is considering amending its regulation, "Codes and Standards," to incorporate by reference with modifications a new edition and addenda of the national code that specifies the requirements for the inservice inspection of nuclear power plant components. Adoption of this amendment would provide the use of improved, updated methods for inservice inspection for use in nuclear power plants.

DATES: Comment period expires March 5, 1979.

ADDRESSES: Written Comments should be submitted to the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Docketing and Service Branch.

FOR FURTHER INFORMATION CONTACT:

Mr. A. Taboada, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 (phone 301-443-5999).

SUPPLEMENTARY INFORMATION: On April 24, 1978, the Nuclear Regulatory Commission published in the FEDERAL REGISTER (43 FR 17337) an amendment to its regulations, 10 CFR Part 50, "Licensing of Production and Utilization Facilities," which incorporated by reference new addenda to a specific national code. The Commission amended § 50.55a to incorporate by reference the 1977 Edition and the Summer 1977 Addenda to Section III, Division 1, "Rules for the Construction of Nuclear Power Plant Components," of the ASME Boiler and Pressure Vessel Code. However, that amendment did not incorporate by reference addenda to Section XI, "Inservice Inspection of Nuclear Power Plant Components," of the ASME Code issued after the Summer 1975 Addenda. These addenda, which contained substantial changes to the existing inservice inspection requirements previously incorporated by reference into the regulations, were still being evaluated when the amendment was published. The statement of considerations to the April 24, 1978 amendment stated that the later addenda to Section XI of the ASME Code were expected to be referenced with modifications in a subsequent amendment to the regulations.

A review of the 1977 Edition of Section XI and addenda issued from Winter 1975 Addenda through the Winter 1977 Addenda has disclosed several major changes to the code which, if adopted, would significantly reduce the examination requirements of inservice inspection programs presently required by the Commission for the reactor coolant pressure boundary and for systems required for safe shutdown of the reactor. This edition and addenda would be acceptable for incorporation by reference into the regulations only with appropriate modifications to retain those requirements considered necessary for an acceptable inservice inspection program.

In this regard, the Summer 1978 Addenda provide such modifications to Section XI of the ASME Code. The examination requirements removed from the code by previous addenda, but still required by the regulations, have either been restored or have been superseded by provisions considered to be improvements.

In light of the changes made in the Summer 1978 Addenda, the Commission now proposes to amend § 50.55a to incorporate by reference the 1977 Edition of Section XI of the ASME Code and Addenda through the Summer 1978 Addenda. Certain limitations and modifications to Section XI of the Code would also be included in the amendment to address the applicability of specific editions and addenda and to provide for flexibility and consistency in the implementation of the Code. The limitations and modifications include the following:

1. The applicability of certain code addenda would be qualified to assure that appropriate inservice examination requirements are included in inservice inspection programs for nuclear facilities. The proposed amendment would, in effect, require the application of the Summer 1978 Addenda to those inservice inspection programs that would otherwise apply additions

V 4 4 / 1 3 J A 1 8 7 9 UMI

and addenda of Section XI from the Winter 1975 Addenda through the Winter 1977 Addenda.

2. Alternatives would be provided to the requirements for inservice inspection of pipe welds. Operating facilities and facilities in the construction stages with inservice inspection programs (facilities with applications for construction permits docketed prior to July 1, 1978) would be permitted the option of examining code Class 1 and Code Class 2 pipe welds to either the Summer 1975 Addenda or the summer 1978 Addenda or later. This addenda is the latest code addenda incorporated by reference in § 50.55a. By applying this option, such facilities would have continuity in the extent and frequency of examinations for pipe welds. the amendment also would specify the use of the Summer 1975 Addenda for establishing examination requirements for pipe welds in the Residual Heat Removal System, the Emergency core Cooling System, and the Containment Heat Removal System. This provision is needed since new code requirements for inservice examination of these systems are still under development for later addenda.

3. Provisions added to article IWB-2000 of Section XI of the ASME Code by the winter 1975 Addenda contained, for the first time, requirements for inservice inspection of steam generator tubing. However, it has been the practice of the commission to include detailed provisions for the inservice inspection of steam generator tubing in the technical specifications for a specific reactor. the potential for conflicting requirements would exist if code requirements were incorporated by reference into the regulations without appropriate modifications. Since the provisions in the technical specifications approved by the Commission are, in general, more complete and more current, the proposed amendment would require that the inservice inspection program for steam generator tubing be governed by the requirements in the technical specifications.

In addition to incorporating by reference the new edition and addenda with modifications, the Commission proposes several minor and clarifying amendments to § 50.55a. These include a change in the time interval for revising programs for inservice examination of components and for testing pumps and valves to make it consistent with the inservice inspection interval in Section XI of the ASME Code. The interval for revising inservice inspection programs for operating plants would be extended from 40 and 20 months to 120 months. Such a change would make the regulation more practical to implement and save time and effort for both the NRC and the licensee. Extending the period for revising the program is not considered a significant relaxation of safety requirements since new code changes generally deal with practical considerations or the application of new developments. In this regard the Commission may impose new code requirements at any time if safety considerations so dictate.

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974, as amended, and section 553 of title 5 of the United States Code, notice is hereby given that adoption of the following amendments to 10 CFR Part 50 is contemplated. All interested persons who wish to submit written comments or suggestions in connection with the proposed amendments should send them to the Secretary of the commission, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Docketing and Service Branch by March 5, 1979. Copies of comments received may be examined in the Commission's Public Document room at 1717 H Street, NW., Washington, D.C.

In § 50.55a of 10 CFR Part 50, paragraphs (g)(2) and (g)(3)(v) are amended by deleting the words "become effective" and substituting therefor "are incorporated by reference in paragraph (b) of this section subject to the limitations and modifications listed therein"; paragraphs (b)(2) and (g)(4)(i) through (g)(4)(iv) are revised to read as follows:

§ 50.55a Codes and standards.

Each operating license for a boiling or pressurized water-cooled nuclear power facility shall be subject to the conditions in paragraph (g) and each construction permit for a utilization facility shall be subject to the following conditions in addition to those specified in § 50.55:

• • • • •

(b)(2) As used in this section, references to Section XI of the ASME Boiler and Pressure Vessel Code refer to Section XI, Division 1 and include editions through the 1977 Edition and addenda through the Summer 1978 Addenda, except that the addenda to the 1974 Edition issued after the Summer 1975 Addenda and the 1977 Edition and subsequent addenda are subject to the following limitations and modifications: (i) *Applicability of specific editions and addenda.* When using the 1974 Edition for establishing an inservice inspection program only the addenda through the Summer 1975 Addenda may be used. When using the 1977 Edition for establishing an inservice inspection program all of the addenda through the summer 1978 addenda must also be used.

(ii) *Pressure-retaining welds in ASME Code Class 1 piping (applies to Table IWB-2500 and IWB-2500-1 Category B-J).* If the facility's application for a construction permit was docketed prior to July 1, 1978, Code Class 1 pipe welds may be examined to the requirements of Table IWB-2500 and Table IWB-2600 Category B-J of Section XI of the ASME code in the 1974 Edition and addenda through the Summer 1975 Addenda.

(iii) *Steam generator tubing (modifies Article IWB-2000).* If the technical specifications of a nuclear power plant include surveillance requirements for steam generators different than those in Article IWB-2000, the inservice inspection program for steam generator tubing shall be governed by the requirements in the technical specifications.

(iv) *Pressure-retaining welds in ASME Code Class 2 piping (applies to Tables IWC-2520 or IWC-2520-1, Category C-F)*

(A) The Code Class 2 pipe welds in Residual Heat Removal Systems, Emergency Core Cooling Systems, and Containment Heat Removal Systems, shall be examined to the requirements of paragraph IWC-1220, Table IWC-2520 Category C-F and C-G, and paragraph IWC-2411 in the Summer 1975 Addenda of Section XI of the ASME Code.

(B) For a nuclear power plant whose application for a construction permit is docketed prior to July 1, 1978, Code Class 2 pipe welds may be examined to the requirements of paragraph IWC-1220, Table IWC-2520 Category C-F and C-G and paragraph IWC-2411 in the Summer 1975 Addenda of section XI of the ASME Code.

• • • • •

(g) Inservice Inspection Requirements:

• • • • •

(4) (i) Inservice examinations of components and inservice tests of pumps and valves conducted during the intial 120-month inspection interval shall comply with the requirements in the latest edition and addenda of the code incorporated by reference in paragraph (b) of this section on the date 12 months prior to the date of issuance of the operating license, subject to the imitations and modifications listed in paragraph (b).

(ii) Inservice examinations of components and inservice tests of pumps and valves conducted during successive 120-month inspection interval shall comply with the requirements of the latest edition and addenda of the Code incorporated by reference in paragraph (b) of this section 12 months prior to the start of the 120-month inspection interval, subject to the limitations and modifications listed in paragraph (b).

(iii) For a facility whose operating license was issued prior to March 1, 1976, the provisions of paragraph (g)(4) of this section are effective after September 1, 1976, at the start of the next one-third of a 120-month inspection interval. During that third of an inspection interval and the remainder of the inspection interval, the inservice inspections of components and tests of pumps and valves for such facilities shall comply with the requirements in the latest edition and addenda of the Code incorporated by reference in paragraph (b) of this section on the date 12 months prior to the start of that third of an inspection interval, subject to the limitations and modifications listed in paragraph (b).

(iv) Inservice examinations of components and tests of pumps and valves may meet the requirements set forth in subsequent editions and addenda that are incorporated by reference in paragraph (b) of this section, subject to the limitations and modifications listed in paragraph (b), and subject to Commission approval. Portions of editions or addenda may be used provided that all related requirements of the respective editions or addenda are met.

• • • • •

(Secs. 103, 104, 1611, Pub. Law 83-703; 68 Stat. 936, 937, 948; Sec. 201, Pub. Law 93-438, 88 Stat. 1242; (42 U.S.C. 2133, 2134, 2201(i), 5841)).

Dated at Bethesda, Maryland this 2nd day of January 1979.

For the Nuclear Regulatory Commission.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

[10 CFR Parts 500, 501, 502, 503, and 505]

[Docket No. ERA-R-78-19]

HEARINGS ON PROPOSED RULES TO IMPLEMENT THE POWERPLANT AND INDUSTRIAL FUEL USE ACT OF 1978

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of Public Hearings on New Facilities; Extension of the Public Comment Period.

SUMMARY: The Economic Regulatory Administration (ERA) of the Department of Energy (DOE) hereby announces a series of public hearings on its proposed rules for implementation of the Powerplant and Industrial Fuel Use Act of 1978 (FUA), Public Law 95-620, and extension of the public comment period. Proposed rules concerning new facilities were published on November 17, 1978 (43 FR 53974). Proposed rules concerning existing facilities will be published in the near future. Notice of public hearings on the Draft Environmental Impact Statement concerning implementation of FUA was published in the January 9, 1979 FEDERAL REGISTER (44 FR 2004).

DATES: Public hearings will be held on February 7, 1979, and if required, on February 8, 1979, in Boston, Massachusetts; February 14, 1979, and if required, February 15, 1979 in Salt Lake City, Utah; February 21, 1979, and if required, February 22, 1979 in Tampa, Florida; and March 1, 1979, and if required, March 2, 1979 in Lexington, Kentucky. All hearings will begin at 9:30 a.m. Written comments on new facilities are now due by March 2, 1979, 4:30 p.m. Requests to speak for the Boston, Salt Lake City, and Tampa hearings by January 26, 1979, 4:30 p.m. Requests to speak for the Lexington hearing by February 15, 1979, 4:30 p.m.

ADDRESSES: Send all written comments to: Department of Energy, Public Hearing Management, Room 2313, 2000 M Street, NW., Washington, D.C. 20461, Docket No. ERA-78-R-19. Where possible, comments on separate issues should be clearly identified to allow efficient review and consideration.

City	Hearing date	Location	Requests to speak
Boston, Mass.	Feb. 7	Shawmut Bank Bldg., Conf. Rm. 8th Fl., 1 Federal Street, Boston, Mass.	Dept. of Energy, 150 Causeway Street, Room 700, Boston, Mass., (617) 223-5257.
Salt Lake City, Utah	Feb. 14	Salt Palace, 100 S.W. Temple, Room 128, Salt Lake City, Utah.	Dept. of Energy, 1075 S. Yukon Street, P.O. Box 26247, Belmar Branch, Lakewood, Colo., (303) 234-2420.
Tampa, Fla.	Feb. 21	Sheraton Tampa Motor Hotel, Ballroom, 500 E. Cass Street, Tampa, Fla.	Dept. of Energy, 1655 Peachtree, St. NE, Atlanta, Ga., (404) 257-2051.
Lexington, Ky.	Mar. 1	Hyatt Regency, Washington Room, 400 W. Pine Street, Lexington, Ky.	Dept. of Energy, 1655 Peachtree, St. NE, Atlanta, Ga., (404) 257-2051.

FOR FURTHER INFORMATION CONTACT:

William L. Webb (Office of Public Information), Economic Regulatory Administration, Department of Energy, Room B-110, 2000 M Street, N.W., Washington, D.C. 20461, (202) 634-2170.

John L. Gurney (Regulations and Emergency Planning), Economic Regulatory Administration, Department of Energy, Room 2130, 2000 M Street, N.W., Washington, D.C. 20461, (202) 632-6690.

Barton R. House (Fuels Regulation Program Office), Economic Regulatory Administration, Department of Energy, Room 6128-I, 2000 M Street, N.W., Washington, D.C. 20461, (202) 254-3905.

James H. Heffernan (Office of General Counsel), Department of Energy, Room 6144, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, (202) 633-9296.

SUPPLEMENTARY INFORMATION: On November 9, 1978, ERA issued proposed rules for implementation of FUA pertaining to new facilities (November 17, 1978, 43 FR 53974).

FUA prohibits the use of petroleum and natural gas by certain new electric powerplants and industrial major fuel burning installations. The proposed rules establish procedures and criteria by which users may petition for exemptions from the prohibitions of the Act. The rules also establish a requirement for a Fuels Decision Report which must be submitted as part of any petition for exemption.

Interested persons who would like to participate in any hearing should contact the appropriate Regional Ofice of DOE as listed above in the "ADDRESSES" section of this Notice. A request to participate in any hearing shall be in writing and signed by the person making the request. Please provide a phone number where we may contact you through the day before the hearing.

Participants should bring 50 copies of their testimony and each exhibit to be presented to ERA with them on the day of the hearing. The hearings will be conducted in accordance with the procedures set forth in the November 17, 1978 Proposed Rules.

We will notify each person selected to be heard before 4:30 p.m., January 30, 1979 for the Boston, Salt Lake City and Tampa hearings, and February 20, 1979 for the Lexington hearing.

(Department of Energy Organization Act, Pub. L. 95-91; Powerplant and Industrial Fuel Use Act, Pub. L. 95-620.)

Issued in Washington, D.C. January 12, 1979.

DAVID J. BARDIN,
Administrator, Economic Regulatory Administration.

NATIONAL CREDIT UNION ADMINISTRATION

[12 CFR Part 701]

ORGANIZATION AND OPERATIONS OF FEDERAL CREDIT UNIONS

Nondiscrimination Requirements in Lending

AGENCY: National Credit Union Administration.

ACTION: Proposed rule.

SUMMARY: The National Credit Union Administration proposes to amend its nondiscrimination in lending regulation. The amendments, which are in accordance with the Fair Housing Act of 1968, would: (a) Prohibit a Federal credit union from denying a real estate related loan (or offering it on less favorable terms and conditions) based on the age or location of the dwelling, or based upon the race, color, sex, or national origin of the borrower or of the people who reside (or may reside) in the vicinity of the dwelling securing the loan; (b) Make the real estate appraisal available to any requesting member/applicant; and (c) Enable a member who feels he/she has been discriminated against to contact the National Credit Union Administration.

DATE: Comments must be received on or before February 28, 1979.

SEND COMMENTS TO: Robert S. Monheit, Senior Attorney, Office of General Counsel, National Credit Union Administration, 2025 M Street, NW. Washington, DC 20456.

FOR FURTHER INFORMATION CONTACT:

Edward J. Dobranski, Senior Attorney, Office of the General Counsel, at the above address. Telephone: (202) 632-4870.

SUPPLEMENTARY INFORMATION: The National Credit Union Administration proposes to broaden its nondiscrimination regulation (§ 701.31) to specifically address certain practices, such as racial redlining, which violate the Fair Housing Act of 1968 (42 U.S.C. 3601, *et seq.*). Given Federal credit union entry into the long term mortgage market, the National Credit Union Administration believes the changes are necessary to assist Federal credit unions in distinguishing legitimate reasons for denying a loan from those that are prohibited by the Fair Housing Act. Also, it is hoped that the regulation will impress upon Federal credit unions the necessity of assisting in the revitalization of urban neighborhoods.

The proscriptions contained in the proposals are based upon the Fair Housing Act and the interpretations given that statute by the Federal courts. *See*, e.g., *Laufman* v. *Oakley Bldg. & Loan Co.*, 408 F. Supp. 489 (D. Ohio 1976). Other applicable statutes and regulations protecting a credit applicant from prohibited discrimination, such as the Equal Credit Opportunity Act, are neither incorporated nor supplanted by the proposed regulation.

SCOPE

The proposed regulation applies to those loans secured by a first lien made for the purpose of financing (or refinancing) the acquisition of a 1-4 family dwelling and also applies to home improvement loans. Both types of loans are referred to in the regulation as 'real estate related' loans.

NONDISCRIMINATION IN LENDING

This section encompasses both denying a loan and offering a loan on less favorable terms and conditions. It prohibits consideration of the racial, ethnic, or religious affiliation of both the borrower *and* of the people who live (or are expected to live) in the neighborhood where the dwelling is located. Considering such factors is a clear violation of the Fair Housing Act of 1968.

This section also prohibits reliance upon two other factors (*i.e.*, age and location of dwelling) neither of which relates to the creditworthiness of the borrower, and both of which often have a discriminatory effect, irrespective of whether a discriminatory intent is present. (Use of such factors in the appraisal, as opposed to underwriting of the loan, is discussed below).

ADVERTISING

Section 701.31 has been amended to require that the Fair Housing logotype and legend state that the applicant/borrower may file a complaint with the National Credit Union Administration, as well as with HUD. it has also been amended to require an Equal Credit Opportunity Act legend stating that the applicant/borrower may file an ECOA complaint with the Administration.

APPRAISAL

This section prohibits the use of an appraisal which was made in violation of the Fair Housing Act (either *per se* or *in effect*). This includes reliance on an appraisal which, based on the age or location of the dwelling, undervalues the appraised dwelling. (Since the appraiser is an agent of the Federal credit union in this respect, any of his/her discriminatory actions are imputed to the Federal credit union, irrespective of the Federal credit union's actual knowledge of them). It should be noted that prohibition relating to age does not prevent consideration of the structual soundness of a dwelling. The prohibition extends only to underappraisal due to the age of a dwelling without regard to its structural soundness.

With respect to the prohibition against consideration of the dwelling's location, the Administration recognizes that certain factors relating to location can be validly considered in the appraisal process. For example, the fact that the dwelling is located atop an abandoned mine shaft or land fault. It is the Administration's position, however, that the burden of justifying an exception to the consideration of location prohibition be placed upon the Federal credit union and its agent appraiser, and documented accordingly. This approach has been proposed for two reasons. First, the Administration cannot possibly list a litany of every location factor causing a lower appraisal which can be validly considered. Second, consideration of certain location factors (such as zoning changes and abandoned homes in the neighborhood) can be proper in some instances and improper in others. The Administration believes this approach best implements its position that arbitrary decisions based on location are prohibited.

This section also enables the member to obtain a copy of the appraisal on request.

MONITORING

The National Credit Union Administration believes that the application and loan information a Federal credit union maintains pursuant to Regulation B (race, sex, age, and marital status), Regulation C (census tract); FHLMC loan application Form 65/FNMA Form 1003 (year property built) and National Credit Union Administration Regulation 701.21-6 (application, sales contract, appraisal, settlement statement, note and security instrument) are sufficient to enable to National Credit Union Administration to determine, upon examination, whether redlining or other discriminatory practices have taken place. In short, the National Credit Union Administration can assume the full responsibility for collecting and analyzing the data needed for determining compliance.

Consequently, the National Credit Union Administration will not require a Federal credit union to maintain a separate loan application register for residential real estate loans and no additional burden will be placed upon Federal credit unions. The agency believes this approach is consistent with the President's anti-inflation policies.

Accordingly, the National Credit Union Administration proposes to delete existing § 701.31 and proposes new § 701.31 to read as follows:

LAWRENCE CONNELL,
Administrator.

JANUARY 12, 1979.

(Sec. 120, 73 Stat. 635 (12 U.S.C. 1766) and Sec. 209, 84 Stat. 1104 (12 U.S.C. 1789). (42 U.S.C. 3601-3619; 42 U.S.C. 1981, 15 U.S.C. 1601 et seq.; 12 U.S.C. 1757, 1759, 1786 and 1789)

§ 701.31 Nondiscrimination requirements.

(a) *Definitions.* As used in this part, the term,

(1) 'Application' carries the meaning of that term as defined in 12 CFR 202.2(f) (Regulation B); and

(2) 'Real estate related loan', means any loan (or application therefor) made pursuant to Section 107(5)(A)(i) of the Federal Credit Union Act and any loan (or application therefor) made pursuant to Section 107(5)(A)(ii) of the Federal Credit Union Act for the purpose of repair, alteration, or improvement of the applicant's residential dwelling.

(b) *Nondiscrimination in Lending.* (1) A Federal credit union may not deny a real estate related loan on the basis of age or location of the dwelling.

(2) A Federal credit union may not discriminate in setting the terms and conditions of a real estate related loan on the basis of the age or location of the dwelling.

(3) A Federal credit union may not deny a real estate related loan, nor may it discriminate in setting the terms and conditions of such loan on the basis of the race, color, religion, sex, or national origin of:

(i) Any applicant or joint applicant;

(ii) Any person associated with an applicant or joint applicant in connection with a real estate related loan application;

(iii) The present or prospective owners, lessees, tenants, or occupants of the dwelling for which a real estate related loan is requested to be made;

(iv) The present or prospective owners, lessees, tenants, or occupants of other dwellings in the vicinity of the dwelling for which a real estate related loan is requested to be made.

(c) *Nondiscrimination in Appraisals.* (1) A Federal credit union may not rely upon an appraisal of a dwelling if the appraisal is discriminatory on the basis of the age or location of the dwelling, or is discriminatory either *per se* or *in effect*, on a basis prohibited by the Fair Housing Act of 1968.

(2) Notwithstanding paragraph (c)(1) of this section it is recognized that there may be factors concerning location of the dwelling which can be properly considered in an appraisal. If any such factors are relied upon, such reliance must be justified as not in violation of the Fair Housing Act of 1968, and documented accordingly.

(3) Each Federal Credit union shall make available, to any requesting member/applicant, a copy of the appraisal used in connection with that member's real estate related loan application.

(d) *Nondiscrimination in Advertising—(1) Advertising notice of nondiscrimination compliance.* No Federal credit union may directly or indirectly engage in any form of advertising of real estate related loans which implies or suggests a discriminatory preference or policy of exclusion in violation of the provisions of the Fair Housing Act of 1968 or of this Part. Advertisements relating to such loans shall include a facsimile of the logotype and legend appearing in paragraph (d)(3) of this section.

(2) *Lobby notice of nondiscrimination compliance.* Every Federal credit union which engages in real estate related lending shall conspicuously display in the public lobby of such credit union and in the public area of each office where such loans are made, in a manner so as to be clearly visible to the general public entering such lobby or area, a notice that incorporates a facsimile of the logotype and legend appearing in paragraph (d)(3) of this section. Posters containing this legend and logotype may be obtained from the regional offices of the National Credit Union Administration.

(3) *Logotype and notice of nondiscrimination compliance.* The logotype and text of the notice required in paragraphs (d) (1) and (2) of this section shall be as follows:

EQUAL HOUSING LENDER

We Do Business in Accordance With the Federal Fair Housing Law

(Title VIII of the Civil Rights Act of 1968, as Amended by the Housing and Community Development Act of 1974)

IT IS ILLEGAL TO DISCRIMINATE AGAINST ANY PERSON BECAUSE OF RACE, COLOR, RELIGION, SEX, OR NATIONAL ORIGIN, TO:

- Deny a loan for the purpose of purchasing, constructing, improving, repairing or maintaining a dwelling or
- Discriminate in fixing of the amount, interest rate, duration, application procedures or other terms or conditions of such a loan

IF YOU BELIEVE YOU HAVE BEEN DISCRIMINATED AGAINST, YOU MAY SEND A COMPLAINT TO:

NATIONAL CREDIT UNION ADMINISTRATION, Division of Consumer Affairs, Washington, D.C. 20456

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, Assistant Secretary for Fair Housing and Equal Opportunity, Washington, D.C. 20410

or call your local HUD Area or Insuring Office.

IT IS ILLEGAL UNDER THE EQUAL CREDIT OPPORTUNITY ACT TO DISCRIMINATE IN EXTENDING CREDIT:

- ☐ On the basis of race, color, religion, national origin, sex, or marital status, or age
- ☐ Because income is from public assistance
- ☐ Because a right was exercised under the Consumer Credit Protection Act.

IF YOU BELIEVE YOU HAVE BEEN DISCRIMINATED AGAINST, YOU MAY SEND A COMPLAINT TO:

NATIONAL CREDIT UNION ADMINISTRATION, DIVISION OF CONSUMER AFFAIRS, WASHINGTON, D.C. 20456

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 78-SO-81]

DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE, AND REPORTING POINTS

Proposed Alteration of Control Zone, Anderson, S.C.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes to alter the Anderson, South Carolina, control zone and lower the base of controlled airspace in the vicinity of the Anderson County Airport from 700 feet AGL to the surface to accommodate Instrument Flight Rule (IFR) operations. A new public use instrument approach procedure has been developed for the Anderson County Airport, and the additional controlled airspace is required to protect aircraft executing the approach procedure.

DATES: Comments must be received on or before: February 28, 1979.

ADDRESS: Send comments on the proposal to: Federal Aviation Administration, Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320.

FOR FURTHER INFORMATION CONTACT:

Harlen D. Phillips, Airspace and Pro-

V 4 4 / 1 3 J A 1 8 7 9 UMI

cedures Branch, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georiga 30320; telephone: 404-763-7646.

SUPPLEMENTARY INFORMATION:

COMMENTS INVITED

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Federal Aviation Administration, Attention: Chief, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. All communications received on or before February 28, 1979, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each public contact with FAA personnel concerned with this rulemaking will be filed in the public, regulatory docket.

AVAILABILITY OF NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, S.W., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

THE PROPOSAL

The FAA is considering an amendment to Subpart F of Part 71 of the Federal Aviation Regulations (14 CFR 71) to provide additional controlled airspace protection for IFR operations at Anderson County Airport. The NDB Runway 35 standard instrument approach procedure utilizing the Anderson County (nonfederal) nondirectional radio beacon is proposed in conjunction with the alteration of this control zone.

THE PROPOSED AMENDMENT

Accordingly, the Federal Aviation Administration proposes to amend Subpart F, § 71.171 (44 FR 353), of Part 71 of the Federal Aviation Regulations (14 CFR 71) by adding the following:

ANDERSON, S.C.

". . . and within 3 miles each side of the 171° bearing from the Anderson County RBN (latitude 34°29'53" N., longitude 82°42'31" W.), extending from the 5 mile radius zone to 8.5 miles south of the RBN . . .".

(Sec. 307(a) of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)) and Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

NOTE.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

Issued in East Point, Georgia, on January 4, 1979.

LONNIE D. PARRISH,
Acting Director, Southern Region.

[FR Doc. 79-1732 Filed 1-17-79; 8:45 am]

CIVIL AERONAUTICS BOARD

[14 CFR Part 399]

[Docket 30362; PSDR-54]

STATEMENTS OF GENERAL POLICY PAYMENTS TO SHIPPERS AND INTERMEDIARIES BY DIRECT CARRIERS

JANUARY 11, 1979.

AGENCY: Civil Aeronautics Board.

ACTION: Notice of Proposed Rulemaking.

SUMMARY: This notice proposes a policy statement that since payments by direct carriers to shippers, air freight forwarders, or cooperative shippers associations for ready-for-carriage services are not directly connected with the basic sale of transportation, these payments are not barred as rebates. The rulemaking is in response to a petition from the Airfreight Forwarders Association.

DATES: Comments by March 20, 1979.

Comments and other relevant information received after these dates will be considered by the Board only to the extent practicable.

Requests to be put on the Service List by: January 29, 1979.

Docket Section prepares the Service List and sends it to each person listed, who then serves comments on others on the list.

ADDRESSES: Comments should be sent to Docket 30362, Docket Section, Civil Aeronautics Board, Washington, D.C. 20428. Docket comments may be examined at the Docket Section, Civil Aeronautics Board, Room 711, Universal Building, 1825 Connecticut Avenue N.W., Washington, D.C. as soon as they are received.

FOR FURTHER INFORMATION CONTACT:

Joseph A. Brooks, Office of the General Counsel, Civil Aeronautics Board, 1825 Connecticut Avenue, N.W., Washington, D.C. 20428, 202-673-5442.

SUPPLEMENTARY INFORMATION: In response to a petition for rulemaking from the Air Freight Forwarder Association, the Board issued Advance Notice of Proposed Rulemaking EDR-330 (42 FR 38600, July 29, 1977), asking for comment about payment of commissions or ready-for-carriage fees to shippers or intermediaries on international shipments. The Board specifically asked for information and views about: the kinds of services usually performed by freight intermediaries such as forwarders and agents; any differences in costs that would result if a particular service were performed by someone else; the type of intermediary that should receive these payments; and the tariffs and system of fees connected with the services performed. Comments and reply comments were received from several large shippers, U.S. and foreign direct carriers, and from air freight forwarders and cargo agents.[1]

Under the Act (section 403(b)) and Board regulations (14 CFR Parts 221 and 296), the payment of commissions or fees to shippers or indirect cargo carriers has been considered a method for rebates from the direct carrier's

[1] Comments were received from: Air Express International, Air Freight Forwarder Association, Amerford International Corporation, American Airlines, British Airways, Control Date Corporation, Customs Brokers and Forwarders Association of Miami, The Flying Tiger Line (FTL), Intercontinental Forwarders, International Airfreight Agents Associations (IAAA), Japan Air Lines, Novo International Airfreight, Outboard Marine Corporation, Trans World Airlines, United Air Lines, Venezolana Internacional de Aviacion, S.A. (VIASA), W. R. Zane & Co., and 3M Company.

FTL filed a Motion for Leave to File Late with its comments, and IAAA filed a Motion for Leave to File an Otherwise Unauthorized Document with a response to FTL's comment. For good cause, the motions are granted.

tariff.[2] Forwarders, however, may receive a commission when acting as an agent for an individual shipment on the airwaybill of the direct carrier. Cargo agents receive a commission from the direct carrier on individual shipments. These agents do not receive a commission on consolidated shipments. The forwarder may not receive a commission for either an individual or consolidated shipment when transmitted on his airwaybill. To do so would be a rebate from the direct carrier's tariff, because of these shipments the forwarder is acting as a shipper in relation to the direct carrier. For the same reasons, the direct carriers may not pay commissions on these shipments.

Ready-for-carriage fees (payments for services rendered), however, have been prohibited not as rebates, but because they could be used as a vehicle to disguise rebating. We have tentatively decided that this prophylactic restraint on ready-for-carriage fees is no longer justified. The Airline Deregulation Act of 1978 (Pub. L. 95-504) has emphatically changed the policy of regulation of air transportation from protection to competition. Previously, in balancing the danger of rebating against freer opertion of the market, the Board found protection was necessary. In view, however, of the changes in the Act freeing price and entry, and of the more liberalized regulation of the cargo industry, not only has the danger of rebating receded, but such a prohibition would tend to stifle these competitive market forces.

The forwarders and shippers contended that direct carriers receive specific, valuable services from them at no cost. Only part of their services, they claimed, are in any way compensated by the difference between their rates and the discounts given by the direct carriers on volume shipments. They argued that the prohibitions on such payments have been discriminatory in two ways. First, cargo agents performing the same services to receive payments in the form of commissions.[3] Second, since the international cargo rate structure is based on the implicit assumption that commissions are paid to forwarders, there are insufficient incentives for U.S. forwarders to develop and expand international air freight markets. Also, this situation is to the competitive advantage of foreign forwarders, allowing them the financial resources, in part because of the receipt of commissions, to penetrate U.S. markets, while denying U.S. forwarders the same resources for foreign markets.

The opponents stressed that these payments can camouflage rebates and are not economically justified. They argued that the freight rate structure of the direct carriers is designed so that the shippers or indirect air carriers performing ready-for-carriage services receive the resulting cost saving to the direct carriers. If permitted, they argued, these payments would increase the cost to the shipper to cover the additional cost to the direct carrier.

While we agree that payment of commissions to forwarders or shippers could be considered a rebate from the direct carrier's tariff to the purchaser of its air transportation, ready-for-carriage fees would appear to be payment for services which are only ancillary to the air transportation provided, and in addition would appear to provide incentives for efficiency and price competition. With the passage of the cargo deregulation amendments (Pub. L. 95-163) and the Airline Deregulation Act of 1978 (Pub. L. 95-504), the air freight industry will gradually become more responsive to price competition.

Since the forwarder or shipper can often more efficiently prepare shipments for carriage at a lower cost than the direct carrier, payment by the direct carrier of ready-for-carriage fees to the forwarder could result in the shipper receiving more efficient service at lower cost. Overall, we believe that shaper price competition between the direct air carrier and the forwarder, and price competition at the forwarder level, would create pressures to minimize the costs of shipment handling, and would force forwarders to pass along lower rates to the shipper, driving rates down and benefiting both the shipping public and the ultimate consumer of the goods.

It is also our tentative decision that if the direct carrier is paying for actual services received, there is no rebate involved in the transaction. For example, although decided on a narrow basis, and not a precedent for this case, in Order 77-4-80, dated April 15, 1977, the Board has stated that the bona fide sharing of advertising expenses by a direct carrier and a tour operator would not be a rebate. In view of the Congressionally mandated emphasis on competition as the primary regulator of air transportation, since these ready-for-carriage services appear to be only ancillary to the provision of the air transportation itself, this artificial, prophylactic restraint is no longer warranted. Payment for these services would not be a refund or remittance to the purchaser from the direct carrier's rate for air transportation, and since they are not directly connected to its sale there is no point in denying this competitive tool to the air cargo industry.

Accordingly, the Board proposes to amend Part 399 of its Policy Statements (14 CFR Part 399) to read as follows:

1. The Table of Contents would be revised by adding a new section 399.86 to Subpart G to read:

Subpart G—Policies Relating to Enforcement

* * * * *

§ 399.86 Payments to shippers and indirect cargo carriers.

2. Subpart G would be revised by adding a new section 399.86 to read:

§ 399.86 Payments to shippers and indirect cargo carriers.

The Board considers that payments by direct air carriers to shippers or indirect air cargo carriers for delivering shipments to the direct carriers in a ready-for-carriage form are for services ancillary to the provision of air transportation, and are not rebates under section 403 of the Act.

(Secs. 204, 401, 403, 404(b), of the Federal Aviation Act, as amended, 72 Stat. 743, 754, 758, and 760; 49 U.S.C. 1324, 1371, 1373, and 1374; Pub. L. 95-504).

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc. 79-1867 Filed 1-17-79; 8:45 am]

[2] By ER-1080 (43 FR 53628, November 16, 1978), the Board has exempted direct carriers in domestic cargo transportation from the requirement to file tariffs.

[3] They do not ship on their own tariffs, however, or charge their own rates. They charge the shipper the rate of the direct carrier's airwaybill.

PREAMBLE TO THE PERMANENT CURTAILMENT RULE

BACKGROUND

Section 401 of the Natural Gas Policy Act of 1978 (NGPA) seeks to assure that natural gas required for essential agricultural uses will not be curtailed unless curtailment is required to protect the needs of enumerated high priority users.

Section 401(a) provides that not later than 120 days after the date of enactment of the NGPA the Secretary of Energy shall prescribe and make effective a rule which provides that no curtailment plan of an interstate pipeline may provide for curtailment of deliveries of natural gas for any essential agricultural use except to meet the requirements of enumerated high priority users.

Section 401(c) states that the Secretary of Agriculture shall certify to the Secretary of Energy and to the Federal Energy Regulatory Commission and natural gas requirements for essential agricultural uses in order to meet the requirements of full food and fiber production.

Pursuant to section 403(b) of the NGPA and section 402(a)(1)(E) of the Department of Energy Organization Act, the Federal Energy Regulatory Commission is charged with implementing the rules prescribed under section 401 under its authority to establish, review, and enforce curtailments under the Natural Gas Act. By a separate rulemaking the Commission has proposed rules to give effect to section 401 for the period March 9, 1979, 120 days after the date of enactment, through October 31, 1979. The rules proposed herein are to be effective November 1, 1979, the beginning of the first full winter heating season when section 401 will be in effect. However, as will be discussed, public comment is solicited on when this rule should be made effective.

Title IV of the NGPA creates new priority classifications for high priority users as defined in the statute, essential agricultural uses, and essential industrial process and feedstock uses. There is no statutory deadline for implementation of a rule regarding essential industrial process and feedstock uses. The Economic Regulatory Administration of the Department of Energy is studying curtailment priorities and it is likely that a rule regarding essential industrial process and feedstock uses will be proposed by the Secretary of Energy upon its completion.

By this rulemaking the Commission proposes a method for the permanent implementation of section 401. In developing this proposed rule the Commission has had the benefit of consultation with the United States Department of Agriculture as contemplated by section 401. The Commission is aware, however, that consultation does not imply concurrence by the USDA with all aspects of these proposed regulations.

Under the proposed rule pipeline curtailment plans will be amended so that high priority end users that are not now in the highest priority of pipeline curtailment plans will be reclassified into Priority One. Pipeline curtailment plans will create a new Priority Two which will contain the requirements necessary to serve essential agriculture uses. All other pipeline curtailment categories will remain the same and their order will remain the same but they will be below these two new categories.

The proposed changes in curtailment plans are to be implemented on November 1, 1979. It will be necessary for the interstate pipelines to revise their end use profiles and curtailment plans to reflect the changes brought about by the enactment of NGPA. Thus, although the rule will not be implemented until November 1, substantial work will be required before that date to prepare for its implementation. The Commission anticipates as soon as this rule is promulgated end users, local distribution companies, and interstate pipelines will immediately commence working towards its implementation.

The Commission requests interested parties to comment on the proposed date for implementation of these changes in curtailments. It is possible that the rules promulgated under section 402 may require similar modifications to the ones proposed here. There may be benefits to postponing permanent implementation until after those rules are promulgated. However, it is unlikely that the section 402 rule will be in place for the 1979-80 heating season so that if section 401 were implemented with section 402, some interim plan would have to be adopted for the 1979-80 heating season. Comments and suggestions are requested on this issue.

The Commission recognizes that there may be interstate pipelines with existing curtailment plans that will not require modification. For example, there may be interstate pipelines that do not have any essential agricultural uses on their systems and whose existing curtailment plans already classify high priority users ahead of all other uses. Another situation might find a pipeline's natural gas supply and existing curtailment plan adequate to forestall curtailment of high priority users and essential agricultural uses for the foreseeable future. In such cases it is not the Commission's intent to compel alteration of the existing curtailment plan needlessly. If an interstate pipeline's existing curtailment plan, given current supply projections, adequately protects those uses the statute seeks to protect, the interstate pipeline may file for an exception to the provisions of this rule.

Where modification of a pipeline's curtailment plan is required, individual pipelines may require a plan which varies from that in the proposed rule. Once again, the Commission seeks to be sensitive to the differences among interstate pipelines. Should differing treatment be appropriate for individual pipelines the Commission is prepared to recognize this fact and respond accordingly.

In past curtailment proceedings the parties have often arrived at a settlement of all issues without resort to adjudicatory proceedings before the Commission. This procedure may be appropriate here, and nothing in the proposed rule precludes any interstate pipeline and its customers from proposing, as a settlement, a curtailment plan that differs from that set out in our proposed rules. Such a settlement will be evaluated by the Commission in light of its ability to meet the statutory goal of protecting, to the maximum extent practicable, high priority users and essential agricultural uses.

SUMMARY OF PROPOSED RULE

The proposed rule would have interstate pipelines file revised curtailment plans setting forth two new categories, placing high priority users and essential agricultural uses ahead of existing curtailment categories. The Commission views this as a reclassification of existing curtailment plans so that uses once categorized on another basis would now be categorized as high priority users or essential agricultural uses.

The requirements of high priority users would be the same as the requirements for those users currently reflected in existing interstate pipeline curtailment plans.[1] Thus, were an interstate pipeline curtails on a past fixed base period the high priority user requirements would be those reflected in the base period data. Where an interstate pipeline uses an alternate approach to curtailment then the high priority user's requirements would be computed on the same basis as they are computed in the interstate pipeline's presently effective curtailment plan.

Under the Commission's proposed rules essential agricultural uses requirements will be calculated on the same basis as they are calculated in the interstate pipeline's presently effective curtailment plan. Thus, where an interstate pipeline curtails based on a past fixed base period, the requirements will be the base period allocation. Where another basis is used that method will be used. After this volume is calculated, the user's alternate fuel capability will be subtracted out. The Commission is of the view that this will help insure that uses without alternate fuel capability, those most in need of protection, receive the highest curtailment classification. Failure to examine alternate fuel capability would result in the rule protecting those with alternate fuel capability on the same basis as those without that capability, thereby diminishing the quality of the protection afforded to those who most need it.

Where a determination is made that certain requirements can be satisfied with alternate fuel, those requirements will not be reclassified. This may result in certain end user's volumes being split among various curtailment categories. This is not unusual and has been done in the past with industrial needs which may be divided among process, feedstock and boiler fuel requirements with curtailment of the lower priority uses occurring while the same end user's high priority needs are served.

This proposed rule is linked to the basis upon which the interstate pipeline now curtails. This is designed to result in minimal disruption of existing curtailment plans as expressed in the NGPA Conference Report at page 113:

> For purposes of implementing this section, the Commission is instructed to reopen curtailment plans that are already in effect under the Natural Gas Act only to the extent necessary to adjust those plans to bring them into conformity with the new curtailment priority schedule. The conferees were concerned that these changes not burden the Commission with lengthy proceedings which might throw existing curtailment plans into disarray. Therefore, the conference agreement includes the term "to the maximum extent practicable" to assure that the Commission has the necessary flexibility in implementing any changes. For example, the conferees do not intend the reopening of curtailment plans for this limited purpose to result in adoption of a new base year for curtailment purposes.

In the course of the Commission's consultation with the Department of Agriculture, pursuant to section 401(b) of the NGPA, two alternative methods of calculating agricultural requirements were suggested.[2] The Commission is giving serious consideration to these proposals as alternatives that might be adopted in place of the procedure in the proposed rule. The Secretary of Agriculture has stated:

> The Department of Agriculture has taken the position that the proposed rule would not achieve the statutory intent that access of agricultural users to pipeline supplies of gas be protected at significantly higher levels than previously and that such additional protection of gas supply must be available to agricultural users on equally favorable economic terms with other pipeline gas supplies that are protected against curtailment.
>
> The USDA has recommended the following as one possible way to achieve the statute's intent in a practicable way:
>
> 1. Small-scale agricultural uses, as defined in the January 3, 1979, draft FERC rule, would be placed in the high-priority classification under a broad interpretation of the definition of "commercial establishments using less than 50 mcf per peak day." Such users would be presumed to lack the economic practicability to utilize a fuel other than natural gas in their operations, and would be protected in their access to gas on demand within appropriate tariff provisions or up to contract entitlements.
>
> 2. For essential agricultural uses under 401(f)(1)(A), protect all projected and verified natural gas requirements of certified essential agricultural users up to contract entitlements, with a rebuttable presumption that such users lack the economic practicabiltity to utilize a fuel other than natural gas in their operations.
>
> 3. For essential agricultural uses under 401(f)(1)(B), natural gas requirements would be computed as:
>
> (a) the certified peak use, in the time frame normally employed by the pipeline, during a rolling 3-year base period; plus
>
> (b) the volume of natural gas the essential agricultural user would have consumed in that curtailment period but for curtailment or plant shutdowns.
>
> For determination of past curtailments and plant shutdowns, the burden of coming forward with the relevant verifiable information would be upon the agricultural users, and such information would be rebuttably presumed to be accurate. This would generally eliminate sequential determination on economic practicability and reasonable availability of alternate fuels; agricultural users would be rebuttably presumed to lack the economic practicability to utilize a fuel other than natural gas up to the base corrected for past curtailments and plant shutdowns.[3]

Comment is invited on the USDA preferred proposal, regarding (1) its sufficiency in fulfilling the intent of the statute and (2) its practicability of implementation.

However, should the Commission decide to adopt a historical base period approach the Department of Agriculture would advance an alternative proposal, although USDA emphasizes that the proposal set out above is the preferred approach in its view. USDA's alternative proposal follows:

> 1. Small-scale agricultural uses, as defined in the January 3, 1979, draft rule, would be placed in the high-priority classification under a broad interpretation of the definition of "commercial establishments using less than 50 mcf per peak day." Such users would be presumed to lack the economic practicability to utilize a fuel other than natural gas in their opcrations, and would be protected in their access to gas on demand within appropriate tariff provisions or up to contract entitlements.
>
> 2. For all other essential agricultural uses, natural gas requirements would be computed as:
>
> (a) the certified peak use, in the time frame normally employed by the pipeline, during a rolling 3-year period; plus
>
> (b) the volume of natural gas the essential agricultural user would have consumed in that curtailment period but for curtailment or plant shutdowns.
>
> 3. For determination of past curtailments and plant shutdowns, the burden of coming forward with the relevant verifiable information would be upon the agricultural user, and such information would be rebuttably presumed to be accurate. This would generally eliminate sequential determination on economic practicability and reasonable availability of alternate fuels; agricultural users would be rebuttably presumed to lack the economic practicability to utilize a fuel other than natural gas up to the base corrected for past curtailments and plant shutdowns.[4]

Comment is invited on the USDA's second proposal regarding (1) its sufficiency in fulfilling the intent of the statute and (2) its practicability of implementation.

Should USDA's second approach be adopted, the Commission would continue to employ the data verification committees of the various interstate pipelines in order to examine require-

[1] The Commission's rule conforms to the Department of Energy's proposed rule insofar as it considers the alternate fuel capability of high priority users. If the Department of Energy's proposed rule is altered, appropriate modifications will be made to this rule.

[2] Memoranda submitted to the Commission by the USDA pursuant to this consultation are in the public record in this docket.

[3] Memorandum from Secretary Bergland to Commissioner Hall, Subject: USDA Comments on FERC Proposed Rule, dated January 9, 1979. The definition of small agricultural use proposed by USDA is the same as that in the proposed rule.

[4] Memorandum from Mr. Barton to Commissioner Hall, January 6, 1979.

V 4 4 - 1 3 J A 1 8 7 9 UMI

ments. The data verification committees would be instructed to determine that small users be deemed to have no alternate fuel capability and that they be given treatment comparable to high priority uses. For all other essential agricultural uses the data verification committee would be instructed to determine the peak use of the essential agricultural use over the past three years, with such use determined on the basis on which the interstate pipeline's curtailment plan is based such as daily, seasonally, monthly, or annually. If the essential agricultural user demonstrated that it had been curtailed during this period of time and that the use of a three year rolling period did not adequately cover a period where there had been no curtailment, the volumes that would have been used if there were no curtailment would be added into this requirement. Implementing this rule, the Commission would eliminate its presumption of past alternate fuel use as in indication of economic practicability and reasonable availability of alternate fuels now. Any challenges to essential agricultural users requirements calculated under this method would be adjudicated with the burden of proof on the challenger, and any adjustment in the essential agricultural users requirements would be prospective only.

How essential agricultural use requirements are to be calculated including the determination of alternate fuel capability is a major issue. The Commission specifically requests comments on this aspect of the proposed rule in general and both of the USDA's proposals in particular. Parties who prefer other alternate approaches are requested to submit the proposed methods for computing the requirements of essential agricultural uses. The practical implications of the various proposals on interstate natural gas pipeline systems and the impact on natural gas demands by consuming category should be analyzed and evaluated.

Parties to this proceedings should be aware that the Commission is considering adoption of a direct purchase program as contemplated by section 608 of the Public Utility Regulatory Policies Act of 1978. The proposed changes would provide an opportunity for agricultural users of natural gas whose requirements are not covered by pipeline curtailment plans to obtain natural gas by means of direct purchases. The changes in this program, if adopted, should provide an important complement to the rule proposed here.

To reclassify high priority users or essential agricultural uses, it will be necessary for the pipelines to identify such end users. The Commission recognizes that many of those classified as high priority uses in the NGPA are already classified in pipeline curtailment Category One. To the extent such consumers are known and their requirements, whether individually or aggregated by distributor, are known to the interstate natural gas pipeline they would not be expected to file requests for reclassification nor would their requirements be subject to reexamination by data verification committees. The requests for reclassification should contain the information set out in the proposed rule and any other information that a person seeking reclassification deems relevant. This requested information is comprehensive so as to obviate the need for additional requests for information.

The rule provides that suppliers of natural gas, where appropriate, are to review the request for reclassification and indicate whether to the best of their knowledge, information, and belief the statements made by the end user are true. These requests for reclassification will then be forwarded to the interstate pipeline suppliers.

Each interstate pipeline will use its Data Verification Committee to review the data submitted. Interstate pipelines that do not presently have data verification committees are to form them. Interstate pipelines with existing data verification committees should continue to employ those committees.

The Commission anticipates that the data verification proceedings will be informal forums for the amicable resolution of disputes. The Commission has set out in its proposed rule the minimum requirements for membership but individual pipelines may choose to add additional members, and groups of customers may designate an individual to serve as their representative. While the proposed regulation specifies those groups who we expect to be represented, attendance by any member of the Data Verificaiton Committee is, of course, not mandatory.

The Data Verification Committee is expected to examine the information submitted by the end user and determine whether the end user actually qualifies for reclassification as a high priority user or essential agricultural use. Once this decision is made the Data Verification Committee is expected to examine the requirements of the high priority user and the essential agricultural use and compute them in accordance with the provisions of this rule. Where necessary, high priority users, agricultural users or challengers may appear before the Data Verification Committee.

The report of the Data Verification Committee, as spelled out in this rule, is required to be in detail. It is to be the basis of the interstate pipeline's tariff filing. Once the interstate pipeline files the proposed tariff sheets with the Data Verification Committee's report the Commission will review the tariff filing and Data Verification Committee report. Where there are challenges to the Data Verification Committee report, or the Data Verification Committee has not been able to reach an agreement on a recommendation, challenges will be heard by the Commission. In those proceedings the burden of proof will be on those who seek to change the status quo. Thus, if an essential agricultural use is challenged based on alleged availability of alternate fuel and its economic practicability and that end user has not used alternate fuel in the past, the burden of proof would be on the challenger.

Where a consumer has been denied reclassification by the data Verification Committee or where a consumer with a high priority or essential agricultural use believes its requirements were inaccurately stated by the Data Verification Committee the challenge to the Data Verification Committee report will be construed as a complaint under Section 1.6 of the Commission's regulations.

The proposed rule also defines alternative fuel capability for the purposes of implementation of section 401. The definition of alternate fuel capability contained in section 401(b) of the NGPA differs from that presently contained in the Commission's regulations. The new definition of alternate fuel capability is proposed solely for the purposes of this rule so as not to require a relitigation of existing curtailment plans. One difference from the Commission's existing rule is that propane and other gaseous fuels are not excluded from the definition of alternate fuel by this rule. The Commission believes that the standard set out in the statute, reasonably available and economically practicable will provide an adequate basis for dealing with propane and other gaseous fuels on a case-by-case basis, or where appropriate, on a blanket basis. Comments are requested on the Commission's proposed treatment of propane and other gaseous fuels.

It may not be possible for the Data Verification Committee to examine the alternative fuel capability criteria in each case becasue of time constraints. In such situations the Data Verification Committee may elect to submit its report calculating alternate fuel capability based ona ctual past use under the presumption established in the rule. It would be desirble for the Data Verification Committee to consider all factors in reaching its decision but it is also important to complete determination of requirements under the permanent rule as promptly as possible in order to limit uncertainty.

The proposed rule deems small essential agricultural users, those consumers using less than 50 Mcf per day, at each separately metered delivery point as not having alternate fuel capability. Additionally, small low load factor agricultural users are presumed not to have alternate fuel capability.[5] These features of the rules are designed to minimize litigation involving small users and low load factor users so that the Commission's implementation program does not become backlogged because of excessive adjudication of disputes involving small volumes of natural gas. The presumption also reflects experience with small users that indicates that they generally do not have economically feasible alternatives. Generally, small natural gas users do not have alternate fuel capability and would have great difficulty converting to alternative fuel such as coal, solar energy, or waste heat. As a general proposition in most curtailment cases the Commission has classified small volume users with a relatively high priority.

Where there are challenges to the report of the Data Verification Committee and the associated tariff filing the Commission will establish procedures to adjudicate those challenges. It is hoped that the use of the data verification committees will minimize the number of disputes that require adjudication. Where the Commission determines that a high priority user or an essential agricultural use has been misclassified by the Data Verification Committee the Commission will grant relief prospectively. However, where a consumer received excess volumes while the Commission was adjudicating the challenge to its requirements or status, the Commission reserves the right to order payback of excess volumes in appropriate cases.

PUBLIC COMMENT PROCEDURES

Interested persons may participate in this proposed rulemaking by submitting written data, views or arguments to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, on or before February 26, 1979. Each person submitting a comment should include his name and address, identify the notice (Docket No. RM79-15), and give reasons for any recommendations. An original and 14 conformed copies should be filed with the Secretary of the Commission. Comments should indicate the name, title, mailing address, and telephone number of one person to whom communications concerning the proposal may be addressed. Written comments shall be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, N.E., Washington, D.C. 20426, during regular business hours.

The Commission intends to allow an opportunity for the oral presentation of data, views and arguments. One such proceeding will be held in Washington, D.C. and additional proceedings will be scheduled at appropriate times and places. The Commission solicits suggestions as to where it would be appropriate to hold such other proceedings and the names of those interested in appearing. Such requests should be submitted by January 25, 1979 to the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426. Requests should reference Docket No. RM79-15 and indicate whether the request is for Washington, D.C. or elsewhere. The dates and exact locations of the public hearings will be announced as soon as practicable.

(Administrative Procedure Act (5 USC § 553), Natural Gas Act, as amended (15 U.S.C. 717), Department of Energy Organization Act, Pub. L. 95-91, E.O. 12009, 42 FR 46267), Federal Energy Administration Act (15 U.S.C. 761), Energy Supply and Environmental Coordination Act (15 U.S.C. 791), Natural Gas Policy Act of 1978, Pub. L. 95-621, Public Utility Regulatory Policies Act of 1978, Pub. L. 95-617.)

In consideration of the foregoing, it is proposed to add Part 281, Subpart B, Title 18, Code of Federal Regulations, as set forth below:

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

PART 281—NATURAL GAS CURTAILMENT

Subpart B—Proposed Rule for Curtailment of Natural Gas Under Section 401 of NGPA

Sec.
281.201 Purpose.
281.202 Applicability.
281.203 Definitions.
281.204 General rule.
281.205 Request for classification.
281.206 Review of requests for reclassification.
281.207 Data Verification Committee.
281.208 Protests and challenges.

AUTHORITY: (Administrative Procedure Act (5 USC § 553), Natural Gas Act, as amended (15 U.S.C. 717), Department of Energy Organization Act, Pub. L. 95-91, E.O. 12009, 42 FR 46267), Federal Energy Administration Act (15 U.S.C. 761), Energy Supply and Environmental Coordination Act (15 U.S.C. 791), Natural Gas Policy Act of 1978, Pub. L. 95-621, Public Utility Regulatory Policies Act of 1978, Pub. L. 95-617.)

§ 281.201 Purpose.

The purpose of this subpart is to implement section 401 of the NGPA in order to provide that effective November 1, 1979, the curtailment plans of interstate pipelines protect to the maximum extent practicable, deliveries of natural gas for essential agricultural uses and for high-priority uses.

§ 281.202 Applicability.

This subpart applies to sales of natural gas made by an interstate pipeline on and after November 1, 1979, if the pipeline is curtailing its sales of natural gas.

§ 281.203 Definitions.

(a) *NGPA definitions.* Terms defined in the NGPA shall have the same meaning for purposes of this subpart as they have under the NGPA, unless further defined in this subpart.

(b) *Subpart B definitions.* For purposes of this subpart:

(1) "NGPA" means the Natural Gas Policy Act of 1978.

(2) "School" means a facility the primary function of which is delivering instruction to regularly enrolled students in attendance at such facility. Facilities used for both educational and noneducational activities are not included under this definition unless the latter activities are merely incidental to the delivery of instruction.

(3) "Hospital" means a facility the primary function of which is delivering medical care to patients who remain at the facility. Outpatient clinics or doctors' offices are not included in this definition. Nursing homes and convalescent homes are included in this definition.

(4) "Essential agricultural use" means any use of natural gas which is certified by the Secretary of Agriculture under 7 CFR § 2900.3 as an "essential agricultural use" under section 401(c) of the NGPA.

(5) "Essential agricultural user" means a person who uses natural gas for an essential agricultural use.

(6) "High-priority use" means any use of natural gas:

(i) In a residence;

(ii) In a commercial establishment in amounts of less than 50 Mcf on a peak day;

(iii) In a school or hospital; or

(iv) By any person who is designated by the Secretary of Energy as a "high-priority user" under 10 CFR § 580.2(c)(2)(iv).

(7) "High-priority user" means a person who consumes natural gas for a high-priority and who does not have installed alternate fuel capability.

[5] Load factors are computed by taking the total annual consumption and dividing that figure by 365. The resulting figure, the average daily consumption, is then divided by the consumption on the day of highest use during the year. If the result is equal to or less than .20 the consumer is a low load factor user within this definition.

V 4 4 - 1 3 J A 1 8 7 9 UMI

(8) "High-priority requirements" for a curtailment period from a particular interstate pipeline means the high-priority requirements as determined by the Data Verification Committee under § 281.207 or the high-priority requirements as determined by the Commission, as appropriate.

(9) "Essential agricultural requirements" for a curtailment period from a particular interstate pipeline means the essential agricultural requirements as determined by the Data Verification Committee under § 281.207 or the essential agricultural requirements as determined by the Commission, as appropriate.

§ 281.204 General rule.

(a) Each interstate pipeline shall file tariff sheets amending its effective curtailment plan to provide that the total requirements for high-priority uses and essential agricultural uses are fully met prior to delivering natural gas for any other end use. These end uses are designated end-use priorities one and two and, for all interstate pipelines with existing curtailment plans based on numbered priority of use categories, those existing categories are renumbered to follow sequentially the new priorities one and two. In the event the interstate pipeline has insufficient gas available to meet both its high-priority requirements and essential agricultural requirements, the high-priority requirements will be fully served before any deliveries are made for essential agricultural requirements.

(b) The tariff sheets shall be filed on October 1, 1979, with a proposed effective date of November 1, 1979. The tariff sheets shall contain the conditions prescribed in paragraph (a) and indicate the volumes as determined by the Data Verification Committee under § 281.207, needed to serve the requirements of the high-priority users and the essential agricultural users for which there is no alternate fuel. The report of the Data Verification Committee shall be the basis of the tariff filing and shall be filed with the tariff sheets required by this subpart.

§ 281.205 Request for classification.

(a) Any end user of natural gas may file a request with its direct supplier to classify a specified volume of its purchases as high-priority use or essential agricultural use.

(b) Except as provided in paragraph (c), the end user shall submit under oath the following information, where applicable, to its direct supplier:

(1) Name of end user;

(2) Address of end user;

(3) Standard Industrial Classification (SIC) code of activity for which natural gas is required;

(4) Direct supplier of natural gas;

(5) Current curtailment priority classification;

(6) Contract entitlement for the calendar years 1976, 1977, and 1978, computed on the basis or bases utilized by the supplier (e.g., daily, monthly, seasonal, annual) for the calendar years 1976, 1977, and 1978;

(7) Actual agricultural use computed on the basis or bases utilized by the supplier (e.g., daily, monthly, seasonal, annual) for the calendar years 1976, 1977, and 1978;

(8) The current requirements of the high-priority end user as reflected in the interstate pipeline's curtailment plan;

(9) If natural gas volumes have been curtailed, the dates of such curtailment and the amount of gas curtailed;

(10) Whether the end user has alternative fuel available;

(11) Whether any fuel other than natural gas, has ever been used by the end user for end uses designated as essential agricultural uses or high-priority use and, if another fuel has been used, the dates of such use and the amount of alternate fuel used; and

(12) Whether fuels other than natural gas are planned to be used in the future; if so, the fuel and the amount involved.

(c) Residential and small commercial customers who use less than the 50 Mcf of natural gas on a peak day are not required to file with their direct supplier. Direct suppliers shall base these requirements on those already included in pipeline curtailment plan or, if none, they may estimate the high-priority requirements of these customers.

(d) The request described in paragraph (b) must be filed with the direct supplier by June 10, 1979.

§ 281.206 Review of requests for reclassification.

(a) *Suppliers.* (1) The natural gas supplier shall determine whether to the best of its knowledge, information and belief, the statements made by the end user requesting reclassification of natural gas as a high-priority use, or as an essential agricultural use are true.

(2) Where appropriate, the supplier shall file under oath the information with its interstate pipeline supplier no later than June 25, 1979, a copy of the information shall be sent simultaneously to the appropriate state or local regulatory authority. If the supplier has more than one interstate pipeline supplier, the volumes for which the reclassification is sought shall be prorated among the interstate pipeline suppliers on the same basis as proration was made for purposes of the interstate pipeline's effective curtailment plan.

(b) *Interstate pipelines.* No later than June 30, 1979, the interstate pipeline shall forward all requests for reclassification as high-priority use or essential agricultural use to the Data Verification Committee and circulate a list of customers seeking such classification to all its distributors, appropriate State and local regulatory authorities, all parties to its curtailment proceeding and the Commission staff.

§ 281.207 Data Verification Committee.

(a) The Data Verification Committees of each interstate pipeline shall include at a minimum a representative of the interstate pipeline, Commission staff, large and small distributors and appropriate State or local regulatory bodies. If an interstate pipeline does not have a Data Verification Committee, it shall form one.

(b) The interstate pipeline shall convene a meeting of the Data Verification Committee within 10 days of receipt of the information sent to it under § 281.206.

(c) The Data Verification Committee shall review the requests for reclassification and shall make an initial determination of the essential agricultural requirements and high-priority requirements of each person requesting reclassification. The initial determination of the Data Verification Committee shall be made in accordance with subparagraphs (1) and (2).

(1) *High-priority users and essential agricultural users.* The high-priority requirements of a high-priority user and the essential agricultural requirements of an essential agricultural user shall be the maximum volume the high-priority user or essential agricultural user would be entitled to purchase for high-priority use or essential agricultural use under the interstate pipeline's effective curtailment plan, but not including volumes a high-priority user or essential agricultural user may receive solely by operation of Subpart A, or volumes obtained under § 2.79, less volumes of natural gas for which the high-priority user or essential agricultural user has alternate fuel capability.

(2) *Determination of alternate fuel capability.* (i) For purposes of this paragraph and except as provided in clause (ii), alternate fuel capability will be deemed to be equal to the least amount of alternate fuel actually used in the comparable curtailment period of lowest alternate fuel use during the past three years.

(ii) (A) A person whose natural gas consumption for high-priority use or essential agricultural use during the curtailment period on which the interstate pipelines curtailment plan is based did not exceed a peak day requirement of 50 Mcf at each separately metered delivery point is deemed to have no alternate fuel capability.

(B) A person whose natural gas consumption for high-priority use or essential agricultural uses during the curtailment period on which the interstate pipelines curtailments is based did not exceed 300 Mcf on a peak day at each separately metered delivery point and whose average daily requirements for essential agricultural uses, measured over the calendar years 1976, 1977, and 1978 did not exceed 20 percent of such person's peak day requirement for essential agricultural uses measured on the 36-month period ending October 31, 1978, is deemed to have no alternate fuel capability.

(C) The Data Verification Committee shall compile a list reflecting its initial determination of high-priority requirements and essential agricultural requirements. This list shall be prepared by August 1, 1979, and simultaneously a copy shall be mailed to the interstate pipeline, all of its distributors, appropriate State and local regulatory authorities, all parties to its curtailment proceeding and the Commission staff.

(D) Any person aggrieved by an initial determination of the Data Verification Committee may challenge the determination on the basis of the actual use of the natural gas, the volumes of natural gas required for the high-priority use or the essential agricultural use or the alternate fuel capability determination. Any person challenging an initial determination shall be permitted to make an oral or written presentation to the Data Verification Committee.

(E) Subject to the provisions of subparagraphs (1) and (2) the Data Verification Committee may adjust the challenged initial determinations.

(*1*) *Alternate fuel capability.*

(*i*) Any person challenging an initial determination on the basis of alternate fuel capability shall have the burden of proving there is no alternate fuel capability.

(*ii*) For purposes of this subparagraph "alternate fuel capability" means a condition where a fuel other than natural gas could be utilized to achieve the end use of natural gas. The facilities for such use may have actually been installed, but a potential capability to use a fuel other than natural gas also qualifies as an alternate fuel capability. Alternate fuel capability exist when use of alternate fuel is economically practicable and reasonably available to the end user. A fuel other than natural gas is deemed economically practicable when the cost of such other fuel plus the cost of the facilities required to utilize such fuel are, when compared with natural gas on the basis of units of energy displaced, sufficiently similar so that the user might reasonably be expected to use either fuel without serious adverse financial consequences.

(*iii*) In determining alternate fuel capability as defined in clause (*ii*), the following factors shall be considered:

(*A*) Does the facility or industry in question have the installed capacity to use an alternate fuel?

(*B*) Does the present state of technology permit the use of an alternate fuel to perform the particular end use?

(*C*) Do other similar types of consumers presently utilize fuels other than natural gas?

(*D*) If alternate fuel capability is technically feasible, what is the cost of conversion or replacement of facilities so that alternate fuel can be utilized?

(*E*) What is the projected cost of the alternate fuel?

(*F*) What is the projected cost of natural gas?

(*G*) Are there any other out-of-pocket costs required to utilize natural gas?

(*H*) What part of the end user's total costs is attributable to the cost of fuel?

(*I*) What competitive disadvantage will the end user suffer if it utilizes a fuel other than natural gas?

(*J*) What is the projected availability of natural gas for that end user?

(*K*) What is the projected availability of fuels other than natural gas?

(*2*) *Essential agricultural requirements.* An end user may request an increase of the initial determination of its essential agricultural requirements on the grounds that the initial determination is not sufficient to satisfy its natural gas needs for full food and fiber production. The Data Verification Committee may increase the essential agricultural requirement up to the contract entitlement if it determines that no other source of natural gas is available to satisfy these requirements including but not limited to purchases by the distributor or end user.

(F) By September 15, 1979, the Data Committee shall make a final determination of the high-priority requirements and essential agricultural requirements of each person seeking reclassification. This determination and the report described in paragraph (g) shall be sent by September 15, 1979 to the interstate pipeline, the pipeline's distributors, appropriate state and local regulatory authorities, all parties to the interstate pipeline's curtailment proceeding, the Commission staff and all customers who sought reclassification.

(G) No later than September 15, 1979, the Data Verification Committee shall prepare a report which contains the following information:

(*1*) a list by end user indicating:

(*i*) the volume for which reclassification is sought;

(*ii*) the standard industrial classification of the end user;

(*iii*) the alternate fuel capability as determined by the Data Verification Committee; and

(*iv*) the high-priority requirements or essential agricultural requirements as determined by the Data Verification Committee;

(*2*) a list by end user and the volumes requested for reclassification for whom a challenge to such reclassification was made if such challenge has not been resolved and the basis, therefore, and a list of those for whom insufficient information existed to make a determination as to whether the essential reclassification is appropriate;

(*3*) the recommendation of the Data Verification Committee as to the appropriate resolution of any challenge to a request for reclassification as a high-priority user or as an essential agricultural use;

(*4*) a copy of the minutes of the Data Verification Committee meeting.

§ 281.208 Protests and challenges.

(a) *Protests.* Protests to this tariff filing shall be limited to further challenges to natural gas end users seeking reclassification in either priority-of-service category one or two, challenges by customers who were denied certification by the Data Verification Committee as either high-priority users or essential agricultural users on whose requirements were decreased by the Data Verification Committee. All such protests shall be treated as complaints pursuant to § 1.6 of this chapter. The Secretary of Agriculture may intervene as a matter of right under § 1.8(a)(1) of the chapter in any proceeding initiated under this section.

(b) *Burden of proof.* (1) In the case of a consumer being challenged as to the propriety of its inclusion in priority-of-service category one or two, the consumer shall have the initial burden of going forward to explain why it should be included in either priority-of-service category one or two. The ultimate burden of proof is upon those challenging the end users inclusion to show conclusively that the end user is not a high-priority user or essential agricultural use, that the requirements of the end users approved by the Data Verification Committee are not correct or, that alternate fuel technology exists and that use of an alternate fuel is economically practicable and that such fuel is reasonably available.

(2) In the case of challenge by an end user that has been denied certification by the Data Verification Committee as either a high-priority user or essential agricultural use or in the case of a certified consumer whose pri-

ority-of-service category one or two requirements were decreased by the Data Verification Committee, the challenge will be construed as a complaint pursuant to § 1.6 of this chapter.

(3) In the case of an end user that has provided insufficient information upon which to conclude that it qualifies for either priority-of-service category one or two treatment, the consumer's request for classification will be construed as a complaint pursuant to § 1.6 of this chapter.

(c) *Commission decision.* (1) If the Commission determines that an end user who has been temporarily classified in priority-of-service category one or two does not qualify for the classification, the end user shall be placed in the appropriate curtailment category.

(2) The Commission, in its discretion, may direct the payback to excess volumes taken while the end user was temporarily misclassified.

(3) If the Commission finds that an end user who was denied certification as a high-priority user or an essential agricultural use qualifies for such status, the end user shall be reclassified on a prospective basis.

(4) If the Commission finds that a certified end user whose requirements were decreased by the Data Verification Committee, warrants the recognition of increased requirements, the increase shall be granted on a prospective bases.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

[45 CFR Chapter I]

LAW-RELATED EDUCATION PROGRAM

Availability of Draft Proposed Regulations

AGENCY: Office of Education, HEW.

ACTION: Notice of availability of draft proposed regulations.

SUMMARY: Notice is given that a first draft of proposed regulations to implement the Law-Related Education Act of 1978 is now available to the public.

The program was enacted by the Education Amendments of 1978 as Part G of Title III of the Elementary and Secondary Education Act. It authorizes the Commissioner to award grants and contracts to encourage State and local educational agencies and other public and private nonprofit agencies, organizations, and institutions to provide law-related education programs.

The program has not been funded for Fiscal Year 1979, and it is not clear whether it will be funded for Fiscal Year 1980. Regulations are being developed for the program in the event that it is funded. The draft proposed regulations now available have not been adopted as official views of either the U.S. Office of Education or the Department of Health, Education, and Welfare. They have no legal effect.

ADDRESS: Copies of these draft proposed regulations may be obtained by writing to: Steven Y. Winnick, U.S. Office of Education, Room 4091, 400 Maryland Avenue, SW., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT:

Steven Y. Winnick, telephone (202) 245-8953.

Dated: January 11, 1979.

JOHN ELLIS,
Acting U.S. Commissioner of Education.

FEDERAL COMMUNICATIONS COMMISSION

[47 CFR Part 73]

[Docket No. 21310; RM-1847; RM-1984; RM-2742; FCC 79-1]

FM QUADRAPHONIC BROADCASTING

Further Notice of Inquiry

AGENCY: Federal Communications Commission.

ACTION: Further notice of inquiry.

SUMMARY: Federal Communications Commission issues Further Notice of Inquiry to determine the extent that adoption of proposed quadraphonic broadcasting standards would preclude the Commission's option of reducing the FM broadcast channel spacing and the feasibility of operation of the proposed systems within a possible reduced channel spacing. The Inquiry seeks to further examine the merits of alternative systems in addition to the proposed systems. The effect on SCA operation will be studied.

DATES: Comments must be received on or before April 16, 1979 and reply comments must be received on or before May 16, 1979.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Albert S. Jarratt, Sr., Broadcast Bureau (202) 632-7792.

SUPPLEMENTARY INFORMATION:

In the matter of FM Quadraphonic Broadcasting, Docket No. 21310, RM-1847, RM-1984, RM-2742. See also 43 FR 4678, February 1, 1978.
Adopted: January 2, 1979.

Released: January 10, 1979.

BACKGROUND

1. A Notice of Inquiry was released in this proceeding on July 6, 1977 (FCC 77-444, FR 42 FR 34913), as a result of three petitions filed with the FCC which proposed rules and standards for FM quadraphonic broadcasting. These petitions were filed by Pacific FM, Inc., RM-1847 (hereafter identified as "Pacific"), General Electric Company, RM-1984 ("GE"), and CBS, Inc., RM-2742 ("CBS").[1] A further consideration was the study performed by the National Quadraphonic Radio Committee (NQRC).[2] The objective of that Inquiry was to determine if there was sufficient interest to warrant the Commission's adoption of standards for quadraphonic broadcasting, and if so to develop a record which would assist the Commission in formulating the needed standards for this service.

2. Quadraphonic systems which have been studied in this proceeding fall into three general categories, 4-2-4, 4-3-4, and 4-4-4. Where four independent or discrete audio sources are encoded by a "matrix" into two signals transmitted as compatible left and right stereo signals to be later decoded back into four audio signals, the system has been designated as a 4-2-4 system. Where the four independent or discrete audio sources are combined and transmitted as a main channel plus either 2 or 3 subchannels, all to be later converted back into 4 (discrete in the case of 4-4-4) audio signals, the systems are designated as 4-3-4 or 4-4-4 respectively. In issuing its first *Notice of Inquiry*, the FCC recognized that it was faced with the difficult task of not only trying to evaluate the merits of 4-4-4, 4-3-4 and 4-2-4 systems as compared to each other, but also to evaluate the several designs being proposed.

3. Pacific and GE petitioned the FCC to adopt standards for 4-4-4

[1] These petitions were filed on August 23, 1971, May 30, 1972, and August 10, 1976, respectively.

[2] In 1972 the Electronic Industries Association sponsored the National Quadraphonic Radio Committee whose objective was to report to the Commission its conclusions regarding quadraphonic FM broadcasting standards. In November, 1975, the NQRC submitted its report and conclusions to the FCC. This report consists of two volumes, of which Volume One is a summary of the tests and conclusions and Volume Two, consisting of 5 Parts, includes the various tests performed on receivers, interconnecting facilities, transmitters, field tests, and compatibility tests. This report was made a part of the record in this proceeding.

quadraphonic systems. Pacific proposed adoption of the system designed by Quadracast Systems, Inc. (QSI), whereas, GE proposed adoption of its system. the third petition was submitted by CBS for a 4-2-4 system identified under the trademark SQ.

4. The NQRC tests were performed primarily on 4-4-4 and 4-3-4 quadraphonic systems.[3] There was a lack of comparative test data for 4-2-4 systems since proponents of such systems did not choose to provide their equipment for tests. As a consequence, the Commission's Laboratory Division, Office of the Chief Engineer, performed comparative listening tests between 4-4-4, 4-3-4 and several 4-2-4 systems.[4][5]

5. A substantial record was developed in response to the *Notice of Inquiry*. Over 2,000 comments from broadcasters, manufacturers, and the general public were received. With few exceptions comments were in support of some form of quadraphonic broadcasting. Comments from the listening public were divided between expressions of interest for 4-4-4 and 4-2-4 quadraphonic systems. Although no significant preference was shown for any particular 4-4-4 system, those parties indicating interest in 4-2-4 systems predominantly favored the CBS SQ system.

6. A considerable number of comments were received from engineers, manufacturers, and broadcasters who addressed many of the questions contained in the *Notice of Inquiry*. Broadcasters were also split in their preferences for 4-2-4 and 4-4-4 systems. It is quite evident that the needs of broadcasters, taking into consideration location, market size, equipment limitations, etc. vary considerably. Many broadcasters are providing ancillary services through use of SCA's which may effect their ability to provide quadraphonic radio service.[6]

7. After analysis and review of the comments received to the *Notice of Inquiry*, the FCC has concluded that there is substantial interest in FM quadraphonic broadcasting. Additionally, technical comments received as well as the FCC's own analysis of technical data submitted indicate that 4-4-4/4-3-4 quadraphonic systems can be accommodated within the present frequency assignment plan without objectionable degradation to monophonic and stereophonic radio service. With these conclusions in mind and after considerations of the many technical issues involved, we believe that further action is warranted.

ADDITIONAL CONSIDERATIONS

8. This *Further Notice of Inquiry* is being issued to obtain additional information to assist the FCC as it gives further consideration to FM quadraphonic broadcasting. One of the primary questions remaining to be resolved is: What impact would the adoption of quadraphonic broadcasting standards have on the possibility of reducing the channel spacing in the FM broadcast band to 150 kHz or 100 kHz? In December of 1975, the Office of the Chief Engineer of the FCC released a report entitled "FM Broadcast Channel Frequency Spacing" (FCC/OCE RS 75-08). This document studies the effect of reducing the channel spacing for FM broadcasting stations from the present 200 kHz to 150 kHz or 100 kHz, and concludes "that from a technical point of view both the 100 kHz offset, with a low pass receiver filter after the second demodulator, and the 150 kHz offset are more efficient than the presently used 200 kHz offset, both in overall area coverage efficiency and in the available number of station assignments—i.e., in area and population coverage." The authors clearly state however that a number of assumptions have been made in developing the study. For example, the report notes that the study is based upon assuming "A simplified equilateral triangular co-channel assignment plan • • •" and observes that "• • • such a regular configuration is not representative of the true physical distribution of the distances between population centers • • •" The report also states "For lack of protection criteria the effect of reducing the frequency offset (channel spacing) upon SCA and quadraphonic operation could not be evaluated", and recognized that other non-technical aspects are important, such as the cost to change the operating frequency of many FM stations, and the cost of incorporating needed changes to both new and existing receivers. Though the study results reflect a very preliminary effort, the FCC considers it desirable to ascertain the extent to which adoption of standards for quadraphonic broadcasting might foreclose possible options should the Commission find it in the public interest to look toward reducing the spacing between FM broadcast channels, and we are requesting comments on this matter.

9. In addition, we wish to explore the feasibility of operation of the various proposed quadraphonic systems within the narrower channel spacing suggested by the OCE report. For example, it may be necessary with 150 kHz channel spacing to restrict all baseband signals to within 75 kHz, a point which could preclude some of the proposed quadraphonic systems as well as present and proposed SCA operations. We are therefore requesting comments concerning the effects on co-channel and adjacent channel protection ratios due to the operation of 4-2-4, 4-3-4 and 4-4-4 systems and SCA transmission, if FM channel separations should be reduced to 150 kHz or 100 kHz.* Pending a Commission determination regarding the efficacy of reducing FM channel spacings, we will further consider adoption of quadraphonic broadcasting standard(s) only for such system(s) as can be clearly demonstrated to not preclude possible future reductions in channel spacing.

10. After having first determined that the technical issues involved and interest by the public warrants further consideration of some form of quadraphonic broadcasting, the FCC's next task is to determine which system or combination of systems consistent with the restrictions discussed above will best serve the public interest. To arrive at this determination the FCC has concluded that certain threshold objectives should be met:

a. Any standards established must be compatible with the present monophonic and stereophonic broadcasting service.

b. Any system proposed should be capable of providing the highest quality service possible, consistent with reasonable cost. Such costs would include both the equipment necessary to implement and receive these transmissions and the spectrum space which may be necessary to provide for effective quadraphonic broadcasting.

c. Any standards established should be as broad as practical to permit the marketplace (broadcasters and listening public) to influence the selection between alternative transmission modes.

11. The FCC is of the view that any quadraphonic broadcasting standards proposed should allow licensees to select the particular transmission mode which best suits their needs as well as those of their particular listening audience. The primary considerations to broadcasters and listeners of the three quadraphonic modes proposed would be as follows:

[3] The 4-4-4 systems tested were those proposed by Quadracast Systems, Inc. (QSI), RCA Corporation, Cooper-UMX, General Electric Company, and Zenith Radio Corporation. Additionally, RCA and Cooper-UMX proposed 4-3-4 systems which are compatible with their 4-4-4 systems and existing SCA (Subsidiary Communication Authorization) standards.

[4] The 4-2-4 systems tested were QS (Sansui Electric Company, Ltd.), SQ (CBS, Inc.), and the BBC H Matrix.

[5] The FCC Laboratory report for these tests, "A Subjective Evaluation of FM Quadraphonic Reproduction Systems-Listening Tests" Project No., 2710-1, was released in August, 1977 and was made a part of the record.

* We recognize that 100 kHz Channel spacing would probably preclude presently permitted operation, such as stereo and SCA.

V 44 / 13 JA 18 79 UMI

V 4 4 / 1 3 J A 1 8 7 9 UMI

4-4-4 This type of system involves four original audio channels encoded and transmitted over the main channel and three subchannels, to be received and decoded by the receiver into four audio channels. Broadcast stations presently equipped for stereophonic operation face a greater expense to implement this service than would be encountered by the other formats discussed below, and station coverage will be somewhat reduced. However, many commenting parties expressed the view that the 4-4-4 transmission provides the best overall quadraphonic performance. Existing SCA standards would generally have to be changed when transmitting in this mode.

4-3-4 This type of system is similar to the 4-4-4 system with the exception that one subchannel is deleted such that the four audio channels are broadcast over the main channel and two subchannels. It is, therefore, not possible to uniquely recover the original four audio channels at the receiver, resulting in a degradation of the separation of the received channels. Stations opting for this mode would face expenses somewhat similar to those required for 4-4-4 transmissions. The potential loss of coverage area however, is less than that experienced with 4-4-4 transmissions and the existing SCA standards could be retained. The 4-3-4 mode is considered to have many of the desirable characteristics of the 4-4-4 mode, although there are some inherent limitations, especially concerning the amount of separation between the audio channels. However, some of the comments expressed the view that this mode of transmission has the ability to provide acceptable "surround sound" reception. 4-4-4 and 4-3-4 transmissions can be made compatible so that a single decoder will decode either transmission mode. The cost of this equipment to the public appears to be about the same as for the 4-4-4 system.[7]

4-2-4 This system also starts with four audio channels, however, it is encoded into the usual two stereophonic channels using the main channel and one subchannel. The four channels are encoded using phase and signal amplitude information such that the receiver can attempt to recover the original four channels of information. Because of the lack of separation between channels which results from this type of encoding, it is usually desirable to install "logic decoders" at the receiver in an effort to increase the apparent separation between the channels. Such logic enhancement in the receiver could increase the cost to the public of the necessary equipment, more so than the other systems listed above. There are also serious questions of "listening fatigue" that appear to occur with the use of such encoders over extended time periods.[8] Stations presently equipped for stereophonic transmissions could implement such a system with minimum expense as well as continuing SCA operations under existing standards. However, the performance of such a system is considered by many to have inherent overall limitations when compared to a 4-3-4 or 4-4-4 system.

12. The selection between 4-2-4, 4-3-4, and 4-4-4 modes may best be left to the marketplace. The broadcast marketplace has not been given a full opportunity to determine whether one of these three modes is preferred. Since August 9, 1972, the only quadraphonic transmissions permitted on a regular basis have been the 4-2-4 versions. In spite of this, it does not appear that there has been overwhelming public acceptance of these 4-2-4 system transmissions. Where feasible and practical, it is the Commission's desire to permit the marketplace to influence the choice between transmitted modes. One choice may be to permit both 4-2-4 and 4-3-4/4-4-4 transmissions.

13. In addition to the issues identified above, the FCC finds certain inherent faults in the proposed GE, Zenith and Cooper systems. On the other hand, a compatible 4-3-4/4-4-4 system similar to that proposed by QSI and RCA appears to offer the most nearly optimum quadraphonic sound reproduction at this time. Therefore, of the systems that were tested by the NQRC, we tend to prefer standards for a system that is similar to that proposed by QSI and RCA. The basis for this preference is system simplicity coupled with performance equal to other proposals.

14. GE proposes that the diagonal difference signal modulate the second quadraphonic subcarrier and that the front minus back information signal modulate the third quadraphonic subcarrier. Such an arrangement has been shown to be least desirable.[9] GE also proposes the use of a vestigial filter to reduce the upper sidebands of the third quadraphonic subchannel above 76 kHz. The use of this filter adds complexity to this system and is a potential source of distortion for the third subchannel. Thus, the FCC believes that this system does not provide the most compatible quadraphonic signal with the added disadvantages of increased complexity and potentially inferior audio linearity.

15. Zenith proposes that the diagonal difference signal modulate a third quadraphonic subcarrier at 95 kHz using a vestigial filter to reduce the upper sidebands which otherwise would cause an out-of-band interference condition. This system also includes optional variable pre-emphasis (from 25 to 225 microseconds) that is program level controlled. Two 57 kHz pilot tones, one in-phase and one in quadrature with the pilot subcarrier, are modulated with control signals representing variable pre-emphasis and audio signal compression respectively. The use of the 95 kHz subcarrier in the third quadraphonic information subchannel leaves the usual 67 kHz SCA operation unchanged. The FCC is critical of this system for the following reasons: a) use of a vestigial filter adds complexity and is a potential source of distortion for the third subchannel, b) placement of the third quadraphonic subcarrier on 95 kHz subjects this subchannel to more degradation from noise and interference than subcarriers at lower frequencies as proposed for other systems.

16. Cooper proposed a compatible 4-3-4/4-4-4 system which is a more complex system requiring several audio phase shift networks both at the transmitter and in each receiver. Because of the equal performance without this added complexity in the other systems which have been proposed, the FCC would tend to reject this system. Further discussion of this system is included in the Alternative Considerations.

17. The Quadracast Systems, Inc. (QSI) and RCA Systems are quite similar. The RCA system emphasis is on the compatible 4-3-4/4-4-4 aspect while the QSI system emphasis is on a 4-4-4 system. However, the QSI proposal includes a 4-3-4 option that is almost identical with the proposed RCA system. The second quadraphonic subcarrier is in quadrature (90° out of phase) with the first subcarrier which is in phase with the 19 kHz pilot signal. Both systems use 76 kHz for a third quadraphonic subcarrier in addition to the conventional 38 kHz stereophonic subchannel. The main channel contains the monophonic information (left plus right) signal and the first subchannel contains the L-R (left minus right) signal as is presently done for stereophonic transmission. The RCA proposal specifies that the front minus back signal modulate the second quadraphonic subcarrier and the diagonal or criss-cross signal modulate the third quadraphonic subcarrier. The QSI proposal specifies that the diagonal difference signal modulate the second quadraphonic subcarrier and the front minus back signal modulate the third quadraphonic subcarrier. However, during the NQRC tests the signals on these two subcarriers were switched to agree with the preferred configuration. RCA proposed a second pilot subcarrier in phase quadrature at 76 kHz to control receiver mode switching, indicating a 4-4-4 transmission. RCA also suggested that the presence of a signal modulating the 38 kHz quadrature subcarrier could be used to indicate 4-3-4 transmission. QSI suggested that the 19 kHz pilot be used for the frequency/phase reference of all subcarriers including the SCA. Although QSI mentioned that a second pilot "may be optionally inserted" for mode indication, it stated that insertion of a second pilot tone may increase the overall intermodulation and multipath susceptability. Therefore, QSI suggested that the presence of quadraphonic information may be used to automatically switch quadraphonic receiving modes and to indicate quadraphonic presence.

18. As a result of the test performed by the FCC Laboratory Division and the substantial number of comments received in this proceeding, the proposal submitted by CBS for its 4-2-4 SQ system is being given further consideration. This system is transmitted in exactly the same manner as the present stereophonic operation utilizing the standard 19 kHz pilot tone and a single 38 kHz subcarrier in phase with the pilot tone. It should also be noted that CBS has proposed the transmission of a 57 kHz pilot as an identification signal. However, such a pilot would interfere with present SCA transmissions.

19. The FCC prefers switching and mode indication techniques that minimize the use of additional pilot tones. The FCC will consider including an additional pilot tone for mode switching only upon a strong showing that such mode switching cannot be satisfactorily accomplished by use of other means. Informal comments to the FCC indicate that submerged switching tones (more than 60 decibels below 100 percent modulation of the main carrier) in the vicinity of 16 to 17 kHz may be practical to indicate which quadraphonic mode is being transmitted and to provide automatic receiver mode switching. Additional information concerning such techniques is requested.

Alternative Considerations

20. Comments in reply to our *Notice of Inquiry* were received which, for example, concerned development of a quadraphonic system defined as a "universal system." Such a system contains within it characteristics such that 4-2-4, 4-3-4, and 4-4-4 transmissions are compatible. In other words, this is an extension of the compatible 4-3-4/4-4-4 concept, as discussed earlier and for which we have expressed a preference. Further, this concept would allow the listener to receive and decode any of the three modes transmitted.

21. However, such systems are still under development. The original Cooper-UMX System contained elements of such a universal system, but in its comments, Cooper concurs to changes of its system along the lines recommended by the NRDC (National Research and Development Corporation, a Corporation in the United Kingdom). Therefore, the Cooper-UMX system as modified approximates the HJ Universal system. This system (UHJ) advocates inclusion of a 4-2 1/2-4 mode. Because of the alleged flexibility that such a system would allow, the FCC desires that additional consideration be given to these proposals. The FCC desires to know what effect, if any, the adoption of standards permitting a "universal" system will have on the artistic freedom of live and recorded productions. Because the NRDC system is in the early stages of development, it has not been given serious consideration in this proceeding.

22. The FCC is therefore requesting comments addressing these systems and their feasibility. Also of interest in these comments would be the capability of the QSI/RCA 4-3-4/4-4-4 systems and the CBS SQ 4-2-4 system to lend themselves to practical conversion to a universal system in the future should such a system eventually be determined to be desirable. Claims have been made that other systems such as the UHJ system may optimize total sound reproduction and provide a more acceptable form of "surround sound." Any comments on the applications of these techniques in quadraphonic reproduction are requested.

SCA Considerations

23. A number of comments were received from parties involved in the use of SCAs expressing concern that certain quadraphonic systems might preclude or cause degradation of SCA operations. Flexible quadraphonic standards which permit several transmission modes could provide options to the broadcaster in providing SCA service. Present SCA transmission standards would, for example, limit quadraphonic broadcasting to only the 4-3-4 (4-2 1/2-4) or 4-2-4 systems. However, the Commission could consider expanding the limits of the FM baseband from the present 75 kHz to 99 kHz to permit stations using the 4-4-4 mode of transmission to place an SCA at 95 kHz. Such an expanded limit would also allow a station transmitting stereo or the 4-3-4 quadraphonic mode to move its SCA to 76 kHz. It has been suggested that phase-locking the SCA to the fourth or fifth harmonic (76 or 95 kHz) of the 19 kHz pilot subcarrier will reduce cross modulation and intermodulation.

24. QSI proposes SCA standards at 95 kHz similar to those in use today, but RCA suggests that at 95 kHz the SCA subcarrier be limited to a modulating frequency of 2 kHz, an injection level of 5% and a deviation of ±2 kHz. Analysis of the NQRC data for protection ratios indicates that the more permissive standards proposed by QSI warrant further consideration. Additional comments are requested concerning the SCA standards proposed by QSI and the possible need to further modify those standards as proposed by RCA.

Special Temporary Authorizations

25. In the event any station licensee determines that additional significant data can be obtained by over-the-air tests, the Commission will entertain applications for Special Temporary Authorizations. Any authorization will be conditioned with the requirement that the public be informed that the quadraphonic programs are being broadcast on a temporary basis, and that any receiving equipment purchased may have no utility after the testing period. Other conditions may also be imposed. The granting of such temporary authority will be strictly to gather needed information. The FCC will not be swayed in its final decision by claims of expenses encountered in implementing these tests.

Other Matters

26. In addition to the quality of the reception from the various quadraphonic systems, along with other matters already covered, there have been a number of specific questions raised which were not adequately covered in

[7] 4-2½-4 (Special Case of 4-3-4) This is similar to the 4-3-4 system, yet because of some differences from that system, it is being mentioned separately. The four channels of audio are similarly sent over the main channel and two subchannels, however, the second subchannel is reduced in both bandwidth and in its amount of modulation. Because of this reduction, the signal-to-noise ratio of the received signal, compared to usual stereophonic transmissioin, is reduced by only ½ to 1 decibel and the occupied bandwidth required for the transmission is reduced. Reduction of the coverage area of the station is, therefore, less than that of the 4-3-4 system. At the present it appears that only the UHJ universal system, under development in the United Kingdom, is being tested in this category.

[8] Logic enhancement (signal processing) may produce unnatural movements of the sound images which if listened to over an extended period of time may result in a condition termed "listening fatigue."

[9] The diagonal difference signal consists of the difference between the sum of the left front and right back signals and the sum of the left back and the right front signals. It was shown by RCA in its comments that the diagonal difference signal is less significant than the front minus back signals. It was also shown that the effects of crosstalk in the arrangement proposed by GE is more harmful.

V 4 4 / 1 3 J A 1 8 7 9 UMI

the comments to this proceeding. Many of these could possibly be resolved through the use of the STA's mentioned earlier. One such problem involves multipath distortion, especially the reception in a moving automobile. This matter has already been addressed on a theoretical basis but practical testing is needed.

27. The FCC will address quadraphonic modulation monitors at a later time. Also, the FCC is studying the desirability of requiring that quadraphonic generators be typed-accepted. Type-accepting generators may facilitate the substitution or addition of quadraphonic generators to existing transmitters. Further, as was of concern during the FM stereophonic proceeding (Docket No. 13506), here also the FCC requests that the proponents whose systems are included in this *Further Notice* submit information concerning the identity of persons or organizations applying for or holding patents on FM quadraphonic broadcast transmission and reception systems and apparatus. And, in addition, we are requesting information with respect to the arrangements that will be employed for the licensing of patents for competitive distribution and use of such systems and apparatus.

28. Pursuant to applicable procedures set forth in § 1.415 of the FCC's rules, interested persons may file comments on or before April 16, 1979, and reply comments on or before May 16, 1979. All relevant and timely comments and reply comments will be considered by the FCC before further action is taken in this proceeding.

29. In accordance with the provision of § 1.419 of the FCC's rules and regulations, an original and 5 copies of all comments, replies or other documents filed in this proceeding shall be furnished to the FCC. Participants filing the required copies who also desire that each Commissioner receive a personal copy of the comments may file an additional 6 copies. Members of the general public who wish to express their interest by participating informally in this proceeding may do so by submitting one copy of their comments, without regard to form, provided that the Docket Number 21310 is specified in the heading. Such informal participants who desire that responsible members of the staff receive a personal copy and to have an extra copy available for the Commissioners may file an additional 5 copies. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room (Room 239) at its headquarters in Washington, D.C. (1919 M Street, NW.). Further information concerning this proceeding may be obtained from Albert Jarratt, Sr., Broadcast Bureau 202-632-7792.

[SS Docket No. 78-394; FCC 78-877]

RADIO FREQUENCIES

Changing the Method for Assigning Frequencies for Trunked Systems in the 806-821 MHz and 851-866 MHz Bands

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Federal Communications Commission proposes to amend its regulations by adopting a new method for assigning radio frequencies in certain bands for trunked radio systems. It has been alleged that the present method of assigning frequencies for trunked systems may result in significant increase in system costs, in high levels of intermodulation interference, and perhaps more significantly, in severe reduction of system efficiency. The Commission, therefore, has studied alternative frequency assignment methodologies for trunked systems in this frequency band.

DATES: Comments must be received on or before February 7, 1979 and Reply Comments must be received on or before February 22, 1979.

ADDRESS: Federal Communications Commission, 1919 M Street, N.W., Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:

Neal Pike, Safety and Special Radio Services Bureau, (202) 632-6497.

Adopted: December 21, 1978.

Released: January 8, 1979.

By the Commission:

In the Matter of Amendment of § 90.365 (formerly 89.751) of the Commission's Rules to change the method for assigning frequencies for trunked systems in the 806-866 MHz bands.

1. The rules adopted by the Commission in Docket 18262 provide for the assignment of frequencies for trunked and for conventional radio systems in the 806-821 and 851-866 MHz bands sequentially; that is, assign the first assignable frequency followed by the next assignable frequency and proceed to the end of the band in a uniform 25 kHz channeling.[1] The rules also provide for the assignment of a minimum of five and a maximum of twenty contiguous channel pairs for the operation of trunked systems authorized in the Public Safety, Industrial, and Land Transportation Radio Services in the 806-822 and in the 851-866 MHz bands. However, in the development of trunked system designs and in applications for trunked system authorizations now on file, the question has been raised whether this frequency assignment method initially adopted for trunked systems should be changed.

2. It has been alleged that the present method of assigning frequencies for trunked systems may result in significant increase in system costs, in high levels of intermodulation interference, and perhaps more significantly, in severe reduction of system efficiency. The Commission, therefore, has studied alternative frequency assignment methodologies for trunked systems in this frequency band. A number of methods have been considered. Obviously, primary consideration was given to retaining the sequential assignment procedure now prescribed by the rules. However, for the reasons mentioned, we believe that some other method may be more appropriate. Thus, we have also considered the feasibility of a random, rather than sequential, frequency assignment approach. Under the random method, applicants would choose their frequencies from among the channels available in the 800 MHz bands on the basis of the most suitable frequencies for the particular system involved. However, this alternative was rejected basically because it would be difficult to administer; it provides little incentive to applicants to prevent or to reduce intermodulation interference by the use of interference suppressing techniques; and because, in general, it is inconsistent with the overall plan for 800-MHz under which frequencies are assigned by the Commission under a prearranged, standard assignment plan.

3. A second alternative studied is somewhat complex but does retain many of the advantages of sequential assignment procedures, while at the same time permitting system configurations which reduces the intermodulation problems and allows the use of more effective and efficient combining techniques. Under this method, the following assignment procedures would be adopted and included in Section 90.365 (formerly 89.751) of the Rules.

(a) Divide the 200 channels now allocated for trunked systems into ten, twenty-channel blocks with ten channel spacing between frequencies from block to block. Further, arrange each twenty-channel block into five-channel groups with forty channel spacings between successive frequencies in each five-channel group. In addition, arrange these five-channel groups into four blocks with twenty-channel spacings and one, ten-channel spacing between five-channel groups. Offset successive twenty-channel blocks by one channel to form ten, twenty-channel groups. This arrangement is shown in Table 1, below.

[1] Section 90.365(a) (formerly 89.751(a)). See also *Land Mobile Radio Service, Second Report and Order*, Docket 18262, 46 FCC 2d 752 (1974).

TABLE 1.—*Proposed Channelization for Trunked Systems**

5 CHANNEL GROUPS	
1-41-81-121-161 21-61-101-141-181 11-51-91-131-171 31-71-111-151-191	20-Channel Block 1
2-42-82-122-162 22-62-102-142-182 12-52-92-132-172 32-72-112-152-192	20-Channel Block 2
3-43-83-123-163 23-63-103-143-183 13-53-93-133-173 33-73-113-153-193	20-Channel Block 3
4-44-84-124-164 24-64-104-144-184 14-54-94-134-174 34-74-114-154-194	20-Channel Block 4
5-45-85-125-165 25-65-105-145-185 15-55-95-135-175 35-75-115-155-195	20-Channel Block 5
6-46-86-126-166 26-66-106-148-186 16-56-96-136-176 36-76-116-156-196	20-Channel Block 6
7-47-87-127-167 27-67-107-147-187 17-57-97-137-177 37-77-117-157-197	20-Channel Block 7
8-48-88-128-168 28-68-108-148-188 18-58-98-138-178 38-78-118-158-198	20-Channel Block 8
9-49-89-129-169 29-69-109-149-189 19-59-99-139-179 39-79-119-159-199	20-Channel Block 9
10-50-90-130-170 30-70-110-150-190 20-60-100-140-180 40-80-120-160-200	20-Channel Block 10

*In the Chicago Region, the table will be slightly different because some of the frequencies have already been assigned.

(b) Each applicant for twenty-channels will be assigned the next successive complete twenty-channel block.

(c) Five channel applicants will be assigned the next available five-channel group. Ten and fifteen channel applicants will be given the next two or three 5-channel groups provided they are within the same block.

(d) Frequencies for applicants for other than 5, 10, 15, or 20 channels will be selected by taking integral multiples of 5 channels within a twenty-channel group with the remaining channels (less than 5 channels) made up from the next five-channel group provided all channels are in the same twenty-channel group.

4. This assignment method provides significant separation between frequencies in one system. It also insures that intermodulation products generated by a given system will fall within that system, as well as on systems of later applicants and those out-of-band. This should assure that each licensee will have the incentive to take corrective measures to prevent intermodulation interference since his own system would be the first to be adversely affected. At the same time, this approach is a compromise derived from many possible formulations. We realize, therefore, that there could be other similar methodologies that achieve these objectives and we welcome comments with suggestions on any other reasonable methods.

5. Accordingly, Notice is hereby given for proposed rule making in the above-entitled matter. Any interested person may participate in this proceeding by filing comments by February 7, 1979, and reply comments by February 22, 1979. Comments and reply comments may be addressed to the issues and proposals set forth in this Notice and to such other issues as the participants believe are relevant and necessary to the resolution of these matters.

6. Authority for the proposed amendments is contained in Section 4(i) and 303 of the Communications Act of 1934, as amended. In accordance with Section 1.419 of the Commission's Rules, an original and five (5) copies of all comments, reply comments, and other pleadings and submissions shall be furnished to the Commission. All documents will be available for public inspection during regular hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

7. For further information on this document, you may contact Neal Pike, (202) 632-6497.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[49 CFR Part 531]

[Docket No. LVM 77-07; Notice 2]

PASSENGER AUTOMOBILE AVERAGE FUEL ECONOMY STANDARDS

Officine Alfieri Maserati S.p.A.; Proposed Decision To Grant Exemption

AGENCY: National Highway Traffic Safety Administration, Department of Transportation.

ACTION: Proposed decision to grant exemption from average fuel economy standards.

SUMMARY: This notice is being issued in response to a petition by Officine Alfieri Maserati (Maserati) requesting that it be exempted from the generally applicable average fuel economy standard of 18.0 miles per gallon (mpg) for 1978 model year passenger automobiles and that a lower, alternative standard be established for it. This notice proposes that the requested exemption be granted and that an alternative standard of 12.6 mpg be established for Maserati.

DATE: Comment closing date: February 2, 1979.

ADDRESS: Comments on this notice must refer to Docket LVM 77-07 and should be submitted to: Docket Section, National Highway Traffic Safety Administration, Room 5108, 400 Seventh Street, SW., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT:

Douglas Pritchard, Office of Automotive Fuel Economy Standards, National Highway Traffic Safety Administration, Washington, D.C. 20590 (202-755-9384).

SUPPLEMENTARY INFORMATION: Section 502(c) of the Motor Vehicle Information and Cost Savings Act, as amended (the Act), provides that a low volume manufacturer of passenger automobiles may be exempted from the generally applicable average fuel economy standards for passenger automobiles if those standards are more stringent than the maximum feasible average fuel economy for that manufacturer and if the National Highway Traffic Safety Administration (NHTSA) establishes an alternative standard for the manufacturer at its maximum feasible level. Under the Act, a low volume manufacturer is one which manufactures less than 10,000 passenger automobiles worldwide in the model year for which the exemption is sought ("the affected model year") and which manufactured less than 10,000 passenger automobiles worldwide in the second model year before the affected model year. In determining maximum feasible average fuel economy, the agency is required by section 502(e) of the Act to consider:

(1) Technological feasibility;
(2) Economic practicability;
(3) The effect of other Federal motor vehicle standards on fuel economy; and
(4) The need of the Nation to conserve energy.

To implement section 502(c), NHTSA issued Part 525, Exemptions from average fuel economy standards (42 FR 39374; July 28, 1977). Part 525 prescribes the contents of exemption petitions and sets forth the procedures for processing those petitions. After

V 4 4 / 1 3 J A 1 8 7 9 UMI

receipt of a complete petition, the agency publishes a notice of receipt which summarizes the petition and invites comments on it. Subsequently, the agency publishes a proposed decision to grant or deny the petition and provides a further opportunity for comment. Finally, the agency publishes a final decision to grant or deny the petition.

This agency issued a notice announcing the receipt of Maserati's petition for exemption from the generally applicable standards for the 1978-1930 model years (43 FR 46106; October 5, 1978). That notice summarized the Maserati petition and invited public comment on it.

Only one comment on the notice of receipt was submitted. That commenter urged that the petition be granted so that Maserati could remain in the U.S. market and asserted that the world will be a better place because of the continued existence of these automobiles.

Requested alternative standard. Maserati requested that its alternative standard for the 1978 model year be set at a level bwtween 11.3 and 11.5 mpg. This was based on the company's inability to exactly forecast what average fuel economy level the Environmental Protection Agency (EPA) would certify as its 1978 average fuel economy level. Since the time Maserati filed its petition for exemption, EPA has certified that company's 1978 average fuel economy level as 12.6 mpg. Accordingly, NHTSA has used 12.6 mpg as the base figure, and tentatively determined this proposed maximum feasible average fuel economy for Maserati by adding to this base all fuel economy improvements which are deemed feasible for the 1978 model year.

Technological feasibility and economic practicability. In considering whether Maserati could improve its average fuel economy for the 1978 model year, the agency examined the same methods for improving average fuel economy that it examined in establishing average fuel economy standards for model year 1981-1984 passenger automobiles (42 FR 33534; June 30, 1977) and for model year 1980-1981 light trucks (43 FR 11995; March 23, 1978). Those methods were weight reduction, aerodynamic improvements, engine efficiency improvements, engine accessory efficiency improvements, alternative engines, turbochargers, automatic transmission improvements, improved lubricants, reduced rolling resistance, engine displacement or drive ratio reductions, and mix shifts.

NHTSA's examination of these methods in this proceeding was significantly less detailed than in those earlier proceedings since there is no time now available for Maserati to make any changes to its 1978 automobiles. At this point, Maserati could not take any step which would increase its 1978 average fuel economy, so the agency tentatively concludes that running changes to improve the fuel economy of Maserati's 1978 model year automobiles are not technologically feasible and economically practicable.

The effect of other Federal vehicle standards. The other motor vehicle standards are important for the current model year only in determining whether those standards could be complied with in a more fuel efficient manner. Any fuel economy penalty which might be imposed by these standards, in the current model year would be reflected in the fuel economy of the 1978 Maseratis, and would have already been considered in the analysis of technological feasibility and economic practicability.

In determining whether the Federal Standards could be complied with in a more fuel efficient manner, the leadtime available to the manufacturer is a critical factor. In this case, Maserati has no leadtime available, so NHTSA concludes that no more fuel efficient means of compliance with the other Federal motor vehicle standards is available to Maserati for the 1978 model year.

The need of the Nation to conserve energy. The daily extra U.S. demand for petroleum that will result from Maserati achieving an average fuel economy level of 12.6 mpg rather than the generally applicable level of 18.0 mpg is estimated to average 8.4 barrels per day over the life of the 1978 Maseratis. To give perspective on this number, the fuel consumed by passenger automobiles in the United States is about 5 million barrels per day. For all purposes, the United States currently consumes about 17 million barrels of petroleum each day.

Selection of the type of alternative standard. The Act permits NHTSA to establish an alternative average fuel economy standard applicable to exempted manufacturers in one of three ways: (1) A separate standard may be established for each exempted manufacturer; (2) classes, based on design, size, price, or other factors, may be established for the automobiles of exempted manufacturers, with a separate average fuel economy standard applicable to each class; and (3) a single standard may be established for all exempted manufacturers. In the case of each manufacturer exempted thus far, the agency has used the first approach, that of establishing a separate standard for each exempted manufacturer. Since this approach has proven effective, the NHTSA will continue its use and by this notice, proposes a separate standard for Maserati.

Proposed alternative standard. Based on the agency's tentative conclusions stated above, the agency believes that the maximum feasible average fuel economy for Maserati for the 1978 model year is 12.6 mpg. Therefore, the agency proposes to exempt Maserati from the generally applicable standard of 18.0 mpg and to establish an alternative standard of 12.6 mpg for Maserati for the 1978 model year.

In consideration of the foregoing, it is proposed that 49 CFR Part 531 be amended by adding § 531.5(b)(7) reading as follows:

§ 531.5 Fuel economy standards.

* * * * *

(b) The following manufacturers shall comply with the standards indicated below for the specified model years:

* * * * *

(7) Officine Alfieri Maserati, S.p. A.

Model year, 1978.
Average fuel economy standard (miles per gallon), 12.6.

Persons are invited to submit comments on this proposed decision. Comments must be limited so as not to exceed 15 pages in length. Necessary attachments may be appended to these submissions without regard to the 15 page limit. This limitation is intended to encourage commenters to detail their primary arguments in a succinct and concise fashion.

NHTSA typically allows at least 45 days for the public to comment on its proposals. With respect to this proposal, however, the agency has shortened the comment period to 15 days. There are a number of reasons for taking this action. First, it is clear that Maserati cannot improve its average fuel economy for the 1978 model year. Further, the agency has indicated in its final decision on the Rolls-Royce petition for the 1978 model year (in this issue of the FEDERAL REGISTER) that it will not exercise its discretion at this time to establish alternative standards in excess of a manufacturer's maximum feasible average fuel economy. It appears to this agency that, given these circumstances, the preparation of comments on this proposal should be fairly simple. Second, the agency already provided a 30-day period to comment on the petition when the agency published its notice of receipt, and only one comment was received. Third, it is very desirable to have a final decision on the Maserati petition for the 1978 model year published as soon as possible.

All comments received before the close of business on the comment closing date indicated at the beginning of this proposal will be considered, and will be available for public inspection in the docket both before and after the comment closing date. To the extent possible, comments filed after the comment closing date will also be considered. The agency will continue to file relevant material in the docket as it becomes available after the comment closing date, and it is recommended that interested persons continue to examine the docket for new material.

The agency has reviewed the impacts of this proposal and determined that they are minimal and that the proposal is not a significant regulation within the meaning of Executive Order 12044.

The program official and attorney principally responsible for the development of this proposed regulation are Douglas Pritchard and Stephen Kratzke, respectively.

AUTHORITY: Sec. 9, Pub. L. 89-670, 80 Stat. 981 (49 U.S.C. 1657); sec. 301, Pub. L. 94-163, 89 Stat. 901 (15 U.S.C. 2002); delegation of authority at 41 FR 25015, June 22, 1976, and 43 FR 8515, March 2, 1978.

Issued on January 11, 1979.

MICHAEL M. FINKELSTEIN,
Associate Administrator for Rulemaking.

[Ex Parte Nos. 356, 360]

INSPECTION OF RECORDS

Regulations for the Processing of FOIA Requests and Confidentiality of Financial Data (General Policy Statement)

AGENCY: Interstate Commerce Commission.

ACTION: Consolidation of proceedings and change in date for filing comments.

SUMMARY: In a notice in Ex Parte No. 360, published December 8, 1978, at 43 FR 57625, and in a notice published in Ex Parte No. 356, published on December 11, 1978, at 43 FR 58001, the Commission asked for comments on whether proposed regulations or a policy statement on the disclosure of commercial data is warranted. These proceedings involve similar subject matter—the processing and consideration of requests for the disclosure of business data. In a decision served January 9, 1979 the two proceedings were consolidated. Comments in both proceedings are now due January 22, 1979.

DATE: Written comments are due January 22, 1979.

ADDRESSES: An original and 15 copies of any comments should be sent to: Secretary, Interstate Commerce Commission, 12th and Constitution Avenue N.W., Washington, D.C. 20423.

ENVIRONMENTAL PROTECTION AGENCY

[40 CFR Part 52]

[FLR 1040-2]

APPROVAL AND PROMULGATION OF IMPLEMENTATION PLANS

Revision to Texas Air Quality Surveillance Network

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This rule proposes approval of a revision to the Texas Air Quality Surveillance Network. This revision involves the deletion of 4 particulate monitoring sites. These deletions will remove 4 hi-vol samplers from the Texas Air Quality Surveillance Network. The deletion of these hi-vol samplers was evaluated and the remaining network is considered an adequate SIP network.

DATE: Comments on the proposed approval should be submitted before February 20, 1979 in order to be considered by EPA in arriving at a final approval/disapproval decision.

ADDRESSES: Copies of the State's submittal are available for inspection during normal business hours at the following locations:

Environmental Protection Agency,
Region VI,
Air Program Branch,
1201 Elm Street,
Dallas, Texas 75270.

Environmental Protection Agency,
Public Information Reference Unit,
401 "M" Street, S.W., Room 2922,
Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT:

Jerry Stubberfield, Air Program Branch, SIP Section, Region VI, Dallas, Texas 75270, (214) 767-2742.

SUPPLEMENTARY INFORMATION: The proposed revision was submitted by the Texas Air Control Board (TACB) on August 14, 1978. The table below lists the 4 sites to be deleted and a detailed discussion of the revision follows the table.

FOUR PARTICULATE MONITORING SITES

Site No.	City	Sampler
1. 066001	Brownwood	Hi-Vol
2. 261001	Huntsville	Hi-Vol
3. 131027	Dallas	Hi-Vol
4. 158003	Eagle Pass	Hi-Vol

Texas proposes the deletion of site 066001, designated site category Background (BG) by TACB, as this site is not representative of background air quality levels. Site 261001, designated site category Growth Areas (GA) by the TACB, has had an unacceptable data return, with no reasonable remedy projected. The location for the sampler at site 131027 is no longer available and as there are 8 other sites in Dallas designated site category Air Quality Surveillance (AQS) by the TACB, it is proposed this site be deleted. It is proposed site 158003 designated site category Air Quality Surveillance (AQS) by the TACB, be deleted as the location is not longer available.

This notice or proposed rulemaking is issued under the authority of section 110(a) of the Clean Air Act, as amended, 42 U.S.C. 7410-(a).

Dated: January 3, 1979.

EARL N. KARI,
Acting Regional Administrator.

It is proposed to amend Part 52 of Chapter 1, Title 40 of the Code of Federal Regulations as follows:

Subpart SS—Texas

1. In § 52.2270, paragraph (c) is amended by adding a new paragraph (16) as follows:

§ 52.2270 Identification of plan.

* * * * *

(c) * * *

(16) An administrative revision to Section IX, Air Quality Surveillance System, was submitted by the Texas Air Control Board on August 14, 1978. (Non-regulatory)

TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

Proposed Tolerance for the Pesticide Chemical 6-Benzyladenine

AGENCY: Office of Pesticide Programs, Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: This notice proposes that a tolerance be established for residues of the plant growth regulator 6-benzyl adenine on apples. The proposal was submitted by Abbott Laboratories. This amendment would establish a maximum permissible level for residues of 6-benzyladenine on apples.

DATE: Comments must be received on or before February 20, 1979.

ADDRESS COMMENTS TO: Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St. SW, Washington DC 20460.

FOR FURTHER INFORMATION CONTACT:

Mr. Robert Taylor, Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency (202/755-7013).

SUPPLEMENTARY INFORMATION: On March 21, 1977, notice was given (42 FR 15361) that Abbott Laboratories, 14th Street and Sheridan Road, N. Chicago, IL 60064, had filed a petition (PP 7F1912) with the EPA. This petition proposed to amend 40 CFR Part 180 by establishing an exemption from the requirement of a tolerance for residues fo the plant growth regulator 6-benzyladenine (*N*-phenylmethyl)-1*H*-purine-6-amine) in or on the raw agricultural commodity apples. No comments were received in response to this notice of filing. Subsequently, the petitioner amended the petition by proposing the establishment of a tolerance of 0.15 part per million (ppm) for residues of 6-benzyl adenine in or on apples. Because of the potential increase in exposure to humans to 6-benzyladenine residues as a result of the 0.15 ppm tolerance, the tolerance is being proposed at this time to provide an opportunity for public comment.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance included a rat oral acute toxicity study with a lethal dose (LD_{50}) of 1.3 grams (g)/kilogram (kg) of body weight (bw), a 90-day rat feeding study with a no-observable-effect level (NOEL) of less than 500 ppm, a 90-day dog feeding study with an NOEL in excess of 1,500 ppm, a one-generation rat reproduction study with no adverse effects, and metabolism studies. Although the above studies were taken into consideration, the chief considerations in establishing the 0.15 ppm tolerance were: (1) The subject pesticide is naturally found in apples, (2) The natural residues of this pesticide will not be changed by the establishment of the 0.15 ppm tolerance, and (3) since the residue level will not be increased, the risk to the consumer of apples will not be increased. Since there is no discrenible difference in the 6-benzyladenine levels in treated vs. control samples, there will be no problem with respect to secondary residues in eggs, meat, milk, or poultry.

Since the levels of the compound are the same on both sprayed and unsprayed apples, consideration of the acceptable daily intake (ADI) and the maximum permissible intake (MPI) are not relevant to this petition. The metabolism of 6-benzyladenine is adequately understood, and an adequate analytical method (gas-liquid chromatography using electron capture detection) is available for enforcement purposes. No regulatory actions are pending against the continued registration of the pesticide, nor are desirable data lacking to support the 0.15 ppm tolerance, nor are any other considerations involved in establishing the tolerance.

The pesticide is considered useful for the purpose for which a tolerance is sought, and it is concluded that the tolerance of 0.15 ppm on apples established by amending 40 CFR Part 180 will protect the public health. It is proposed, therefore, that the tolerance be established as set forth below.

Any person who has registered or submitted an application for the registration of a pesticide, under the Federal Insecticide, Fungicide, and Rodenticide Act, which contains any of the ingredients listed herein, may request on or before February 20, 1979, that this rulemaking proposal be referred to an advisory committee in accordance with section 408(e) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on the proposed regulation. The comments must bear a notation indicating both the subject and the petition/document control number, "PP 7F1912/P100". All written comments filed in response to this notice of proposed rulemaking will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: January 11, 1979.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

(Sec. 408(e), Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(e)))

It is proposed that Part 180, Subpart C, be amended by adding the new § 180.376 to read as follows:

§ 180.376 6-Benzyladenine; tolerances for residues.

A tolerance is established for residues of the plant growth regulator 6-benzyladenine (*N*-(phenylmethyl)-1*H*-purine-6-amine) in or on the following raw agricultural commodity:

Commodity:	Parts per million
Apples	0.15

[FRL 1041-2]

AIR POLLUTION CONTROL; RECOMMENDATION FOR ALTERNATIVE EMISSION REDUCTION OPTIONS WITHIN STATE IMPLEMENTATION PLANS

AGENCY: Environmental Protection Agency.

ACTION: Proposed policy statement.

SUMMARY: The Policy Statement set forth below encourages states to extend to facilities, subject to State Implementation Plans, the option for use of alternative emission reduction controls, and to be receptive to proposals from facilities seeking to employ the more economically efficient mix of controls allowed by the policy. This alternative emission control approach, commonly referred to as the "bubble" concept, enables states to revise their plans to permit facilities to place a greater burden of control on sources where the marginal cost of control is low, and a lesser burden where cost is high.

COMMENT PERIOD: March 19, 1979.

ADDRESS: Submit comments and direct inquiries to: Barbara Ingle, U.S. Environmental Protection Agency, Office of Planning and Evaluation (PM-220), 401 M Street, S.W., Room 3009, Washington, D.C. 20460, Telephone: (202) 755-2811.

FOR FURTHER INFORMATION CONTACT:

Inquiries may also be directed to: Edward Reich, Office of Enforcement (EN-340), U.S. Environmental Protection Agency, 401 M Street, S.W., Room 1111, Washington, D.C. 20460, Telephone: (202) 755-2550.

Kent Berry, Office of Air Quality Planning and Standards (MD-11), U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711, Telephone: (919) 629-5431.

SUPPLEMENTARY INFORMATION: The text of the proposed Policy Statement is set forth below. We invite comments on all aspects of the issues it raises.

In addition, we are explicitly requesting comments on the resource burden that final adoption of such an approach might place on state air pollution control agencies to evaluate and rule on alternative emission reduction applications. We are aware that these agencies have limited staffs, and that the requirements of the new Clean Air Act are placing heavy burdens on them. Therefore, we would like to hear views on whether the further resource burdens arsing from this policy are sufficiently large as to outweigh the corresponding benefits.

PROPOSED POLICY STATEMENT ON ALTERNATIVE EMISSION REDUCTION OPTIONS WITHIN STATE IMPLEMENTATION PLANS

INTRODUCTION

State Implementation Plans (SIPs) and facility specific compliance schedules are the regulatory vehicles designated by the Clean Air Act to be used for attaining and maintaining air quality standards.

The Clean Air Act requires that states adopt implementation plans to attain and maintain ambient air quality standards as expeditiously as practicable, but no later than by dates set forth in the statute. In developing these plans states adopt regulations setting forth emission limits which, when applied to sources contributing to the ambient air problem, are calculated to assure that standards are attained. In making these decisions states regularly take into account the nature and amount of emissions from each source, the control technology available and the time required for its installation. However, SIPs are not necessarily as economically efficient as possible, nor are regulated companies prompted to seek innovations in control technology.

For this reason, the Environmental Protection Agency is proposing this policy to allow plants to reduce control where costs are high in exchange for an equal increase in control where abatement is less expensive. We strongly recommend that the states inform facilities of the availability of the alternative emission reduction approach, explain the advantages and conditions to use, and be receptive to proposals from facilities seeking to employ the more cost-effective mix of controls this policy allows.

Under the new policy, facilities may obtain financial savings by employing more cost-effective mixes of control techniques than current process-by-process regulations allow, as long as total environmental benefits are not reduced. Properly applied, the alternative approach should promote greater economic efficiency and increased technological innovation.

The possible financial savings of the alternative approach will provide an economic incentive to plant managers to develop innovative control strategies. This is one of our few opportunities to provide positive incentives for innovation, and the new control strategies developed in response to the program could be used as a basis for setting tighter standards in the future.

It is very important to ensure that use of the alternative approach will not obstruct progress toward air quality objectives by permitting degradation of air quality, weakening enforcement, or providing an opportunity for delaying compliance. To avoid these problems, the use of the alternative approach is carefully conditioned as described in detail in the body of this statement. The proposed policy is intended, and should be interpreted, as an alternative means to expeditious compliance with the SIP's regirements, not as a way to avoid or delay compliance with the SIP or any other requirements of the Clean Air Act nor as a way to avoid, delay, or reduce the sanctions flowing from previous or future noncompliance.

In this statement I am urging states to extend this option to eligible sources and be receptive to proposed alternative emission reduction applications whenever they are drawing up or revising SIPs. Under the Clean Air Act, EPA may, in certain cases, draw up or revise SIPs and in those cases we will advise eligible sources and be receptive to such applications too, where it would be appropriate [1] to do so.

The following discussion describes the alternative emission reduction approach and how it will be implemented, and discusses concerns which lead to conditions in its use.

THE ALTERNATIVE EMISSION REDUCTION CONCEPT

A. *What is the Concept?* The primary tests to which EPA subjects State Implementation Plans are: Do its provisions assure the attainment and maintenance of ambient air quality standards as expeditiously as practicable? And, are its provisions enforceable? The Agency has had no stated policy on the degree of which individual sources of air pollution within an industrial site should be controlled, if the pattern of control adopted meets those requirements.

Under the alternative emissions reduction concept, a facility with multiple process-related emission sources, (stacks, vents, ports, etc.) each of which is subject to specific emission limitation requirements under an approved SIP, may propose to meet the total emission control requirements of the SIP for a given pollutant through a different mix of controls than that mandated by the existing or proposed regulations.

Facilities would have the opportunity to come forward with alternative abatement strategies that would place relatively more control on sources with a low marginal cost of control, and less on sources with a high cost, achieving the same amount of emission reduction for less cost.

EPA has already issued guidance approving use of the alternative approach in some cases for control of hydrocarbon emissions. (See July 3, 1978 memorandum from David Hawkins on "Internal Offsets for RACT Categories".) The concept is generally similar to the offset policy, except that, to avoid overburdening the program, the alternative approach outlined here is restricted to use only within a single plant.

B. *How will the alternative emission reduction approach be implemented?* It is the regulatee's responsibility to come forward with the alternative control approach. The regulatee also has the burden to demonstrate satisfactorily that the proposal is equivalent in pollution reduction, enforceability, and environmental impact to existing individual process standards. In this way the resource demands on control agencies are primarily limited to deciding what kind of demonstration is required and reviewing the results.

The implementation will differ depending on whether the alternative approach is being applied to existing SIP requirements or new ones.[2] Where existing SIP requirements are concerned, overall emissions limits and compliance deadlines are known. Once a plant comes forward with a promising alternative proposal that seems to achieve the goals of the current com-

[1] Under the Clean Air Act EPA cannot relax any air pollution control regulations which a State has adopted and, of course, EPA's own use of the alternative emission reduction policy would be subject to that condition too.

[2] Plants which are neither in compliance nor on an EPA approved schedule (including EPA agreement as to penalty issues and other sanctions) nor in compliance with an acceptable court decree are not eligible to use this approach (see discussion in Section 2(a).)

V 4 4 / 1 3 J A 1 8 7 9 UMI

pliance schedule, then the control agency must decide upon a test to verify the equivalency of the proposed trade. If the source is able to present sufficient evidence, and the control agency agrees, then a provision would be drawn up as an addition to the existing SIP requirement, which will continue to be on the books. All proposals must be approved by EPA.

Sources may propose an alternative for existing SIP requirements at any time, though it is clearly to the plant's advantage to do so as early as possible. This is because until equivalency tests have been conducted and the alternative approach is approved the plant will be expected to meet the requirements of the existing schedule on time. In some cases this could mean that a plant would have to make a pollution control investment that would not have to be made under the alternative approach. By presenting alternative proposals as early as possible (preferably during the engineering and design period that is provided at the beginning of most compliance schedules), plants can avoid any such conflicting investments.

When a State is revising a SIP, plants may, in anticipation of overall emissions limit, or in response to limits being proposed, present a counterproposal. The plant would then have to show that its alternative mix of controls would be environmentally equivalent to the process-specific standards. If the demonstration is successful, the counter-proposal can be adopted as part of the SIP.

The S02 regulation for the Stuart Power Plant of the Dayton Power and Light Company in Ohio provides an example of how the alternative emission reduction approach can be used. This SIP regulation contains an alternative set of limitations which the company may use in lieu of a uniform limitation at each of the four boiler stacks at its power generating plant. The plant still must meet specific limitations at its individual stacks, but these limitations are set using an equation that makes the overall emissions under the emission reduction alternative equal to the amount permitted under the uniform emissions limit. This flexibility will allow the power plant to apply the least-cost mix of scrubbing, low-sulfur coal and/or cleaning controls among the facility's four boilers. In this case a demonstration has been made that differences in emissions from each of the stack sources will not result in overall differences in ambient air quality attainment or maintenance.

Another situation where this approach can be applied is to different stages of a plant's production process which emit the same kind of pollutant. For example, painting and degreasing operations of an automobile paint shop are both sources of hydrocarbon emissions. A plant may want to apply greater control to the degreasing process in order to reduce the amount of required control of the painting operations. This will enable the plant to achieve the same overall emissions standard at a lower cost since it can avoid such expensive measures as reformulating paints and installing new spraying equipment.

C. *Conditions on Use of the Alternative Approach.* States that apply the alternative approach must make sure that the basic goal of achieving the air quality standards on time is not compromised, and that SIPs with alternative provisions are just as enforceable and are enforced as promptly as those without them. Certain conditions on use of the alternative approach are necessary for this. EPA will disapprove any alternative SIP that does not satisfy these conditions.

1. *Air Quality Considerations.* a. *Air quality standards must be met.* The overriding command of the statute is to attain and maintain ambient air quality standards. Many States are required to submit revised SIP's (due January 1979) because existing regulations are not sufficient to meet this basic condition of the Act. In those areas where states submit revised plans which are not adequate to achieve the future statutory deadlines contained in the new Clean Air Act, the alternative approach will not be allowed for the pollutant in question. Under these conditions, control of all sources with reasonably available control measures, done without trading one against the other, will be needed to meet the statutory requirements.[3]

In addition, states must also disapprove proposals where controlling one source less and another source more might violate a basic condition of attainment even where source total emissions do not increase. For example, particulates emitted from a stack would have a totally different and more harmful impact upon ambient air quality than road dust stirred up by trucks within the plant site.

EPA will insist on a demonstration that any SIP employing alternative emission reduction approaches will result in attainment and maintenance of standards. The more different the types of sources included under the new approach, the more detailed the demonstration will have to be. In other words, two industrial sources of the same nature (e.g. steam boilers) would have to make a less detailed showing of equality for the alternative approach than would a stack source combined with fugitive emission source.

The treatment of certain low-emitting processes deserves special mention in this regard. Some existing sources may be emitting less than existing SIP regulations would allow, for example, because they are burning a clean fuel like natural gas. In such cases the current SIP often assumes, as part of its demonstration of attainment, that these emissions will not be increased above current levels even though this increase is not explicitly forbidden by a SIP regulation. Whenever this assumption has been made, the difference between such a low-emitting source's actual emissions and the emissions the SIP might theoretically allow may be, in effect, unavailable to offset any proposed higher emissions from another source under this policy since the low-emitting process is already being relied on to attain ambient air quality standards. Therefore, in any case where the difference between actual and allowable emission levels for such low-emitting sources is proposed to be used to offset higher emission levels for other sources, the alternative emission reduction proposal must include an explicit demonstration that the total actual emissions resulting from such an approach will not interfere with the attainment and maintenance of air quality standards.

All demonstrations should be initiated and paid for by the source.

b. *Emissions under the alternative approach must all be quantifiable and trades among them must be even.* A facility that wishes to control one source less in exchange for controlling another source more must demonstrate that the trade will in fact be even—that the lesser emissions at the first source will at least offset the greater emissions at the second and that emissions from the two sources have a similar impact on ambient air quality. This can only be done if the emissions from both sources (and increases and decreases in them) can be acceptably quantified and related to ambient air quality considerations.

This condition applies with particular force where "fugitive" emissions are concerned. These emissions are much more difficult to quantify than stack emissions. EPA will insist on an adequate demonstration that emissions can be quantified and that any trades being made are in fact even and do not result in a worsening of overall ambient air quality.

c. *The pollutants under the alternative proposal must be comparable.* Clearly, trade offs cannot be applied across pollutants, e.g., to trade S02 against hydrocarbons. And even within the categories, those with different health or ambient air impacts cannot be traded against each other. For example:

i. Coke oven particulate emissions and other proven carcinogens should not be traded against paticulate emissions from any other source. (EPA plans to designate coke ovens emissions as hazardous emissions under section 112 of the Clean Air Act and there is no prospect that control requirements for coke ovens could be eased for long by such trades.)

ii. Some hydrocarbon emissions, such as benzene where EPA has made a determination as to their hazardous nature, cannot be traded against other hydrocarbon emissions.

iii. Emissions from open dust sources like roads and storage piles may not be traded against emissions from stacks or against fugitive emissions from industrial processes. The latter contain far more intensive concentrations of fine particulates, which disperse more widely in the air than coarse particulates, stay in the air longer, and penetrate more deeply into the lungs. Moreover, there is sufficient evidence that open dust sources do not contribute significantly to ambient concentrations. For example, violations of the 24 hour particulate standard are frequently observed under conditions of atmospheric inversions. In these situations the accompanying low wind speeds are insufficient to disturb open dust sources.

The problems of determining emission rates from these open dust sources, modeling their impact on ambient air quality in concert with process emission sources, and assuring that all actual and potential ambient air quality standard violations are protected against, are sufficiently complex to effectively preclude acceptable demonstrations of equivalency of controls.

2. *Enforcement Considerations.* The alternative emissions reduction policy, if improperly carried out, could be a source of delay in compliance and an impediment to effective enforcement. It is therefore carefully conditioned, as described below, to avoid creation of any additional grounds for legal challenges to present or revised SIPs, delays in enforcement, or any weakening of the enforceability or sanctions (e.g., penalties) of SIP requirements.

a. *Existing SIPs provisions must not be replaced.* Under the Clean Air Act, potential litigants have sixty days after a SIP is promulgated to challenge it in court. For almost all existing SIPs, that litigation has long since run its course, and the SIP is enforceable and is being enforced. If states rewrite existing SIPs to incorporate the alternative approach, these new provisions might reopen litigation opportunities and lead to long delays before new provisions are enforceable. To make sure there is still an enforceable SIP pending compliance, all alternative emission reduction provisions of the new SIP must be submitted as alternatives or additions to the existing SIP, not as replacements for it. That way the existing SIP can still be enforced even if the new one is not approved or is otherwise held up.

b. *Each emission point must have a specific emission limit and that limit must be tied to enforceable testing techniques.* In order for an alternative emission reduction proposal to be enforceable specific limitations on each source must be imposed. Apart from other difficulties, a SIP without specific limitations would be effectively unenforceable in most cases since continuous monitoring of a number of different sources would be required to make sure the total allocation was not exceeded. Accordingly, EPA will approve alternative proposals only if they contain a specific emissions limit on each regulated source that is inforceable. Of course, each limit must have an enforceable testing requirement associated with it. In general, the new requirements must be at least as enforceable as the existing requirements.

c. *Non-complying sources should not be free to submit alternative emission reduction proposals.* Facilities that have successfully deferred compliance with existing SIP requirements, including compliance schedules, may be tempted to use the possibility that an alternative might be drafted to further delay compliance. They would argue that any steps toward compliance should be further delayed until the possibilities of this new approach have been fully explored.

If this argument were allowed to succeed, it would only continue unlawful pollution and increase the present inequity between sources that have incurred the expense and difficulty of compliance and those that have deferred it so far. Accordingly, applications should be restricted to facilities which are:

i. In compliance;

ii. Not in compliance, but meeting an EPA approved compliance schedule (including EPA agreed to resolution of penalties issues and other sanctions); or

iii. Subject to court decree: (1) in an action in which EPA was a party or which decree EPA has found to be satisfactory, (2) which decree includes schedules for compliance, and (3) which decree recognizes the possibility of SIP revision and allows for timely modification of the decree without delay in the final compliance date.

To be acceptable, any compliance schedule under ii and any decree under iii must set out a timetable to which the source has agreed (i.e., is not appealing or otherwise contesting) to expeditious compliance with the overall emissions limits under the *existing* SIP, and which provides for a resolution of penalties issues and other sanctions.[4]

d. *Existing compliance dates must not be extended.* In some cases, SIP requirements that took effect several years ago have not yet been complied with. States are free if they wish, subject to the conditions in this statement, to apply the alternative approach to these requirements as well. However, that revision should not have the effect of relieving noncomplying sources of the consequences of their noncompliance. Under no circumstances can the proposal be used to delay or defer compliance deadlines. To accomplish this, any such new requirement should have the same SIP compliance deadline as the existing requirement to which it is an alternative. And, if the new requirement allows the use of alternatives which can be adopted more quickly than those included in the existing compliance schedule, then the states should consider establishing earlier compliance dates.

Whichever method of compliance the source elects—the old or the new—penalties will be assessed and collected from the same date, namely the date by which the original requirement should have been met. Until the alternative proposal is approved, all noncompliance penalties under authority of Sections 113 or 120 of the Clean Air Act or equivalent state provisions will be based on the pre-alternative proposal definition of cost. For that part of the period which follows the date of approval of the alternative proposal, the basis for estimating noncompliance penalties should be changed to the cost that would have been incurred by the facility assuming it had complied with the alternative emissions reduction approach on the date of approval.

Sources for which alternative emission reduction proposals are accepted by EPA for consideration, or built into a decree must agree in writing not to seek stays of compliance with the existing requirement or any avoidance of sanctions (e.g., penalties) if the alternative proposal is disapproved, challenged, or otherwise delayed or not made effective.

e. *There will be no delay of existing enforcement actions.* As discussed

[3] In addition, under the Clean Air Act new or modified sources of air pollution are subject to various requirements to apply "best available control technology", to attain a "lowest achievable emission rate", or to meet "new source performance standards". These requirements raise different legal and practical problems from SIPs generally, and in these cases sources may only use substitute provisions as specific EPA guidance or regulations allow.

[4] It is EPA's policy not to approve compliance schedules for existing requirements which extend beyond December 31, 1982.

V 4 4 / 1 3

above, non-complying sources must not be allowed to further delay compliance due to the pendency of possible alternative requirements under the alternative approach. Therefore, states should continue to pursue enforcement actions and seek compliance with the requirements of the existing SIP as expeditiously as practicable.

Where completely new SIP provisions are concerned, of course by definition there are as yet no non-complying sources, and parts (c), (d), and (e) above do not apply.

CONCLUSION

EPA believes that the alternative emission reduction approach, properly applied, will be of significant benefit to the states, to EPA, and to industry. We therefore encourage states to review carefully the policy and inform facilities of the options, explain the advantages and conditions of use and be receptive to industry proposals.

Dated: January 16, 1979.

DEPARTMENT OF AGRICULTURE

Forest Service

DESCHUTES NATIONAL FOREST, DESCHUTES, KLAMATH, JEFFERSON, AND LAKE COUNTIES, OREG.; FOREST PLAN

Intent To Prepare an Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, and the Forest and Rangeland Renewable Resources Planning Act of 1974, as amended by the National Forest Management Act of 1976, the Deschutes National Forest intends to prepare and file an Environmental Statement on a Forest Plan.

The Plan will be prepared according to regulations being promulgated by the Secretary of Agriculture. The regulations will implement section 6 of the National Forest Management Act of 1976.

The Plan will be sensitive to public issues. Public workshops are being conducted and written comments are being solicited to help the Forest identify public issues. The Plan will be coordinated with local, county, State, and other Federal agencies.

The official responsible for preparing the Forest Plan Environmental Statement is Earl E. Nichols, Forest Supervisor, Deschutes National Forest. The official responsible for approving the Forest Plan Environmental Statement is Richard E. Worthington, Regional Forester, Pacific Northwest Region, Portland, Oregon.

The Draft Environmental Statement is scheduled for completion by January 1980. A 3-month review period of the Draft Environmental Statement is planned. The Final Environmental Statement is scheduled for filing by September 1980.

Comments on the Notice of Intent or on the planning project should be sent to Earl E. Nichols, Forest Supervisor, Deschutes National Forest, 211 N. E. Revere, Bend, Oregon 97701.

Dated: January 9, 1979.

R. E. WORTHINGTON,
Regional Forester.

[3410-11-M]

GIFFORD PINCHOT NATIONAL FOREST; DRY CREEK I PRECOMMERCIAL THINNING PROJECT

Determination

An Environmental Assessment Report that discusses the proposed precommercial thinning project by stem injection using Tordon 101 Weed and Brush Killer, on no more than 363 acres of National Forest lands in Section 1, T.5N., R.6E., W.M., and Sections 6, 7, 8, 17 and 20, T.5N., R.7E., W.M., on the Wind River Ranger District in Skamania County, Washington, is available for public review in the Gifford Pinchot National Forest Supervisor's Office.

These projects consist of six (6) thinning areas (units). Two (2) units are north of Dry Creek on National Forest Road Number N614 and four (4) units are between Big Hollow Creek and Dry Creek on National Forest Road Number N558. The Environmental Assessment Report does not indicate that there will be any significant effects on the quality of the human environment. Therefore, it has been determined that an Environmental Statement will not be prepared.

This determination was based upon consideration of the following factors which are discussed in detail in the Environmental Assessment Report: (a) No irreversible or irretrievable effects on the environment; (b) No apparent adverse cumulative or secondary effects; (c) Physical and biological effects limited to the area of plant treatment; (d) No known threatened or endangered species of plants, animals or birds have been recorded or observed in any proposed treatment area.

Some problems exist over the slash hazard that may result. Since slash hazards from chemical thinning are unknown, fuel breaks will be established in the project area. Permanent photoplots will also be established so that the data from this project will be on record. Annual data will be taken for future project use.

No action will be taken prior to thirty (30) days from the date of publication in the FEDERAL REGISTER.

The responsible official is Robert D. Tokarczyk, Forest Supervisor, Gifford Pinchot National Forest, 500 West 12th Street, Vancouver, Washington 98660.

Dated January 8, 1979.

ROBERT D. TOKARCZYK,
Forest Supervisor.

[3410-11-M]

OLYMPIC NATIONAL FOREST, CLALLAM, JEFFERSON, GRAYS HARBOR AND MASON COUNTIES, WASHINGTON; OLYMPIC FOREST PLAN

Intent to Prepare an Environmental Statement

Pursuant to section 102(2)(c) of the National Environmental Policy Act of 1969, the Forest Service, Department of Agriculture will prepare an Environmental Statement on a comprehensive land and resource plan for the Olympic National Forest.

Subunit plans for the Soleduck and Quinault Ranger Districts have been prepared and implemented. The Hoodsport and Quilcene Ranger District and Satsop Block plans are in process. The Hoodsport and Quilcene Districts were incorporated into a single plan entitled Canal Front Plan. Other resource plans covering specific resources have been developed prior to this effort. The Ten Year Timber Management Plan for the Shelton Ranger District is complete.

The Plan will provide management direction for all lands and resources in the Olympic National Forest. Existing plans may be modified.

The Forest Plan will be developed in accordance with direction for land and resource planning developed pursuant to the National Forest Management Act of 1976.

Issues, concerns and opportunities have not yet been identified but are expected to include the effect of timber harvest on long term soil productivity and stability, fisheries and esthetics. Full identification of issues will be accomplished through public involvement.

Richard E. Worthington, Regional Forester, Pacific Northwest Region, is the responsible official and Paul G. Schaufler, Forester, will be the team leader for Environmental Assessment and Statement.

It is anticipated that the environmental assessment will require about three years.

The Draft Environmental Statement is scheduled to be filed in December 1981.

V 44 / 13 JA 18 79 UMI

Comments on the Notice of Intent or the Forest Plan should be sent to Richard D. Boaubein, Forest Supervisor, Olympic National Forest, P.O. Box 2288, Olympia, Washington 98507.

JANUARY 10, 1979.

R. E. WORTHINGTON,
Regional Forester.

GENERAL ADVISORY COMMITTEE

Meeting

Notice is hereby given in accordance with section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. I, (the Act) and paragraph 8b of Office of Management and Budget Circular No. A-63 (Revised March 27, 1974) (the OMB Circular), that a meeting of the General Advisory Committee (GAC) is scheduled to be held on February 8, 1979 from 9 a.m. to 6 p.m. and on February 9, 1979 from 9 a.m. to 6 p.m. at 2201 C Street, NW., Washington, D.C., in Room 7516.

The purpose of the meeting is for the GAC to receive briefings and hold discussions concerning arms control and related issues which will involve national security matters classified in accordance with Executive Order 12065, dated June 28, 1978.

The meeting will be closed to the public in accordance with the determination of January 8, 1979 made by the Director of the U.S. Arms Control and Disarmament Agency pursuant to section 10(d) of the Act and paragraph 8d(2) of the OMB Circular that the meeting will be concerned with matters of the type described in 5 U.S.C. 552(b)(1). This determination was made pursuant to a delegation of authority from the Office of Management and Budget dated June 25, 1973 issued under the authority of Executive Order 11769 dated February 21, 1974.

Dated: January 10, 1979.

SIDNEY D. ANDERSON,
Advisory Committee Management Officer.

[Docket 33091]

FLORIDA SERVICE CASE

Hearing

Notice is hereby given, pursuant to the provisions of the Federal Aviation Act of 1958, as amended, that a hearing will be held on February 21, 1979 at 10:00 a.m. (local time) at the Leon Room, Host International Hotel, Tampa International Airport, Tampa, Florida.

At the conclusion of the hearing schedule in Tampa, the hearing will be recessed until February 28, 1979 at 10:00 a.m. (local time) in the Mobile Municipal Auditorium, 401 Auditorium Drive, Mobile, Alabama.

For details of the issues involved in this proceeding, interested persons are referred to the Prehearing Conference Report, served October 23, 1978, and other documents which are in the docket of this proceeding on file in the Docket Section of the Civil Aeronautics Board.

Dated at Washington, D.C., January 12, 1979.

WILLIAM H. DAPPER,
Administrative Law Judge.

GULF OF MEXICO FISHERY MANAGEMENT COUNCIL, SPINY LOBSTER ADVISORY SUB-PANEL

Public Meeting

AGENCY: National Marine Fisheries Service, NOAA.

SUMMARY: The Gulf of Mexico Fishery Management Council was established by Section 302 of the Fishery Conservation and Management Act of 1976 (Pub. L. 94-265), and the Council has established an Advisory Subpanel on Spiny Lobsters. This panel will meet to review a draft fishery management plan.

DATES: The meeting will convene on Monday, February 12, 1979, at 10:00 a.m., adjourning at 5:00 p.m. and on Tuesday, February 13, 1979, at 8:30 a.m. and adjourning at 3:00 p.m. This meeting is open to the public.

ADDRESS: The meeting will take place in the Tampa Room of the Barclay Best Western Inn, 5303 West Kennedy Boulevard, Tampa, Florida.

FOR FURTHER INFORMATION CONTACT:

Wayne Swingle, Executive Director, Gulf of Mexico Fishery Management Council, Lincoln Center, Suite 881, 5401 West Kennedy Boulevard, Tampa, Florida 33609, Telephone: (813) 228-2815.

Dated: January 15, 1979.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

MARINE MAMMALS

Receipt of Application for General Permit

Notice is hereby given that the following application has been received to take marine mammals incidental to the course of commercial fishing operations within the U.S. Fishery Conservation Zone, as authorized by the Marine Mammal Protection Act of 1972 (16 U.S.C. 1361-1407) and the regulations thereunder.

Sovryhflot, Moscow, U.S.S.R. has applied for a Category 1: "Towed or Dragged Gear" general permit.

The application is available for review in the office of the Assistant Administrator for Fisheries, National Marine Fisheries Service, Washington, D.C. 20235.

Interested parties may submit written views on this application within 30 days of the date of this notice to the Assistant Administrator for Fisheries, National Marine Fisheries Service, Department of Commerce, Washington, D.C. 20235.

Dated: January 12, 1979.

WINFRED H. MEIBOHM,
Acting Executive Director, National Marine Fisheries Service.

National Technical Information Service

GOVERNMENT-OWNED INVENTIONS

Availability for Licensing

The inventions listed below are owned by the U.S. Government and are available for domestic and possibly foreign licensing in accordance with the licensing policies of the agency-sponsors.

Copies of the patents cited are available from the Commissioner of Patents & Trademarks, Washington, D.C. 20231, for $.50 each. Requests for copies of patents must include the patent number.

Copies of the patent applications can be purchased from the National Technical Information Service (NTIS), Springfield, Virginia 22161 for $4.00 ($8.00 outside North American Continent). Requests for copies of patent applications must include the PAT-APPL number. Claims are deleted from patent application copies sold to the public to avoid premature disclosure in the event of an interference before the Patent and Trademark Office. Claims and other technical data will usually be made available to serious prospective licensees by the agency which filed the case.

Requests for licensing information on a particular invention should be directed to the address cited for the agency-sponsor.

DOUGLAS J. CAMPION,
Patent Program Coordinator, National Technical Information Service.

U.S. DEPARTMENT OF THE AIR FORCE, AF/JACP, 1900 Half Street, SW., Washington, D.C. 20324.

Patent Application 925,899; 2-Amino-4-Ethynylphenol; filed July 19, 1978.

Patent Application 925,900; Fluorocarbon Ether Bibenzoxazole Oligomers Containing Reactive Acetylenic Terminal Groups; filed July 19, 1978.

Patent Application 926,059; Microwave Power Level Stabilizing Circuit for Cesium Beam Frequency Standards; filed July 19, 1978.

Patent Application 926,358; Floating Head Laser Mirror Assembly; filed July 20, 1978.

Patent Application 928,329; Mechnical Munition Flight Environment Sensor; filed July 26, 1978.

DELAWARE RIVER BASIN COMMISSION

PUBLIC HEARING

Notice is hereby given that the Delaware River Basin Commission will hold a public hearing on Wednesday, January 24, 1979, commencing at 2:00 p.m. The hearing will be a part of the Commission's regular January business meeting which is open to the public. Both the hearing and the meeting will be held at the Hall of Flags East, Sheraton Hotel, 17th and Kennedy Boulevards, Philadelphia, Pennsylvania. The subject of the hearing will be applications for approval of the following projects as amendments to the Comprehensive Plan pursuant to Article 11 of the Compact and/or as project approvals pursuant to Section 3.8 of the Compact.

1. *North Wales Water Authority (D-77-90 CP).* A well water supply project to augment public water supplies in the Authority's service area in Upper Gwynedd Township, Montgomery County, Pa. Designated as Well No. 23, the new facility is expected to yield 115,000 gallons per day.

2. *North Penn Water Authority (D-78-42 CP).* A well water supply project to augment public water supplies in the Authority's

V 4 4 / 1 3 J A 1 8 7 9 UMI

service area in Skippack Township and adjacent Townships and Boroughs in Montgomery County, Pa. Designated as Well No. 39, the new facility has a capacity of 360,000 gallons per day.

3. *Audubon Water Company (D-78-77 CP).* A well water supply project to augment public water supplies in the Company's service area in Lower Providence Township, Montgomery County, Pa. Designated as Well No. 11, the new facility is expected to yield 20,000 gallons per day bringing the total capacity of the approved system to 78,000 gallons per day.

4. *Bristol Borough Water and Sewer Authority (D-78-83 CP).* A well water supply project to augment public water supplies in the Authority's service area in Bristol Township, Bucks County, Pa. Designated as Well No. 8, the new facility is expected to yield 288,000 gallons per day.

5. *Hatfield Borough (D-78-84 CP).* A well water supply project to augment water supplies in the Borough of Hatfield and adjacent portions of Hatfield Township, Montgomery County, Pa. The facility has a capacity of 180,000 gallons per day.

6. *Town of Smyrna (D-78-96 CP).* Increased water allocation of two existing wells serving the Town of Smyrna, Kent County, Del. Use of the two facilities would be limited to a combined withdrawal of 30 million gallons per month.

7. *New Hanover Township Authority (D-73-26 CP (Rev.)).* A sewage treatment project serving New Hanover and Upper Frederick Townships, Montgomery County, Pa. The treatment facility will provide removal of 85% of BOD from a sewage flow of 275,000 gallons per day. Treated effluent will discharge to eight spray irrigation fields.

8. *Abington Township (D-73-191 CP (Rev.)).* Upgrading of the Township's existing sewage treatment plant in Montgomery County, Pa., serving portions of Abington, Cheltenham, Springfield, Upper Dublin and Upper Moreland Townships, Montgomery County, Pa. The treatment plant will provide for removal of 95% of BOD from a sewage flow of approximately 3.9 million gallons per day. Treated effluent will discharge to Sandy Run, a tributary of Wissahickon Creek.

9. *Moyer Packing Co. (D-77-93).* Expansion of industrial waste treatment facilities at the company's plant in Franconia Township, Montgomery County, Pa. Additional facilities will provide treatment for up to 300,000 gallons per day and removal of approximately 99 percent of BOD and suspended solids. Treated effluent will discharge to Skippack Creek.

10. *Esser Chemical Corp. (D-77-95).* A wastewater treatment and a stream encroachment project at the company's property in Paulsboro, Gloucester County, N.J. Approximately 2.2 million gallons per day of treated wastewater will discharge to the Delaware River. Additional gypsum will be stored in the area adjacent to Mantua Creek.

11. *Brown Company (D-78-72).* Industrial waste treatment project at the Company's Specialty Products Division in Bristol Township, Bucks County, Pa. The applicant proposes to install additional waste treatment facilities to handle an average wastewater flow of 4 million gallons per day. Treated effluent will discharge to the Delaware River.

12. *Barcroft Company (D-78-85).* A well water supply project for use at the company's magnesium production plant in Lewes, Sussex County, Delaware. Four seawater infiltration wells with a combined design capacity of 580,000 gallons per day will be used at the plant.

Documents relating to the above-listed projects may be examined at the Commission's offices. Persons wishing to testify at this hearing are requested to register with the Secretary prior to the date of the hearing.

W. BRINTON WHITALL,
Secretary.

JANUARY 10, 1978.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

NORTHERN STATES POWER CO. 500 KV INTERNATIONAL TRANSMISSION LINE

Availability of Final Environmental Impact Statement

AGENCY: Department of Energy, Economic Regulatory Administration.

ACTION: Notice of availability of final environmental impact statement.

SUMMARY: The Department of Energy gives notice of the availability of the final environmental impact statement (EIS) for the Northern States Power Company 500kV International Transmission Line, DOE/EIS-0032.

FOR FURTHER INFORMATION CONTACT:

James M. Brown, Jr., System Reliability and Emergency Response Branch, Department of Energy, Room 4070, Vanguard Building, 2000 M Street, N.W., Washington, D.C. 20461, (202) 634-5620.

Robert J. Stern, Office of Environment, Department of Energy, Room 7119, Federal Building, 12th and Pennsylvania Avenue, N.W., Washington, D.C. 20461, (202) 633-8755.

Lise Courtney Howe, Office of General Counsel, Department of Energy, Room 5116, Federal Building, 12th & Pennsylvania Avenue, N.W., Washington, D.C. 20461, (202) 633-8277 or (202) 633-9380.

SUPPLEMENTARY INFORMATION: The final environmental impact statement was prepared pursuant to the requirements of the National Environmental Policy Act of 1969 to analyze the environmental impacts of a 500kV transmission line extending to the U.S. Canadian border. This facility would be constructed and operated by the Northern States Power Company and the Minnesota Power and Light Company to exchange electric energy with the Manitoba Hydor-Electric Board. The construction of this facility will require the issuance of a Presidential Permit by DOE.

Copies of the draft EIS were distributed for review and comment to appropriate Federal, Minnesota and local agencies, and other organizations and individuals who were known to be interested in the project. All comments received were incorporated into the final EIS.

Copies of the final EIS have also been distributed for review and comment to appropriate Federal, Minnesota and local agencies, and other organizations and individuals who commented on the draft EIS.

Copies of the statement are also available for public inspection between the hours of 8 a.m. and 4:30 p.m., Monday through Friday, except holidays, at the following DOE public reading rooms:

FOI Reading Room GA-152, Department of Energy, 1000 Independence Avenue, SW., Washington, D.C. 20545.
Freedom of Information Reading Room, Department of Energy, Room 2107—Federal Building 12th & Pennsylvania Avenue, N.W., Washington, D.C. 20461.
Albuquerque Operations Office, National Atomic Museum, Kirtland Air Force Base, Albuquerque, New Mexico 87115.
Chicago Operations Office, 9800 South Cass Avenue, Argonne, Illinois 60439.
Chicago Operations Office, 175 West Jackson Boulevard, Chicago, Illinois 60604.
Idaho Operations Office, 550 Second Street, Idaho Falls, Idaho 83401.
Nevada Operations Office, 2753 South Highland Drive, Las Vegas, Nevada 89109.
Oak Ridge Operations Office, Federal Building, Oak Ridge, Tennessee 37830.
Richland Operation Office, Federal Building, Richland, Washington 99352.
San Francisco Operations Office, 1333 Broad, Oakland, California 94612.
Savannah River Operations Office, Savannah River Plant, Aiken, South Carolina 29801.

Individual copies of the final Environmental Impact Statement are available upon request at the System Reliability and Emergency Response Branch, U.S. Department of Energy, Room 4070—Vanguard Building, 2000 M Street, N.W., Washington, D.C. 20461.

Issued in Washington, D.C., January 15, 1979.

RUTH C. CLUSEN,
Assistant Secretary for Environment.

[6450-01-M]

Federal Energy Regulatory Commission

[Docket No. CP79-126]

NORTHERN NATURAL GAS CO.

Application

JANUARY 11, 1979.

Take notice that on December 15, 1978, Northern Natural Gas Company (Applicant), 2223 Dodge Street, Omaha, Nebraska 68102, filed an application in Docket No. CP79-126 pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing Applicant to construct and operate certain small volume sales meters, and to sell and deliver natural gas, as set forth in the appendix hereto, all as more fully set forth in the application on file with the Commission and open to public inspection.

Applicant states that it has received gas service requests from 63 right-of-way grantors who meet the requirements for such service set forth in FPC Opinion No. 773, issued August 13, 1976. Accordingly, Applicant seeks authority to install and operate the necessary small volume sales meters to sell gas to these customers in Minnesota, South Dakota, Iowa, Nebraska, Kansas and Texas.

Further, there are stated to be two right-of-way customers in Oklahoma who seek gas service. Applicant requests authority to increase its annual delivery volumes of natural gas under Rate Schedule X-46 of Applicant's FPC Gas Tariff, Volume No. 2, to Southern Union Gas Company from 726,509 Mcf to 726,809 Mcf to meet these needs.

Any person desiring to be heard or to make any protest with reference to said application should on or before February 2, 1979, file with the Federal Energy Regulatory Commission, Washington, D.C. 20426, a petition to intervene or a protest in accordance with the requirements of the Commission's Rules of Practice and Procedure (18 CFR 1.8 or 1.10) and the Regulations under the Natural Gas Act (18 CFR 157.10). All protests filed with the Commission will be considered by it in determining the appropriate action to be taken but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party to a proceeding or to participate as a party in any hearing therein must file a petition to intervene in accordance with the Commission's Rules.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Energy Regulatory Commission by Sections 7 and 15 of the Natural Gas Act and the Commission's Rules of Practice and Procedure, a hearing will be held without further notice before the Commission or its designee on this application if no petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

KENNETH F. PLUMB,
Secretary.

Office of Hearings and Appeals

ISSUANCE OF PROPOSED DECISIONS AND ORDERS

December 18 through December 22, 1978

Notice is hereby given that during the period December 18 through December 22, 1978, the Proposed Decisions and Orders which are summarized below were issued by the Office of Hearings and Appeals of the Department of Energy with regard to Applications for Exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR Part 205, were issued in proposed form on September 14, 1977 (42 FR 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of a Proposed Decision and Order in final form may file a written Notice of Objection within ten days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this Notice (January 18, 1979), or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form. Any aggrieved party that wishes to contest any finding of conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of these Proposed Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street, NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except federal holidays.

JANUARY 12, 1979.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

PROPOSED DECISIONS AND ORDERS

Burk Royalty Company, Washington, D.C., DEE-1010, crude oil

The Burk Royalty Co. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. By permitting the firm to sell the crude oil produced for the benefit of the working interest owners at the Garden Island properties at upper tier ceiling prices, the exception request, if granted, would enable the firm to invest in new equipment for the properties. On December 21, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

Chevron USA, Inc., San Francisco, California, DEE-1968, crude oil

Chevron USA, Inc. (Chevron) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Chevron to sell a portion of the crude oil produced for the working interest owners at the Murphy Non-Unit at upper tier ceiling prices. On December 21, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

City of Long Beach, California, Long Beach, California, DXE-2023, crude oil

The City of Long Beach, California filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of exception relief previously granted and would permit the working interest owners to continue selling a portion of the crude oil which is produced at the Fault Block II Unit of the Wilmington Field located in Los Angeles County, California, at upper tier ceiling prices. *City of Long Beach, California*, 2 DOE Par. 81,008 (1978). On December 18, 1978, the DOE issued a Proposed Decision and Order to the City of Long Beach, California, which would grant an extension of exception relief permitting the City to sell at upper tier ceiling prices 53.78 percent of the crude oil produced for the benefit of the working interest owners at the Fault Block II Unit during the period January 1, 1979 through June 30, 1979.

Consumers Power Company, Jackson, Michigan, DEE-0978, residual fuel oil

Comsumers Power Company filed an Application for Exception in which it requested additional entitlement benefits for each barrel of residual fuel oil which it has imported into the State of Michigan since January 1, 1977. On December 21, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be denied.

Chester F. Dolley and Atlantic Oil Company, Los Angeles, California, DEE-1020 and DEE-1032, crude oil

Chester F. Dolley and the Atlantic Oil Company filed Applications for Exception from § 212.54 of the Mandatory Petroleum Price Regulations. The exception requests, if granted, would have the effect of relieving them of any obligation to refund revenues that they received by charging prices in excess of the maximum levels permitted by §§ 212.72 and 212.73. On December 19, 1978, the DOE issued a Proposed Decision and Order which determined that the exception requests should be denied.

Gary Operating Company, Englewood, Colorado, DEE-1975, crude oil

Gary Operating Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, in which the firm requested that it be permitted to sell certain of the crude oil produced from the Ranch Creek Muddy Sand Unit, located in Powder River County, Montana, at upper tier ceiling price levels. On December 21, 1978, the DOE issued a Proposed Decision and Order which determined that the Gary exception request be denied.

Gulf Oil Corporation, Tulsa, Oklahoma, DXE-2024, crude oil

Gulf Oil Corporation filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Gulf to sell at upper tier ceiling prices the crude oil which it produces from the Northwest Graylin "D" Sand Unit. On December 18, 1978, the DOE issued a Proposed Decision and Order which determined that Gulf should be permitted to sell at upper tier ceiling prices 57.38 percent of the crude oil produced from the Northwest Graylin "D" Sand Unit for the benefit of the working interest owners during the period January 1, 1979 through June 30, 1979.

H.&M. Oil Company, Lyman, Wyoming, DEE-0893, crude oil

The H.&M. Oil Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart L. The exception request, if granted, would permit H.&M. to sell the crude oil which it obtains from processing contaminated or waste crude oil without regard to the restrictions imposed by the Mandatory Petroleum Price Regulations. On December 18, 1978, the DOE issued a Proposed Decision and Order in which it determined that the exception request should be granted in part.

Henry Petroleum Corporation, Martin County, Texas, DEE-1400, crude oil

The Henry Petroleum Corporation filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the working interest owners to sell the crude oil produced from the Epley B lease at market prices. The request would also allow Henry to treat the Epley B lease as a new crude oil producing property with a zero base production control level effective February 1, 1975. On December 19, 1978 the DOE issued a Proposed Decision and Order denying the Henry exception request.

Pacific Resources, Inc., Honolulu, Hawaii, DEE-1874, residual fuel oil

Pacific Resources, Inc. filed an Application for Exception from the provisions of 10 CFR 211.67. The PRI exception request, if granted, would result in the issuance of entitlements to PRI for each barrel of residual fuel oil produced by the firm which is transported and sold into the East Coast market. On December 18, 1978, the DOE issued a Proposed Decision and order which determined that the exception request be denied.

Perrault Production Company, Tulsa, Oklahoma, DXE-1943, crude oil

On October 4, 1978, the Perrault Producing Company (Perrault) filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit Perrault to sell at exempt prices all of the crude oil produced and sold for the benefit of the working interest owners from the Varnum and Cudjo Leases located in Seminole County, Wyoming. On December 21, 1978, the Department of Energy issued a Proposed Decision and Order which granted in part Perrault's request.

Rickelson Oil and Gas Company, Tulsa, Oklahoma, DEE-0363, crude oil

The Rickelson Oil and Gas Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to sell at upper tier ceiling price levels the crude oil produced from the Chapman "A" Lease located in Hughes County, Oklahoma. On December 18, 1978, the DOE issued a Proposed Decision and Order in which it determined that the exception request be granted.

Southwestern Refining Company, Inc., Washington, D.C., DEE-0483, crude oil

Southwestern Refining Company, Inc. filed an Application for Exception from the provisions of 10 CFR 211.67. The exception request, if granted, would relieve Southwestern of its obligation to purchase entitlements with respect to the crude oil that it refines. On December 19, 1978, the DOE issued a Proposed Decision and Order which determined that the firm's request should be denied in the form submitted. However, the DOE also determined that the obligations of the Mobil Oil Corporation and the Mountain Fuel Supply Company to allocate crude oil supplies to Southwestern's supplier, Johnson Oil Company, should be terminated, and that Mobil and Mountain should supply the same quantities of crude oil directly to Southwestern.

Texaco, Inc., Denver, Colorado, DEE-1394, crude oil

Texaco, Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, in which the firm requested that it be permitted to sell certain of the crude oil produced from the Government Graves Lease, located in Campbell County, Wyoming, at upper tier ceiling price levels. On December 21, 1978, the DOE issued a Proposed Decision and Order which determined that the Texaco exception request be granted.

Texaco, Inc., Los Angeles, California, DEE-1777, crude oil

Texaco, Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D which, if granted, would permit Texaco to sell at market prices the crude oil which it produces for the benefit of the working interest owners from the TS-1 and TS-3 wells which operate from an offshore drilling platform known as Platform A located in Cook Inlet, Alaska. On December 21, 1978, the DOE issued a Proposed Decision and Order tentatively granting Texaco permission to sell 74.41 percent at market prices and 25.59 percent at upper tier ceiling prices for twelve months following completion of the investment plan described in Texaco's application, and 100 percent at market prices in the subsequent three month period.

Union Oil Company of California, Los Angeles, California, DXE-2016, crude oil

Union Oil Company of California filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would permit the firm to continue to sell a portion of the crude oil produced from the West Richfield Chapman Zone Unit at upper tier ceiling price levels. On December 18, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be granted.

Young Coal Company, Waterloo, Iowa, DEE-0664, fuel oil

Young Coal Company filed an Application for Exception from the provisions of 10 CFR 212.93. The exception request, if granted, would permit Young to increase retroactively its maximum permissible selling prices for No. 1, No. 2 and No. 5 fuel oils and relieve the firm of the obligation to refund overcharges under the terms of a Remedial Order issued by DOE Region VII. On December 19, 1978, the DOE issued a Proposed Decision and Order which determined that the exception request be denied.

ISSUANCE OF PROPOSED DECISION AND ORDER

December 26 through December 29, 1978

Notice is hereby given that during the period December 26 through December 29, 1978, the Proposed Decision and Order which is summarized below was issued by the Office of Hearings and Appeals of the Department of Energy with regard to an Application for Exception which had been filed with that Office.

Amendments to the DOE's procedural regulations, 10 CFR, Part 205, were issued in proposed form on September 14, 1977 (42 F.R. 47210 (September 20, 1977)), and are currently being implemented on an interim basis. Under the new procedures any person who will be aggrieved by the issuance of a Proposed Decision and Order in final form may file a written Notice of Objection within ten days of service. For purposes of the new procedures, the date of service of notice shall be deemed to be the date of publication of this Notice (January 17, 1979) or the date of receipt by an aggrieved person of actual notice, whichever occurs first. The new procedures also specify that if a Notice of Objection is not received from any aggrieved party within the time period specified in the regulations, the party will be deemed to consent to the issuance of the Proposed Decision and Order in final form.

Any aggrieved party that wishes to contest any finding or conclusion contained in a Proposed Decision and Order must also file a detailed Statement of Objections within 30 days of the date of service of the Proposed Decision and Order. In that Statement of Objections an aggrieved party must specify each issue of fact or law contained in the Proposed Decision and Order which it intends to contest in any further proceeding involving the exception matter.

Copies of the full text of this Proposed Decision and Order is available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street, NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except federal holidays.

MELVIN GOLDSTEIN,
Director,
Office of Hearings and Appeals.

JANUARY 12, 1979.

PROPOSED DECISION AND ORDER

Mobile Oil Corporation, New York, New York, DXE-2007, crude oil

Mobile Oil Corporation filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D which, if granted, would permit Mobil to continue selling at upper tier prices certain of the crude oil which it produces for the benefit of the working interest owners of the H&J 495-D Lease located in North Russell Devonian Field, Gaines County, Texas. On December 28, 1978, the DOE issued a Proposed Decision and Order tentatively granting Mobil permission to sell 64.29 percent of the working interest share of production at upper tier ceiling prices for the period from January 1, 1979 until June 30, 1979.

[FR Doc. 79-1762 Filed 1-17-79; 8:45 a.m.]

[6450-01-M]

ISSUANCE OF DECISIONS AND ORDERS

Week of October 10 through October 13, 1978

Notice is hereby given that during the week of October 10 through October 13, 1978, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Hearings and Appeals and the basis for the dismissal.

APPEALS

Harold Fruchtbaum, New York, New York, DFA-0211, Freedom of Information

Harold Fruchtbaum appealed from a partial denial of a request for information which he had filed under the Freedom of Information Act (the Act). In his request for information, Fruchtbaum had sought

V 4 4 / 1 3 J A 1 8 7 9 UMI

copies of certain reports written by Dr. Klaus Fuchs during the time Fuchs was at the Los Alamos Scientific Laboratory. The DOE initially released copies of four of the requested documents but withheld several documents on the grounds that they were exempt from disclosure under the provisions of Exemption 1 (national security information) and Exemption 3 (information specifically exempted from disclosure by another statute) of the Act. In considering Fruchtbaum's Appeal, the DOE found that the documents withheld from Fruchtbaum contained "Restricted Data" as that term is defined in the Atomic Energy Act. Since the unauthorized release of "Restricted Data" is prohibited by the Atomic Energy Act, the DOE determined that the documents were properly withheld under Exemption 3. The DOE further determined that, in as much as the documents at issue contained information relating to the design of nuclear weapons, their release could adversely affect National security. The DOE therefore concluded that the documents were also properly withheld under Exemption 1. Accordingly, Fruchtbaum's Appeal was denied.

Home Gas Service, Inc., Swanton, Ohio, FRA-1466, Propane

Home Gas Service, Inc. Filed an Appeal of a Remedial Order which was issued to the firm by the FEA Region V Office on August 22, 1977. In the Remedial Order, the Regional Office found the Home gas had sold propane at prices which exceeded the maximum permissible price levels calculated pursuant to 10 CFR 212.93. In its Appeal, Home Gas did not challenge any of the factual or legal findings contained in the Remedial Order. Instead, Home Gas claimed that it was entitled to exception relief because the application of Section 212.93 to its operations would result in an inequity and a hardship and because enforcement of the Remedial Order could cause the firm to terminate its business operations. In support of its claim for exception relief, Home Gas contended that its markup on sales of propane on May 15, 1973 was abnormally low because of a seasonal price discount offered by the firm on that date. The DOE rejected this argument, noting that the firm would have earned substantial profits throughout the entire period covered by the Regional Office's audit if it had charged lawful prices. Consequently, the DOE determined that Home Gas had failed to make a *prima facie* showing that exception relief should be granted in this case. However, the DOE also concluded that if Home Gas were required to refund the overcharges in the manner set forth in the Remedial Order, the firm's profitability in future periods would be reduced to unreasonably low levels. Accordingly, the DOE ordered the Region V Office to issue a revised Remedial Order to Home Gas which will not require the firm to implement refunds in any single year which exceed the average annual amount of overcharges obtained during the FEA audit period. In all other respects, the Home Gas Appeal was denied.

Karchmer Pipe & Supply Company, Centralia, Illinois, FXA-1365, crude oil

Karchmer Pipe & Supply Company filed an Appeal from a Decision and Order which was issued to the firm on February 22, 1977. *Karchmer Pipe & Supply Co.*, 5 FEA Par. 83,075 (1977). In the February 22 Decision and Order, the FEA denied Karchmer's request for retroactive exception relief and granted its request for prospective exception relief from the provisions of 10 CFR, Part 212, Subpart D. The Appeal, if granted would have permitted Karchmer to retain revenues which it apparently received as a result of charging unlawfully high prices for the crude oil produced from its Patoka Unit No. 1 in Marion County, Illinois. The Appeal would also have extended prospective exception relief to the other working interest owner on the Unit. In considering the firm's Appeal, the DOE found that the firm had merely reiterated the contentions which it has raised in the exception proceeding regarding retroactive relief and had failed to demonstrate that the DOE's analysis of any of these contentions was erroneous in fact or law or was arbitrary or capricious. The DOE therefore denied Karchmer's Appeal of the February 22 Order with respect to retroactive exception relief. The DOE also found that Karchmer's request that prospective exception relief be extended to the other working interest owner had not beeen raised in Karchmer's initial exception application. The DOE therefore concluded that this aspect of Karchmer's subimission would be considered as an exception request under the provisions of Part 205, Subpart D and that a separate order would be issued with respect to that matter.

Martin Oil Company, Wichita, Kansas, DRA-0118, crude oil

The Martin Oil Company filed an Appeal from a Remedial Order which the Acting Director of Enforcement of DOE Region VII issued to the firm on January 5, 1978. In the Remedial Order, the DOE Regional Office found that Martin had improperly classified its Spier Lease and "Montford Property" as stripper well properties, and had, as a result, sold crude oil produced from the properties at prices which were in excess of those permitted by the Mandatory Petroleum Price Regulations. In considering the Martin Appeal, the DOE determined that the Remedial Order was correct in finding that a series of post-1972 subdivisions of the premises of which the Spier Lease was originally a part did not establish a new "property" for purposes of measuring the lease's base production control level. With respect to the "Montford Property" Martin argued that the Regional Office's determination that interest be paid on the overcharges was arbitrary and capricious. In support of this position, Martin contended that in a number of consent orders the DOE had compromised or waived the payment of interest and that by voluntarily refunding the full amount of its overcharges Martin had placed itself in a situation similar to that of a firm that agreed to a consent order. The DOE found, however, that Martin's refund of overcharges had not made formal administrative proceedings unnecessary and that the firm had not waived its right to judicial review. The DOE further found that the firm had not specified any unusual circumstances which should have led the Regional Office to exercise its discretion to waive the payment of interest in this case. Consequently, the DOE determined that Martin had failed to demonstrate that any of the circumstances which might justify the waiver or compromise, in a consent order, of the generally imposed requirement that interest be paid on overcharges existed in the present case. The DOE therefore concluded that the January 5 Remedial Order was neither erroneous in fact or law nor arbitrary and capricious. Accordingly, the Martin Appeal was denied.

State of Illinois, Chicago, Illinois, DFA-0210, Freedom of Information

The State of Illinois appealed from a denial by the Acting Director of the Office of Nuclear Waste Management of a Request for Information which the State submitted under the Freedom of Information Act (the Act). In its Appeal, the State requested that the DOE order the release of two documents withheld on the grounds that they are intra-agency memoranda which are exempt from mandatory public disclosure under the provisions of 5 U.S.C. 552(b)(5). In considering the Appeal, the DOE found that the documents which were withheld from the State generally analyze and make recommendations concerning alternative methods of implementing the DOE's spent nuclear fuel policy. The DOE therefore determined that the material which was withheld is precisely the type of information which Exemption 5 of the Act was designed to protect from disclosure and that the release of the material would not be in the public interest. The States's Appeal was therefore denied.

Sun Company, Inc., Philadelphia, Pennsylvania, FXA-1282, motor gasloine

Sun Company, Inc. filed and Appeal from a Decision and Order which the Federal Energy Administration issued to Amtel, Inc. on February 25, 1977. *Amtel, Inc.*, 5 FEA Par. 83,091 (1977). The prior proceeding involved the allocation and pricing of the motor gasoline that Sun supplied to South Central Oil Company, a marketing subsidiary which Amtel acquired from Sun on March 29, 1974. In the February 25 Decision, the FEA granted Amtel an exception which required Sun to establish a new class of purchaser for sales of motor gasoline to Amtel's South Central subsidiary and also directed Sun to determine its prices to that class of purchaser under 10 CFR 212.111(b) (1) (the new item rule). In its Appeal, Sun first claimed that the FEA's determination exceeded the agency's authority and denied Sun due process of law. In rejecting those contentions, the DOE found that, contrary to Sun's assertions: (i) The exceptions process was the appropriate forum for consideration of Amtel's claims of serious hardship and gross inequity; (ii) the February 25 Decision did not constitute an improper remedial order proceeding, because the pricing methodology prescribed by the FEA in that determination was not based on any finding that Sun had violated the price regulation; (iii) the prior determination did not constitute a procedurally invalid rulemaking proceeding in which the agency failed to provide Sun with adequate notice and opportunity to comment; and (iv) Sun was afforded an adequate opportunity to respond to the evidence on which the FEA relied in granting exception relief to Amtel

Sun next contended that Amtel had failed to establish that it qualified for exception relief. The DOE also rejected this claim, finding that: (i) Amtel was not stopped from seeking exception relief with respect to South Central's financial operations merely because Sun had notified Amtel of South Central's financial position prior to Amtel's acquisition of South Central; (ii) the February 25 Order did not constitute an impermissible government impairment of the contract between Sun and Amtel for the sale of South Central; and (iii) Sun's contention that Amtel had failed to demonstrate the existence of a serious hardship was irrelevant because the exception relief granted to Amtel was based upon gross inequity rather than serious hardship.

With respect to Sun's third contention, however, the DOE agreed with Sun that the exception relief previously granted to Amtel should be revised. The DOE found that the requirement in the February 25, Order that Sun refer to the new item rule in establishing its prices to Amtel had not accomplished the objective of lowering Sun's prices to Amtel and in turn lowering Amtel's prices to South Central's historical wholesale purchasers. The DOE concluded that in order to accomplish that objective Sun should continue to treat Amtel/South Central as a separate class of purchaser, but that Sun should adopt as its imputed May 15, 1973 selling price to Amtel the lowest price that Sun had charged to members or its wholesale unbranded class of purchaser on that date. The DOE also determined that this revised exception relief should be limited to the volume of motor gasoline which Sun sold to Amtel for resale to South Central's customers at the wholesale level. Finally, the DOE noted that Whitco, Inc., an historical purchaser of gasoline from South Central, is currently subject to exception relief which permits it to purchase gasoline directly from Sun rather than through Amtel/South Central. The DOE indicated that the supplier/purchaser relationships among Sun, Amtel and Whitco would be reevaluated in a future determination to consider whether Whitco should be required once again to purchase motor gasoline directly from Amtel rather than Sun. On the basis of these considerations the Sun Appeal was granted in part and denied in part.

T-C Oil Company, San Antonio, Texas, DRA-0140, crude oil

The T-C Oil Company filed an Appeal from a Remedial Order which was issued to the firm by the Acting Director of Enforcement of DOE Region VI on January 6, 1978. In the Remedial Order, the Regional Office determined that T-C Oil had sold crude oil produced from its "L" and "A" leases at unlawful price levels. In its Appeal, T-C Oil contended that the aggregation of the right to produce condensate from the "L" lease with the right to produce condensate from two other leases in the same field, all of which was processed in T-C Oil's mechanical separator facility, created a new "property" which was separate from the three leases. T-C Oil also argued that the light and heavy crude oil producing reserviors on the "L" lease constitute two separate "properties." The firm also asserted that it was entitled to offset the undercharges which occurred on its "LP" and "D" leases against the overcharges found to have occurred on the "L" lease. Finally, T-C Oil asserted that the DOE was barred by the applicable Texas statute of limitations from issuing any orders to T-C Oil to refund overcharges for the audit period. In considering the Appeal, the DOE found that each of the three leases from which casinghead gas was recovered and processed into condensate at the mechanical separator facility constitutes a single right to produce and therefore a single "property" under the Mandatory Petroleum Price Regulations. The DOE held that T-C Oil's construction of a mechnical separator facility and its use of that facility to process the casinghead gas recovered from each of the leases did not create a new right to produce and therefore did not create a new property separate from the three leases. In regard to T-C Oil's separate reservior argument, the DOE held that before September 1, 1976 the existence of two or more separate reserviors did not create two or more separate "properties," notwithstanding any alleged separate development, production, and pricing of production from the reserviors. The DOE also determined that while under appropriate circumstances a Regional Office could exercise its discretion to permit a firm to offset undercharges and overcharges among two or more leases, the record in the present case did not support the granting of an offset. Finally, the DOE determined that the Texas statutes of limitations was not applicable to the present enforcement action against T-C Oil. Accordingly, the T-C Oil Appeal was denied.

Trends Publishing, Inc., Washington, D.C., DFA-0220, Freedom of Information

Trends Publishing, Inc. filed an Appeal of an order issued by the Director of Safeguards and Security of Defense Programs (OSSDP) denying a request for information that Trends submitted under the Freedom of Information Act. The DOE noted that the Trends Appeal had not been filed within 60 days of receipt of the OSSDP order as required by § 709.10(b) of the regulations of the Energy Research and Development Administration (ERDA), which governed the Appeal. The DOE also noted that Trends had failed to show good cause for its failure to file its Appeal in a timely manner. The Trends Appeal was therefore dismissed. However, in view of the fact that the Trends Appeal was one of the first requests filed under ERDA regulations to be reviewed by the Office of Hearings and Appeals, Trends was given leave to file an amended appeal that satisfies the provisions of § 709.10.

Vickers Dividend Oil Company, Wichita, Kansas, DEA-0082, motor gasoline

The Vickers Dividend Oil Company filed an Appeal from an Assignment Order which was issued to it by the Acting Regional Representative of DOE Region VIII on November 8, 1977. The Appeal, if granted, would result in the assignment of a supplier to furnish a base period volume of 2,700,000 gallons of motor gasoline for a retail outlet which Dividend owns and operates. In its Appeal, Dividend claimed that the November 8, 1977 Order did not take into account the firm's intent to operate a new retail outlet at the site. In rejecting this contention, the DOE pointed out that under the criteria discussed in Ruling 1975-6 and *Red Carpet Car Wash*, 1 DOE Par. 82,530 (1978), a firm which succeeds another firm as the operator at a retail site is not eligible to receive an assignment of supplier and base period volume as a new whole sale purchaser-reseller if it intends to continue to engage in the retail sale of motor gasoline at the site, regardless of any change in the mode of operation. The DOE found that since Dividend has always intended to continue the retail sale of motor gasoline at the site, it failed to qualify as a new retail outlet, despite the conversion of the mode of operation from a full-service facility to a self-service operation. The Dividend Appeal was accordingly denied.

REQUESTS FOR EXCEPTION

Asiatic Petroleum Corp., New York, New York, DPI-0017
Pacific Resources, Inc., Honolulu, Hawaii, DPI-0009
Inter-Americas Oil Company, Pittsburgh, Pennsylvania, DPI-0010
Roarda, Inc., Washington, D.C., DPI-0011
Scanoil, Inc., New York, N.Y., DPI-0012

Asiatic Petroleum Corporation, Pacific Resources, Inc., the Inter-Americas Oil Company, Roarda, Inc., and Scanoil, Inc. filed Applications for Exception from the provisions of 10 CFR 213.15(c) which, if granted, would result in the issuance of an Order by the DOE authorizing the firms to import additional barrels of residual fuel oil into PAD District I on a fee-exempt basis during the 1978-1979 allocation year. In its Application, Asiatic stated that it expects to exhaust its present fee-exempt authority authorized under Section 213.15 by September 1978. The remaining four firms stated that since they were not importers of residual fuel into District I during 1973, they are not eligible to receive fee-exempt licenses under § 213.15 and therefore must pay license fees for all of the residual fuel oil which they import. All five firms stated that, in contrast, their competitors possess substantial fee-exempt authority under § 213.15. In the consolidated Decision which it issued to the five firms, the DOE noted that significant dislocations in the allocation of fee-exempt authority among importers of residual fuel oil had arisen since the Mandatory Oil Import Program (MOIP) was promulgated in 1973. The DOE also found that the maldistribution of fee-exempt authority to the five applicants threatened the competitive viability of those firms and therefore constituted an exceptional hardship to the firms and an unfair distribution of the burdens generally imposed on importers by the MOIP. Based on these considerations, the DOE concluded that exception relief should be granted. In determining the specific level of relief to be granted to the firms, the DOE noted that the fee-exempt authority mandated under § 213.15 for all importers during the 1978-1979 allocation year represents approximately 81.2 percent of the projected residual fuel imports for all importers for the same period. The DOE found that these five firms should be placed in a similar position and directed that additional fee-exempt licenses be issued in order to raise each firm's fee-exempt authority for the 1978-1979 allocation year to 81.2 percent of its total projected imports for that period.

Sidney E. Pinkston, Jr., Natchez, Mississippi, DEE-1409, Crude oil

Sidney E. Pinkston, Jr. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the firm to sell the crude oil produced from the U.S.A. No. 1, U.S.A. No. 5, and U.S.A. No. 7 wells located on Lease BLM-A-011586-C in the Beaver Branch Field, Adams County, Mississippi at upper tier ceiling prices. In considering the exception request the DOE found that Pinkston's operating costs had increased to the point where the firm no longer had an economic incentive to continue the production of crude oil from the BLM-A-011586-C

V 4 4 / 1 3 J A 1 8 7 9 UMI

Lease if the crude oil were subject to the lower tier ceiling price rule. The DOE also determined that if Pinkston abandoned its operations at the Lease, a substantial quantity of domestic crude oil would not be recovered. On the basis of criteria applied in previous Decisions, the DOE determined that Pinkston should be permitted to sell 100% of the crude oil produced from the U.S.A. No. 1, No. 5 and No. 7 wells for the benefit of the working interest at upper tier ceiling prices.

S&W Engine Supply Company, Oklahoma City, Oklahoma, DXE-1472, crude oil

The S&W Engine Supply Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The request, if granted, would result in the extension of exception relief previously granted to S&W and would permit the firm to sell at upper tier ceiling prices certain quantities of crude oil produced from the Baker Townsend Lease located in Oklahoma County, Oklahoma. *S&W Engine Supply Co.*, 1 DOE Par. 81,123 (1978). In considering the S&W request, the DOE found that the firm had continued to experience operating losses at the Baker Townsend lease despite the exception previously granted. The DOE also found that S&W would have no economic incentive to continue its operations at the Baker Townsend property unless the type of exception relief previously granted were extended for an additional six month period. In view of this situation and on the basis of the operating data which S&W submitted for the most recently completed six-month period, S&W was permitted to sell at upper tier ceiling prices 78.84 percent of the crude oil produced from the Baker Townsend lease for the benefit of the working interest owners through March 31, 1979.

Tenneco Oil Company, Houston, Texas, DXE-1557, crude oil

The Tenneco Oil Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception, if granted, would result in the extension of relief previously granted and would permit Tenneco to continue to sell certain quantities of the crude oil produced from the South Coast Unit located in St. Mary Parish, Louisiana, at upper tier ceiling prices. In considering the Tenneco exception request, the DOE found that operating costs per barrel at the South Coast Unit continued to exceed the applicable lower tier ceiling price and that exception relief was therefore necessary to provide the firm with an economic incentive to maintain production operations. In accordance with the methodology established in previous Decisons, the DOE permitted Tenneco to sell 74.21 percent of the crude oil produced from the South Coast Unit at upper tier ceiling prices for a six month period of time.

PETITION FOR SPECIAL REDRESS

Robert B. Sutton, Tulsa, Oklahoma, DSG-0032, DES-0104, crude oil

Robert B. Sutton filed a Petition for Special Redress which, if granted, would have resulted in the issuance of an order quashing a subpoena that DOE Region VI issued to him on June 30, 1978. Sutton also requested a stay of the provisions of the subpoena pending a final determination on his Petition. In considering the Sutton Petition, the DOE noted that § 205.8(h)(4) of the DOE Regulations sets forth criteria governing the review by the Office of Hearings and Appeals of a Petition in which a firm seeks to quash or modify a subpoena. That Section provides that a preliminary review will be made in order to determine whether a reasonable probability exists that the petitioner will be able to satisfy the criteria for relief. If the Office of Hearings and Appeals determines that a Petition might satisfy those criteria, the Petition will then be considered on its merits. On the other hand, if the determination is made that the Petition fails to meet this threshold standard the Petition will be dismissed. See 41 FR 55322 (December 20, 1976). The DOE reviewed the contentions which Sutton advanced in his Petition and concluded that he had failed to demonstrate that an immediate review was warranted to correct substantial errors of law, to prevent substantial injury to legal rights, or to cure a gross abuse of administrative discretion. The Sutton Petition was therefore dismissed and the Application for Stay was denied.

REQUESTS FOR STAY

Northland Oil & Refining Company, Tulsa, Oklahoma, DES-0109, crude oil

Northland Oil & Refining Company requested that its obligation under the provisions of 10 CFR 211.67 (the Domestic Crude Oil Entitlements program) be stayed for the month of October 1978 pending a determination on the merits of an Application for Exception which the firm had filed. In considering the Northland request, the DOE found that the material which the firm submitted made a *prima facie* showing that the firm did not possess the financial resources which would enable it to purchase entitlements during October 1978. Accordingly, the DOE concluded that it was impossible for the firm to purchase entitlements during the month of October 1978. The DOE therefore granted the request for stay pending a determination on the firm's Application for Exception.

San Joaquin Refinging Company, Newport Beach, California, DES-1049 crude oil

San Joaquin Refining Company filed an Application for Stay in which it requested that the firm's obligation to purchase entitlements in the amount specified in the Entitlement Notice issued in September 1978 be suspended pending a final determination on an Application for Exception which the firm filed on April 20, 1978. In considering the San Joaquin request, the DOE found that San Joaquin had insufficient amounts of cash and other current assets to satisfy the full amount of its September entitlements purchase obligation. The DOE concluded that the financial material presented by San Joaquin therefore supported the firm's claim that it would suffer a severe and irreparable injury in the absence of a stay. The DOE also noted that there existed a substantial likelihood of success on the merits of San Joaquin's Application for Exception. Accordingly, the DOE granted the request for stay.

REQUEST FOR TEMPORARY STAY

Continental Oil Company, Houston, Texas, DST-1947, motor gasoline

The Continental Oil Company filed an Application for Temporary Stay of the requirements of 10 CFR 211.10(b). In its Application, Continental contended that because of an explosion and fire at its Denver, Colorado refinery it was unable to fulfill the allocation obligations imposed by 10 CFR 211.10(b). After considering the Application, the DOE determined that as a result of the explosion and fire it was impossible for Continental to maintain a single allocation fraction for the distribution subsystems served by the firm's Denver, Colorado and Billings, Montana refineries. Therefore, the DOE granted a temporary stay which permitted Continental to use separate allocation fractions for its Denver and Billings customers pending consideration of an Application for Stay which Continental intended to file.

MOTIONS FOR EVIDENTIARY HEARING

Champlin Petroleum Company, Fort Worth, Texas, DRH-0018, DRX-0115
Special Counsel, Washington, D.C., Motor gasoline

Champlin Petroleum Company filed a Motion for Evidentiary Hearing in connection with its Appeal of a Remedial Order. In its Motion, Champlin designated 49 issues with respect to which the firm wished to present testimony at an evidentiary hearing. In reviewing the Champlin Motion, the DOE noted that a firm seeking an evidentiary hearing must establish that the issues designated in its Motion are relevant to the enforcement proceedings and that the facts that the firm wishes to establish are not susceptible to documentary proof. The DOE noted that a large number of the issues designated in the Champlin Motion did not involve material disputes of a factual nature. In this regard, the DOE found that a number of the firm's assertions had already been accepted by the FEA and referred to in the Remedial Order. The DOE also noted that a number of issues designated by Champlin involved the interpretation of the contents of documents and should be resolved on the basis of those documents.

In its Motion Champlin also stated that it wished to elicit the testimony of various DOE officials regarding circumstances surrounding the preparation and issuance of the Remedial Order and other notices to the firm. The DOE determined that the presentation of this type of evidence was barred by the testimonial privilege recognized by the United States Supreme Court in *Citizens to Preserve Overton Park v. Volpe*, 401 U.S. 402 (1971). Under that privilege, the oral testimony of agency officials may be elicited by parties affected by agency action only in unusual circumstances. Where administrative findings were made contemporaneously with the agency action challenged, there must be a strong showing of bad faith or improper behavior on the part of agency officials before inquires may be made as to their mental processes in formulating agency action. The DOE determined that Champlin failed to make any preliminary showing that bad faith existed or that contemporaneous findings were not made.

The DOE also rejected Champlin's request to present testimony regarding alleged *ex parte* contacts involving the agency's enforcement personnel and individuals representing one of the firm's customers. The DOE concluded that no impropriety was committed even if the alleged *ex parte* contacts were made since the alleged contacts were with enforcement personnel acting in a prosecutorial capacity. The DOE further noted that even if the alleged *ex parte* contacts had been improper, Champlin was receiving an independent review of the Remedial Order before the OHA. In view of Champlin's failure to demonstrate the existence of any material factual dispute that was not susceptible to disposition on the basis of documentary proof, the Champlin Motion for Evidentiary Hearing was denied.

The DOE also considered the Motion of the Office of Special Counsel to strike from the administrative record excerpts of a deposition of a DOE official which were included in the Champlin submissions. The DOE determined that Special Counsel failed to make a showing that it would be prejudiced by the admission of that evidence into the record, and the Special Counsel's Motion to Strike was denied.

Petroleum Management, Inc., Corpus Christi, Texas, DRH-0015, crude oil

Petroleum Management, Inc. filed a Motion for Evidentiary hearing in connection with its Statement of objections to a Proposed Remedial Order which was issued to the firm by DOE Region VI on May 23, 1978. In the Proposed Remedial order, Region VI found that during the period from September 1, 1973 through December 31, 1975, PMI's Fred Blundell No. 5 Well produced only natural gas and natural gas condensate. In its Motion for Evidentiary Hearing, PMI stated that it intended to present testimonial evidence and supporting documents in support of its position that this finding was incorrect and that the well in fact produced crude oil during the audit period. In considering PMI's Motion, the DOE determined that there was a substantial dispute as to the nature of the liquids produced from the Fred Blundell No. 5 Well during the audit period. The DOE also determined that this factual dispute was central to the question of whether or not PMI engaged in practices which violated the price regulations. Moreover, the DOE concluded that because the credibility of PMI's witnesses was certain to be a critical factor in the DOE's decision with respect to this dispute, it was desirable that the DOE have the opportunity to observe the demeanor of PMI's witnesses and consider the veracity of their statements as they presented evidence and responded to cross-examination. Accordingly, the PMI Motion for Evidentiary Hearing was granted.

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Amerada Hess Corporation, New York, New York, DEE-0858
Homer Moore, Baton Rouge, Louisiana, DEE-1068
Texas City Refining, Inc., Washington, D.C., DSG-0033

The following submissions were dismissed on the grounds that recent regulatory changes have eliminated the need for the exception relief requested:

Getty Oil Company, Los Angeles, California, DEE-1702 through DEE-1706
Hunt Petroleum Corporation, Dallas, Texas, DXE-1864
Texas Pacific Oil Company, Inc., Dallas, Texas, DXE-1878 through DXE-1880

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street, N.W. Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5 p.m., e.s.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

JANUARY 12, 1979.

[6450-01-M]

ISSUANCE OF DECISIONS AND ORDERS

Week of October 16 through October 20, 1978

Notice is hereby given that during the week of October 16 through October 20, 1978, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Hearings and Appeals and the basis for the dismissal.

APPEALS

Como Gas Sales Company, Inc., Duluth, Minnesota, DRA-0085 propane.

Como Gas Sales Company, Inc. appealed from a Remedial Order which the Department of Energy Region V Office issued to the firm on November 4, 1977. In the Remedial Order, the DOE found that Como had sold propane to its customers at prices which exceeded the maximum permissible levels computed pursuant to 6 CFR 150.359 and 10 CFR 212.93. In its Appeal, Como contended that its 20-lb. and 30-lb. propane cylinder transactions should be eliminated from the Regional Office's audit because they constituted a service rather than sales of a covered petroleum product and because it was impossible for the DOE to correctly calculate the amount of any violation which occurred. Como further challenged the manner in which the Regional Office had calculated Como's cost of product in inventory on May 15, 1973. In addition, Como challenged the application to it of the firmwide inventory requirement and the equal application rule. Como also asserted that DOE representatives had led the firm to believe that its pricing methods were correct and that netting, or subtraction of undercharges from overcharges, would be permissible if any overcharges were found to have occurred. Finally, Como sought an exception which, if granted, would have permitted the firm to retroactively calculate its selling prices on a separate inventory basis.

In considering Como's contentions with respect to its cylinder transactions, the DOE noted that a firm cannot avoid the applicability of the Price Regulations by the manner in which it characterizes its business activities. The DOE further determined that it would be inappropriate to relieve a firm of liability for compliance with the Price Regulations on the basis of an argument that it was impossible for the DOE to calculate correctly the amount of the violation, particularly when the firm had made no effort to comply with the Price Regulations with respect to the transactions involved and had not maintained records to show the quantity of product sold during the audit period. With respect to the application of the firmwide inventory requirement to Como, the DOE initially noted that in prior cases the FEA has stated that prior to May 1, 1976 a reseller or retailer was required to calculate its increased product costs on a firmwide basis. However, because the Office of Enforcement is apparently giving some further consideration to this issue, the DOE remanded the matter for further consideration.

In addition, the DOE found that the record was insufficient to enable it to assess the validity of Como's claim that the Regional Office had incorrectly calculated the firm's May 15, 1973 cost of product in inventory. Accordingly, the DOE determined that the Remedial Order should be remanded for further findings and conclusions regarding this issue. With respect to Como's argument that it had relied on the advice of DOE representatives, the DOE found that Como had not established that the DOE representatives had approved any specific pricing practice such as netting or the use of separate inventory accounting. Moreover, the DOE noted that Como had not shown that it actually established its prices on the basis of incorrect oral advice received from IRS and FEA representatives. In considering Como's netting argument, the DOE noted that netting is not permitted unless a firm convincingly demonstrates that it reduced its prices for the sole purpose of making restitution for previous overcharges. The DOE determined that Como had not made the proper showing. With respect to Como's request for a retroactive exception, the DOE found that the firm had failed to make a *prima facie* showing that exception relief should be granted, and consequently had failed to demonstrate that an exception should be granted in the context of its Appeal of the Remedial Order. On the basis of the foregoing considerations, Como's Appeal was granted in part and the Remedial Order was remanded for further findings.

Fuel Distributors, Inc., Temple, Texas, DFA-0213, Freedom of Information

Fuel Distributors, Inc. (Fuel) appealed from a partial denial by the Director of the Division of Freedom of Information and Privacy Activities of the Department of Energy (the FOI Director) of a request for information which the firm had filed pursuant to the Freedom of Information Act (FOIA). In its request, Fuel requested records related to a DOE investigation and audit of Foremost Petroleum Corporation, Inc. In his initial determination the FOI Director released six documents to Fuel and withheld 93 documents which were within the scope of the firm's request. On appeal Fuel requested that the DOE release 25 of the 93 documents which the FOI Director had

V 4 4 / 1 3 JA 18 79 UMI

withheld from the firm. In considering the appeal, the DOE found that 13 of those 25 documents were a part of an ongoing investigation of the pricing practices of Foremost Petroleum Corporation, Inc. and that release of those documents could seriously affect that investigation in an adverse manner. The DOE also found that nine documents contained confidential proprietary information and were therefore properly withheld from Fuel pursuant to exemption 4 of the FOIA. In addition, the DOE found that four documents contained significant substantive content which was a part of the decisionmaking process of the agency and that those documents were therefore properly withheld from Fuel pursuant to exemption 5 of the FOIA. Finally, the DOE determined that two documents and the routing slips attached to three documents should have been released to Fuel after material which is exempt from the mandatory public disclosure provisions of the FOIA had been segregated and withheld.

Petroleum Management, Inc., Wichita, Kansas, FRA-1311 crude oil

Petroleum Management, Inc. (PMI) appealed from a Remedial Order which was issued to it on April 27, 1979. In the Remedial Order, the DOE found that PMI had sold the crude oil produced from 12 leases as "stripper well crude oil" when those properties did not qualify for stripper well status during periods of time from November 16, 1973 through December 31, 1974. As a result of these findings, the Remedial Order directed PMI to refund the overcharges to the six purchasers of the crude oil. In considering the Appeal, the DOE rejected PMI's contention that injection wells should be included for purposes of determining eligibility of a property for stripper well status. The DOE also concluded that the record indicated that the production of crude oil from several of the properties was not maintained at maximum feasible rates and that the Regional Office had therefore acted properly in adjusting the calculations of average daily production from the Sutley and Barney-Morgan properties to reflect the disruptions in production that these properties to reflect the disruptions in production that these properties had experienced during 1973. However, the DOE determined that the Regional Office appeared to have correctly calculated the average daily porduction from the Krug Lease, and the property may have properly been entitled to stripper well status. Moreover, the DOE also concluded that the payment mechanism utilized by the Koch Oil Company for certain crude oil produced from the Palmer C Lease during December 1973 appears to have been appropriate. Accordingly, those portions of the Remedial Order were remanded to the Director of Enforcement of Region VII for further consideration of the issues involved. In all other respects, the Appeal filed by PMI was denied.

True Oil Purchasing Company, Casper, Wyoming, DFA-0215, freedom of information

True Oil Purchasing Company (True) filed an Appeal from an Order which the Director of the DOE Division of Freedom of Information and Privacy Act Activities (the Director) issued to the firm on August 14, 1978. In that Order the Director denied in part a Request for Information which True had filed under the Freedom of Information Act, 5 U.S.C. 552 (the Act), as implemented by the DOE in 10 CFR, Part 202. In its Appeal, True argued that a document which was found to be within the scope of the firm's request but which was withheld by the Director pursuant to 5 U.S.C. 552(b)(5) (Exemption 5) should be disclosed. Exemption 5 generally exempts from the mandatory disclosure provisions of the Act documents which are part of the agency's predecisional deliberative processes. See *Exxon Co., U.S.A*, 2 DOE Par. — (November 1, 1978) and cases cited therein. In considering the Appeal, the DOE determined that the document in question which is a draft Notice of Proposed Rulemaking had been properly withheld under Exemption 5 in accordance with previous DOE decisions. *See Shank, Irwin, Conant, Williamson, and Greverlle,* 1 DOE Par. 80,209 (1977). The firm also appealed a determination by the Director that portions of the firm's request for information did not reasonably describe the records sought. Since the firm failed to demonstrate that this aspect of the Director's determination constituted a gross abuse of administrative discretion, the DOE dismissed this aspect of the firm's appeal in accordance with the principles of a recent decision. *See Andrews, Kurth, Campbell and Jones,* 2 DOE Par. — (September 28, 1978). Finally, the DOE determined that a document which was within the scope of the firm's request but which had not yet been released to the firm should be released since it did not contain any material which is exempt from mandatory disclosure under the Act.

PETITION FOR SPECIAL REDRESS

Marathon Oil Company, Findlay, Ohio, DEH—0030, DSG—0030, DES—0103, crude oil

Marathon Oil Company filed a Petition for Special Redress, a Motion for Evidentiary Hearing, and an Application for Stay. In its Petition for Special Redress, the firm requested that an order be issued (i) directing the Special Counsel of the Department of Energy to refrain from reviewing a subpoena which was issued to Marathon by the Deputy Special Counsel on December 13, 1977, and (ii) designating another DOE official to conduct that review. The Application for Stay sought to restrain the Special Counsel from review of the subpoena until a determination was reached concerning the Petition for Special Redress. Marathon based its requests upon a contention that the Special Counsel was not the appropriate offical to review the December 13 subpoena because of his alleged involvement in its issuance. In considering Marathon's application for Stay, the DOE found that Marathon failed to make any showing that an irreparable injury to the firm was imminent or that it would experience a serious hardship or gross inequity if its Application for Stay was denied. The DOE found that since the Special Counsel might designate another DOE official to review the subpoena or might modify or rescind the subpoena, Marathon's contention that it would experience an irreparable injury in the absence of stay relief was without merit. In addition, the DOE noted that in any event Marathon could obtain review of the Special Counsel's determination by the DOE Office of Hearings and Appeals under § 205.8(h)(4). Inasmuch as Marathon failed to make a showing of an imminent irreparable injury resulting from the normal operations of the subpoena review regulations, the DOE determined that a Stay was not warranted and that, for the same reason, the Petition for Special Redress was premature. Accordingly, Marathon's Application for Stay was denied and its Petition for Special Redress was dismissed. The firm's Motion for Evidentiary Hearings was also dismissed on the ground that the subpoena review regulations make no provision for evidentiary hearings.

REQUESTS FOR EXCEPTION

Damson Oil Company, Houston, Texas, DXE—1607, curde oil

Damson Oil Company filed an application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of the exception relief previously granted to Damson and would permit the firm to continue to sell a portion of the crude oil produced from the Venice Beach lease at upper tier ceiling prices. *Damson Oil Co.*, 1 DOE Par. 81,101 (1978). In considering the exception application, the DOE found that in the absence of exception relief the working interest owners would lack an economic incentive to continue to produce crude oil from the property. In view of this determination, and on the basis of operating data which Damson had submitted for the most recently completed fiscal period, the DOE concluded that Damson should be permitted to sell 74.15 percent of the crude oil produced from the Venice Beach lease for the benefit of the working interest owners at upper tier ceiling prices. On September 26, 1978, Damson filed a Statement of Objections citing an alleged error in the effective date of the relief proposed in the Proposed Decision and Order. After reviewing the Damson submission, the DOE concluded that Damson was correct. Accordingly, Damson was permitted to sell at upper tier ceiling prices 74.15 percent of the crude oil produced from the Venice Beach Lease for the benefit of the working interest owners from September 1, 1978 to February 28, 1979.

H & K Oil Company, Yankton, South Dakota, DRC-0012, No. 2 fuel oil

H & K filed a statement of Objections relating to a Proposed Decision and Order that DOE Region VIII issued to the firm on January 13, 1978. In that determination, Region VIII tentatively concluded that H & K's request for exception relief from the provisions of 10 CFR 212.93 should be denied. The exception request, if granted, would have permitted H & K to retain revenues which it realized during the period November 1, 1973 through December 31, 1974 as a result of charging the University of South Dakota prices for No. 2 fuel oil which exceeded maximum permissible levels. In considering that request, the DOE applied the standard which is generally applied to requests for retroactive exception relief. *Marvin E. Boyer Co., Inc.*, 3 FEA Par. 83,088 (1978). Under that standard and on the basis of the financial material submitted by H & K, the DOE found that the firm had not shown that either an irreparable injury existed or compelling reasons were present which justified the approval of retroactive exception relief. In fact, the DOE found that H & K had realized increasing profits since 1973. Under these circumstances, the DOE concluded that retroactive exception relief was not warranted, and the H & K Application for Exception was denied.

Kewanee Oil Company, Tulsa, Oklahoma, DXE-1288 crude oil

Kewanee Oil Company filed an Application for exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in an extension of the exception relief previously granted to Kewanee and would permit the firm to sell a portion of the crude oil produced from the South Stanley Lease at upper tier ceiling prices. In considering the Kewanee exception application, the DOE determined that the Kewanee firm had been acquired by the Gulf Oil Corporation (Gulf) and that Gulf, rather than Kewanee, should have filed the exception application. However, the DOE also determined that the financial material which Kewanee submitted for a recent six-month period covered a period in which Kewanee continued as the operator of the property. The DOE also found that the working interest ownership of the property continued at the same level as under Kewanee's ownership and that it did not appear that the manner in which Gulf accounted for the operations was different from the manner in which Kewanee had accounted for them. Accordingly, the DOE determined that the exception proceeding should not be dismissed. Based on the current financial and operating data furnished for the property, the DOE concluded that exception relief should be continued so the firms would have an economic incentive to produce the crude oil involved. The DOE therefore granted Kewanee and Gulf exception relief which permits them to sell 41.18 percent of the crude oil produced from the South Stanley Lease during a six-month period for the benefit of the working interest owners at upper ceiling prices.

Monsanto Company, Winkler County, Texas, DXE-1115, crude oil

The Monsanto Company (Monsanto) filed an Application for Exception from the provisions of 10 CFR, Part 212, subpart D which, if granted, would permit Monsanto to sell the crude oil which it produces from the Hendrick "C" Property at upper tier ceiling prices. In considering the exception request, the DOE found that Monsanto continued to incur per barrel operating costs for the Hendrick "C" Property which were in excess of the lower tier ceiling price the firm was permitted to charge pursuant to Subpart D and that in the absence of continued exception relief, the working interest owners would lack an economic incentive to continue production of crude oil from the property. In view of this situation and on the basis of the operating data presented for the property for the preceding six months, the DOE issued a Proposed Decision and Order in which it concluded that the working interest owners should be permitted to sell 48.5 percent of the crude oil produced from the property at upper tier ceiling prices in order to recover the increased operating costs of the property. On July 25, 1978, Monsanto filed a Statement of Objections in which the firm asserted that the amount of relief specified in the Proposed Order was inadequate because it was based in part upon monthly operating results which were anomalous. In considering Monsanto's arguments, the DOE determined that the impact of any anomalous production period was minimized or eliminated as a result of the DOE's consideration of operating results from an entire six month period. Accordingly, on October 16, 1978, the DOE issued the Proposed Order in final form without modification.

Phillips Petroleum Company, Bartlesville, Oklahoma, DEE-0386, crude oil

The Phillips Petroleum company (Phillips) filed an Application for Exception from the provisions of 10 CFR 212.73. The exception request, if granted, would permit Phillips to sell a sufficient protion of the crude oil produced from the Bridger Lake Unit located in Summit County, Utah, at upper tier ceiling prices to generate revenues that would contemporaneously offset the projected cost of injecting natural gas into the underlying reservoir. Phillips claimed that natural gas is required to be injected into the reservoir in order to maintain the miscibility pressure of the Unit prior to the implementation of a major secondary recovery project at the Unit. Phillips further alleged that unless a level of revenues which would contemporaneously offset the cost of injecting the gas were achieved, the firm would cancel its plans to implement the secondary recovery project and large volumes of otherwise recoverable crude oil would be permanently lost. After consideration of the projected cost of the injection gas and the magnitude of the volume of crude oil that could be produced if the firm actually proceeded with the planned secondary recovery project, the DOE found that Phillips would have sufficient incentive to purchase and inject the natural gas if the firm was permitted to recover the increased operating costs per barrel that it actually incurred at the Unit since May 15, 1973. Since Phillips could recover the cost of injecting the natural gas after it had actually been incurred through subsequent exception requests the DOE concluded that there was no need to permit Phillips to recover the projected cost of the injection gas contemporaneously with the expenditures for that gas in order to provide the firm with an incentive to undertake the project. Consequently, the DOE granted Phillips permission only to increase the price of the crude oil produced from the Unit in order to recover the increased operating cost per barrel which it actually had incurred since May 15, 1973.

Phillips Petroleum Company, Bartlesville, Oklahoma, DXE-1554, crude oil

Phillips Petroleum Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D. The exception request, if granted, would result in the extension of exception relief previously granted to Phillips and would permit the firm to continue to sell a portion of the crude oil produced from the Foote Lease, located in Oklahoma County, Oklahoma, at upper tier ceiling prices. In considering the exception application, the DOE found that Phillips had continued to incur increased operating expenses at the Foote Lease and that, in the absence of exception relief, the working interest owners would lack an economic incentive to continue to produce crude oil from the property. In view of this determination and on the basis of the operating data which Phillips had submitted for the most recently completed fiscal period, the DOE concluded that exception relief should be continued permitting Phillips to sell at upper tier prices 90.98 percent of the crude oil produced at the Foote Lease for the benefit of the working interest owners.

Phillips Puerto Rico Core, Inc., Puerto Rico Sun Oil Company, Commonwealth Oil Refining Company, Inc., PPG Industries, Inc., and Puerto Rico Olefins Company, Washington, D.C., DPI-0002, DEE-0392, DXE-0611, DPI-0006, naphtha crude oil

This proceeding involved several Applications for Exception filed by firms that maintain refineries or petrochemical plants in Puerto Rico. Commonwealth Oil Refining Company, Inc. (Corco), Phillips Puerto Rico Core, Inc. (Phillips) and the Puerto Rico Olefins Company (PRO), a subsidiary of PPG Industries, requested exception relief from the license fee provisions of the Mandatory Oil Import Program contained in 10 CFR, Part 213. Corco and the Puerto Rico Sun Oil Company (Sun) requested exception relief from certain provisions of the Old Oil Entitlements Program.

After reviewing the material submitted by Corco, PRO and Phillips, the DOE determined that the firms should be granted exception relief from the license fee provisions. The DOE noted that in a previous case, the Federal Energy Administration had granted similar exception relief to Corco based in part on the firm's deteriorating financial condition, and on the fact that due to competitive conditions, the firm was not able to pass through to its customers the additional costs associated with license fees. The relief granted in that case was also based on the finding that adequate domestic supplies of crude oil and naphtha were not available to Corco at competitive price levels as a result of the Jones Act requirements and the fact that the Corco facilities are located in Puerto Rico. *Commonwealth Oil Refining Co., Inc.*, 5 FEA Par. 83,132 (1977). Based on information submitted by Corco, the DOE determined that these conclusions were still valid, and that the firm, now in bankruptcy, was experiencing even more serious financial difficulties. Accordingly, Corco was granted exception relief permitting it to import all of its expected crude oil and naptha feedstock needs for the current allocation period on a fee-exempt basis. It was also found that PRO was subject to the same economic factors which affect Corco and was experiencing serious financial difficulties. Consequently, PRO was also granted exception relief permitting it to import its expected naphtha, raffinate and gas oil feedstock needs for the current allocation period on a fee-exempt basis. The DOE further determined that as a result of this Decision and the existence of long-term allocations and other regulatory fee-exempt allocations, all of the refiners and petrochemical plants located in Puerto Rico will have substantial fee-exempt authority except for Phillips. The DOE concluded that since Phillips has no ongoing fee-exempt authority on a permanent basis, the firm is subject to a substantial competitive disadvantage. Consequently, Phillips was also granted exception relief permitting it to import its expected naphtha feedstock needs for the current allocation period on a fee-exempt basis. Phillips was also granted limited retroactive exception relief from the license fee provision due to administrative delay in reaching a decision on the merits of its request.

The DOE also pointed out that other factors supported the approval of the exception relief from the license fee program

V 4 4 / 1 3 J A 1 8 7 9 UMI

granted to Corco, PRO and Phillips. The agency noted that each of the firms had constructed facilities in Puerto Rico that were dependent on foreign feedstocks largely as a result of incentives provided by the Federal and Puerto Rican Governments. It also found that since the firms generally had no feasible alternative to the use of imported feedstocks the license fee, which was designed to discourage the use of imported crude oil and petroleum products, did not serve its intended function with respect to these firms and exacerbated the competitive disadvantages already being experienced by the firms.

The DOE also concluded that Corco and Sun should be granted exception relief from the provisions of 10 CFR 211.67(i)(4) of the Old Oil Entitlements Program. In this regard, the DOE noted that the purpose of that provision was to provide a cost advantage for refiners who process domestic crude oil over those who process imported crude oil. It was determined that this objective is not met by the application of § 211.67(i)(4) to Corco and Sun since under provisions of the Jones Act neither of the firms has an economic incentive to process domestic crude oil. The DOE reiterated that these firms initially relied on incentives provided by the Federal and Puerto Rican Governments to locate facilities in Puerto Rico, but now were experiencing competitive cost disadvantages as a result of the Jones Act and changes in the economic climate. In addition, the DOE determined that a denial of exception relief could have a potentially significant adverse impact on the economy of Puerto Rico. Based on these factors, the DOE granted Corco and Sun exception relief for specified periods to eliminate the cost disadvantage which accrues to the firms under the entitlements program as a result of their use of imported crude oil feedstocks.

After reviewing the material submitted by Corco, the DOE also concluded that the firm should be granted exception relief from the provision of 10 CFR 211.67(d)(5). Under that provision, the level of entitlements benefits which a Puerto Rican firm receives for the naphtha which it imports for use as feedstock in its petrochemical plant is based on the weighted average cost of all naphtha imported into Puerto Rico for use as a petrochemical feedstock. The DOE noted that in a previous decision, the FEA found that Corco's weighted average cost of imported naphtha was significantly in excess of the weighted average cost of imported naphtha for all of Puerto Rico. In view of this finding and the financial difficulties being experienced by Corco, the FEA concluded that exception relief from the provisions of § 211.67(d)(5) should be granted, permitting the firm to substitute its actual cost of naphtha for purposes of applying the formula set forth in that section. *Commonwealth Oil Refining Co., Inc., supra.* The DOE found that because Corco's financial condition continued to be precarious and its weighted average cost of imported naphtha still exceeded the weighted average cost for all of Puerto Rico, the exception relief previously approved should be continued until September 30, 1979.

The DOE also determined that exception relief from the equal application rule, 10 CFR 212.83(h), which had previously been granted to Corco and Phillips should also be granted to Sun and PRO. The DOE noted that the purpose of the rule was to preserve existing price differentials which are the basis of the class of purchaser concept. As a result of the provisions of the equal application rule, a refiner which passes through different amounts of increased costs to different classes of purchaser is not permitted to "bank" for recovery in future months the costs which it failed to reflect in the lower prices charged to certain classes of purchaser. The DOE determined that the equal application rule may not serve any useful purpose when applied to Puerto Rico and instead functions to inhibit the passthrough in Puerto Rico of costs incurred by refiners operating only in Puerto Rico. Consequently, exception relief was approved permitting all of the firms involved in this proceeding to reflect in the prices which they charge for petroleum products sold in Puerto Rico the actual cost increases incurred in their Puerto Rican refining and marketing operations.

Finally, the DOE noted that several firms had filed submissions objecting to the Proposed Decision and Order which was issued in this proceeding. Corco objected to certain procedures attached to the exception relief from the entitlements program which had been tentatively approved. The procedures generally permitted Corco to sell entitlements pursuant to the exception only if it takes appropriate measures to ensure that the revenues generated from such sales are used only to meet current expenses of the firm. The DOE noted that these procedures were the subject of ongoing discussions between Corco and the DOE, and that in order to avoid any delay in this proceeding, the procedures should be adopted in the final Decision issued in this matter. However, the DOE stated that if new procedures were ultimately approved as a result of the negotiations with Corco, a Supplemental Order will be issued to conform the procedures adopted in this Decision with the new procedures. Several other firms argued that the exception relief fromthe license fee program which had been tentatively approved was intended to alleviate general economic problems facing Puerto Rico and the Puerto Rican refining and petrochemical industries, and was thus more properly the subject of a rulemaking proceeding. In rejecting this argument, the DOE determined that the approval of this exception relief was designed to mitigate the impact of specific DOE regulatory provisions which under the unique circumstances involved produced an inequity to the Puerto Rican firms and economy.

The DOE also rejected the contention advanced by several firms that relief from the regulatory provisions involved in this proceeding should be considered for all refiners through the regulatory process. The DOE determined that the inequity being experienced by Puerto Rican refiners and petrochemical manufactures is unique, and that the allegation that a larger problem exists should not restrict the agency from addressing specific inequities presented to it in individual applications for exception. Several firms also contended that the exception relief proposed would adversely affect every other refiner in the United States to some extent. The DOE stated that this argument had been fully considered, and that various factors favoring exception relief were more compelling. Lastly, Sun stated that it was now processing substantial quantities of Alaskan North Slope (ANS) crude oil in its Puerto Rican refinery, and requested additional exception relief from the entitlements penalty on that crude oil, which is identical to the penalty on foreign crude oil. The DOE determined that it would be anomalous if this entitlements penalty were not removed, since it would encourage Sun and othen Puerto Rican refiners to use imported crude oil rather than ANS crude oil. Accordingly, both Sun and Corco were granted exception relief until September 30, 1979 relieving them of the cost disadvantage mandated under § 211.67 (l) (4) with respect to ANS crude oil.

Total Petroleum, Inc., Apco Oil Corporation, Oklahoma Refining Corporation, Washington, D.C., FEE-4753, FEE-4774, FEE-4832, crude oil and refined petroleum products

On February 6, 1977, the DOE issued a Proposed Decision and Order to Total Petroleum, Inc., Apco Oil Corporation, and Oklahoma Refining Corporation in which the DOE proposed to grant exception relief to facilitate Apco's sale to Total and ORC of two refineries located in Arkansas City, Kansas and Cyril, Oklahoma. As a condition of receiving relief, the DOE proposed to limit the entitlements which ORC may earn under 10 CFR 211.67(e) (the small refiner bias) to the benefits which Apco would have earned if it did not sell the facility. Apco and ORC objected to that limitation. In considering their contentions, the DOE observed that the agency's Economic Regulatory Administration (ERA) had recently indicated that it was reassessing the propriety of the small refiner bias. The DOE had as a result determined that exception relief in cases involving refinery acquisitions should not be conditioned upon the continuation of the level of small refiner bias that existed prior to the refinery sale. *Dorchester Gas Corp.; American Petrofina, Inc.*, 2 DOE Par. 81,048 (1978). On the basis of the precedent established in *Dorchester/Fina*, the DOE concluded that the parties to the Apco/ORC/Total refinery transfers should be permitted to receive the full measure of entitlement benefits calculated pursuant to the provisions of § 211.67(2).

In its Statement of Objections to the February 6 Proposed Decision, ORC also requested that the DOE permit the firm to calculate its increased product and nonproduct cost on the basis of the actual purchase price of Apco's inventory at the Cyril refinery. The DOE found that this method of calculating costs could result in a misallocation of costs between the cost of inventory and the costs of the refinery itself. The DOE therefore concluded that the method indicated in the February 6 Proposed Decision, which would instead require ORC to assume Apco's actual costs of the inventory purchased, would result in a more consistent application of § 212.83 and would prevent the sudden and unwarranted price variations which might result from using a negotiated price for Apco's inventory on the date of the sale of the Cyril refinery.

The DOE issued a Decision and Order which finalized the proposed determination except as noted above.

REMEDIAL ORDERS

Drew Cornell, Inc., Lafayette, Louisiana, DRO-0003, crude oil

Drew Cornell, Inc. objected to a Proposed Remedial order which the DOE Region VI Office issued to the firm on January 27, 1978. In the Proposed Remedial Order the Regional Office found that during the period September 1, 1973 through June 30, 1976, Cornell erroneously treated the V. Boagni and V. Boagni "C" leases as two separate "properties" as that term is defined in 6 CFR 150.354(b) and 10 CFR 212.72, and as a result had sold crude oil produced from the leases at unlawful price levels. The Proposed Remedial Order therefore directed Cornell to refund to the purchaser the full amount of the overcharges, plus interest. In considering Cornell's objections the DOE noted that the definition of the term "property" which was applicable during the period of the alleged overcharges was based exclusively upon the right to produce crude oil conveyed by the governing oil and gas lease or other instrument. The DOE therefore determined that the execution of a new lease covering a portion of a premises subject to an already existing right to produce does not create a new property with a separate BCPL of zero. The DOE also found that, contrary to the contentions advanced by Cornell, the circumstances surrounding crude oil production at the V. Boagni and V. Boagni "C" leases are readily distinguishable from the special cases identified in Rulings 1977-1 and 1977-2 in which separate property treatment for portions of premises subject to a single right to produce would be permitted. The DOE additionally rejected Cornell's contentions that the interest payments required by the the Proposed Remedial Order were excessive and punitive in nature. Finally, with respect to Cornell's claim that it should not be held liable for the entire amount of overcharges since its working interest in the property is only 2.7 percent, the DOE determined that the objective of compensating the purchaser for the overcharges might well be frustrated if Cornell were required to meet the full refund requirement of the Proposed Remedial Order. Consequently, the DOE remanded the Proposed Remedial Order to the Regional Director of Enforcement of Region VI with instructions to formulate a price reduction arrangement under which each working interest owner will bear its proportionats share of the refund burden.

Norco Oil Company, Cheboygan, Michigan, DRO—0064, DRH-0064

Norco Oil Company filed a Statement of Objections and a Motion for Evidentiary Hearing in connection with a Proposed Remedial Order which DOE Region V issued to the firm on March 20, 1978. After reviewing the Norco submissions, the DOE determined that additional information was necessary. Norco failed, however, to respond to numerous requests that it submit the additional information. The DOE therefore determined that the Statement of Objections and the Motion for Evidentiary Hearing should be dismissed with prejudice. Accordingly, the Proposed Remedial Order was issued as a final Remedial Order of the Department of Energy.

In the following case involving a Proposed Remedial Order, no Statement of Objections was filed. The DOE therefore issued the Remedial Order in final form.

Selby Williams, Piketon, Ohio, DRW-0001

REQUEST FOR MODIFICATION AND OR RESCISSION

Sun Company, Inc., Dallas, Texas, DMR-0018, natural Gas

The Sun Company, Inc. filed an Application for Modificiation or Rescission of a Decision and Order which was issued by the DOE to the firm on February 27, 1978. *Sun Co., Inc.*, Case No. DEE-0068 (Unreported Decision issued February 27, 1978). In that Decision, the DOE granted Sun an exception to 10 CFR 212.165 and permitted it to increase prices for natural gas liquids to reflect the increased non-product costs which the firm incurred at its Putnam-Oswego natural gas processing plant. The firm stated in its Application for Modification that in January 1978 the Putnam-Oswego plant was converted from the production of natural gas liquids (NGL's) to the production of natural gas liquid products (NGL products). The firm contended that since 10 CFR 212.165 limited to $.005 per gallon the amount of non-product costs associated with the production of NGL's which a firm may automatically pass through to its customers in the form of higher prices, and since the non-product cost passthrough provided for NGL products is only $.00375 per gallon, the firm was entitled to modification relief which would permit it to charge an additional $.00125 per gallon for the NGL products produced at the Putnam-Oswego plant since January 1978. In support of its contention, the firm stated that the Mobil Oil Corporation, the operator of Sun's plant, failed to notify Sun that the plant had been converted to NGL products. Sun contended that it had met the criterion of significantly changed circumstances set forth in 10 CFR 205.135(b) and that a modification should therefore be granted. In rejecting that contention, the DOE stated that any firm which seeks exception relief is under an affirmative duty to take all necessary steps to ensure that all factual representations made in support of an exception request accurately reflect the current situation of the firm. The DOE found that Sun had failed to make the showing necessary to qualify for modification relief under the criterion of significantly changed circumstances since the firm could easily have taken steps to inform itself of the conversion of its plant and to inform the DOE accordingly. Sun's Application for Modification was therefore denied.

REQUEST FOR STAY

Texas City Refining, Inc., Texas City, Texas, DES-0105 crude oil

Texas City Refining, Inc. (TCR) filed an Application for Stay in which it requested that it be relieved of any obligation to purchase entitlements during the months of September through November 1978. On September 22, 1978, the DOE issued a Decision and Order to TCR in which it denied the firm's initial request for a stay of its entitlement purchase obligation during these months. In its second Application for Stay, TCR presented updated financial information and argued that this material demonstrated that it would incur an irreparable injury in the absence of a stay. In considering the TCR request, the DOE concluded that the financial difficulties being experienced by the firm were not primarily attributable to DOE regulations. In view of this finding, the DOE concluded that only a very strong showing that the firm had made a diligent effort to minimize its cash flow problem before requesting assistance from the DOE would justify the approval of the requested stay. The DOE concluded that TCR had not made that showing. In reaching this conclusion, the DOE found that TCR had made a discretionary business decision to incur a sizable loss on the sale of motor gasoline to its parent corporations prior to restoring its refinery to normal operation. The DOE also found that TCR had placed an additional strain on its financial resources by electing to expand immediately its refining capacity even though its cash position had significantly worsened as a result of the refinery fire. In addition, the DOE observed that TCR had made virtually no effort to obtain funds from its parent corporations even though the record indicated that those firms had a strong vested interest in the continuation of operations by their subsidiary. Finally, the DOE concluded that TCR had not satisfied any of the criteria for a stay set forth in Part 205 of the DOE Procedural Regulations. Accordingly, the TCR request was denied.

MOTION FOR EVIDENTIARY HEARING

Valley Oil Corporation, Staunton, Virginia, DEH-0119 motor gasoline

Valley Oil Corporation (Valley) filed a Motion for Evidentiary Hearing in which it requested that an evidentiary hearing be convened in connection with the DOE's consideration of a Statement of Objections to a Proposed Exception Decision and Order issued to the firm on March 10, 1978. In its Motion Valley requested that it be permitted to present witnesses to testify that the DOE's regulations were ambiguous and that it received contradictory guidance from agency officials regarding the proper method of calculating its cost of product in inventory. In considering the Valley request, the DOE found that the preliminary determination reached in the Proposed Decision and Order issued to the firm would not be influenced by specific evidence regarding the clarity of the DOE regulations. Consequently, Valley's request for an evidentiary hearing was denied.

INTERLOCUTORY ORDER

Husky Oil Company of Delaware, Denver, Colorado, DEZ-0112 crude oil

On September 20, 1978, the United States District Court for the District of Wyoming remanded to the DOE for reconsideration a Decision and Order issued to the Husky Oil Company of Delaware (Husky) by the Federal Energy Administration on December 15, 1976. *Husky Oil Co. of Delaware*, 4 FEA Par. 83,244 (1976), *aff'd*, 5 FEA Par. 80,649 (1977). In that Decision, the FEA granted Husky a partial exception from the provisions of 10 CFR 211.67 (the Entitlements Program). In remanding the Husky exception request to the DOE, the District Court ordered the DOE to recalculate the level of relief which had been approved in the December 15 order and to disregard any negative historical profit margin, crude oil production activities or profits, or base years unrepresentative of Husky's historical financial and operating position. After reviewing the record developed in the prior Husky exception proceedings and the directive of the District Court, the DOE concluded that its reconsideration could not be premised on the use of the standards established in *Delta Refining Co.*, 2 FEA Par.

V 4 4 / 1 3 J A 1 8 7 9 UMI

83,275 (1975). Consequently, the DOE determined on a preliminary basis that the standard which should be adopted in its reconsideration of the Husky exception request is one which will prevent the entitlement purchase obligations which Husky would otherwise have incurred from placing the firm's refining and marketing operations into a loss position. Finally, in view of the fact that the utilization of a new standard in this case would necessitate a *de novo* review of Husky's historical financial and operating position, the DOE stated its intention to request certain financial and operating data which will enable the DOE to fully reconsider the Husky Application for Exception.

SUPPLEMENTAL ORDER

Pawnee Petroleum Company, Seminole, Oklahoma, DRX-0117, crude oil

A Remedial Order which was issued to Pawnee Petroleum Company on August 9, 1978 implied that Pawnee could file an Appeal of that Order with the Federal Energy Regulatory Commission. In order to clarify Pawnee's appellate rights, the DOE amended the Order to state that the Remedial Order was a final order of the DOE from which any aggrieved party may seek judicial review.

DISMISSALS

The following submission was dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Equipment, Inc., Lafayette, Louisiana, DRH-0121

The following submissions were dismissed on the grounds that the requests are now moot:

Sun Company, Inc., Philadelphia, Pennsylvania, DES-0392
Sun Company, Inc., Philadelphia, Pennsylvania, DEA-0070

The following submission was dismissed after the applicant repeatedly failed to respond to requests for additional information:

Helter Gas Company, Oran, Missouri, DEE-1112

The following submissions were dismissed on the grounds that alternative regulatory procedures existed under which relief might be obtained:

Standard Oil Co. of California, San Francisco, California, DEE-1911 through DEE-1918, DXE-1919 through DXE-1935
Sun Company, Inc., Dallas, Texas, DXE-1945

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street, N.W. Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

JANUARY 12, 1979.

[6450-01-M]

ISSUANCE OF DECISIONS AND ORDERS

Week of October 23 through October 27, 1978

Notice is hereby given that during the week of October 23 through October 27, 1978, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the office of Hearings and Appeals and the basis for the dismissal.

APPEALS

Ernest E. Allerkamp, San Antonio, Texas, DRA-0042, crude oil

Ernest E. Allerkamp filed an Appeal from a Remedial Order issued to him by FEA Region VI on September 9, 1977. In that Remedial Order, Region VI found that Allerkamp had improperly classified as stripper well properties the Halff & Oppenheimer property in Frio County, Texas, and the M. A. Tyler property in McMullen County, Texas. In his Appeal, Allerkamp maintained that the Halff & Oppenheimer property actually consisted of two properties, the Navarro Lease and the Austin Chalk Lease, and he claimed that the Navarro Lease qualified as a stripper well property on the basis of its 1972 production. In considering the Appeal, the DOE observed that Allerkamp had not contested the DOE's treatment of the Halff & Oppenheimer property as a single property prior to his Appeal. Nevertheless, the DOE exercised its discretion to consider this issue on Appeal in view of material submitted by Allerkamp which strongly indicated that the Halff & Oppenheimer property did in fact consist of two separate and distinct properties. In this regard, the DOE observed that the record developed by Region VI contained information which should have led that Office to determine whether one or two properties existed. The DOE also concluded that the data submitted by Allerkamp supported his contention that the Navarro Lease qualified as a stripper well property on the basis of 1972 production. In view of these findings, the DOE remanded the Remedial Order for further consideration.

Arizona Fuels Corporation, Salt Lake City, Utah, FXA-1474, crude oil

Arizona Fuels Corporation appealed from a Decision and Order which the FEA issued to it on July 12, 1977. *Arizona Fuels Corporation*, 6 FEA Par. 83,033 (1977). In that determination, the FEA granted Arizona Fuels an exception from the provisions of 10 CFR 211.67 (the Entitlements program) which extended the firm's prior exception relief through December 1977. The Arizona Fuels' Appeal, if granted, would provide additional entitlement exception relief for that period. In its Appeal, Arizona Fuels contended that the prior Decision was based on inaccurate financial data. In considering the Appeal, however, the DOE found that the FEA's determination relied on data which the firm itself had submitted. in addition, the DOE rejected the contention that the July 12 Decision should be revised to reflect an entitlement obligation based on the firm's corrected data because the DOE would review the financial projections at the end of the current fiscal year in any event. Accordingly, the Arizona Fuels Appeal was denied.

Depco, Inc., Renville County, North Dakota, DRA-0068, crude oil

Depco, Inc. filed an Appeal from a Remedial Order issued to the firm by DOE Region VIII on November 14, 1977. In the Remedial Order, DOE Region VIII found that Depco had erroneously classified 75 percent of the production from the Bryans No. 1 well as new crude oil by attributing that production to an adjoining property with a base production control level (BPCL) of zero. According to the Remedial Order, Depco attributed 75 percent of its production to the adjoining property because the Bryans lease occupied only 25 percent of a state-imposed Spacing Unit. In its Appeal, Depco asserted that the crude oil was properly attributed to the adjoining property in compliance with North Dakota state law. Depco also stated that if DOE regulations did not permit the firm to attribute production from one property to another, then the federal regulations would conflict impermissably with state law. In considering the Depco Appeal, the DOE first noted that its regulations did not permit a firm to ascribe the production from one property to another property since that policy would circumvent the intent of the price regulations. In addition, the DOE found that its price regulations did not conflict with the provisions of state law because, contrary to Depco's claim, the North Dakota Spacing Order which established the spacing units did not require production to be attributed from one property to another. Therefore, Depco's Appeal was denied.

Dunaway, McCarthy & Dye, P.C., Washington, D.C., DFA-0223, Freedom of Information

Dunaway, McCarthy & Dye, P.C. (DMD) appealed from a partial denial of a request for information which the firm had submitted under the Freedom of Information Act (FOIA). In its Appeal, DMD requested that the DOE direct the Information Access Officer to release documents which were withheld from the firm pursuant to the exemptions set forth in 5 U.S.C. 552(b). In considering the Appeal, the DOE determined that the three documents which had been withheld pursuant to Section 552(b)(4) should be released because the disclosure of the commercial information contained in those documents was unlikely to cause substantial competitive harm to the firms involved. With respect to those documents withheld pursuant to Section 552(b)(5), the DOE concluded that with the exception of certain segregable nonexempt portions which were releasable, these documents were properly withheld because they consisted of nonfactual predecisional intra-agency materials that were used in the department's deliberative process. In addition, the DOE found

that a "Regional Compliance Review" was properly withheld under Sections 552(b)(5) and (7A) because it contained investigative materials of a deliberative nature, the release of which would interfere with an ongoing enforcement proceeding. The DOE did, however, direct the release of a letter sent by the Federal Energy Administration to a committee of the House of Representatives, which had been withheld pursuant to Sections 552(b), 552(7A) and 552(7E). The DOE found that the release of this material would not interfere with any ongoing investigation and would not disclose investigatory techniques or procedures of the department. The DOE also directed the release of three documents which were arguably exempt, after finding that disclosure would not be contrary to the public interest.

Enterprise Products Company, Houston, Texas, FRA-1200, propane

Enterprise Products Company appealed from a Remedial Order for Immediate Compliance which was issued to the firm by FEA Region IV on February 16, 1977. The Remedial Order directed Enterprise to make available to Horne Products, Inc. that firm's base period use of propane at a pipeline terminal in Albany, Georgia. In its Appeal, Enterprise contended that it had acted in accordance with its normal business practices when it refused to supply Horne at the Albany terminal. In considering the Enterprise Appeal, the DOE found that during the base period, Enterprise had employed a prorationing policy to allocate transport rights on the pipeline during periods of excess demand. The DOE found, however, that FEA Region IV had failed to consider Enterprise's normal business practices in issuing the Remedial Order to the firm. Based on these findings, the DOE concluded that the Remedial Order should be remanded for further consideration.

Hedrick and Lane, Washington, D.C., DFA-0209, Freedom of Information

The law firm of Hedrick and Lane appealed from a denial of a request for information which the firm had submitted under the Freedom of Information Act (the FOIA). In its request, the firm sought the release of a document entitled "Joint Committee Policy and Progress in the H-Bomb Program: A Chronology of Leading Events, January 1, 1953" (the Chronology). The Information Access Officer had denied Hedrick and Lane's request on the ground that the Chronology was not an agency record, but was instead a Congressionally-generated document which remained the exclusive property of Congress, despite the fact that it was in the possession of the DOE and its predecessors. In considering the Appeal, the DOE noted that the FOIA did not define the term "agency records." The DOE referred, however, to a memorandum from the United States Attorney General which stated that the FOIA required the disclosure of "records in being and in the possession or control of an agency." According to the DOE, the Attorney General's position was consistent with the policy of full disclosure underlying the FOIA. The DOE determined that the Chronology was an "agency record" which would be subject to disclosure unless it fell within one of the nine categories of information listed in the FOIA. The DOE therefore remanded the proceeding for a determination as to its releasability and directed DOE officials to determine whether the information contained in the Chronology remained classified.

Richard Levy, Alexandria, Virginia, DFA-0219, Freedom of Information

Richard Levy appealed from a partial denial by the DOE Information Access Officer of a request for information which he had filed under the Freedom of Information Act (the Act). In his request, Levy had sought all documents in the custody of DOE Region VIII concerning his client, the Taylor Oil Company. The Information Access Officer released copies of several documents to Levy, but withheld 37 documents on the grounds that they satisfied one or more of the exemptions to the mandatory disclosure provisions of the Act. The Information Access Officer also withheld 28 documents on the ground that they were predecisional intra-agency memoranda, which are exempt from disclosure pursuant to Section 552(b)(5) of the Act. In addition, seven documents were withheld on the ground that they contained confidential financial information that was exempt from public disclosure under Section 552(b)(4) of the Act. Thirty-six documents were also withheld on the rationale that as part of an ongoing enforcement proceeding, they were exempt from mandatory disclosure under Section 552(b)(7)(A) of the Act. Finally, the Information Access Officer withheld one document on the ground that it was related solely to internal agency practices and was therefore exempt from disclosure, pursuant to section 552(b)(2) of the Act. Upon review of these documents, the DOE determined that five of the 28 documents which were withheld under Section 552(b)(5) did not contain predecisional analyses and recommendations, the release of which would injure the agency's deliberative processes. Therefore, the DOE concluded that those five documents did not properly fall within the exemption set forth in Section (b)(5) and directed their release. The DOE further determined that the seven documents withheld under Section 552(b)(4) contained confidential trade information that could harm the competitive position of Taylor. The DOE noted, however, that the Information Access Officer generally releases such information to counsel for the firm to which the information refers. Because the present denial apparently was made without knowledge of Levy's status as counsel for Taylor, the DOE ordered the release of the documents withheld under Section 552 (b)(4) that did not contain material protected from disclosure by Section 552(b)(5) of the Act. In addition, the DOE determined that the ten documents, or portions thereof, that were not exempt from disclosure under Sections 552(b)(4) and (b)(5) of the Act were also not exempt from disclosure under Section 552(b)(7)(A), because their release would not interfere with the ongoing enforcement proceedings against Taylor. Finally, the DOE determined that the single document withheld pursuant to Section 552(b)(2) was not exempt from disclosure because its release would not disclose any internal DOE investigative technique. Based on these determinations, the Levy Appeal was granted in part and denied in part.

Louisiana Crude Oil and Gas Company, Inc., New Orleans, Louisiana, DRA-0109, crude oil

Louisiana Crude Oil and Gas Company, Inc. filed an Appeal from a Remedial Order which the Acting Regional Director of Enforcement of DOE Region VI issued to the firm on December 1, 1977. In that Remedial Order, Region VI determined that Louisiana Crude had improperly treated Tract 988 and 988A as a single property and had sold crude oil produced from these properties at unlawful price levels. On the basis of these findings, Louisiana Crude was directed to refund the overcharges which it had obtained. In considering the Appeal, the DOE found that Shell Oil Company subdivided the property into Tract 988 and 988A in 1968 and that two separate properties existed on January 1, 1972. With respect to Louisiana Crude's contention that the Remedial Order did not contain specific findings of fact to support the Regional Office's calculation of ceiling prices and cumulative deficiencies, the DOE determined that the Remedial Order did not provide sufficient information regarding the volume of new crude oil produced from Tract 988A. Therefore, the DOE granted the Appeal in part and remanded that portion of the Remedial Order to DOE Region VI for further elaboration of the calculations contained in the Remedial Order.

McAfee, Taft, Mark, Bond, Rucks & Woodruff, Oklahoma City, Oklahoma, DFA-0222, Freedom of Information

The law firm of McAfee, Taft, Mark, Bond, Rucks and Woodruff (McAfee) appealed from a denial of a Request for Information that the firm submitted under the Freedom of Information Act (the Act) on behalf of its client, Unit Operations, Inc. In its request McAfee sought copies of three interviews conducted by a DOE investigator with former employees of Unit Operations. The Information Access Officer withheld the documents on the grounds that they fell within the scope of the exemption for investigatory records specified in Section 552(b)(7)(a). In considering McAfee's Appeal, the DOE determined that the interviews contained information relating to an ongoing DOE investigation. The DOE concluded that disclosure of the nature of the government's enforcement proceeding against Unit Operations at the present time would make it more difficult to secure voluntary compliance from the firm, which is an integral part of the DOE enforcement program. Accordingly, McAfee's Appeal was denied.

State of Hawaii; Chevron U.S.A., Inc., Union Oil Company of California, Honolulu, Hawaii, FXA-1488; FXA-1489; FXA-1473; motor gasoline and diesel fuel

The State of Hawaii, Chevron U.S.A., Inc. and Union Oil Company of California filed Appeals from a Decision and Order that the FEA had issued to the State. State of Hawaii, 6 FEA Par. 83,046 (1977). In the previous Decision, the FEA granted a request for exception relief from the provisions of Section 212.83 that permitted certain refiners to increase prospectively their maximum permissible prices for motor gasoline and diesel fuel to reflect an increase in a license tax imposed by the State. The FEA denied a request for similar relief on a retroactive basis. In considering the three Appeals, which were consolidated for resolution in a single proceeding, the DOE first noted that the relief requested by the State had already been granted on a prospective basis in an earlier Decision. *State of Hawaii*, 3 FEA Par. 83,245 (1976). With respect to the pres-

V 4 4 / 1 3 JAN 18 79 UMI

ent request, which was limited to the period prior to the issuance of the 1976 Decision, the DOE found that the same circumstances which led to approval of prospective exception relief were present during the earlier period as well. The DOE therefore concluded that the State's request for additional relief would have been granted if it had applied on a timely basis. In addition, the DOE determined that there were compelling reasons that justified the approval of retroactive relief. In this regard, the DOE noted that the State's principal objectives in enacting the license tax were (i) to distribute the burdens of maintaining the State highway system equitably among highway users and (ii) to encourage conservation of the State's energy resources. The DOE found that these objectives would be frustrated if retroactive relief were not granted which permitted distributors to pass through the full amount of the increased license tax to their customers. Therefore, the three Appeals were granted.

PETITION FOR SPECIAL REDRESS

Lerner Oil Company, Inc., Gardena, California, DSG-0024, motor gasoline

Lerner Oil Company, Inc. filed a Petition for Special Redress with the DOE Office of Hearings and Appeals. In its Petition, Lerner requested that the DOE issue an order directing the Region IX Office to issue a Remedial Order on the basis of a complaint that Lerner filed against its base period supplier of motor gasoline. In considering the petition, the Office of Hearings and Appeals indicated that the decision whether to commence compliance proceedings against a particular firm is a matter of prosecutorial discretion. Accordingly, the Office of Hearings and Appeals held that it would not issue an order directing that a prosecution be initiated in the absence of a *prima facie* showing of a gross abuse of discretion on the part of the enforcement officials or a showing that the reasons provided for the Regions's actions are patently erroneous. The DOE found that Lerner had submitted no evidence to indicate that the failure of Region IX to issue a Remedial Order fell within either of these criteria. Therefore, the Lerner Petition for Special Redress was denied.

REQUESTS FOR EXCEPTION

Aminoil U.S.A., Inc., Washington, D.C., DEE-1432 crude oil

Aminoil U.S.A., Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit the firm to sell the crude oil produced from the California State Lease 392, Lower Main Zone at upper tier ceiling prices. In considering the exception application, the DOE determined that the costs of producing crude oil from the Lower Main Zone had increased significantly since 1973 and that Aminoil's costs of production exceeded the prices that the firm was permitted to charge for the crude oil. Consequently, the DOE concluded that Aminoil did not have an economic incentive to continue to operate the Lower Main Zone. The DOE also found that the recoverable crude oil in the reservoir underlying the Lower Main Zone would not be produced in the absence of exception relief. On the basis of precedents involving similar factual situations, the DOE concluded that the application of the lower tier ceiling price resulted in a gross inequity to Aminoil. Based on operating data which the firm submitted for its most recently completed fiscal period, the DOE granted exception relief which permitted the firm to sell at upper tier ceiling prices 28.32 percent of the crude oil produced and sold for the benefit of the working interest owners from the Lower Main Zone.

R. H. Engelke, San Antonio, Texas, DXE-1667 crude oil

R. H. Engelke filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would extend the exception relief previously granted to Engelke and permit him to continue to sell a portion of the crude oil produced from the Bertha Copsey lease located in Jackson County, Texas, at upper tier ceiling prices. In considering the exception application, the DOE found that Engelke had continued to experience increased operating expenses at the lease and that in the absence of exception relief, the working interest owners would lack an economic incentive to continue to produce crude oil from the property. On the basis of operating data which Engelke had provided for the most recently completed fiscal period, the DOE granted exception relief which permitted Engelke to sell 98.14 percent of the crude oil produced for the benefit of the working interest owners from the Bertha Copsey Lease at upper tier ceiling prices.

Getty Oil Company, Los Angeles, California, DEE-1377, through DEE-1381, crude oil

Getty Oil Company filed five Applications for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would permit Getty to sell the crude oil produced from five properties located on the Zaca Field near Santa Maria, California, at upper tier or market price levels. In considering the exception applications, the DOE determined that the operating costs for each of the properties had increased to the point where the firm no longer had an economic incentive to continue the production of crude oil from the properties. The DOE also found that if Getty abandoned its operations at the five properties, a substantial quantity of otherwise recoverable domestic crude oil would not be produced. In order to provide Getty with an economic incentive to operate the properties, exception relief was granted which permitted the firm to sell a portion of the crude oil produced for the benefit of the working interest owners from three of the leases at upper tier ceiling prices. In addition, the DOE granted exception relief which permitted Getty to sell a portion of the working interest share of production from the remaining two leases at market price levels.

P & M Petroleum Management, Denver, Colorado, DXE-1606 crude oil

P & M Petroleum Management filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would result in the extension of exception relief previously approved and would permit P & M to continue to sell a portion of the crude oil produced from the Track Lease in the Tule Creek South field in Roosevelt County, Montana, at upper tier ceiling prices. In considering the exception request, the DOE found that P & M had continued to incur increased operating costs in connection with the Track Lease and that in the absence of continued exception relief, P & M would lack an economic incentive to produce crude oil from the property. On the basis of the financial data which P & M provided for the most recent six-month period, the DOE granted exception relief which permitted P & M to sell at upper tier ceiling prices 68.65 percent of the crude oil produced from the Track Lease for the benefit of the working interest owners.

Standard Oil Company (Indiana), Chicago, Illinois, DEE-0252, natural gas liquids

The Standard Oil Company (Indiana) (SOC) filed a Statement of Objections to a Proposed Decision and Order issued to SOC on February 13, 1978. In the Proposed Decision, the DOE tentatively determined that the firm should be granted an exception from the provisions of 10 CFR 212.165 which would permit it to increase its prices for natural gas liquids and liquid products to reflect non-product cost increases incurred at its Bairoil natural gas processing plant. The DOE also noted in the proposed determination that the Bairoil-facility had been shut down for repairs for a portion of the third quarter of the firm's 1977 fiscal year, resulting in a lower level of production during that quarter than SOC otherwise would have obtained. Accordingly, the DOE utilized production volume data from the fourth quarter of 1977 in its calculations of increased costs. In objecting to this methodology, SOC contended that the DOE should have used both cost as well as production volume data for the fourth fiscal quarter of 1977 since its cost data for the third quarter was also unreasonably low, due to the shutdown. Although the record contained no written submission from SOC of its cost or production volume data for the fourth quarter of 1977, the DOE noted that the production volume data appeared in Table A of the Proposed Decision and Order. Moreover, SOC had submitted an affidavit which indicated that the firm's fourth quarter cost and production volume data was provided to the DOE in a telephone conversation prior to issuance of the Proposed Decision and Order. The DOE concluded that it should incorporate that data in its calculation of non-product costs. On the basis of that data, the DOE found that the level of exception relief granted in the Proposed Decision should be increased from $.0064 to $.0109 per gallon.

REMEDIAL ORDERS

Bright & Schiff, Dallas, Texas, DRO-0099, crude oil

Bright and Schiff filed a Statement of Objections to a Proposed Remedial Order which FEA Region VI issued to the firm on September 2, 1977. The Proposed Remedial Order found that Bright & Schiff had incorrectly classified its A. E. Webb lease in Yokum, Texas, as a stripper well property and improperly sold crude oil produced from that property at market price levels. In reaching this determination, FEA Region VI relied upon Ruling 1974-29 as a basis for its calculations of the lease's average daily production (ADP). In its Statement of Objections, Bright & Schiff contended that the FEA erroneously excluded injection wells from the calculation of the ADP of the Webb lease under the recent holding in *Energy Reserves Group, Inc. v. FEA*, 447 F. Supp. 1135 (D. Kan. 1978). In that case, a

Federal district court invalidated Ruling 1974-29, which specifies that injection wells are not to be counted in determining the ADP of a crude oil producing property. The DOE noted, however, that the department's Office of Enforcement had not acquiesced in the district court's opinion and was continuing to enforce Ruling 1974-29 against all firms except the plaintiffs in that lawsuit, pending a decision by the Temporary Emergency Court of Appeals on an appeal on the *Energy Reserves* case. Since the DOE in a prior decision had approved the Office of Enforcement's policy of continuing to enforce Ruling 1974-29, the DOE found no basis to suspend enforcement of the Ruling in the present proceeding. The DOE also rejected Bright & Schiff's claim that the FEA lacked the authority to assess interest on the overcharges specified in its Proposed Remedial Order. Bright & Schiff's Statement of Objections was therefore rejected, and the Proposed Remedial Order was issued as a final order of the DOE.

In the following cases involving Proposed Remedial Orders, no Statements of Objections were filed. The DOE therefore issued Remedial Orders in final form.

NAME, LOCATION AND CASE NO.

Greene Oil Company, Letcher, South Dakota, DRW-0005
O'Kun Fluid Service, Inc., Liberal, Kansas, DRW-0009
Butler Fuel Company, Oxford, Massachusetts, DRW-0004
Jedco, Inc., Mobile, Alabama, DRW-0006
John T. Ackerman, Sisseton, South Dakota, DRW-0002
R. W. Jones & E. Haag, A Copartnership, Freer, Texas, DRW-0007

MOTIONS FOR EVIDENTIARY HEARING

Marine Petroleum Company, Washington, D.C.; Tresler Oil Company, Washington, D.C.; Independent Terminal Operators Association, Washington, D.C.; Northeast Petroleum Industries, Inc., Washington, D.C.; Mid-Valley Petroleum Company, Washington, D.C.; Gibbs Oil Company, Washington, D.C.; Supreme Petroleum Company of New Jersey, Washington, D.C., DRH-0019; DRH-0025; DRH-0024; DRH-0011, motor gasoline

Seven intervenors filed Motions for Evidentiary Hearing in connection with an Appeal proceeding involving a Remedial Order issued to Champlin Petroleum Company. In considering the Motions, the DOE found that the issues raised by the intervenors could best be resolved through the submission of documentary evidence, rather than oral testimony at an evidentiary hearing. Although the Motions were accordingly denied, the DOE permitted the intervenors to file additional documentary submissions in support of their positions.

Quincy Oil, Inc.; Quincy, Massachusetts, Taunton Municipal Lighting Plant, Taunton, Massachusetts, DEH-0028; DEH-0029, fuel oil

Quincy Oil, Inc. and Taunton Municipal Lighting Plant filed Motions for Evidentiary Hearing in connection with the DOE's consideration of Statements of Objections which the two firms had filed to a Proposed Decision and Order issued to Quincy on March 17, 1978. In that Proposed Decision, the DOE tentatively determined that Quincy's Application for Exception from the provisions of 10 CFR 212.93 should be granted in part. The DOE had also issued a determination relating to portions of the Quincy and Taunton requests for an evidentiary hearing. *See Quincy Oil, Inc.*, 2 DOE Par. —— (August 31, 1978). The present proceeding related to the remaining issues in the parties' Motions for Evidentiary Hearing. The DOE first considered Quincy's request that it be permitted to present the testimony of DOE officials to demonstrate that FEA Ruling 1977-5 constituted an impermissible retroactive change in regulatory requirements. With respect to this issue, Quincy first sought to examine the deliberative processes of DOE officials that led to the issuance of FEA Ruling 1977-5. The DOE determined that this request should be denied under the standards announced in *Champlin Petroleum Co.*, 2 DOE Par. —— (October 13, 1978). The DOE observed that Quincy had failed to establish that the agency left no written record of its reasons for issuing the Ruling. Therefore, the DOE held that an examination of the thought processes of departmental officials was not justified. Nevertheless, the DOE granted Quincy's request to examine agency personnel for the purpose of showing that previous informal interpretations of the regulatory term "transaction" were inconsistent with the use of that term in the Ruling. The DOE observed that the Ruling itself acknowledged that the term "transaction" had been subject to varying interpretations. In addition, the DOE found that during the period relevant to Quincy's exception requests, the agency had issued no rulings, interpretations, or decisional law clarifying the term "transaction." Since the issue of whether the interpretation of "transaction" contained in the Ruling constituted a departure from the agency's past practices was a principal issue in the pending exception proceeding, the DOE determined that Quincy should be permitted to explore that issue at an evidentiary hearing. The DOE also granted Taunton's request to present testimony on the question of whether Quincy would receive windfall benefits at Taunton's expense if exception relief were approved.

REQUEST FOR DISCOVERY

Leonard E. Belcher, Inc., Springfield, Massachusetts, DRD-0197 No. 2, heating oil

Leonard E. Belcher, Inc. filed a Motion for Discovery in connection with an Appeal which the firm has filed from a Revised Remedial Order. In that appellate proceeding, Belcher claimed that the overcharges set forth in that Remedial Order should be offset by voluntary price reductions allegedly implemented by the firm. In the present discovery request, the firm sought copies of certain remedial orders and consent orders issued by the DOE to other firms, as well as the administrative records underlying those determinations. Belcher also requested that if its Motion were denied, the DOE nevertheless grant a stay of the appellate proceeding pending a determination on a Request for Information which Belcher intended to file pursuant to the Freedom of Information Act. Belcher contended that the material it sought was necessary to clarify DOE enforcement policy with respect to voluntary refunds. In considering the firm's discovery request, the DOE noted that its policy governing offsets was set forth in a previous Decision issued to Belcher in connection with the present enforcement proceeding, *Leonard E. Belcher, Inc.*, 1 DOE Par. 80,183 (1978). The DOE also noted the Belcher could acquire the information through research conducted in the DOE Freedom of Information Reading Room. In its Motion, Belcher also renewed a request that the DOE subpoena certain personnel employed by five of Belcher's competitors. The DOE had previously considered and rejected this request in *Leonard E. Belcher, Inc.*, 2 DOE Par. 82,505 (1978), and again concluded that this information would not assist the DOE in determing whether Belcher's price reductions satisfy the *Mid-Continent* criteria. Accordingly, the DOE denied Belcher's discovery request. In evaluating the request for stay, the DOE found that the information sought by Belcher would not materially advance the appellate proceeding. The DOE also concluded that any further delay in the enforcement proceeding would adversely affect any customer who was actually overcharged and would frustrate the compelling public interest of securing timely compliance with the DOE price regulations. Accordingly, the DOE denied the Belcher stay request.

DISMISSALS

The following submission was dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Mid-America Refining Company, Washington, D.C., DEE-1421

The following submissions were dismissed on the grounds that recent regulatory changes have eliminated the need for the exception relief requested:

Coastal States Gas Corporation, Houston, Texas, DXE-1893
Texas Pacific Oil Company, Inc., Dallas, Texas, DEE-1970

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street, NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

ISSUANCE OF DECISIONS AND ORDERS

Week of October 30 Through November 3, 1978

Notice is hereby given that during the week of October 30 through November 3, 1978, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dis-

missed by the Office of Hearings and Appeals and the basis for the dismissal.

APPEALS

Andrews, Kurth, Campbell & Jones, Washington, D.C., DFA-0228, Freedom of Information

Andrews, Kurth, Campbell & Jones appealed from a partial denial by the Director of the Division of Freedom of Information and Privacy Act Activities (the Director) of a request for information which the firm had submitted under the Freedom of Information Act (FOIA). In its Appeal, Andrews requested that the DOE release the documents which had been withheld and order the Director to identify additional documents responsive to the firm's request. In considering the Appeal, the DOE determined that ten of the requested documents had been properly withheld by the Director under Section (b)(5) of the FOIA, which exempts from mandatory disclosure certain inter-agency and intra-agency memoranda. The DOE nevertheless directed the release of material in eight of those documents on the basis that disclosure would be in the public interest. With respect to the remaining documents withheld under other exemptions of the FOIA, the DOE determined that disclosure would not be in the public interest. Finally, the DOE released portions of two other documents since they did not fall within any exemption. The DOE also ordered the Director to identify with greater specificity certain documents responsive to Andrews' request.

Exxon Company, U.S.A., Washington, D.C., DFA-0216, Freedom of Information

Exxon Company, U.S.A. appealed from a partial denial by the Director of the Division of Freedom of Information and Privacy Act Activities (the Director) of a Request for Information which the firm submitted under the Freedom of Information Act, 5 U.S.C. 552 (FOIA). The Director had withheld a number of the requested documents under the provisions of Sections (b)(4), (b)(5), and (b)(7) (A) and (E) of the FOIA. In considering the Exxon Appeal, the DOE found that the Director had erred in allowing individual DOE offices to determine whether the request was for reasonably described documents. The matter was therefore remanded to the Director for a single determination as to whether the Exxon request reasonably described the records sought. The DOE also reviewed the documents which had been withheld by the Director and determined that a number of them should be disclosed.

Gray Operating Company, Oklahoma City, Oklahoma, DRA-0009, crude oil

Gray Operating Company appealed from a Remedial Order which the Acting Director of Enforcement of DOE Region VI issued to the firm on December 10, 1977. In the Remedial Order, Region VI found that Gray had sold crude oil produced from four properties at prices in excess of the maximum permissible prices. The Remedial Order therefore directed Gray to refund $31,170.23 in overcharges to its customers. In considering the Gray Appeal, the DOE determined that contrary to the firm's contention the DOE has the authority to issue remedial orders requiring restitution of revenues obtained in violation of the pricing regulations. The DOE also rejected Gray's claim that the Remedial Order had incorrectly applied the term "preceding calendar year." Finally, the DOE rejected Gray's claim that the overcharges should be offset by certain alleged undercharges to some of its customers. On the basis of the foregoing considerations, the DOE denied Gray's Appeal.

REQUESTS FOR EXCEPTION

Age Investment Co., Inc., Lynnwood, Washington, DRC-0006, motor gasoline

Age Investment Co., Inc. filed an Application for Exception from the provisions of 10 CFR 211.12 which, if granted, would result in the issuance of an order increasing Age's base period use of motor gasoline at a retail service station located in Lynnwood, Washington. In its Application, Age contended that the increased allocation was necessary to satisfy an increased demand for motor gasoline at the station since 1972. Age maintained that unless it received an increase in its base period use of motor gasoline, its financial position would be impaired and the firm would be unable to complete a capital expansion project at the station. After considering the firm's request, DOE Region X issued a Proposed Decision and Order in which it determined that the Age request should be denied. In considering the firm's Statement of Objections to the Proposed Decision, the DOE observed that, contrary to an argument advanced by Age, § 211.13(e) of the Mandatory Petroleum Allocation Regulations requires that a firm demonstrate that a serious hardship or gross inequity exists before it may be granted exception relief. The DOE determined that Age had failed to demonstrate that it was unable to obtain adequate supplies of motor gasoline. The DOE further found that the firm's claim of financial hardship was speculative and it had not shown that denial of its request would significantly frustrate one or more of the policy objectives of the Emergency Petroleum Allocation Act. Based on these findings, the DOE determined that Age had failed to demonstrate that it was experiencing a serious hardship or gross inequity and the firm's Application was therefore denied.

Clarke County Supply, Inc., Berryville, Virginia, DEE-0452, coal, No. 2 heating oil

Clarke County Supply, Inc. filed an Application for Exception from the requirement that it file Form EIA 2 ("Monthly Coal Report Retail Dealers—Upper Docks") and Form EIA 9 ("No. 2 Heating Oil Supply/Price Monitoring Report") with the DOE. In considering the exception request, the DOE found that Clarke should be able to compile the information required with minimal effort. The DOE also determined that Clarke had not demonstrated that any inconvenience that it might experience in filing the forms outweighed the benefits of compliance. Accordingly, the DOE denied Clarke's exception request.

Forty-One Petitioners, natural gas liquids, natural gas liquid products

Forty-one petitioners filed 239 Applications for Exception from the provisions of 10 CFR 212.165 requesting extensions of exception relief previously granted to them. However, the DOE recently amended § 212.165, providing that effective November 1, 1978 natural gas processors may pass through most increased non-product costs incurred in the production of natural gas liquids and natural gas liquid products. 43 FR 42984 (September 21, 1978). Those amendments have made it unlikely that continuing exception relief for the petitioners will be necessary after October 31, 1978. However, the DOE determined that exception relief should be approved for the month of October 1978. Accordingly, the DOE issued a Decision and Order which extended for the period October 1 through October 31, 1978 the exception relief that was previously granted to each of the petitioners.

Green's Propane Gas Company, Smiths, Alabama, DEO-0005, propane

Green's Propane Gas Company filed an Application for Exception from the provisions of 10 CFR 212.93 which, if granted, would permit it to charge prices for propane in excess of the maximum permissible prices. On February 10, 1978, DOE Region IV issued a Proposed Decision and Order to Green's which determined that relief should be granted prospectively from April 6, 1977 but denied prior to that date. A Consent Order was subsequently executed which resolved a compliance proceeding against Green's concerning the period from November 1, 1973 to March 31, 1974. Consequently, Green's withdrew its Statement of Objections to the proposed determination and the DOE issued the Proposed Decision and Order in final form.

L & H Gas and Electric Co., Inc., Sharon Springs, Kansas, DRC-0007, propane

L & H Gas and Electric Co., Inc. filed an Application for Exception from the provisions of 10 CFR 212.93 which, if granted, would permit L & H to retain revenues which it realized in sales of propane during the period October 1, 1973 through September 30, 1975. In its Application, L & H contended that retroactive exception relief was necessary because it would earn no profits if required to implement prospective price reductions. DOE Region VII issued a Proposed Decision and Order to L & H which determined that the exception request should be denied. In considering the firm's Statement of Objections, the DOE found that L & H's markup on sales of propane on May 15, 1973 was substantially lower that its historical markup. The DOE also found that if L & H had complied with the pricing regulations its pretax profits during the period in question would have been reduced significantly. The DOE concluded that if L & H were required to refund the alleged overcharges, the firm would probably have to cease its business operations. Accordingly, the Application for Exception was granted.

Mid-Michigan Truck Service, Inc., Kalamazoo Michigan, DXE-1147, motor gasoline

On May 10, 1978, the DOE issued a Supplemental Order to Mid-Michigan Truck Service, Inc. in which it approved an extension of exception relief previously granted to the firm. *Mid-Michigan Truck Service, Inc.*, 1 DOE par. 81,127 (1978). In that Order, the DOE directed Gulf Oil Corporation to supply Mid-Michigan with its base period use of petroleum products directly rather than through a substitute supplier. Based upon data submitted by Mid-Michigan in its present request and upon the recommendation of the Regional Administrator of DOE Region V, the DOE determined that Mid-Michigan would experience a serious hardship in te absence of continued exception relief. Accordingly, an extension of exception relief was approved through December 31, 1978.

North Pole Refining (a subsidiary of Earth Resources Company), Washington, D.C. FEE-4451, crude oil

North Pole Refining filed an Application for Exception in which it requested that the DOE treat it and Delta Refining Company as separate entities for purposes of the Crude Oil Buy/Sell program (§ 211.65) and the Old Oil Entitlements Program (§ 211.67). In considering the request, the DOE noted that North Pole and Delta are both owned and controlled by Earth Resources Company and are therefore a single firm under the Mandatory Petroleum Price and Allocation Regulations. The DOE found that there was no basis to conclude that treating the entities as a single firm would prevent them from recovering their increased costs under the DOE Regulations. The DOE also noted that North Pole had not alleged that it was currently incurring a serious hardship as a result of the provisions of the Crude Oil Buy/Sell Program, but had only speculated that it might incure a hardship at some time in the future. The DOE also concluded that the applicant was not experiencing a serious hardship or gross inequity as a result of being treated as the same firm as Delta for purposes of the Old Oil Entitlements Program. Accordingly, North Pole's Application for Exception was denied.

Panhandle Eastern Pipe Line Company, Houston, Texas, DEE-0349, DEE-0350, DEE-0351, DEE-0352, natural gas liquids, natural gas liquid products

The Anadarko Production Company, a subsidiary of the Panhandle Eastern Pipe Line Company (PEPLC) filed a Statement of Objections to a Proposed Decision and Order issued to PEPLC on February 28, 1978. In the Proposed Decision, the DOE determined that PEPLC should be granted an exception from the provisions of 10 CFR 212.165 to permit it to increase its prices for natural gas liquids and natural gas liquid products to reflect non-product cost increases at three of its natural gas processing facilities. In its Statement of Objections, Anadarko contended that the effective date of the Proposed Decision and Order should be December 1, 1977, the date on which its Applications for Exception were filed. Anadarko also contended that the Order should have been issued to it rather than to its parent firm. In rejecting these contentions, the DOE noted that Anadarko had apparently misconstrued the meaning of the term "prospective exception relief," which the DOE uses to indicate the time period following the issuance of a Proposed Decision and Order. The DOE found that since the firm had not demonstrated that it satisfied the criteria generally applied to requests for retroactive relief, it should not be granted relief prior to the date of the Proposed Decision and Order. The DOE also found that under the applicable definition of "firm" it could consider either Anadarko or PEPLC as the applicant for exception relief. Since Anadarko had not alleged that the issuance of a Decision to its parent would cause either of those corporate entities any difficulties, the DOE concluded that there was no reason to depart from its general practice of issuing Decisions involving the provisions of 10 CFR 212.165 to parent firms. Accordingly, the Statement of Objections was denied and the relief proposed in the February 28 Decision was made final.

Petroleum, Inc. Wichita, Kansas, DEE-0317, crude oil

Petroleum, Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which if granted, would permit the firm to sell all of crude oil produced from the Crowder Lease located in Cleveland County, Oklahoma, at upper tier ceiling prices. In considering the exception request, the DOE found that the operating costs involved in producing crude oil from the property had increased to a level where those costs exceeded the revenues which the firm could obtain from the sale of the crude oil at the applicable ceiling price levels. The DOE concluded that under these circumstances Petroleum did not have an economic incentive to continue to produce crude oil from the Crowder Lease. Accordingly, on the basis of recent operating data submitted by the firm, Petroleum was granted exception relief which permitted the firm to sell at upper tier ceiling prices 100 percent of the crude oil produced from the Crowder Lease for the benefit of the working interest owners for a period of six months.

Sabre Refining, Inc., Bakersfield, California, DXE-0346, crude oil

Sabre Refining, Inc. filed an Application for Exception from its regulatory obligations under the Old Entitlements Program (10 CFR 211.67). The exception request, if granted, would relieve the firm of any obligation to purchase entitlements for the period November 1977 through April 1978. On January 16, 1978, the DOE issued a Proposed Decision and Order in which it reached the preliminary determination that the level of relief to be granted to Sabre pursuant to the criteria established in *Delta Refining Co.*, 2 FEA Par. 83,275 (1975), should be limited to the maximum entitlement purchase obligation which the firm would incur during the current period if its level of crude oil receipts and runs to stills were the same as in 1975 (the 1975 ceiling). On the basis of the application of the 1975 ceiling, the DOE proposed to deny Sabre's request for exception relief for the period November 1977 through April 1978. In its Statement of Objections to the Proposed Decision, Sabre contended that the DOE could not apply the 1975 ceiling to exception relief calculated under the *Delta* standards without first complying with statutory rulemaking provisions. Sabre also asserted that the DOE impermissibly applied the modifications to the *Delta* standards retroactively. In considering Sabre's first contention, the DOE found that the *Delta* standards had been adopted in the context of an adjudicatory proceeding and that the modification of those standards in subsequent proceedings represented the continuing development of that area of administrative law through case-by-case adjudication. Therefore, the DOE concluded that the rulemaking provisions of the Administrative Procedure Act did not apply to the present proceeding. With respect to Sabre's second argument, the DOE concluded that its proposed action was prospective in nature since it concerned a period of time that had not previously been considered and did not alter any relief previously granted to the firm. The DOE therefore concluded that the modified *Delta* standard was not being applied in a retroactive manner. Although the DOE concluded that it would be appropriate to apply the 1975 ceiling to the entire period for which Sabre requested exception relief, equitable considerations led it to approve additional relief for the months of November and December 1977. With respect to the period January through April 1978, the DOE utilized the 1975 ceiling and concluded that no exception relief was warranted.

Southland Drilling Company, Inc., Houston, Texas, DEE-0113, crude oil

Southland Drilling Company, Inc. filed an Application for Exception from the provisions of 10 CFR, Part 212 Subpart D, which, if granted, would permit Southland to charge upper tier ceiling prices for the crude oil which the firm produced from the ARCO Castillo "A" Lease during the months of February, March, and April 1977. Southland stated that early in 1977 it had attempted to certify the crude oil produced from the lease as new oil pursuant to the provisions of 10 CFR 212.131(a), but that the necessary certification forms were apparently lost in the mail. As a result, the lease's production was not certified in a timely manner and Southland was not able to charge upper tier ceiling prices for the crude oil until May 1977. In considering the exception request, the DOE found that Southland had failed to provide any evidence that it actually mailed the certification forms in a timely manner. In addition, the DOE noted that Southland had not submitted any financial material indicating that the firm would experience a severe and irreparable injury in the absence of retroactive exception relief. Southland's Application for Exception was therefore denied.

REQUESTS FOR MODIFICATION AND/OR RESCISSION

Powerine Oil Company, Santa Fe Springs, California, DMR-0027, crude oil

Powerine Oil Company filed an Application for Modification in which it requested that the DOE modify a Decision and Order which was issued to the firm on April 11, 1977. *Powerine Oil Co.*, 5 FEA Par 80,603 (1977). In that Decision, the FEA concluded that Special Rule No. 6 did not preclude it from considering Powerine's operating profits during October 1975 through January 1976 in calculating exception relief from its entitlements purchase obligations for the firm's 1975 fiscal year. In a subsequent Decision, the DOE determined that operating results for the months of October 1975 through March 1976 should be excluded in calculating exception relief to small refiners for 1975. *Southland Oil Co.*, 1 DOE Par. 82,503 (1977). In the present proceeding, Powerine requested that the relief previously granted to the firm be modified to reflect the adjustment which was implemented in the *Southland* case. In considering Powerine's request, the DOE noted that the present circumstances were virtually identical to those in the *Southland* case. The DOE therefore concluded that the entitlement exception relief granted to Powerine for its 1975 fiscal year should be modified. However, the DOE denied Powerine's request that exception relief be based solely on its profit margin. In this regard, the DOE observed that it had consistently applied both a

V 4 4 / 1 3 J A 1 8 7 9 UMI

return on invested capital test and a profit margin test in granting exception relief to small refiners. Accordingly, the DOE amended the April 11, 1977 Decision and Orders and permitted Powerine to sell $1,271,648 in additional entitlements during November 1978.

Tenneco Oil Company, Houston, Texas, FMR—0107 motor gasoline

Tenneco Oil Company filed an application for Modification or Rescission of a Decision and Order which the FEA issued to it on March 31, 1977. *Tenneco Oil Co.*, 5 FEA Par. 80,590 (1977). In that determination, the FEA had upheld the previous denial of the firm's request for exception relief from the refiner price regulations with respect to sales of motor gasoline. According to Tenneco, the price regulations required it to establish a May 15 selling price for purchased gasoline that was less than the unit cost incurred on those purchases during May. Tenneco claimed that it was experiencing a gross inequity on gasoline sales due to the requirement that it include the negative May 15, margin in determining its maximum permissible selling prices. In considering the Tenneco request, the DOE found that the firm's margin on sales of gasoline on May 15, 1973 was less than its margin in 1971 and 1972. The DOE stated, however, that a decline in profitability per unit during the base period did not demonstrate the existence of a gross inequity, absent a showing of a significant adverse impact on the firm. In this regard, the DOE found that Tenneco's sales volumes of gasoline had increased during 1974 and 1975, offsetting the effect of the lower profit margin. In addition, the DOE found that Tenneco continued to realize significant profits on its revenues from gasoline sales. Based on these findings, the DOE affirmed its previous conclusion that Tenneco was not experiencing a gross inequity as a result of the pricing regulations. Accordingly, the Tenneco Application for Modification was denied.

REQUEST FOR STAY

Continental Oil Company, Houston, Texas, DES—1947, motor gasoline

Continental Oil Company filed an Application for Stay or the provisions of 10 CFR 211.10(b), in which it requested that the DOE permit it to apply a separate allocation fraction for its customers in Denver, Colorado and Billings, Montana. The stay was requested pending a determination on an Application for Exception which Continental has filed. In considering the Continental request, the DOE found that an explosion had rendered the firm's Denver refinery inoperative and that it was unable to transport sufficient amounts of gasoline into the Denver area to compensate for the loss of refining capacity. The DOE therefore concluded that Continental could not maintain a single allocation fraction for all of its customers. Accordingly, Continental's Application for Stay was granted.

REQUEST FOR TEMPORARY STAY

Continental Oil Company, Houston, Texas, DST-1979, motor gasoline

Continental Oil Company filed an Application for Temporary Stay of the provisions of 10 CFR 211.9, in which it requested that it be partially relieved of its obligation to supply gasoline to certain customers served by the firm's refineries in Denver, Colorado and Billings, Montana. In considering the request, the DOE found that due to an explosion which rendered Continental's Denver refinery inoperative it did not appear that the firm could supply all of the requirements of its Denver and Billings customers during November 1978. Accordingly, Continental's Application for Temporary Stay was granted.

MOTIONS FOR EVIDENTIARY HEARING

Atlas Gas Company, Jacksonville, Florida, DRH-0020, propane

Atlas Gas Company filed a Motion for Evidentiary Hearing in connection with a Statement of Objections to a Proposed Decision and Order which DOE Region IV issued to the firm on March 14, 1978. In considering the Atlas Motion, the DOE concluded that an evidentiary hearing should be convened in order to provide the firm with an opportunity to present evidence that Region IV calculated the overcharges in the Proposed Remedial Order on the basis of an incorrect formulation of the firm's classes of purchasers. The DOE denied the Atlas Motion with respect to its position that an audit completed on January 9, 1973 showed that Atlas was in compliance with the pricing regulations. The DOE found that Atlas would have a sufficient opportunity to support this contention through the submission of documentary evidence.

Peterson Oil Company, Inc., Red Cloud, Nebraska, DRH-0033, refined products.

Peterson Oil Company, Inc. filed a Motion for Evidentiary Hearing in connection with its Statement of Objections to a Proposed Remedial Order which DOE Region VII issued to the firm on April 7, 1978. In considering the Motion, the DOE determined that the facts which Peterson wished to establish at an evidentiary hearing concerning the operation of the wholesale portion of its business had been accepted as correct by the Office of Enforcement. Accordingly, the DOE concluded that there was no factual dispute between the parties and that an evidentiary hearing would therefore be unnecessary.

SUPPLEMENTARY ORDER

Tonkawa Refining Company, Washington, D.C., DEX-0120, refined petroleum products

On March 8, 1978, the DOE approved exception relief which permitted the Tonkawa Refining Company to be classified as a new refiner as of July 1, 1975, the date on which Tonkawa was released from Bankruptcy. *Tonkawa Refining Co.*, 1 DOE Par. 81,090 (1978). Subsequent to the issuance of that Decision, a dispute arose as to the proper calculation of the firm's increased product costs for the period July through December 1975. After reviewing the record in the matter, the DOE concluded that Tonkawa should be permitted to refer to the cost of crude oil purchased prior to July 1, 1975 in calculating its increased product costs. Accordingly, the March 8 Order was modified to permit Tonkawa to use the costs which it incurred in the month of June 1975 in establishing the cost of items offered for sale after July 1, 1975.

REMEDIAL ORDERS

In the following cases involving Proposed Remedial Orders, since no Statements of Objections were filed the DOE issued Remedial Orders in final form:

NAME, LOCATION, AND CASE NO.

Southern Texas Oil and Gas Producing Company, Inc., Corpus Christi, Texas; DRW-0012

Thomas Petroleum, Liberal, Kansas, DRW-0013

Mecca Oil Company, Olney, Illinois, DRW-0008

Robert L. Adams, Corpus Christi, Texas, DRW-0003

Peterson Gas Company, Harlan, Iowa, DRW-0010

J. L. and W. L. Pulsipher, d/b/a Webster Village, Salt Lake City, Utah, DRW-0011

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Dixie Gas Industries, Inc., Winter Park, Florida, DRA-0154; DRD-0154

Herlocker Fuel Company, Albemarle, North Carolina, DEE-1950

Robert E. Park, Casper, Wyoming, DRD-0046.

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street, NW., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

MELVIN GOLDSTEIN,

Director, Office of Hearings and Appeals.

[6450-01-M]

ISSUANCE OF DECISIONS AND ORDERS BY THE OFFICE OF HEARINGS AND APPEALS

Week of November 6 Through November 10, 1978

Notice is hereby given that during the week of November 6 through November 10, 1978, the Decisions and Orders summarized below were issued with respect to Appeals and Applications for Exception or other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions which were dismissed by the Office of Hearings and Appeals and the basis for the dismissal.

APPEALS

Cleary, Gottlieb, Steen & Hamilton, Washington, D.C., DFA-0230, Freedom of Information

The law firm of Cleary, Gottlieb, Steen & Hamilton appealed from a partial denial by the DOE Information Access Officer of a request for information which Cleary had filed under the Freedom of Information Act. In its request for information, Cleary had sought copies of 25 DOE memoranda contained in a document entitled "Clarifications". In response to Cleary's request, the Information Access Officer released six of the memoranda but withheld the remaining 19 under Exemption 5 of the Act, which generally protects from disclosure predecisional agency documents. In considering the Cleary Appeal, the DOE found that the withheld material formed part of the deliberative process of the agency regarding the implementation of various petroleum pricing regulations and therefore properly fell within the purview of Exemption 5. However, three of the memoranda contained segments of factual material which were segregable from the portions containing policy discussions and one memorandum contained material which was postdecisional in nature. The DOE determined that this material should have been released. Accordingly, the Cleary Appeal was granted in part.

Estate of H. L. Hunt, Allen and Beauregard Parishes, Louisiana, DRA-0076, crude oil

The Estate of H. L. Hunt appealed from a Remedial Order which had been issued to it by Department of Energy Region VI. In the Remedial Order, the DOE found that Hunt had improperly classified its Upper Bearhead Creek Unit as a stripper well property and as a result charged prices for the crude oil produced which were in excess of applicable ceiling price levels. The Remedial Order therefore directed Hunt to refund to the purchaser of the crude oil the excess revenues which Hunt had improperly obtained. In considering the Appeal, the DOE rejected Hunt's contention that the DOE lacked authority to require that interest be paid on the refund amount. The DOE found that the agency's statutory authority to impose interest charges had been established in a number of prior decisions and that the regulatory amendment authorizing interest payments merely clarified and made explicit the authority which the FEA already possessed under existing Regulations. The DOE also rejected Hunt's contention that it was improperly held liable for refunds of revenues received by other working and royalty interest owners. With respect to this argument, the DOE determined that the operator of a crude oil producing property may be held liable for all violations that may occur and that the Regional Office had not abused its discretion by issuing the Remedial Order to Hunt for the entire amount of overcharges. Hunt's final argument on Appeal was that FEA Ruling 1974-29 was invalid because it had not been promulgated in accordance with the procedural requirements of the Administrative Procedure Act and the Federal Energy Administration Act. In considering Hunt's contention, the DOE noted that Ruling 1974-29 had been upheld in a recent decision of the Temporary Emergency Court of Appeals and therefore had been properly applied to Hunt in determining that the Upper Bearhead Creek Unit did not qualify as a stripper well property during 1974. On the basis of the foregoing considerations, the DOE denied Hunt's Appeal.

REQUESTS FOR EXCEPTION

Bock and Bacon Oil Company, Houston, Texas, DXE-1169, crude oil

The Bock and Bacon Oil Company filed an Application for Exception from the provisions of 10 CFR, Part 212, Subpart D, which, if granted, would result in the extension of exception relief previously approved and would permit Bock and Bacon to continue to sell certain quantities of the crude oil produced from the Champion Paper Company Lease property at upper tier ceiling prices or at market price levels. In considering the exception request, the DOE found that the operating costs per barrel at the property continued to exceed the applicable lower tier ceiling price and that continued exception relief was therefore necessary to provide the firm with an adequate economic incentive to maintain production operations. In accordance with the precedent established in a number of previous Decisions, the DOE permitted Bock and Bacon to sell 59 percent of the crude oil produced from the property at market price levels and the remaining 41 percent of the crude oil at upper tier ceiling prices for a period of six months.

Cheyenne Airways, Inc., Cheyenne, Wyoming, FEE-4657, aviation fuel

Cheyenne Airways, Inc., filed an Application for Exception in which the firm requested that it be permitted to calculate its maximum allowable selling price for aviation fuel as if the firm qualified for fixed base operator status under the provisions of 10 CFR 212.93. If granted, Cheyenne's Application would permit the firm to increase its maximum allowable selling price for aviation fuel by three cents per gallon in order to reflect certain non-product cost increases which it has incurred since May 15, 1973. In considering Cheyenne's Application, the DOE found that Cheyenne offered the full services of a fixed base operator and therefore experienced the non-product cost increases which a fixed base operator typically experiences. However, the DOE noted that since Cheyenne does not technically qualify as a fixed base operator under a strict application of the regulatory definition set forth in 10 CFR 212.31, Cheyenne has been prevented from passing those increased non-product costs through to its customers. The DOE further found that as a result of this regulatory restriction on the passthrough of its non-product cost increases, Cheyenne was incurring substantial losses in the aviation fuels portion of its business. On the basis of the DOE's analysis of the history and purpose of the regulatory distinction between the two types of sellers of aviation fuels, the DOE concluded that the definition of a "fixed base operator" contained in the regulations was not intended to prevent firms such as Cheyenne from recovering a portion of their non-product cost increases which result from activities characteristic of a fixed base operator. Accordingly, Cheyenne's Application for Exception was granted.

Knob Noster Oil Company, Inc., Knob Noster, Missouri, DEE-1290, propane

The Knob Noster Oil Company, Inc., filed an Application for Exception from the provisions of 10 CFR 211.9, which, if granted, would result in the issuance of an Order assigning the Continental Oil Company to replace Knob Noster's base period supplier of propane. In considering Knob Noster's request, the DOE found that Knob Noster's base period supplier of propane charged prices which were substantially in excess of the prices which Knob Noster's competitors paid their suppliers. The DOE also found that Knob Noster was unable to purchase surplus propane at competitive price levels. As a result, the DOE determined that Knob Noster was experiencing a serious hardship which threatened the firm's continued existence as an independent marketer of propane. Consequently, the DOE concluded that exception relief was warranted. The DOE further concluded that since Knob Noster had experienced a consistent decline in operating income over the past six fiscal years, it would not be necessary for the DOE to review Knob Noster's exception relief on a quarterly basis. Therefore, Continental was assigned to supply Knob Noster with 67.25 percent of Knob Noster's base period use for a period of one year.

Pacific Northern Oil Corporation, Seattle, Washington, FPI-0124, refined petroleum products

Pacific Northern Oil Corporation (PANOCO) filed an Application for Exception from the provisions of 10 CFR 213.35(c). The exception request, if granted, would permit PANOCO to import into PAD Districts I-V on a license fee-exempt basis (i) 740,000 barrels of residual fuel oil, and (ii) 47,000 barrels of motor gasoline during the allocation period May 1, 1977, through April 30, 1978. On March 13, 1978, a Proposed Decision and Order was issued to PANOCO in which the DOE stated its intention to permit the firm to import 678,334 barrels of residual fuel oil into Districts II-V on a license fee-exempt basis during the 1977-78 allocation period and to permit the firm to utilize this level of exception relief until August 31, 1978. The DOE proposed to deny the PANOCO request in all other respects. On April 4, 1978, PANOCO filed a Statement of Objections to the Proposed Decision and Order. In its Statement of Objections, PANOCO contended that it should have been granted authority to import residual fuel oil on a fee-exempt basis into District I as well as District II-V. In considering the firm's contention, the DOE noted that under the provisions of Special Guideline I, 42 Fed. Reg. 54255 (1977), full exception relief had already been made available to PANOCO for the 1977-78 allocation period. Since PANOCO and all other importers of residual fuel oil into PAD I have already had full exception relief made available to them for the 1977-78 period, the DOE found that there was no reason to grant PANOCO any additional exception relief from the license fee requirements in that period. PANOCO also contended that it should have been permitted an extended period of time in which to utilize the exception relief specified in the Proposed Decision and Order so that the firm could have sufficient time to import the entire volume of residual fuel oil tentatively authorized by the DOE. In considering the firm's contention, the DOE noted that the Proposed Decision had been based to a large extent on PANOCO's projection that in the absence

V 4 4 / 1 3 J A 1 8 7 9 UMI

of exception relief the firm would experience an operating loss during the 1977-78 allocation period. Nevertheless, the DOE found that the firm's actual financial results for that period, which were subsequently submitted, showed that PANOCO earned a substantial profit. In addition, the DOE determined that the shortage of domestic residual fuel oil on the West Coast which previously hampered PANOCO's operations no longer existed. In view of these changes in the factual situation which formed the basis for the March 13, 1978, Proposed Decision and Order, the DOE concluded that there was no longer any proper basis for an approval of exception relief for the 1977-78 allocation period. Accordingly, the PANOCO exception request was denied.

Smith's Bottled Gas, Bruceton Mills, West Virginia, FEE-4846, propane

Smith's Bottled Gas filed an Application for Exception from the provisions of 10 CFR, Part 211, which, if granted, would result in the issuance of an Order assigning Smith's a new base period supplier of propane and increasing the firm's base period use of propane from 85,193 to 154,800 gallons per year. On March 10, the DOE issued a Proposed Decision and Order in which it determined that Smith's was not incurring a serious financial hardship. On April 24, 1978, Smith's filed a Statement of Objection in which it contended that in calculating the firm's profitability, the DOE should not have excluded the owner-manager's salary and the firm's capital expenses. In considering these objections, the DOE noted that it generally excludes the owner-manager's salary when calculating a closely held firm's profitability. The DOE also found that even after taking into account increased depreciation and interest resulting from capital expenses, the firm still projected a pre-tax profit for 1978 which compared favorably to prior years. The DOE therefore concluded that Smith's had failed to demonstrate that it was suffering a severe financial hardship as a result of the application of the DOE regulatory program to its operations. Accordingly, Smith's request for exception relief was denied.

United Independent Oil Company, Lusk, Wyoming, FEE-4393, crude oil

United Independent Oil Company (UIOC) filed an Application for Exception from the provisions of 10 CFR 211.67(e)(2). The exception request, if granted, would result in the issuance of additional entitlements to the firm for crude oil which UIOC intended to have processed for its account by other refiners. In considering the UIOC exception request and Statements of Objection to the Proposed Decision and Order issued in this case, the DOE noted that the regulatory amendments to 10 CFR 211.67(e)(2) which eliminated the issuance of small refiner bias entitlements for crude oil processed for a small refiner's account, resulted in a significant alteration of the factual situation upon which UIOC apparently based its initial determination that its venture into the refinery business would be profitable. However, the DOE found that UIOC had failed to make any showing that the DOE had an affirmative duty to maintain the small refiner bias regulations in such a manner as to benefit UIOC. The DOE therefore concluded that the alteration in the factual situation which existed at the time UIOC decided to enter the refining business did not provide a basis upon which exception relief may be granted. Finally, the DOE determined that UIOC had failed to demonstrate that exception relief from the Entitlements Program was warranted under the precedents established in *Della Refining Co.*, 2 FEA Par. 83,275 (1975), or *Wicket Refining Co.*, 2 FEA Par. 83,238 (1975). Accordingly, UIOC's Application for Exception was denied.

PETITION FOR SPECIAL REDRESS

Schultz Gas Services, Inc., Lansing, Illinois, DSG-0035; DES-0110, propane

Schultz Gas Service, Inc., filed a Petition for Special Redress which, if granted, would have resulted in the rescission of a Modified Special report order (MSRO) which DOE Region V issued to the firm on February 17, 1978. Schultz also requested a stay of the provisions of the MSRO pending a final determination on its Petition. In considering the Schultz petition, the DOE noted that the Office of Hearings and Appeals may only consider a petition for rescission of a Special Report Order if a preliminary review indicates that a reasonable probability exists that the petitioner will be able to satisfy the criteria specified in Section 210.91(d) of the DOE Regulations. Upon reviewing the contentions in Schultz's petition, the DOE concluded that Schultz had failed to show a reasonable probability that it could show circumstances so exceptional that an immediate review was warranted to correct substantial errors of law, to prevent substantial injury to legal rights, or to cure a gross abuse of administrative discretion. In this regard, the DOE noted that although the firm alleged that the MSRO requires it to develop information not readily available from its records, the DOE is empowered to require a firm to submit information in the format specified by the DOE regulations to demonstrate the firm's compliance with the applicable regulations. The DOE also rejected the firm's argument that compliance with the provisions of MSRO would be unduly burdensome. Finally, Schultz contended that the U.S. District Court's holding in *Crown Central Petroleum v. FEA*, Fed. Energy Guidelines Par. 26,101 (D. Md. 1978), rendered improper the MSRO's request for the basis and rationale of the firm's determination of its classes of purchaser. In considering Schultz's contentions, the DOE noted that it is not required as a matter of law to follow the holding of a U.S. District Court and that in the present case there were strong policy reasons for declining to apply the *Crown Central* holding. The DOE concluded that in order for it to determine whether the firm complied with the price regulations, Schultz must supply information concerning its class of purchaser determinations as required by the MSRO. On the basis of these findings, the Schultz Petition was dismissed and the firm's Application for Stay was denied.

DISMISSALS

The following submissions were dismissed following a statement by the applicant indicating that the relief requested was no longer needed:

Atlas Gas Company, Jacksonville, Florida, DRO-0020, DRH-0020, DEO-0054
Dixie Gas Industries, Goldenrod, Florida, DEO-0120
Petroleum, Inc., Wichita, Kansas, DEE-1833
Carper S. Ryland, Winchester, Virginia, DEE-1311
Texaco, Inc., Tulsa, Oklahoma, DEE-1676
Texaco, Inc., Tulsa, Oklahoma, DEE-1468
Trends Publishing, Inc., Washington, D.C., DFA-0246

The following submission was dismissed for failure to correct deficiencies in the firm's filing as required by the DOE Procedural Regulations:

Bob Adams, Washington, D.C., DFA-0229

The following submissions were dismissed on the grounds that alternative regulatory procedures existed under which relief might be obtained:

Hugh M. Briggs, Dallas, Texas, DXE-1990
Ben R. Briggs, Dallas, Texas, DXE-1987

Copies of the full text of these Decisions and Orders are available in the Public Docket Room of the Office of Hearings and Appeals, Room B-120, 2000 M Street, N.W., Washington, D.C. 20461, Monday through Friday, between the hours of 1:00 p.m. and 5:00 p.m., e.s.t., except Federal holidays. They are also available in *Energy Management: Federal Energy Guidelines*, a commercially published loose leaf reporter system.

MELVIN GOLDSTEIN,
Director, Office of Hearings and Appeals.

FEDERAL INSECTICIDE, FUNGICIDE, AND RODENTICIDE ACT SCIENTIFIC ADVISORY PANEL

Meeting Agenda Change

The agenda for the two-day open meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel meeting to be held on January 25 and 26, 1979 has been changed. Notice of this meeting was published in the FEDERAL REGISTER on January 5, 1979 (44 FR 1454).

The primary agenda topics will be:

1. Completion of Panel review of proposed regulatory action to conclude the Rebuttable Presumption Against Registration (RPAR) process on amitraz (BAAM); and

2. Completion of Panel review of proposed regulatory action to conclude the RPAR process on pronamide.

The following alternative agenda topics will be discussed if time permits:

1. Final review of FIFRA Section 3(c)(7) interim-final regulations for

conditional registration of pesticides; and

2. Review of draft final regulations implementing Section 5(f) of the amended FIFRA for State Experimental Use Permits.

Special Note: Subpart H—Label Development, and Subpart I—Experimental Use Permits—of the Guidelines for registration of Pesticides in the United States will be scheduled for a subcommittee meeting in February; a separate FEDERAL REGISTER Notice giving details will be published.

For further information contact Dr. H. Wade Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel, Office of Pesticide Programs (TS-766), Room 803, Crystal Mall, Building No. 2, 1921 Jefferson Davis Highway, Arlington, Virginia, telephone 703/557-7560.

Dated: January 12, 1979.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

PESTICIDE PROGRAMS

Filing of Pesticide and Feed Additive Petitions

Pursuant to sections 408(d)(1) and 409(b)(5) of the Federal Food, Drug, and Cosmetic Act, the Environmental Protection Agency (EPA) gives notice that the following petitions have been submitted to the Agency for consideration.

PP 9F2157. 3M Co., 3M Center, St. Paul, MN 55101. Proposes that 40 CFR 180 be amended by establishing a tolerance for the combined residues of the herbicide mefluidide (*N*-[2,4-dimethyl-5-[[(trifluoromethyl) sulfonyl]amino]phenyl] acetamide) in or on the raw agricultural commodity soybeans with a tolerance limitation of 0.01 part per million (ppm). The proposed analytical method for determining residues is by gas chromatography with flame photometric detection in a sulfur mode. PM25. (202/755-2196)

FAP 9H5203. Dow Chemical USA, Midland, MI 48640. Proposes that 21 CFR 561 be amended by establishing a regulation permitting residues of the insecticide chlorpyrifos [0,0-diethyl 0-(3,5,6-trichloro-2-pyridyl) phosphorothiate] and its metabolite 3,5,6-trichloro-2-pyridinol in or on sorghum grain milling fractions (bran, germ, screenings) intended for animal feed with a tolerance limitation of 1.5 ppm resulting from application of the insecticide to the growing of sorghum. PM12. (202/426-9425)

Interested persons are invited to submit written comments on these petitions to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St., SW, Washington DC 20460. Inquiries concerning these petitions may be directed to the designated Product Manager (PM), Registration Division (TS-767), Office of Pesticide Programs, at the above address, or by telephone at the numbers cited. Written comments should bear a notation indicating the petition number to which the comments pertain. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: January 11, 1979.

DOUGLAS D. CAMPT,
Acting Director, Registration Division.

FILING OF PESTICIDE PETITION

Rohm & Haas Co., Independence Mall West, Philadephia, PA 19105, has submitted a petition (PP 9F2158) to the Environmental Protection Agency (EPA) which proposes that 40 CFR 180 be amended by establishing a tolerance for the residues of the herbicide sodium salt of acifluorfen (sodium 5 - [2 - chloro - 4 - (trifluoromethyl)-phenoxy]-2-nitrobenzoate) and its metabolites (the corresponding acid, methyl ester and amino analogs) in or on the raw agricultural commodities soybeans at 0.1 part per million (ppm); liver and kidney of cattle, goats, hogs, horses and sheep at 0.01 ppm; fat, meat and meat byproducts of poultry at 0.01 ppm; milk and eggs at 0.01 ppm. The proposed analytical method is by gas-liquid chromatographic separation and electron capture detection. Notice of this submission is given pursuant to section 408(d)(1) of the Federal Food, Drug, and Cosmetic Act.

Interested perosons are invited to submit written comments on this petition to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St., SW., Washington, DC 20460. Inquiries concerning this petition may be directed to Product Manager (PM) 23, Registration Division (TS-767), Office of Pesticide Programs, at the above address, or by telephone at 202/755-1397. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: January 11, 1979.

PESTICIDE PROGRAMS

Filing of Pesticide Petition

Monsanto Agricultural Products Co., 800 N. Lindbergh Blvd., St. Louis, MO 63166, has submitted a petition (PP 9F2156) to the Environmental Protection Agency (EPA) which proposes that 40 CFR 180.249 be amended by establishing a tolerance for residues of the herbicide alachlor [2-chloro-2',6'-diethyl-*N*-(methoxymethyl) acetanilide] and its metabolites (calculated as alachlor) in or on the raw agricultural commodity cabbage at 0.3 part per million (ppm). The proposed analytical method for determining residues is by gas liquid chromatography using a flame ionization detector. Notice of this submission is given pursuant to the provisions of section 408(d)(1) of the Federal Food, Drug, and Cosmetic Act.

Interested persons are invited to submit written comments on this petition to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St., SW. Washington DC 20460. Inquiries concerning this petition may be directed to Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, at the above address, or by telephone at 202/755-2196. Written comments should bear a notation indicating the petition number. Comments may be made at any time while a petition is pending before the Agency. All written comments filed pursuant to this notice will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4 p.m. Monday through Friday.

Dated: January 11, 1979.

PESTICIDE PROGRAMS

Receipt of Application to Register Pesticide Product Entailing a Changed Use Pattern

Chevron Chemical Co., Ortho Div., 940 Hensley St., Richmond, CA 94804, has submitted to the Environmental Protection Agency (EPA), an application to amend registration of the product ORTHO TRIFORINE EC (EPA Reg. No. 239-2455), which contains 18.2% of the active ingredient triforine (*N,N*-[1,4-piperazinediylbis (2,2,2-trichloroethylidene)] bis [formamide]). The application received from Chevron Co. proposes that the use pattern of this pesticide be changed to include outdoor uses on roses and asters. The application also proposes that this product be classified for restricted use.

Notice of receipt of this application does not indicate a decision by the Agency on the application. Interested persons are invited to submit written comments on this application to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401 East Tower, 401 M St., SW, Washington DC 20460. The Comments must be received on or before February 20, 1979, and should bear a notation indicating the EPA Registration Number "239-2455". Comments received within the specified time period will be considered before a final decision is made; comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Specific questions concerning this application and the data submitted should be directed to Product Manager (PM) 21, Registration Division (TS-767), Office of Pesticide Programs, at the above address or by telephone at 202/755-2562. The label furnished by Chevron Chemical Co., as well as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Notice of approval or denial of this application to amend registration of ORTHO TRIFORINE EC will be announced in the FEDERAL REGISTER. Except for such material protected by Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136,) the test data and other information submitted in support of registration as well as other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedures for requesting such data will be given in the FEDERAL REGISTER if an application is approved.

Dated: January 11, 1979.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

SCIENCE ADVISORY BOARD; EXECUTIVE COMMITTEE

Meeting

As required by Pub. L. 92-463, notice is hereby given that a meeting of the Science Advisory Board's Executive Committee will be held beginning at 9:15 a.m., February 5 and 6, 1979 in the Administrator's Conference Room (Room 1101 West Tower), EPA Headquarters, 401 M Street, SW., Washington, D.C. The first day's Agenda includes a Report on Risk Assessment Methodologies, A Report on Research and Development Aspects of the President's Proposed Budget, A briefing by the Study Group on Regulatory Costs, A Discussion of the Agency's Five Year Research and Development Plan, and an update on EPA and the Universities. The second day's Agenda will be devoted to a Report by the Health Effects Research Review Group. The meeting is open to the public. Any member of the public wishing to attend, participate, or obtain information should contact Ms. Shirley Smith (202) 755-0263 by close of business January 31, 1979.

Dated: January 12, 1979.

SAFE DRINKING WATER ACT

Review of Variances and Exemptions

This public notice is issued pursuant to sections 1415(a)(1)(F) and 1416(d) of the Safe Drinking Water Act as amended through November 1977, Pub. L. 95-190, (42 U.S.C. 300f *et seq.*), and 40 CFR 142.22 (July 1, 1977 ed.), National Interim Primary Drinking Water Regulations.

Under these regulations, the U.S. Environmental Protection Agency, Region V, is required to conduct a comprehensive review of all variances and exemptions granted during the period June 24, 1977 to June 23, 1978 by the Minnesota Department of Public Health, Michigan Department of Public Health, and the Wisconsin Department of Natural Resources.

Written documentation has been received by EPA Region V from each of the named States stating that there were no variances or exemptions granted during the period June 24, 1977 to June 23, 1978.

Consequently, notice is hereby given that in the absence of any State issued variances or exemptions during the statutory time period the section 1415(a)(1)(F) and 1416(d) review is not required and accordingly will not be conducted by the U.S. Environmental Protection Agency, Region V.

For further information, inquiries can be directed to Joseph F. Harrison, Chief, Water Supply Branch, U.S. Environmental Protection Agency, 230 S. Dearborn St. Chicago, Illinois 60604 (312) 353-2151.

Dated: January 10, 1979.

JOHN MCGUIRE,
Regional Administrator,
Region V.

[OPP-180259, FRL 1040-5]

IDAHO, OREGON & WASHINGTON STATE

Issuance of Specific Exemptions To Use Benomyl To Control Cercosporella Foot Rot of Wheat

The Environmental Protection Agency (EPA) has granted specific exemptions to the Idaho, Oregon, and Washington State Departments of Agriculture (hereafter referred to as "Idaho", "Oregon", and "Washington") to use benomyl on 50,000 acres in each State to control *Cercosporella* foot rot of wheat. These exemptions were granted in accordance with, and are subject to, the provisions of 40 CFR Part 166, which prescribes requirements for exemption of Federal and State agencies for use of pesticides under emergency conditions.

This notice contains a summary of certain information required by regulation to be included in the notice. For more detailed information, interested parties are referred to the applications on file with the Registration Division (TS-767), Office of Pesticide Programs, EPA, 401 M St., S.W., Room E-315, Washington, D.C. 20460.

According to the three States, *Cercosporella* foot rot, caused by the fungal pathogen *Cercosporella herpotrichoides*, is a serious disease of cereal grains and is most damaging to early fall-seeded wheat crops. The severity of the infection is dependent upon optimum climatic conditions, such as temperature and humidity. Because of heavy rains this year, conditions are conducive for the development of *Cercosporella* foot rot inoculum.

There are no other pesticidal methods for controlling this disease and wheat strains resistant to this pathogen are not available. Specific exemptions for the use of benomyl to control this wheat disease have been issued annually since 1976 to Idaho, Oregon, and Washington. The three States estimated economic losses ranging from 1.3 to 6.8 million dollars in Idaho, 5 million dollars in Oregon and 1.425 million dollars in Washington if an effective pesticide is not used.

It should be noted that a rebuttable presumption against registration of pesticide products containing benomyl was published in the FEDERAL REGISTER on December 6, 1977 (42 FR 61788); however, no decision has yet been made by EPA as to appropriate regulatory action in this matter.

It was proposed to make a single application of Benlate 50W, containing the active ingredient benomyl, at a dosage rate of 1.0 pound of product (0.5 pound active ingredient (a.i.)) per acre either with aerial equipment (5-10 gallons of water) or with ground equipment (20-30 gallons of water).

After reviewing the applications and other available information, EPA has determined that (a) pest outbreaks of *Cercosporella* foot rot have occurred or are about to occur; (b) there is no pesticide presently registered and available for use to control *Cercosporella* foot rot in Idaho, Oregon, and Washington; (c) there are no alternative means of control, taking into account the efficacy and hazard; (d) significant economic problems may result if the foot rot is not controlled; and (e) the time available for action to mitigate the problems posed is insufficient for a pesticide to be registered for this use. Accordingly, Idaho, Oregon, and Washington State have been granted specific exemptions to use the pesticide noted above until June 30, 1979, to the extent and in the manner set forth in the applications. The specific exemptions are also subject to the following conditions:

1. The DuPont product Benlate 50W, EPA Reg. No. 352-354, containing the active ingredient benomyl, is authorized at a dosage rate of 0.1 pound of product (0.5 lb. a.i.) per acre in either 5 to 10 gallons of water (if applied aerially) or in 20 to 30 gallons of water (if applied by ground equipment). Only one application per acre is authorized;

2. Treatment areas are as follows: *Idaho:* Benewah, Clearwater, Idaho, Kootenai, Latah, Lewis, and Nez Perce counties. *Oregon:* Baker, Gilliam, Morrow, Sherman, Umatilla, Union, Wallowa, and Wasco counties and the Willamette Valley counties of Benton, Clackamas, Lane, Linn, Marion, Polk, Washington, and Yamhill. *Washington:* All counties east of the crest of the Cascade Mountains;

3. Applications may be made by either growers or State-licensed commercial applicators;

4. The presence of *Cercosporella* foot rot must be verified by qualified extension agents of Idaho University, Oregon University, or Washington State University in a given area before any treatment with benomyl is made;

5. Wheat grain with residues of benomyl not exceeding 0.2 part per million (ppm) and wheat straw with residues of benomyl not exceeding 15 ppm may enter interstate commerce. The Food and Drug Administration, U.S. Department of Health, Education, and Welfare, has been advised of this action;

6. All applicable label use directions, precautions, and restrictions must be adhered to;

7. The EPA shall be immediately informed of any adverse effects resulting from the use of benomyl in connection with these exemptions;

8. All applicators involved in the preparation of spray suspension must wear protective gloves and masks;

9. All clothing worn during the preparation of spray suspension must be removed and cleaned after each day of use;

10. All employees must wash immediately upon dermal contact with benomyl or the spray suspension; and

11. Idaho, Oregon, and Washington are each responsible for ensuring that all of the provisions of its specific exemption are met and each must submit a full report on the results of its specific exemption to EPA by January 31, 1980.

Statutory Authority: Section 18 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136 *et seq.*).

Dated: January 12, 1979.

PESTICIDE PROGRAMS

Receipt of Application to Register Pesticide Product Entailing a Changed Use Pattern

3M Co., 3M Center, St. Paul, MN 55101 has submitted to the Environmental Protection Agency (EPA) an application to register the product VISTAR 2-S (EPA File Symbol 7182-0), containing 28% of the active ingredient mefluidide (*N*-[2,4-dimethyl-5-[[trifluoromethyl)sulfonyl]amino]phenyl]acetamide). The application received from 3M Co. proposes that the use pattern of this pesticide be changed to include use on soybeans as a postemergence herbicide for rhizome and seedling johnsongrass and for volunteer corn control. The application also proposes that the product be classified for general use.

Notice of receipt of this application does not indicate a decision by the Agency on the application. Interested persons are invited to submit written comments on this application to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Rm. 401, East Tower, 401 M St. SW., Washington, D.C. 20460. The comments must be received on or before February 20, 1979 and should bear a notation indicating the EPA File Symbol "7182-0". Comments received within the specified time period will be considered before a final decision is made; comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Specific questions concerning this application and the data submitted should be directed to Product Manager (PM) 25, Registration Division (TS-767), Office of Pesticide Programs, at the above address or by telephone at 202/755-2196. The lable furnished by 3M Co., as well as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Notice of approval or denial of this application to register VISTAR 2-S will be announced in the FEDERAL REGISTER. Except for such material protected by Section 10 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136), the test data and other information submitted in support of registration as well as other scientific information deemed relevant to the registration decision may be available after approval under the provisions of the Freedom of Information Act. The procedures for requesting such data will be given in the FEDERAL REGISTER if an application is approved.

Dated: January 12, 1979.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

PESTICIDE PROGRAMS

Receipt of Applications to Register Pesticide Products Containing New Active Ingredient

Applications have been submitted to the Environmental Protection Agency (EPA) to register pesticide products containing active ingredients which have not been included in any previously registered pesticide products. Applications were made pursuant to the provisions of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) as amended in 1972, 1975, and 1978 (92 Stat. 819; 7 U.S.C. 136) and the regulations thereunder (40 CFR 162). Notice of receipt of these applications does not indicate a decision by the Agency on the applications.

Interested persons are invited to submit written comments on any applications referred to in this notice to the Federal Register Section, Program Support Division (TS-757), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M St., SW, Washington, DC 20460. The comments must be received on or before February 20, 1979 and should bear a notation indicating the EPA file symbol number of the application to which the comments pertain. Comments received within the specified time period will be considered before a final decision is made; comments received after the specified time period will be considered only to the extent possible without delaying processing of the application. Specific comments concerning these applications and the data submitted should be directed to the designated Product Manager (PM), Registration Division (TS-767), Office of Pesticide Programs, at the above address or appropriate telephone number cited. The labels furnished by each applicant, as well as all written comments filed pursuant to this notice, will be available for public inspection in the office of the Federal Register Section from 8:30 a.m. to 4:00 p.m. Monday through Friday.

Notice of approval or denial of the applications to register pesticide products will be announced in the FEDERAL REGISTER. Except for such material protected by Section 10 of FIFRA, the test data and other information submitted in support of registration as well as other scientific information deemed relevant to the registration decision may be made available after approval under the provisions of the Freedom of Information Act. The procedures for requesting such data will be given in the FEDERAL REGISTER if an application is approved.

Dated: January 12, 1979.

DOUGLAS D. CAMPT,
Acting Director,
Registration Division.

APPLICATIONS RECEIVED

EPA File Symbol 707-RUO. Rohm & Haas, Independence Mall West, Philadelphia, PA 19105. Blazer™ 2L. Active Ingredient: *Sodium salt of acifluorfen (sodium-[2-chloro - 4 - (trifluoromethyl) - phenoxy] - 2-nitrobenzoate)* 20.4%. Application proposes that this product be classified for general use for post-emergence application to soybeans to control susceptible weeds. PM23. (202/755-1397)

EPA File Symbol 707-RLN. Rohm & Haas. BLAZER™ 2S. Active Ingredient: 21.4% of same ingredient as above. Application proposes that this product be classified for general use for post-emergence application to soybeans to control susceptible weeds. PM23.

EPA File Symbol 100-ANN. Ciba-Geigy Corp., Agricultural Div., PO Box 11422, Greensboro, NC 27409. CGA-48988 5W. Active Ingredient: *N-(2,6-dimethylphenyl)-N-(methoxyacetyl) alanine methyl ester* 5%. Application proposes that this product be classified for general use for control of certain diseases of ornamentals and non-bearing citrus. PM21.

FEDERAL COMMUNICATIONS COMMISSION

[FCC 79-10]

TELEVISION BROADCAST SIGNALS

Further FCC Policy Concerning Technical Standards

JANUARY 10, 1979.

The temporary policy expressed in this Public Notice concerning enforcement of television horizontal and vertical blanking standards supersedes the temporary policy that was pronounced in the FCC's Public Notice of June 16, 1978 (FCC 78-423).

BACKGROUND

On June 16, 1978, the FCC issued a Public Notice entitled "FCC Policy Concerning Technical Standards for Television Broadcast Signals." That Notice announced a temporary policy for enforcement of the television horizontal and vertical blanking standards and was stated as follows:

The Commission finds it in the public interest to adopt a temporary policy and will, until July 1, 1979, issue Advisory Notices when horizontal blanking is detected in excess of 11.44 microseconds, up to 12 microseconds, and when vertical blanking of 22 or 23 lines is detected. Horizontal blanking in excess of 12 microseconds, and vertical blanking in excess of 23 lines, will be cause for issuance of a Notice of Violation. Irrespective of this announcement of our temporary policy, stations demonstrating a pattern of operation with horizontal blanking in excess of 11.44 microseconds, and vertical blanking in excess of 21 lines, will be subject to more severe sanctions.

It was also pointed out that the use of black or other colored borders, or reinserted video, solely to mask excessive horizontal or vertical blanking, is an unacceptable practice.

The Public Notice was issued in response to numerous inquiries which had been received from various sectors of the television industry as well as the FCC's own observations of blanking problems. We had arrived at the conclusion that rejection of program material for reasons of excessive vertial or horizontal blanking generates repercussions adverse to the public interest and that given time the problems being encountered could be remedied.

When the FCC announced its temporary enforcement policy in June, 1978, it did so with the understanding that the industry would cooperatively work together to correct the blanking problems. It was understood that the factors creating the problem touched upon many sectors of the industry such as broadcasters, independent producers of programs and commercials, and manufacturers. It is encouraging to learn that groups and individuals within the television industry are now studying the blanking problem in order to develop recommendations for long term solutions. For example, an Ad Hoc Committee of broadcasters was convened on August 8, 1978, to coordinate with many sectors of the industry for this purpose. Our Public Notice clearly has had the effect of heightening awareness of blanking problems and the following observations are pertinent:

1. Vertical and horizontal blanking difficulties are a much larger problem than the FCC and segments of the industry had realized.

2. Blanking problems are attributable to many activities in the industry: *e.g.*, the manufacture and adjustment of equipment either not meeting standards or which are borderline in meeting the standards; stretching and lengthening of blanking during program production, editing, and broadcast; production techniques not taking into account blanking requirements, etc.

3. There is still a lack of full understanding of the problems and the best long-term solutions to the problem.

4. There is a voluminous amount of program material now in archives, some of which will not comply with blanking standards if broadcast. An FCC policy concerning such material must be formulated.

5. The Commission's workload has increased as a result of an influx of requests for waiver of the blanking rules to permit both new as well as archives program material to be broadcast. In some instances, the program material

was derived from ENG equipment for newscasts, etc.

6. Information coming to the Commission staff indicates that there is uncertainty about the measurement procedures used in determining the horizontal blanking interval with program scenes having dark edges or having low illumination such as night scenes. Dark picture edges may be confused with excessive blanking.

ANNOUNCEMENT OF NEW TEMPORARY POLICY

In conclusion of the magnitude of the blanking problem and the cooperative effort underway among the various segments of the industry, effective upon release of this Notice and until July 1, 1979, the FCC will not issue Advisory Notices or Notices of Violation for vertical and horizontal blanking in excess of 21 lines and 11.44 microseconds, respectively. Under this policy, licensees must, in the exercise of their responsibility to broadcast in the public interest, take such measures as are necessary to insure that the technical quality of program material used comports with this responsibility.

In light of the temporary policy announced herein, our June, 1978, statement concerning use of black or other colored borders or reinserted video, is likewise being modified to place reliance upon each licensee's discretion and judgment.

We also propose to institute an Inquiry in the near future that addresses both the short-term and long-term aspects of this program. This will be a broad Inquiry investigating the many issues that have come to light concerning horizontal and vertical blanking such as the degree of picture degradation actually caused by existing program material having excessive horizontal and vertical blanking, the costs of bringing such material into compliance with our standards, and the tradeoffs between the costs and benefits of bringing existing program material into compliance, etc. It is also proposed to investigate the economic incentives facing program producers, distributors, and broadcasters to determine the role of the marketplace as a possible replacement for or complement to government regulations in insuring that unacceptable degradation of television programs having excessive horizontal and vertical blanking does not occur.

By July 1, 1979, it is expected that the Notice of Inquiry will have produced a record which will guide the FCC in identifying appropriate long-term action. Additionally, it will provide guidance in regard to appropriate action to be taken upon expiration of our temporary policy. It is also intended that such an inquiry will provide the vehicle or groups studying the blanking problems to submit their comments, observations and recommendations to the FCC.

It is to be emphasized that the policy announced herein goes solely to our decision to not issue Advisory Notices or Notices of Violation for excessive blanking for the period until July 1, 1979. It should not be interpreted, in any way, as prejudging an ultimate decison concerning the appropriateness of our current blanking standards. That decision will significantly depend upon results of the extensive effort underway within the industry to identify factors which may contribute to excessive blanking and develop proposed methods for dealing with these factors. Accordingly, we encourage continued industry effort to assist the FCC in developing a sound, long-range solution to the problem.

As a final matter, the many pending requests for waiver of our rules governing blanking are mooted by the action we are now taking. Therefore, these requests are dismissed.

For further information on this matter, please contact Wilson A. LaFollette or John W. Reiser (telephone 202-632-9660) or John M. Taff (telephone 202-632-5414).

Action by the Commission January 9, 1979. Commissioners Ferris (Chairman), Lee, Quello, Washburn, Fogarty, White and Brown.

FEDERAL COMMUNICATIONS COMMISSION,
WILLIAM J. TRICARICO,
Secretary.

FEDERAL HOME LOAN BANK BOARD

FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

Hearings on the Savings and Loan Holding Company Regulatory Program; Closing of Record

The Federal Home Loan Bank Board on January 10, 1979 held previously scheduled hearings on the savings and loan holding company regulatory program. At those hearings it was announced that the record of the proceedings would be held open for fourteen days—until the close of business January 24, 1979—so that all interested parties might submit in writing any further views and comments on the above referenced regulatory program.

All submissions, which will be deemed filed when received, should be directed to W. Michael Herrick, Attorney, Federal Home Loan Bank Board, Office of the General Counsel, 1700 G Street, N.W., Washington, D.C. 20552, (202-377-6417).

RONALD A. SNIDER,
Assistant Secretary.

FEDERAL MARITIME COMMISSION

INDEPENDENT OCEAN FREIGHT FORWARDER LICENSES

Correction to Notice of Revocation

By Decision served July 24, 1978, in Docket No. 77-53, *Licensing of Independent Ocean Freight Forwarders,* (FEDERAL REGISTER, Vol. 43, No. 146 p. 32776, July 28, 1978), the Federal Maritime Commission amended its General Order 4 (46 CFR 510) to require all licensed independent ocean freight forwarders to file with the Commission a surety bond in the amount of $30,000. The amendment stated that if a licensee fails to file such bond on or before December 1, 1978, the license shall be revoked in accordance with Rule 510.9 of General Order 4.

The Commission published a Notice of Revocation in the FEDERAL REGISTER, on January 3, 1979 (Vol. 44, No. 2, pp. 953-955) wherein notice was given of the independent ocean freight forwarders who had failed to file with the Commission a surety bond in the amount of $30,000 and whose licenses were revoked effective December 2, 1978. Erroneously, the following were among the licensees named:

Alf Halbig, 39 Broadway, Suite 2701, New York 10006; FMC 2027.
Mangill Shipping Corp., 39 Broadway, Suite 1017, New York 10006; FMC 1144.
H. E. Schurig & Co. of Louisana, 1810 International Trade Mart Tower, New Orleans, Louisanna 70130; FMC 988.

All requirements for bonds were met by December 1, 1978.

Hence, the above FMC Independent Ocean Freight Forwarder Licenses have not been revoked.

FRANCIS C. HURNEY,
Secretary.

[6210-01-M]

FEDERAL RESERVE SYSTEM

BANK HOLDING COMPANIES

Proposed De Novo Nonbank Activities

The bank holding companies listed in this notice have applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(1) of the Board's Regulation Y (12 CFR 225.4(b)(1)), for permission to engage *de novo* (or continue

to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application of which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than February 9, 1979.

A. *Federal Reserve Bank of New York*, 33 Liberty Street, New York, New York 10045:

1. CITICORP, New York, New York (insurance activities; Ohio): to act through its subsidiaries, Advance Insurance Agency, Inc., and Advance Life Insurance Agency, Inc., as agent or broker for the sale of property and casualty insurance for property securing extensions of credit or the provision of other financial services by Applicant's subsidiary, Advance Mortgage Corporation, generally with regard to one-to-four family residences, and to include liability coverage in home-owners "package" policies where such is the general practice. These activities would be conducted from an office located at 9247 North Meridian Street, Indianapolis, Indiana 46260, and the proposed services would be made available to customers served by offices of Advance Mortgage Corporation in Cleveland, Dayton, and Cincinnati, Ohio. The geographic areas to be served are the Cleveland, Dayton, and Cincinnati, Ohio metropolitan areas.

2. CITICORP, New York, New York (insurance activities; Maryland, Virginia, District of Columbia): to act through its subsidiaries, Advance Insurance Agency, Inc., and Advance Life Insurance Agency, Inc., as agent or broker for the sale of property and casualty insurance for property securing extensions of credit or the provision of other financial services by Applicant's subsidiary, Advance Mortgage Corporation, generally with regard to mobile homes and one-to-four family residences, and to include liability coverage in homeowners "package" policies where such is the general practice. These activities would be conducted from an office located at 9247 North Meridian Street, Indianapolis, Indiana 46260, and the proposed services would be made available to customers served by offices of Advance Mortgage Corporation in Towson, Baltimore, and Severna Park, Maryland. The geographic areas to be served are the Washington, D.C., and Baltimore, Maryland metropolitan areas (residential mortgage borrowers), and Northern Virginia, Washington, D.C., and Maryland (mobile home borrowers).

3. CITICORP, New York, New York (insurance activities; Illinois): to engage in the activities specified in the preceding paragraph 2 through the subsidiaries and from the office there identified. The proposed services would be made available to customers served by offices of Advance Mortgage Corporation in Springfield, Chicago, and Waukegan, Illinois. The geographic areas to be served are the Chicago and Waukegan metropolitan areas (residential mortgage borrowers), and the State of Illinois (mobile home borrowers).

4. CITICORP, New York, New York (insurance activities; Indiana): to engage in the activities specified in the preceding paragraph 2 through the subsidiaries and from the office there identified. The proposed services would be made available to customers served by offices of Advance Mortgage Corporation in Gary and Indianapolis, Indiana. The geographic areas to be served are the Gary, Indiana metropolitan area (residential mortgage borrowers) and the State of Indiana (mobile home borrowers).

B. *Federal Reserve Bank of Philadelphia*, 100 North 6th Street, Philadelphia, Pennsylvania 19105:

PHILADELPHIA NATIONAL CORPORATION, Philadelphia, Pennsylvania (factoring and commercial finance activities; Western United States): to engage through its subsidiaries, Congress Factors Corporation and Congress Financial Corporation, in the purchase of accounts receivable and the making of loans secured by accounts receivable, inventory, machinery, and equipment, and generally in the factoring and commercial finance business. These activities would be performed from an office of Applicant's subsidiaries at 3440 Wilshire Boulevard, Los Angeles, California 90010, and the geographic area to be served is the west coast of the United States, primarily California.

C. *Other Federal Reserve Banks:* None.

Board of Governors of the Federal Reserve System, January 11, 1979.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 79-1879 Filed 1-17-79; 8:45 am]

[6210-01-M]

ST. CLAIR BANCORP.

Formation of Bank Holding Co.

St. Clair Bancorporation, East St. Louis, Illinois, has applied for the Board's approval under Section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company by acquiring 93.3 percent of the voting shares of First National Bank at East St. Louis, East St. Louis, Illinois. The factors that are considered in acting on the application are set forth in Section 3(c) of the Act (12 U.S.C. 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of St. Louis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than January 31, 1979. Any comment on an application that requests a hearing must include a statement of why a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute and summarizing the evidence that would be presented at a hearing.

Board of Governors of the Federal Reserve System, January 11, 1979.

THEODORE E. ALLISON,
Secretary of the Board.

[FR Doc. 79-1878 Filed 1-17-79; 8:45 am]

[6210-01-M]

UNITED OKLAHOMA BANKSHARES, INC.

Proposed Acquisition of United Securities, Inc.

United Oklahoma Bankshares, Inc., Oklahoma City, Oklahoma, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to acquire voting shares of United Securities, Inc., Oklahoma City, Oklahoma. Notice of the application was published on December 21, 1978, in *The Daily Oklahoman*, a newspaper circulated in Oklahoma County, Oklahoma.

Applicant states that the proposed subsidiary would engage in the business of the purchase and sale for its own account and the account of others, of U.S. Treasury Securities, Securities of U.S. Government Agencies, and general obligations of States and political subdivisions thereof including the underwriting thereof. In its order of October 19, 1976 (41 FR 47083 (1976)) deferring consideration of an application to form United Bancorp Municipals, Inc. (62 *Federal Reserve Bulletin* 917 (1876)), the Board concluded as a general matter that the activity of underwriting and dealing in certain government and municipal securities was closely related to banking. That conclusion was affirmed in the Board's Order of January 26, 1978 (43 FR 5382 (1978)) announcing its decision to terminate suspension of consideration of the activity; not to adopt the proposed amendment; and to permit the activity, if at all, by order. On two previous occasions, by order, the Board has approved individual applications by bank holding companies to engage in this activity. (Stepp, Inc., (64 *Federal Reserve Bulletin* 223 (1978)). United Bancorp, (64 *Federal Reserve Bulletin* 222 (1978)).)

Applicant also states that the proposed subsidiary would provide portfolio investment advice to individuals, associations, corporations, financial institutions, and commercial banks. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal to engage in the listed activities can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Kansas City.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than February 12, 1979.

Board of Governors of the Federal Reserve System, January 11, 1979.

THEODORE E. ALLISON,
Secretary of the Board.

[6750-01-M]

FEDERAL TRADE COMMISSION

CIGARETTES AND RELATED MATTERS

Methods to be Employed in Determining Carbon Monoxide, "Tar" and Nicotine Content; Notice of Opportunity to Submit Public Comments

AGENCY: Federal Trade Commission.

ACTION: Proposed methods for determination of carbon monoxide, "tar" and nicotine content of cigarette smoke.

SUMMARY: Since 1967, the Commission has been determining and annually reporting the "tar" and nicotine content of cigarettes. The Commission has been using the Federal Trade Commission Method for Determination of Particulate Matter ("Tar") and Alkaloids (reported as Nicotine) in Cigarette Smoke as referred to in the Federal Trade Commission Notice of August 1, 1967, 32 FR 11178, and described in an article entitled, "Tar and Nicotine in Cigarette Smoke," by H. C. Pillsbury et al., which appeared in the Journal of Association of Official Analytical Chemists, Vol. 52, No. 3, 1969.

In addition to continuing its program of testing and reporting the "tar" and nicotine content of cigarettes, the Commission is now planning to initiate a program for the determination and publication of the carbon monoxide content of cigarette smoke. The Commission is also considering whether to initiate technical improvements in the presently used method for determining nicotine content. This new method is expected to reduce the time needed for checking results.

The purpose of this proceeding is to establish a public record to assist the Commission in resolving specific questions which relate to the manner of determining and reporting the carbon monoxide, "tar" and nicotine content of cigarette smoke.

To establish this public record, the Commission hereby invites all interested parties to submit written comments, including their views, data, arguments and suggestions, on the following questions:

1. Whether to use, in performing the above-described analysis, the new smoking machine as described by H. C. Pillsbury and G. Merfeld at the 32nd. Tobacco Chemists' Research Conference, October 1978, for the determination of "Tar," Nicotine and Carbon Monoxide. This determination involves the use of infra-red spectrophotometry. A written description of this machine, entitled "A 20-Part Sequential Smoking Machine for the Determination of Carbon Monoxide in Cigarette Smoke," is available upon request by writing Harold C. Pillsbury, Director, Tobacco Research Laboratory, Sixth and Pennsylvania Avenue, NW., Washington, D.C. 20580, or by calling him collect at (202) 523-3559.

2. Whether the carbon monoxide determined with the new smoking machine should be reported as milligram per cigarette.

3. Whether to modify the presently used method of "tar" and nicotine determination by using the method described in an article entitled, "Gas Chromatographic Determination of Nicotine Contained on Cambridge Filter Pads," by John R. Wagner et al., as presented at the annual meeting of The Association of Official Analytical Chemist, October, 1978; also available from Mr. Pillsbury at above address and telephone number.

Written comments pertinent to these questions or other aspects of the subject should be submitted in quintuplicate to Mr. Carol M. Thomas, Secretary, Federal Trade Commission, Sixth Street and Pennsylvania Avenue, NW., Washington, D.C. 20580, and postmarked on or before February 20, 1979.

The data, views arguments and suggestions presented in writing will be available for examination by interested parties at the Federal Trade Commission, Washington, D.C.

FOR FURTHER INFORMATION CONTACT:

William I. Rothbard, Attorney, Rm. 6716, (202) 724-1475, or Jane Dolkart, Attorney, Rm. 6109, (202) 724-1458, Star Building, Federal Trade Commission, Washington, D.C. 20580.

Issued: January 12, 1979.

CAROL M. THOMAS,
Secretary.

[FR Doc. 79-1817 Filed 1-17-79; 8:45 am]

[1610-01-M]

GENERAL ACCOUNTING OFFICE

REGULATORY REPORTS REVIEW

Receipt of Report Proposal

The following request for clearance of a report intended for use in collecting information from the public was received by the Regulatory Reports Review Staff, GAO, on January 12, 1979. See 44 U.S.C. 3512(c) and (d). The purpose of publishing this notice

V 4 4 / 1 3 J A 1 8 7 9 UMI

in the FEDERAL REGISTER is to inform the public of such receipt.

The notice includes the title of the request received; the name of the agency sponsoring the proposed collection of information; the agency form number, if applicable; and the frequency with which the information is proposed to be collected.

Written comments on the proposed NRC request are invited from all interested persons, organizations, public interest groups, and affected businesses. Because of the limited amount of time GAO has to review the proposed request, comments (in triplicate) must be received on or before February 5, 1979, and should be addressed to Mr. John M. Lovelady, Assistant Director, Regulatory Reports Review, United States General Accounting Office, Room 5106, 441 G Street, NW, Washington, DC 20548.

Further information may be obtained from Patsy J. Stuart of the Regulatory Reports Review Staff, 202-275-3532.

NUCLEAR REGULATORY COMMISSION

The NRC requests clearance of new application requirements contained in 10 CFR Part 9, "Public Records" (new sections 9.14a(c) and 9.14b(d)). These amendments add a new section "Waiver or Reduction of Fees" and reflect the requirements of the Freedom of Information Act that documents shall be furnished without charge or at a reduced charge where an agency determines that waiver or reduction of the fee for searching and reproduction of records is in the public interest because furnishing the information can be considered as primarily benefiting the general public. New section 9.14b(d), approved by the Commission on a trial basis, provides that, in those cases where a waiver of fees was requested and denied and the requester agreed to bear the estimated cost, the requester may, within 30 days of receipt of the requested documents, resubmit a request for a waiver or reduction of fees if the receipt of the documents has materially changed the information originally furnished by the requester. The Commission believes that these amendments implement procedures for processing Freedom of Information Act requests which provide a reasonable balance between the rights of the requester, the resources available to the NRC, and the rights of the general public. The NRC estimates that potential respondents will number approximately 93 and that burden per licensee will average 4 hours annually.

NORMAN F. HEYL,
Regulatory Reports,
Review Officer.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National advisory bodies scheduled to assemble during the month of February 1979:

CLINICAL PROGRAM-PROJECTS RESEARCH REVIEW COMMITTEE

February 15-16; 9:00 a.m.
Room C130, Shoreham Americana Hotel, 2500 Calvert Street, N.W., Washington, D.C. 20008.
Open—February 15; 9:00-10:00 a.m.
Closed—Otherwise.
Contact: Ms. Eileen Nugent, Room 10C-25, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-3367.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to clinical research and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 9:00-10:00 a.m., February 15, the meeting will be open for discussion of administrative announcements and program developments. ADVISORY COMMITTEES

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of Februry 1979:

MINORITY ADVISORY COMMITTEE, ADAMHA

February 7-9, 1979—OPEN MEETING
February 7, 1:00 p.m.; February 8-9, 9:00 a.m., room 17-09B, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857.
Contact: Mr. Ernest Hurst, Room 13C-15, Parklawn Building, 5600 Fishers Lane, Rockville, Md. 20857, 301-443-3838.

Purpose: The Minority Advisory Committee, ADAMHA, advises the Secretary, Department of Health, Education, and Welfare, and the Administrator, Alcohol, Drug Abuse, and

V 4 4 - 1 3 J A 1 8 7 9 UMI

Mental Health Administration, on needs, programs, and activities regarding minority alcohol, drug abuse, and mental health matters, and makes recommendations for possible solutions which meet the needs and concerns of minority groups throughout the United States. The Committee functions in an advisory capacity to the Administrator, ADAMHA, on these matters which relate to the National Institute on Alcohol Abuse and Alcoholism, the National Institute on Drug Abuse, and the National Institute of Mental Health.

Agenda: On February 7, the Committee will discuss recommendations concerning minority issues from the State and Territorial Alcohol, Drug Abuse, and Mental Health Conference, and response to first phase of Minority Manpower Development and Training Report. The remainder of the meeting will include meetings with Institute Directors; discussion of issues related to the proposed Mental Health Systems Act; Regional Office liaison activities; and plans for the Second Annual National Conference on Minority Group Alcohol, Drug Abuse, and Mental Health Issues. Agenda items are subject to change as priorities dictate.

Mr. James C. Helsing, Deputy Director, Office of Public Affairs, ADAMHA, will furnish, on request, summaries of the meeting and a roster of the Committee members. Mr. Helsing is located in Room 6C-15, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-3783.

Dated: January 11, 1979.

ELIZABETH A. CONNOLLY,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

ADVISORY COMMITTEE

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of February 1979:

NATIONAL ADVISORY MENTAL HEALTH COUNCIL

February 5-7; 9:30 a.m.
Conference Rooms A and F, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857
OPEN—February 5. This is the policy session of Council and it will be convened in Conference Room F.
CLOSED—February 6-7. Both of these closed meetings of Council will be convened in Conference Room A.
Contact: Ms. Zelia Diggs, Room 11-101, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4333.

Purpose: The National Advisory Mental Health Council advises the Secretary, Department of Health, Education, and Welfare, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute of Mental Health, regarding the policies and programs of the Department in the field of mental health. The Council reviews applications for grants-in-aid relating to research, training, and services in the field of mental health and makes recommendations to the Secretary with respect to approval of applications for, and the amount of, these grants.

Agenda: On February 5, the meeting will be open for discussion of NIMH policy issues. These will include current administrative, legislative and program developments. Otherwise, the Council will conduct a final review of grant applications for Federal assistance and this session will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions set forth in section 552 (c)(6), Title 5 U.S. Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact person listed above. Attendance by the public will be limited to space available.

The NIMH Information Officer who will furnish upon request summaries of the meeting and rosters of the Council members is Mr. Paul Sirovatka, Acting Chief, Public Information Branch, Division of Scientific and Public Information, NIMH, Room 15-105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301-443-4536.

Dated: January 12, 1979.

ELIZABETH A. CONNOLLY,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.
